"It is not definitely stated whether the embargoes are to be absolute or partial, but there can be no doubt that the Government in the United States has in mind to take such action to afford relief to the situation at the expense of the window glass industry. Such being the case, Canada will experience a shortage of glass never before known and prices heretofore undreamt of."

Differential On Pure Putty Increased

Toronto.

PUTTY. — The differential between standard putty and pure putty has been increased 25c per hundred pounds, which now makes the price of pure putty $1.25 higher than the price of standard putty. Standard putty prices hold unchanged, bulk in casks being quoted at $3.80 per hundred pounds and in 100-lb. and 25-lb. drums at $4.65. One wholesale house is quoting 100-lb. drums on the basis of $4.55 per hundred pounds. Demand for putty has been fairly good owing to the installations of glass for repair work and for storm windows and doors and similar work.

White Lead In Oil Market Continues Steady

Toronto.

WHITE LEAD IN OIL.—The market for white lead in oil held unchanged during the week. Although intimations were made in certain quarters that an advance was not unlikely some closely in touch with the situation are inclined to scout the idea at the present time. A rather significant fact is that the grinders have extended the booking time up to March 1, 1918. all orders placed at present prices will be filled up to that time. Pig lead in the primary market held in a stationary position during the week. Lacking some incentive from this source it would hardly seem likely that a movement upward will take place in the immediate future.

Travelers Are Now Off Road For Holidays

Toronto.

MIXED PAINT.—Some of wholesale paint houses are not sending their travelers on their rounds this week and will keep them off the road until after the holiday season. Manufacturers of paint, however, continue to do a fairly good booking business for delivery next spring. Makers are busy at their factories preparing for next year's business. Sorting business for mixed paints is light. Paint is not a popular item for Christmas gifts, but some dealers are inclined to the belief that it would make a much more sensible and serviceable gift than some of the articles that are given during the holiday period.

$100 OUTLAY IN TOYS BRINGING RETURNS

(Continued from page 34.)

terest in everyday articles of hardware and the increase in business is estimated at about 25 per cent. over those seasons when toys were not carried. The sales of sleighs and skates, hockey sticks, pucks and other staple lines are also helped.

Bigger Stock Next Year

The success of this venture has been such that Mr. Letourneau will buy and display a larger stock next year. The first year's stock invoiced at cost about $100. This year it has been increased to about $600 or more, including sleighs and skates, so that it can be readily seen how quickly the demand has resulted in an increase in the variety and extent of the toy stock. There is a good margin of profit and with so many new lines available, which meet the popular demand, there is sure to be good scope for developing a full line.

It would in any case require a very modest amount to start, and by judicious display of the lines selected there is little doubt that many retailers will soon be as enthusiastic as is Mr. Letourneau regarding the field for this interesting holiday line.

J. M. Winter, of King, Ont., general merchant, spent Monday in Toronto.

J. Arthur Painchaud, manufacturers' agent, Quebec, was a visitor at HARDWARE AND METAL'S office during the week. Mr. Painchaud, speaking of conditions, stated that business is generally good, with the exception of construction. Very little demand for building materials.

Windsor, Ont.—R. H. Hassler, Ltd., has been incorporated with a capital of $50,000 to manufacture automobiles, bicycles and accessories.

Lengthen the Life of Metal Work

It is a hard problem to keep rust and corrosion from eating the very life out of metal structures, therefore, economy demands the best possible preventive against these destructive elements.

CARTER'S
Dry Red Lead

gives a perfect sealing coat that absolutely protects all kinds of metals from the elements that destroy them, and immeasurably lengthens the life of Metal Work.

We make Orange Dry Lead and Litharge,

Special Dry Lead and Litharge, for Color,

Varnish and Rubber makers,

Oxides for Potters and Storage Battery Makers.

All products are wholly Canadian made and highest standard qualities.

BERRY BROTHERS' CELEBRATED MADE IN CANADA VARNISHES

BRILLIANT DURABLE UNEXCELLED

WALKERVILLE, ONT.

BERRY BROTHERS' trade mark and label bear the same relation to their made-in-Canada varnishes and enamels as the Sterling mark on silver. Sixty years' experience based on "quality first" are sealed up in every can of "Berry" products.

Discriminating buyers have learned that "Berry "brands are absolutely reliable and true to description, and this wide reputation is a valuable asset for dealers handling our line.

The label of Berry Brothers is usually the only argument needed in marketing "Berry" Finishes.

Here are some profitable specialties. They are staples of the varnish trade and ready sellers.

LUXEBERRY ENAMELS—white, ivory and three shades of grey.

LIQUID GRANITE—floor varnish. Makes a smooth satiny finish. Lasting, waterproof, marproof, also adapted for bathrooms, window sills and casings, and all interior work where great durability is desired.

LUXEBERRY WOOD FINISH—for general interior work. Develops and preserves the grain of all woods and makes a handsome and lasting finish. Rubs perfectly.

LUXEBERRY WALL FINISH—produces artistic color effects on walls. Makes a soft velvety finish in twenty-one attractive colors and shades.

LUXEBERRY SPAR—for exterior work. Especially adapted for durability under extreme exposure—front doors, store fronts, marine work, etc. Makes a handsome finish and will not turn white under the severest conditions of wear.

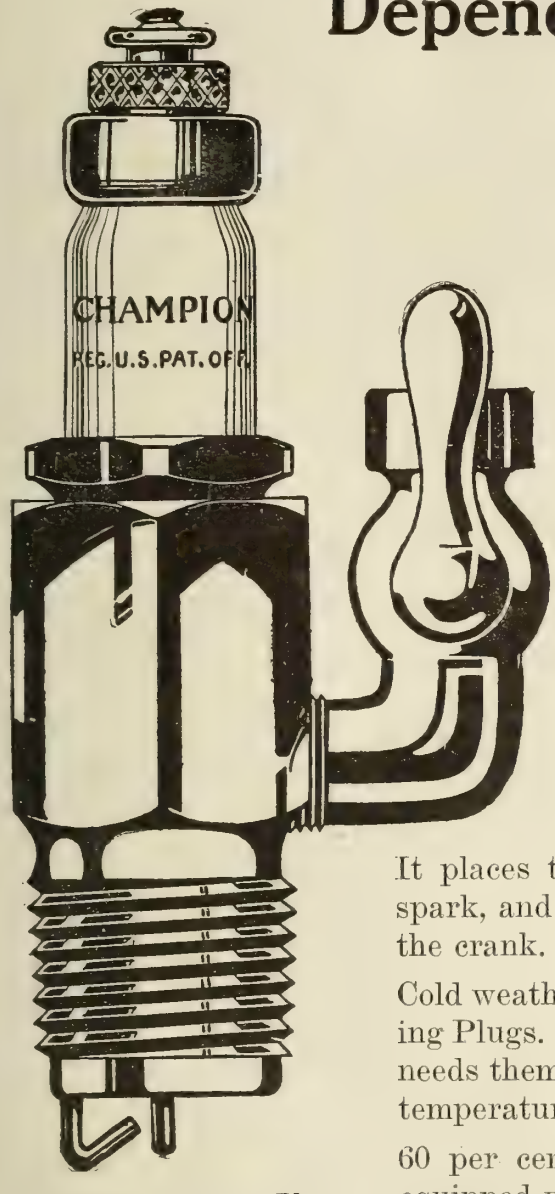
Every Motor Cylinder Should Be Equipped NOW With a Dependable Priming Plug



Champion Priming Plug
List Price $1.25

It is the shortest route to eliminating cold weather starting troubles.

In the whole category of Priming Plugs there is none that will give the same satisfactory service to your customers as will the

Champion Toledo Priming Plug

It places the gasoline right where it will catch the spark, and set the motor humming at the first turn of the crank.

Cold weather means a big demand for Champion Priming Plugs. Every Ford and practically every other car needs them, and they are guaranteed to stand extreme temperature changes without injury.

60 per cent. of all Canadian-made cars are factory equipped with other types of Champions. The reason is obvious.

To-day is the day to order from your jobber
Insist on getting only Champions

CHAMPION SPARK PLUG CO. OF CANADA, LIMITED
Windsor - Ontario

The Champion Guarantee: "Complete satisfaction to the user, free repair replacement or money back."

You'll be as well satisfied as your customers

IF YOU PUSH

Stephens'

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Every householder whom you persuade to use Silkstone instead of Kalsomine and other distemper colours will gain an enhanced opinion of your ability and knowledge. For Silkstone does so much better work—lasts longer—is more sanitary—won't rub off. In fact the advantages of Silkstone over other wall finishes are so many and so decided that one sale always means more to follow. So by persuading your customers to do the best for themselves you have really done the best for your own business.

There can be not the slightest doubt that your customers will be completely satisfied with Silkstone. They'll appreciate the ease with which it is laid, they'll admire its rich, soft tones, and they'll be pleased with its wearing and sanitary qualities. Pushing Silkstone is both profitable and pleasant.

There should be a "Stephen's" Agency in every locality. If there is not one in your district get after this exclusive agency right away. We've a paying proposition for the right man.

Book Your Lawn Mower Order Now!

Orders for Taylor-Forbes Lawn Mowers should be boked as early as possible owing to the uncertainty of the steel and iron markets. Prices are now in the jobbers' hands and if your jobber cannot quote on T-F. lines we will be pleased to quote you direct. We expect to be able to take care of all orders booked before December 31st for shipment up to April, 1918. Get your order in early and be safe for next season.

Largest Manufacturers of Hardware in Canada

TAYLOR-FORBES COMPANY, Limited, Guelph, Canada

HERE'S A PROFITABLE SIDE LINE.

The Pantaphone will occupy little space on your floor, and no one who comes into your store can pass its beautiful cabinet without displaying pleased interest. And anyone who is interested will be quickly won over by the full, resonant, beautiful tone reproduction. Many hardware merchants have sold Pantaphones as a side line with a minimum of trouble. You too can do it. Its price helps. Find out more about it.

WANTED, AT ONCE — CAPABLE HARDware man to manage retail hardware business in thriving Ontario town. State experience, salary expected, and give references. Apply Box 182, Hardware and Metal.

Men who are capable of managing a retail hardware business are not easy to find. The position requires a high type of ability. Above all, it requires a man who recognizes opportunities and who knows how to make the most of them. That type of man in the hardware business is almost invariably a reader of HARDWARE AND METAL. There were fifteen replies to the advertisement shown here. It was a point in favor of all the applicants that they were in the habit of reading HARDWARE AND METAL.

USE THE WANT AD PAGE

The Publisher's Page

TORONTO December 8, 1917

What The Salesmen Think

THE following letter was received by HARDWARE AND METAL from the head salesman and display man in one of the finest retail hardware stores in Western Canada. (Name will be sent on request) :—

"We notice the announcement for the Christmas Window Contest in your last number of HARDWARE AND METAL, *and take great pleasure in sending in an entry for our store.*

"We might add that we would rather win in HARDWARE AND METAL *contest for the honor alone, even if money were not given as a prize, than in any other contest.*

"Wishing you every success."

The writer of the above letter has won prizes in most of the big contests conducted by trade papers and manufacturers in both the United States and Canada.

One of HARDWARE AND METAL'S greatest assets is the "retail salesman confidence" which the paper enjoys.

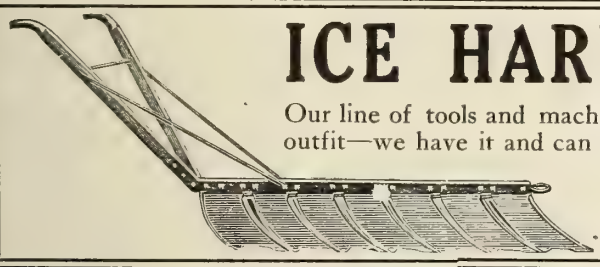
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.



ICE HARVESTING MACHINERY

Our line of tools and machinery is complete. Whether you require a hand saw or a complete outfit—we have it and can fill your requirements.

Get quotations on our sidewalk snow plows and ice levellers for municipal work.

Send for Complete Catalog.

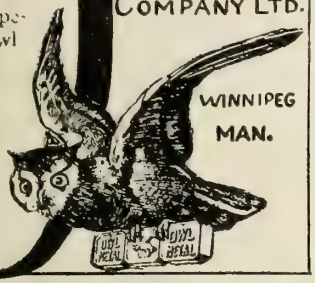
YOU can successfully handle Babbit Metals if you always specify Owl Brand Made in the West.

WL BABBITT METALS

OWL METAL COMPANY LTD.



WINNIPEG MAN.

LONDON

HIGH GRADE

Never Varies in Quality and Toughness

London Bar Iron is absolutely flawless and is uniform throughout, assuring the buyer intrinsic value for his money.

Our methods of production enable us to produce this high-grade Iron at the lowest prices. It will pay you to sell it—write us at once.

London Rolling Mill Co., Ltd.

LONDON - - CANADA

Sales Agents, Ontario, Baines & Peckover, Toronto. Manitoba, Bissett & Loucks, Ltd., Winnipeg.

BAR IRON

PROGRESSIVE HARDWARE MERCHANTS all over Canada handle

"WAKYTE" Closets

The reason: More money for the dealer—better satisfaction for the purchaser.

Their special construction cuts your freight charges in half. Superior Quality and low prices make them a quick seller, and their great durability ensures absolute satisfaction to the purchaser. "Wakyte" Dealers can meet competition from any source, and offer far more value for the money.

This is the time of the year to sell "WAKYTE" Closets, and you cannot make money faster than by putting in your stock NOW.

Wakyte Mfg. Co., Limited
259-261 Stanley St.
Winnipeg, Man.

WAKYTE

ODORLESS SANITARY CHEMICAL CLOSETS

NICKEL

Shot—High and low carbon. Ingots—Two sizes, 25 lbs., 50 lbs.
ELECTROLYTIC NICKEL—99.80%.

Prime Metals for the Manufacture of Nickel Steel, German Silver, Anodes and all remelting purposes. Our Nickel is produced as Rods, Sheets, Strip Stock, Wire and Tubes.

MONEL METAL

We are SOLE PRODUCERS of this natural, stronger-than-steel, non-corrodible alloy.

Manufactured forms are Rods, Flats, Castings, Tubes, Sheets, Strip Stock and Wire.

Send Inquiries Direct to Us.

The

Renfrew

Household Scale

Capacity ½oz. to 30 lbs.

Why not push scales

Here is the handy scale that gets the housewife's confidence the minute you inform her that every Renfrew Household Scale carries with it the Government Inspector's certificate of correct weights. Every scale is guaranteed to weigh correctly.

The Renfrew is strongly made, compact and handsomely designed—just the very scale nine out of ten households should have for protection against mistakes in weighing which are so expensive in these days of high cost of living.

Write for literature and particulars of our attractive selling proposition to dealers.

Spending $1,900 or so on Advertisting

How Modest Appropriations can be used Effectively—the Correct Principle in Advertising.

THE average annual advertising appropriation in Canada is said to be somewhere round $3,000. This seems a very small sum. Yet even smaller sums can be made to accomplish excellent results. Thus a sum slightly under $1,250 will give a national advertiser a really strong campaign covering the whole of Canada; and a sum under $650 can be used effectively if one's particular field is the farm field.

The Correct Principle In Planning An Advertising Campaign

Before we define how these sums can be employed, we shall seek first to establish the correct principle in planning an advertising campaign.

This principle is: (1) Decide on the one best medium reaching the class of persons likely to give you business; (2) use this medium in an attention-commanding way—that is, use advertisements bold enough in size and display to assure the attention of readers; and (3) give this "first" or chief medium your full schedule—that is, all the insertions you deem necessary to secure your object.

If your appropriation for advertising permits the use of more mediums than one to be used simultaneously use each additional medium listed after the manner of the first one chosen; that is: (1) use each medium adequately; (2) give it bold "copy," and (3) a full schedule of insertions.

As against this method and idea is the following practice: (1) Decide on the sum you want to spend; (2) make up a list of all the mediums you would like to use; (3) decide on the number of insertions you think is necessary; and (4) let these three factors in combination determine the size of the advertisements. The consequences of this method are (1) small-size "copy," and (2) a thin—very thin—scratching of much soil.

Now Experience in the advertising world, as in other worlds, says: Circulate, intensify, get out of each unit all that it can be made to yield; multiply units only when each unit employed is being worked to its maximum. This is the teaching of Experience, substantiated by your own knowledge, if you will think it out.

Two "First" Canadian Mediums

Consenting to the principle as above defined, the selections of the "first" or chief mediums become fairly simple.

MACLEAN'S MAGAZINE is the "first" or chief medium in Canada among all monthly magazines of the general or family type having national circulation.

FARMER'S MAGAZINE is the "first" or chief farm paper in Canada having national circulation.

MACLEAN'S MAGAZINE, with its 50,000 circulation, has achieved circulation results in its smaller field comparable with the achievement of the most largely circulated U.S.A. magazine of the same general class in its 20-times-larger field. The circulation of MACLEAN'S MAGAZINE in Canada is the equivalent of a million circulation in the United States.

The circulation of FARMERS' MAGAZINE (27,000-30,000) in Canada is the equivalent of 600,000 in the United States.

Determining Dominant "Copy"

Granting that these two mediums are the "first" or chief mediums in their respective classes; the next thing to consider is what is dominant or adequate or sure-to-get-attention space. Obviously a full page is dominant space; so also is 2/3 of a page. Half a page may be. We shall compromise for the sake of illustration, on a space occupying 2/3 of a page—a space measuring 10 inches deep (a full column in each medium) by 2 columns wide. This means "copy" measuring 20 inches, or 280 agate lines.

We'll suppose, further, that one insertion each month, for the whole year, is scheduled in each medium used. That is a total of 3,360 agate lines (280 lines monthly x 12).

The Cost of a Strong Campaign

So the cost of an all-the-year-round campaign in each medium becomes:

Magazines.			
MACLEAN'S,	3,360 lines @	.37=	$1,243.20
FARMERS'	3,360 lines @	.19=	638.40
Both Mediums			$1,881.60

If one's field takes in urban and rural communities, then a year's advertising in "first" or chief mediums, using dominant "copy," and with full schedules, can be obtained for a little less than $1,900. If one has more to spend, then other mediums can be added, each used dominantly and fully, until the limit of one's appropriation is reached.

Remember that it is wisest to *grow* into advertising than to *go* into it. Many an advertiser has started out beyond his strength, and came to grief, perhaps blaming advertising rather than himself for the failure.

The Local Influence of National Mediums

Now a word about the *local* effect of advertising in these two mediums—the effect on consumers and dealers. First, on consumers. When we talk about magazines having *national* influence, we really mean that this national influence is the sum of its influence on each individual subscriber or home; for it is clear that any single copy of a magazine can and does influence only those persons who read it. Which means, that a magazine's influence is exerted primarily on persons, and that its national influence is the aggregate of its personal influences.

So a magazine has personal, family, community, and national influence, progressively.

This influence has *local* effect. It sends persons and families to local dealers to obtain what may be advertised; and it helps local dealers to sell nationally-advertised goods to persons and families familiar with advertised goods—this because of the magazines they subscribe to.

All of which means that the national advertiser, using magazines as his mediums, secures local community effect and national effect at one and the same time, and thus accomplishes economically his two objects.

This Advertisement is Addressed to You

This advertisement is addressed, in particular, (1) to those who are contemplating an advertising campaign to help them merchandise their products; (2) to those who are as yet in the beginners' class of national advertisers; (3) to those who are not wholly satisfied with past results, which may be a consequence of employing wrong methods or following wrong ideas; and (4) to those successful advertisers who want to strengthen their success.

In the limits of this page, it is not possible for us to elaborate the above and other ideas as fully as we would like; nor to convey all desired information concerning MACLEAN'S MAGAZINE and FARMERS' MAGAZINE. We have, for example, detailed circulation statements of these two magazines, by provinces and counties and in the case of MACLEAN'S by towns. Also, we have printed matter designed to prove that "a little advertising in a few magazines" has been and is the way to great success by many famous advertisers. Send for copies of "Good Stuff about Canadian Magazines" containing information of the sort indicated.

Planning an Advertising Campaign for 1918

THE year 1918 is at hand, and you probably are shaping your merchandising plans. It is important, in such case, that you should know much about the service which the two magazines, separately or in combination, can render you.

Write for the proffered copies of GOOD STUFF, this as a first step.

The MacLean Publishing Company, 143-153 University Ave., Toronto

Publishers of MACLEAN'S MAGAZINE and FARMERS' MAGAZINE.

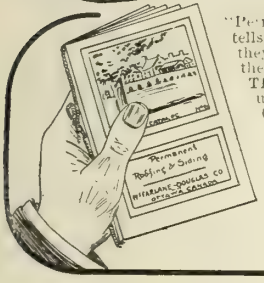
Read this Book and know the perfect roofing



"Permanent Roofing and Siding" is a book that tells you all about "Crown" Metal Shingles—how they're made—what they're made of—how to lay them—why they wear so well—why they make THE PERFECT ROOF. It also gives some useful information on "Crown" Sidings and Corrugated Iron.

This helpful book is yours for the asking. Will you write for it to-day?

Mr. Bruce's Counsel

SPECIFICALLY APPLIED, MR. BRUCE'S COUNSEL may be said to recommend that business men should read every week THE FINANCIAL POST OF CANADA, to inform themselves concerning current events in the realm of Canadian business and public affairs.

Frank E. Mutton, Vice-President of the International Time Recording Company, of Canada, wrote the following letter to the publishers of THE POST:

Attention, Editor:

Recently we sent you a subscription covering the delivery of THE FINANCIAL POST to each of our Sales Agents and Salesmen throughout Canada. This was prompted by the fact that, in our opinion, your paper is the best barometer in Canada of what is going on in the different industries from one ocean to the other in this country. Your paper contains information invaluable to any traveling representative of any firm.

(Signed) F. E. MUTTON.

Dated Oct. 12, 1917.

IN effect, THE FINANCIAL POST represents a Current Events Club, met weekly for the consideration and study of current affairs in Canada in relation to itself and the world at large. It represents the assembly of many, many surpassingly well-informed contributors who discuss intelligently, lucidly and proportionately, Canada's public and business affairs. No more stimulating and worth-while paper is published in Canada for the man who wants to be able to talk confidently, at the club, luncheon, board meeting, business council, public meetings, about Canadian public affairs.

THE price, $3, is nothing to the man who really wants to know. Three dollars spent for knowledge that multiplies a man's power and pleasure and satisfaction is a small, small sum to pay. We make our appeal for subscriptions to men who really want to know and who will take time each week-end to read profitably.

If you are willing to give this time, prove it by signing and mailing the coupon below

The Financial Post
of Canada

.....1917

THE MACLEAN PUBLISHING CO., LIMITED,
143-153 University Ave., Toronto.

Send me THE FINANCIAL POST. I will remit year's subscription, $3.00, on receipt of bill.

[H&M] Address .....

Talk Current Events

A Talk by H. Addington Bruce, Author of "The Riddle of Personality," "Psychology and Parenthood," Etc.

WHAT do you know about the doings in this great world wherein we live?

Do you try to form a really intelligent and well-considered opinion regarding events the world over?

Do you ever discuss their significance with friends and neighbors?

If asked what you think of any particular event, you are perhaps ready with an answer. Is your answer anything but a snap judgment, determined by prejudice rather than by reasoning analysis?

I put these questions not to be disagreeable, but because, if necessary, I want to spur you to appreciate the value that there is in discussion of current events.

Many people, fortunately, appreciate its value instinctively. Perhaps you are one of these. Many others are beginning to appreciate it.

This is shown by the growing popularity of clubs and classes on current events.

Only a few years ago such clubs and classes were almost unheard of. To-day most of our bigger cities have half a dozen of them or more.

In one city—Boston—a talented woman of my acquaintance draws an income of thousands of dollars a year from her leadership of current events classes.

Other men and women have similarly discovered that interest in current events is increasing so rapidly that they can well afford to organize classes like those conducted by the Boston woman.

Still, there remain many people—thousands of people—who never discuss current events. Many thousands more discuss only such events as come under the headings of "crime," "the theatre," and "sports."

These are the people I want to reach. They are the people I want to rouse to recognition of the practical helpfulness they will find in discussion of current events in general.

Current events clubs and classes might well be organized in every neighborhood, with weekly meetings to take up the outstanding happenings in international affairs, national politics, literature, art, music, science and industry.

Regular attendance at, and active participation in, these meetings will prove to be an education in itself.

It will enlarge the mental horizon and broaden the moral sympathies. By disciplining the mind to active thought it will raise the level of workaday efficiency.

It will make for a more alert, a more conscientious citizenship. It will give zest and color to a life which perhaps has hitherto been pathetically drab.

Unsuspected powers will be awakened. With a better grasp on the realities of life, the whole personality will expand.

One evening a week is certainly not too much to give to a discussion of the day-to-day developments in our wonderful world.

It may mean doing without an evening at cards or at the musical comedy, or at the dance hall. But this, after all, is not a terrible sacrifice.

And from the occasional talk over current events will come more profit than could possibly come from any number of evenings spent in card-playing, dancing, or listening to musical comedies.—Reprinted from the Toronto Daily Star.

Wanted

SITUATIONS VACANT

WANTED — EXPERIENCED HARDWARE clerk for live business in large Saskatchewan town; must be a hustler; permanent position for right man. Apply Box 502, Hardware and Metal, Toronto, or Winnipeg preferred.

WANTED EXPERIENCED GENERAL HARDware salesman. Toronto retail store. Box 600, Hardware and Metal.

FIRST CLASS HARDWARE MAN, ACCOUNT were salesmen. Toronto retail store. Box German. Good wages for good man. Box 507, Hardware and Metal.

SITUATIONS WANTED

YOUNG MAN WITH SEVERAL YEARS' EXperience in the retail hardware and paint business desires position as store manager or traveller. Best references. Box 506, Hardware and Metal.

FOR SALE

HARDWARE BUSINESS FOR SALE IN GOOD town in South Ontario; been established 40 years and a money maker; stock, $9,000, but can be reduced. Owner retiring; move quick if you want a good business. Apply, Box 505 Hardware & Metal.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

Trade Papers are Pioneers of Business Expansion

Getting Results

A large firm in a Western Canada city recently advertised in Hardware and Metal Want Ad. Page for a man to fill a responsible position—result 21 replies. This indicates that the want ad. page is followed closely. The man YOU want to reach is reading this page.

We Manufacture

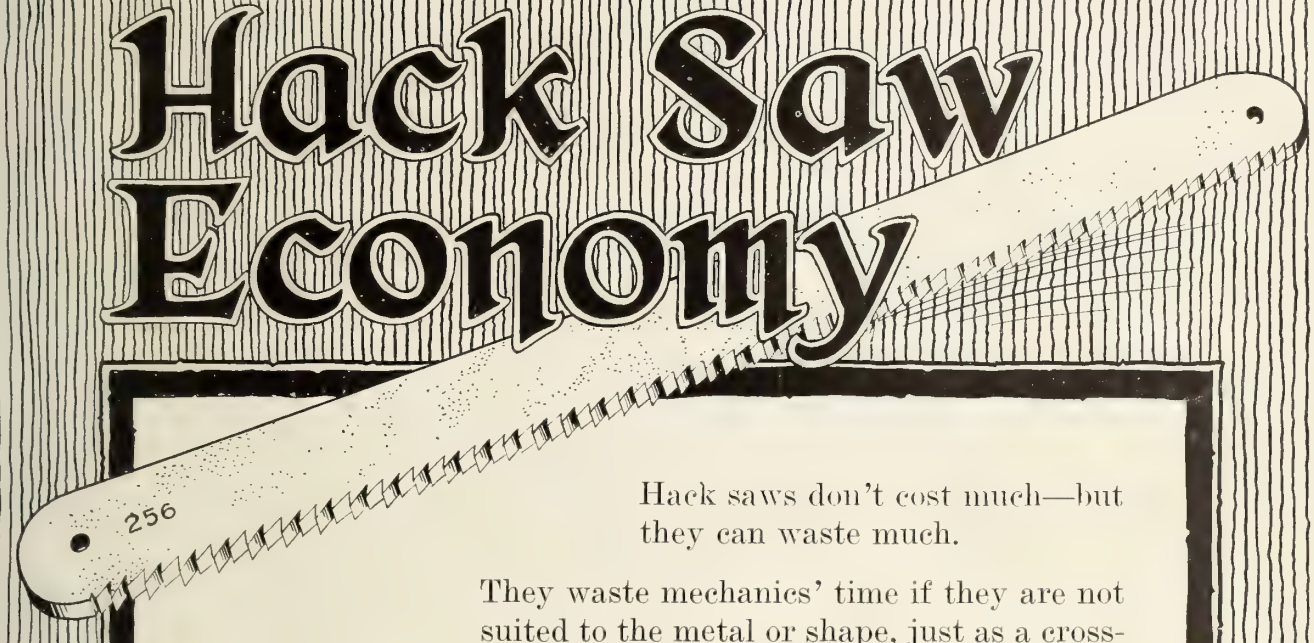
No. 50 1917

THE MACLEAN PUBLISHING COMPANY, LIMITED

PUBLICATION OFFICE: TORONTO, CANADA



Hack saws don't cost much—but they can waste much.

They waste mechanics' time if they are not suited to the metal or shape, just as a cross-cut saw wastes time when used as a splitting saw.

Again, they waste time if they dull quickly or snap too readily.

Starrett Hack-Saws

are characterized by the simple phrase—Cut Quicker—Last Longer. They stay sharp because made of tungsten steel with teeth milled accurately and hardened just right—they cut rapidly when proper selection is made for the job.

What numbered saw to recommend is shown in Catalog No. 21MA. Send for it and consult page 208.

TONCAN METAL

Resists Corrosion

WHEN the "rougher" swings the red-hot sheet bar into the rolls the Toncan Metal Sheet has been started on the last half of its journey.

Careful selection of raw materials, scientific heat treatment, extreme care in every stage of production and special processes have made the material homogeneous and pure, hence corrosion-resisting. Now it is ready to be rolled into a sheet; then cold rolled, annealed and perhaps galvanized. That's the last half of its journey. And the same infinite care is used throughout.

Fitted for the most severe endurance tests—service conditions where ordinary sheet metal cannot exist, Toncan Metal stands to-day a material of proven durability. Its superiority over ordinary sheet metals made from iron ore is an indisputable fact, because of its performance in actual service for years.

Toncan Metal Sheets can be bought in the form of roofing, siding, cornices, eaves trough, conductor pipe, ventilators, window-frames, tanks, lath, etc., and of course can be used for many special purposes wherever needed.

GOODS TO PUSH

UNIVERSAL

Food Choppers, Bread Makers Coffee Percolators

Food to-day costs money. We are all out to make this food go just as far as possible. Universal Food Choppers, Bread Makers and Percolators conserve food. We have spent thousands of dollars to impress this fact.

By the use of the "Universal" Food Chopper the left-over bits of food are made into delicious and appetizing dishes and the price of the chopper is saved in no time.

With the "Universal" Bread Maker whole wheat, rye or graham bread is made with the same certainty and ease that white bread is made.

The "Universal" Coffee Percolator makes delicious coffee without boiling. Saves you one-third on your coffee bill because every bit of flavor is extracted from each grain of coffee.

Realizing these facts, housewives everywhere are buying these goods. Put these articles where they can be seen and handled—it won't hurt them,—but will sell them.

Your jobber will be pleased to furnish you with Universal show cards.

Sell it on Your Customer's Basis

"How much will eighty-five feet of ⅜" Manila Rope cost me?"
If you are one of the hundreds of dealers who are selling

Plymouth Rope

on the "Rope-by-the-Foot" plan it will take you less than ten seconds to tell him—exactly—no tedious calculations, no figuring on a piece of wrapping paper, no hesitating, no saying "**about** so much."

Then when you have measured off his requirements the deal is finished, no weighing, no figuring.

Are you using this plan?

Thousands of dealers think it is the ideal way to sell rope and that Plymouth is the ideal rope to sell.

Besides, there is more profit in it for you.

Your copy of our Dealers' Booklet will tell you about our service. Where shall we send it?

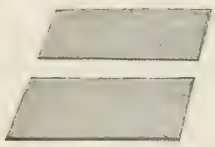
4-ONE WIREBOUND BOXES

knocked down, consist of four separate sections, top, side, bottom, side, connected only by continuous steel binding wires, and of two separate end pieces:

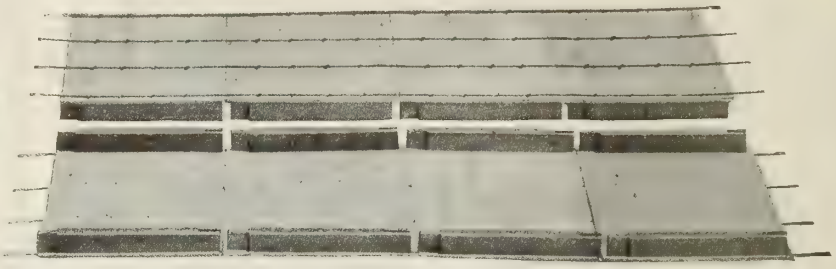
The four separate sections are separated from each other by a distance less than the thickness of the thin boards, so that the wires are tensioned at the corners when the sections are folded.

4-ONE Boxes are made by folding these four separate sections at right angles to each other, which tensions the wires at the corners, causes the top and bottom sections to overlap the side sections along the full length of the corners, and gives tight, square corners. The end pieces are nailed or stapled to the cleats from the inside.

Outside View

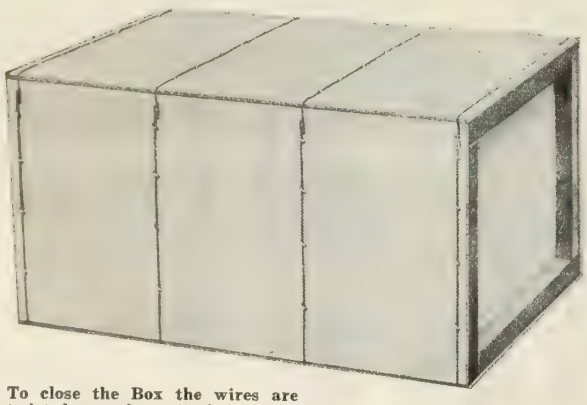


End Pieces

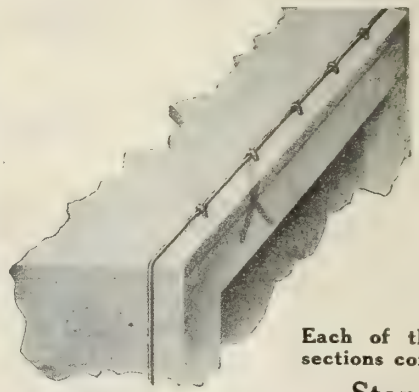


Inside View

4 SECTIONS CONNECTED BY WIRES



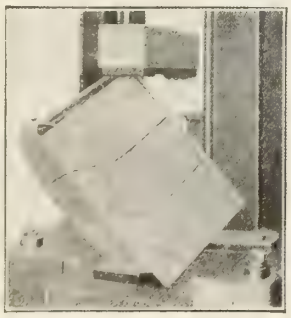
To close the Box the wires are twisted together at their ends.



Cross section of cleat, showing how the staple is anchored.

Each of these four separate sections consists of:

Staples, Wires, Thin Boards, Cleats



Bulging strains are also resisted by the steel binding wires.

The staples are driven, straddling the wires, through the thin boards, and into the cleats, and are anchored in the cleats.

Staples, wires, thin boards and cleats, in each section, because of the above unique construction, become ONE.

Under external strains, the four separate box sections slide on each other at their edges, causing the strains to be taken up immediately by the tensioned steel binding wires and to be borne by these steel binding wires during the whole period of strain.

Staples, wires, thin boards and cleats of each separate section, due to the unique construction illustrated above, are compelled to work as ONE. Four acting as ONE.

Each of the four separate sections is compelled to work during the whole period of strain, and the four sections work together as a unified and co-ordinated whole.

Bound to be the Universal Packing Case.

BECAUSE:—1—They are Strong, Light, Secure, Economical.

2—The strength of 4-ONES is measured in terms of steel wire and not in terms of wood.

3—The peak load is carried by the wire.

4—Cuts the freight cost 50 per cent.

18,451,526 used in 1916

Write us for particulars and literature. We will make you samples and will have them demonstrated.

All manufacturers know the difficulty in getting seasoned lumber for their requirements and the high prices they have to pay. The coming year will see still higher prices, caused by the shortage of labor, the extra heavy demand for boat building and the greatly reduced output from the sawmills.

Look into our proposition to-day. Be prepared.

Buck Brothers

Milbury, Mass., U.S.A.

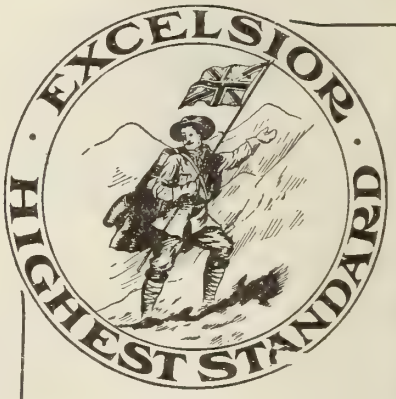

Plate Glass vs. Furniture Polish

On tables, dressers and other flat-topped furniture the greatest beauty of grain and finish is in the tops. This part in which the housewife takes most pride unfortunately is subject to the most wear. Polishes cannot preserve this beauty against scratches, etc. The only sure, economical way is to cover with plate glass which shows up the grain to best advantage and effectually prevents injury to the highly polished surface.

We can help you get some absolutely new business along this line. Ask how it's done.

Starrett Hack-Saws

STARRETT HACK SAWS CUT QUICKER & LAST LONGER

In a shop such as this, the machinists use many Starrett Tools. With our reputation for fine precision tools, we could not muster up courage to put our name on a hack saw that is second to any obtainable. We know that

Starrett Hack Saws Are Unexcelled Just As Starrett Tools Are Unexcelled

We make them in our own shops; in the same plant with Starrett Tools. We know what steel they are made of. We know what they will do, for we test saws all the time under known conditions. With us it is test, test, test—to find out just what constitutes the best saw for this work or for that.

There is no question about the quality of Starrett Hack Saws. The only question is what numbered saw you should recommend, and this question is easily answered by referring to page 208 of our Catalog No. 21MA, which shows what saw to use for any particular work.

Bank of Montreal Annual Meeting Marks Interesting Anniversaries

Shareholders Received Centenary Balance Sheet — Sir Vincent Meredith, Bart., President, Has Completed Fifty Years of Uninterrupted Service in the Bank — Important Developments of Canada's Trade — Banking Officials Conservatively Optimistic Regarding Outlook of Dominion.

MONTREAL, Dec. 10.—Special—At the annual meeting of the Bank of Montreal the shareholders received the centenary balance sheet of the bank.

By an interesting coincidence the event also marked the close of fifty years of uninterrupted service in the bank by the President, Sir Vincent Meredith. On this account the gathering to a great extent took the form of a celebration. This was observed entirely from the standpoint of the bank's continued growth and expansion. The Shareholders present had every reason to be well satisfied with the reports received, as Sir Vincent Meredith remarked that he felt warranted in stating that never, during its history of one hundred years was the prestige of the bank higher, its business in sounder or more elastic condition and its earning power greater then he believed them to be to-day. He was glad to believe also that the bank had never enjoyed a wider measure of public confidence. In his address Sir Vincent Meredith drew particular attention to the business conditions in Canada and the more important events that had occurred during the course of the past year to affect the economic condition of the Dominion.

The most important development in this connection was the entry of the United States into the European conflict and Sir Vincent expressed the view that with the numerous resources which the United States has in men and money it cannot be but an important factor in bringing the war to a speedy and successful conclusion. Sir Vincent then pointed out that in point of value the trade of Canada had never been as great as now and in point of volume had never been exceeded. It was well to remember, however, that nearly one-half of the export trade consists of munitions of war and is therefore to that extent unstable. The balance in trade continued favorable to Canada as imports of merchandise during seven months amounted to $628,100,000 and exports of domestic products to $921,957,000, giving a favorable balance of nearly $300,000,000.

Sir Vincent then dealt with the chief features of trade as between Canada and England, as well as between England and the United States.

Looking out on the future, Sir Vincent took a conservatively optimistic view when he said:

"Our country is one of the most productive in the world. Our gold holdings per capita almost equal those of the United States. Our natural resources are unbounded and our credit is irreproachable. There are no doubt difficulties and anxieties ahead which we shall still have to face, but I think we may look forward with confidence to providing without undue strain for the burden of our patriotic endeavor."

Sir Vincent also congratulated Canada on the success of the new Victory Loan and expressed the view that the amount obtained should suffice, with the surplus on consolidated revenue account to meet the financial requirements of the Government until well on towards the end of next year.

Sir Frederick Gives Interesting Particulars

It was only when Sir Frederick Williams-Taylor, the General Manager, arose to submit his statement that the Shareholders learned that the anniversary of Sir Vincent was also being observed. In this connection Sir Frederick made a very happy allusion when he said: "I feel it a great privilege to present to-day the centenary balance sheet of the Bank of Montreal.

"Coincident with this anniversary, our President, Sir Vincent Meredith, has completed fifty years of uninterrupted service in this Bank and it is befitting that we should extend to both our heartiest congratulations."

Sir Frederick's remarks were confined largely to specific incidents and influences bearing upon the business of the bank.

Of paramount importance was the entry of the United States of America into the war, as this bears upon the Canadian economic and banking position with a force the effect of which is only now commencing to be felt.

Shortly after the outbreak of the war Wall Street took the place of the London market for Canada's public loans, and continued in that place until a few months ago. Now the influx of American capital is scanty, the inflow of borrowed money from the United States is suspended and Canada is thrown upon her own financial resources.

By some this would be regarded too seriously, by others not seriously enough. Actually, the stoppage would have far-reaching consequences. On the one hand industrial development will be checked, but, on the other hand, the inability to borrow may prove a blessing in disguise, once we have adjusted our affairs to the changed conditions. It was surely well for us to learn to do without financial assistance, especially as the country at large already has a debt abroad the interest of which runs into the great sum of about $500,000 per day.

Sir Frederick then passed on to an explanation of the principal changes of the business of the bank in London and New York, and also the chief changes in the balance sheet.

Sir Frederick pointed out that for the first time in many years the automatic flow of funds between Canada and the United States recently became hampered by the dollar exchange situation that

arose in consequence of the prohibition of exports of gold by the United States. As New York is the international clearing house of Canada on this continent, the free movement of gold is essential to stabilize exchange.

Fortunately the American Government were quick to recognize the logic of the arguments the Canadian Bankers' Association were able to present to them and the disadvantages to free trading that would follow unless this condition was rectified, and promptly relieved the situation by modifying their embargo on gold shipments in favor of Canada. Due partly to this wise action, exchange has since become normal, obviating the necessity of gold importations.

Canada's Trade Position

The balance of trade in Canada's favor created by munition exports is opportune and adds permanently to our national wealth, but as the available resources of Canada are not such as we can rely upon to provide peace exports in full substitution, we should stand prepared to meet the declension in trade which must start when the war is over.

Before the war is ended Canada may have to cope with inability or unwillingness on the part of potential purchasers to provide payments for our surplus productions. Moreover, on the conclusion of peace our merchants and manufacturers may be confronted both by diminished demand and falling markets.

For these reasons good banking profits are needed. I do not hesitate to state that there has never been a time in Canada when banking credits, in my opinion, required such careful consideration. It is impossible to gauge the business future, and, therefore, what seems like sound banking business to-day may, under post-war conditions, easily develop into lock-up or doubtful loans.

Bank in Strong Position

Thanks mainly to the soundness of our banking system and to the healthy conditions of our banks, Canada can still hold up her financial head. Our own bank's ratio of quick assets to liabilities is 75½% compared with 75% a year ago and 64% the preceding year.

We have heard it remarked by certain friends that the Canadian banks are too strong, and your own bank particularly so, but permit me to express my clear conviction that the sheet anchor of our Canadian national ship is the Canadian banks and that the anchor must be strong to hold against wind and tide. The banks have kept strong in an endeavor to prevent currency inflation, while, at the same time, they have made war advances to the Canadian and Imperial Governments to an amount that would have been regarded as impossible three years ago. Such advances are naturally included among liquid assets. The loans made by the bank to the Canadian and Imperial Government have enabled the business of the country to be carried on to an extent otherwise impracticable.

Tribute to Staff and Men Overseas

Sir Frederick Williams-Taylor in responding to the vote of thanks to the management and staff took occasion to pay a special tribute to the services of the men at home and to the record of the members of the staff overseas, saying:

"As an indication of the extent to which our male officials enlisted, I may mention that 42% of our present staff are women clerks.

"Both our men and women clerks have worked ungrudgingly early and late, with but the briefest holidays, actuated by a high sense of patriotism and by an admirable sense of duty to our bank. It may truly be said that we enter this, the second century of our institution, with a staff whose loyalty has never been surpassed, not only in our history, but in the history of business corporations in this country.

"As for our splendid contingent with the colors, they are above praise. We follow their future in France with anxious pride, and will welcome them back when the war is won. Many have been wounded. No less than 100 lie under the reeking sod of shattered Flanders. The names of these splendid patriots will stand forever both in the records of our bank and of our Empire, which they have served so well. It would be remiss not to refer to the great loss we have sustained in the recent death at the front of Captain David Jellett Barker. I can find no words with which to express my personal regret while to the bank and his country the untimely closing of a career such as his is deplorable indeed."

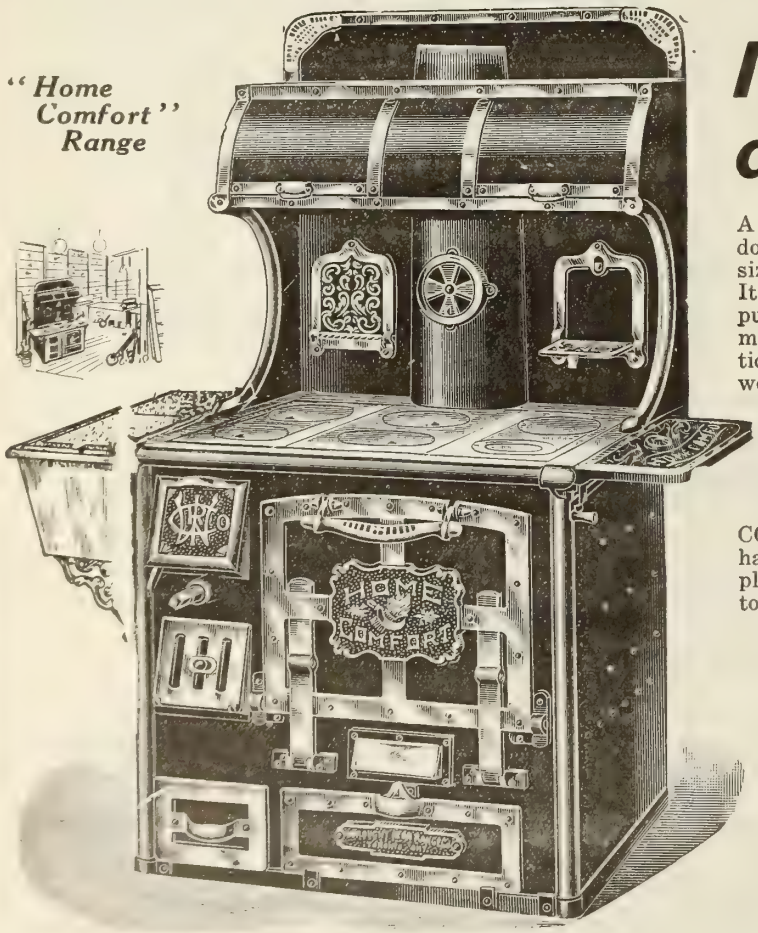
ST. CATHARINES, ESTABLISHED 64 YEARS ONTARIO

"Home Comfort" Range



It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

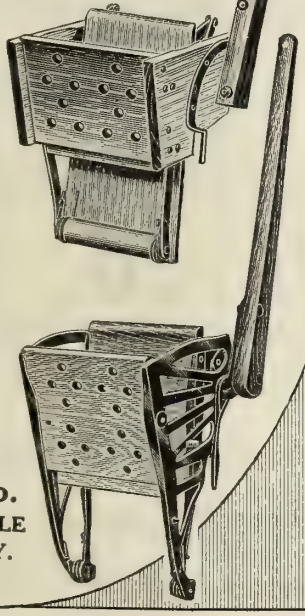
EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.



White Mop Wringer Co.

Christmas in 1 Week

Only 1 Week till Christmas Tree Time

How many homes have had their festivities brought to a sudden and disastrous ending by the Christmas tree catching fire?
Point out this fact to your customers and boost the

"FRANCO" Christmas Tree Outfit

It is a safe, sane, inexpensive way of lighting Christmas trees. Prettier than candles—no danger — no worry about fire.

The cost is small, your profits big.

If there is no electricity in the home a battery can be used with equal advantage.

Lawn Mower Prices for 1918

The 1918 Price Lists of the famous Taylor-Forbes line of Lawn Mowers is in the hands of the jobbers. It behooves every dealer to get quotations right away so that his order may be booked early. The uncertainty of the steel and iron market urges haste in buying so that stocks may be complete when spring arrives. If your jobber cannot quote on T-F Mowers write us direct.

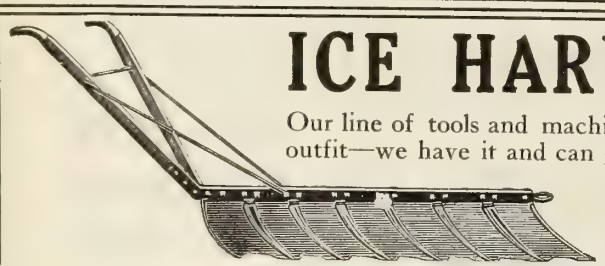
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.



ICE HARVESTING MACHINERY

Our line of tools and machinery is complete. Whether you require a hand saw or a complete outfit—we have it and can fill your requirements.

MACLEAN'S

for DECEMBER

∴ ∵ MACLEAN'S MAGAZINE GETS BETTER ALL THE TIME ∴ ∵

Snipers and Sniping—*by a Sniper*

A SNIPER is back in Canada—a star sniper, who has 34 marks on his rifle, every mark meaning a German life. Most of us know absolutely nothing of the work of the sniper, but the story—a remarkable one—is told in the Christmas (December) MACLEAN'S by the champion sniper of the Canadian Expeditionary Forces. This man was buried by a shell-explosion, was dug out by two comrades, and has lived to tell his wonderful story, in MACLEAN'S. It's worth 15c to get this story alone.

"Politics From Within"

—Leacock, of Course

TRUST Leacock to see a chance for his witty and humorous pen. He deals with the humorous phases of electioneering in Canada in his usual vein.

Why Laurier sent Troops to South Africa

THIS contribution, by Col. John Bayne Maclean, goes backward many years—to the time of the South African War in 1899-1900. That was when Canada first took up arms for the Empire. Politics, of a high order, was back of the decision to send Canadian troops to the Antipodes. It is "inside" history.

Oppenheim—Allenson—McBeth—Mumford

A LONG instalment of **Oppenheim's** absorbing story, The Pawns Count, is given in the December MACLEAN'S. A short story, by A. C. Allenson is seasonable. Madge Macbeth contributes a complete novelette, The Man Who Wasn't. And Ethel Watts Mumford, teller of delightful tales, delicately told, gives us the first of a series of short stories—Love and the Locksmith.

The Usual Popular Departments

THE Business Outlook. The Nation's Business, Women and Their Work, and the Review of Reviews—all are present in strong way in the December MACLEAN'S.

At All News-Stands 15c.

Gadsby's Story of the Union Government

GADSBY is saturated with Ottawa knowledge—much of it of the inside variety. He pokes about, talks with big men; and big men, and lesser ones, talk with Gadsby. Useful sort of man, is Gadsby. What he hears and learns he writes about for MACLEAN'S; and in this story of his about the new Union Government, he reveals the undercurrents on the movement that developed into negotiations, and which finally resulted in a Union Government. Gadsby adds interesting biographical information to his brilliant study.

Robt. W. Service is back again

BACK in MACLEAN'S, that is—in body, he is still in Flanders—where the fighting grows uglier all the time. Service has taken time to write verse for MACLEAN'S. You know well the virility of his style, and the gripping, human character of his verse. It is about life and men in the trenches he writes—about our boys far from us. It is worth something to see our boys as Service sees them. Read "The Shape at the Wheel" in the December MACLEAN'S.

Arthur Stringer writes a Beautiful Christmas Poem

STRINGER is a wonderful man—wonderfully versatile, wonderfully human. He is a master of the short-story and of the detective and mystery type of story; and he can climb the heights of literary endeavor, as he has in this passing sweet poem—Christmas Bells in War-time. Your heart is tender these times of horrible slaughter and of heroic achievement, and you'll be grateful to Stringer for putting beautifully your innermost thoughts and feelings.

YOUR PROFITS ARE MADE IN YOUR QUICK SELLING LINES

"Good morning, Mr. Dealer! I'd like to look at a good hammer."

"Here's the best selling hammer we have."

"How much is this hammer?"

"$1.50."

"How long will a hammer like this last?"

"Oh, it ought to last a life-time."

"Then you don't sell many hammers to the same customers, do you?"

"No. Why do you ask?"

"Well, you haven't much of a market for hammers after you have sold one to each of your customers, have you?"

"No, that's right."

"Selling hammers, then, isn't a very profitable part of your business, is it?"

"No, I don't know that it is."

"There is more profit in handling something that has repeat sales to the same customer, isn't there?"

"Yes, there certainly is."

"Then you really make your profits on your quick selling lines?"

"Yes, that's right."

"Did you ever stop to consider that Automobile Lubricating Oils offer you as good an opportunity for repeat business, and certainly larger profits, as any other lines you can handle to-day?"

"Well, I suppose motor cars do always have to be lubricated."

"You're right. And if your motorist patron knows that you are selling a good quality lubricant he will come back again for his further supply. This means that you not only have an opportunity to realize a profit on his repeat orders for automobile oil, but each time he comes back you have an opportunity to sell him something from your general hardware line."

"Yes, that seems reasonable, but what is a good quality oil to handle?"

"POLARINE. It is made in two grades: POLARINE and POLARINE Heavy."

"Yes, I've seen POLARINE advertised."

"Of course you have. You can't help it. Everybody sees POLARINE advertising. It is being consistently advertised each year in newspapers, farm papers and motoring magazines all over Canada. It is a better known and more generally used automobile lubricant than any other."

"How much profit is there in handling POLARINE?"

"You can make 33 1-3% or more according to the quantity you sell in a year."

"That seems reasonable."

"Yes, and remember, you make that 33 1-3% mighty often. The average motor car will require 15 gallons of motor oil for a year's running. Every car also has to have transmission and differential lubricants and cup grease. There are special grades recommended for these purposes. POLARINE is put up in barrels, half barrels, 1 gallon cans and 4 gallon cans. There is also a special half gallon size for the Ford car as well as the 12½ gallon steel drum which you can sell to the automobile owner who keeps his car in his own garage."

"That does look like a pretty good proposition. Where can I get full information about the POLARINE line?"

"Write the Imperial Oil Company, Ltd., Room 704, Imperial Oil Building, Toronto, for full information about their dealer's proposition."

Canada Fundamentally Sound

Machinery of Country at Present Directed Towards Prosecution of War—Address by Banking Authority on Present Financial Condition and Future Outlook.

A period of real prosperity in Canada will follow re-adjustment after war.

Canada in a position to share in tremendous Russian market.

Russia may have to go through one or more revolutions before settling down.

Necessary for merchants and bankers to keep business on solid basis.

Borrowing by Government does not directly increase amount of credit in use.

Farmers should now be able to pay store accounts, mortgages and bank loans.

Bankers and merchants are working towards same end.

Do not wait until a storm comes before reefing your "sales" and collecting your slow accounts.

In past credit has been too freely granted by both merchants and bankers.

Any man who has carried on a legitimate business or is doing so now should be able to pay his legitimate debts, and if he is wise he will do so. If on the other hand, he cannot you had better have that inquest now rather than a year from now.

Canada has unlimited natural resources

Room in Western Canada for ten times present population.

WHEN the war is over Canada will experience an era of heavy taxation, provision will have to be made for interest upon loans, and the public will have diminished purchasing power. On the other hand Canada is fundamentally sound, we have unlimited resources, and in all probability there will be a period of real prosperity following the war. Such were the views expressed by Wm. Moffat, Assistant General Manager Imperial Bank of Canada, in an address to upwards of 100 members of the Canadian Credit Men's Association, at a meeting and dinner held in the Board of Trade Club Rooms, Toronto.

The meeting was attended by business men representing all classes of industry and was presided over by W. H. Lamont, of H. S. Howland Sons & Co., Toronto, President Canadian Credit Men's Association.

In his address Mr. Moffat dealt with many angles of the present business situation. The address which will interest all branches of the trade follows:—

"Gentlemen,—Your president has asked me to say a few words to you regarding the present financial situation as it appears to a banker, and to give my impression of what the conditions are likely to be after the war. Prophesying is a thankless task, but all business is more or less based upon our ability to gauge the future. I may be wrong, but in my opinion the process of reorganization after the war is likely to impose upon financial interests a greater strain than anything we have felt in the past. At present practically the whole machinery of the country is directed to the prosecution of war—this condition of affairs is abnormal and must sooner or later come to an end. When that end comes—which we hope will be soon—manufacturers must face about and direct their energies first to the production and then to the sale of a different class of products.

Market Must Be Found

"The machinery which is now making shells must be used to make something else or it must be scrapped. If it is scrapped it will only bring scrap prices, if used to make products required in ordinary life a market must be found for them after they are produced. This means organization for selling as well as for producing. If, on the other hand, the war is to go on for another year we can look forward to a demand for almost everything that this country produces, especially for the products of agriculture; but these products must be paid for in cash or its equivalent if the country is to benefit. If we can make, as appears likely, shells for the American Government these will be paid for in cash or equivalent credits in New York. If we sell our wheat and other farm products against payment in New York the country will be ahead to that extent, but if, on the other hand, these products are to be settled for by loans from Canadian banks or the Canadian Government the result may be a curtailment of mercantile banking credits unless through currency inflation the burden is shifted on to the people of Canada as a whole.

To Face Declining Market

"When the war is over our taxes must be heavy, provision will have to be made for interest upon loans which have been created, and the profits which we have been receiving on munition contracts will not be forthcoming. The public as a whole will have diminished purchasing power seeing that lower prices will have to be accepted for products without a corresponding reduction in cost of production, and we shall at the same time have to face a declining market for goods carried.

Canada Has Unlimited Resources

"On the other hand, we have a magnificent country, one of almost unlimited natural resources. On a recent visit to the West, including the Peace River country, I had the pleasure of travelling over a considerable portion of territory, and I have no hesitation in saying the country is one of which every Canadian should be proud. There are miles of farms, but the farmers who are now cultivating them are only the scattered pioneers of future citizens. We have room there for ten times the present population, without crowding, and good land for all. This country is fundamentally sound, and once the war is over a period of real prosperity will I am satisfied ensue—not immediately but as

soon as the readjustments have been made.

The Shipbuilding Industry

"We expect great things from our shipbuilding program, and while the war lasts and also during the reconstruction period there is room for optimism. Whether we can continue to build ships in competition with the world when conditions are normal I am not prepared to say, but it appears to me to be at least doubtful. We have the raw material and all facilities except cheap labor. With our scale of wages, which is bound for years to be higher than in Europe, I question our ability to compete in the open market with the cheaper labor and Europe's necessity for greater production, and unless we can do so shipbuilding cannot be made a permanent success. The waters of the ocean being free to all, a ship built in Japan by cheap labor can carry freight to New York from Liverpool at lower rates than a Canadian vessel built under different conditions.

Great Market in Russia

"There is the Russian market also to consider, which, no matter what has happened or may happen, is bound to be a large factor. The Russians may have to go through one or more revolutions before they settle down, but I have no doubt as to the ultimate result. They are of little or no assistance to us at present, but after the war the purchasing power of 150,000,000 cannot be ignored, and Canadians should not forget that we are in a position to obtain a share of this trade if we cultivate it properly and in time.

The Reconstruction Period

"If I am correct regarding the reconstruction period it becomes necessary for both merchants and bankers as business men to consider the future carefully and see that their affairs are in apple-pie order. There should be systematic siftings of outstandings, and an effort made to put business upon as solid a basis as possible. Stocks of goods at present represent a very much larger cash investment than heretofore; possibly in some cases the actual bulk of goods carried may be no larger but the value is greater, and we are more closely concerned in values. For the last two or three years merchants have been doing business on advancing prices and increased borrowings.

"The time is coming when this process must be reversed, that is, after the war closes you will for a time have to sell your stocks for less money than at present, and write down the value of those in store sufficient to cover depreciation. Borrowing by the Government you must remember does not directly increase the amount of credit in use, and while the effect is not quite the same as an increase in irredeemable currency yet the tendency is to increase the cost of living and the price of all commodities as expressed in money. If after the Government has borrowed large amounts to pay war expenses the public goes on its usual course attempting to carry on business as usual there are sure to be demands for labor and materials which cannot be met and which will inevitably force up prices.

"In financing the war a considerable amount of such expansion is unavoidable —the wants of the Government are imperative—they are on an enormous scale and they cannot be immediately met except by the use of credit.

"It is impossible for the people to adjust immediately their private affairs to new conditions. Business attempts to go along in its accustomed channels and living expenses cannot be suddenly adjusted. Gradually, however the natural remedies make themselves felt. Prices of all commodities rise, and as Government demands must have priority, the people at large are forced to get along with fewer luxuries and possibly fewer necessaries.

Retailers' Purchases Curtailed

"This will have a tendency to curtail the buying by retail merchants as a diminishing number of their customers will pay the higher prices demanded. It is of course very undesirable to have the plane upon which business is done lifted to a higher level, as after the war prices that are high will have farther to fall. All investments in land except for cultivation and production should be avoided. No money should be locked up unless absolutely necessary in plants or buildings, and municipalities should not undertake improvements that can be postponed.

Farmers Should Pay Up

"At present farmers are receiving exceedingly high prices for everything they produce and should be in a position to pay their store accounts, mortgages and bank loans. It is very much in the interest of the merchant and of the community at large that advantage be taken of the present situation to collect out-

Wall board as a background makes a very effective setting for window displays in many instances. The details of the window shown are quite clear and offer a suggestion which could be easily adopted by many window trimmers. The Christmas spirit is emphasized in the use of holly and illustrations of Santa Claus. Display cards stand out prominently and are easily read.

Arranging window displays that attract is the ambition of every window dresser and it is to assist in this respect that reproductions of windows which have made good are shown in these columns. There may be just the suggestion above that you have wanted to get that power of pull in your display of goods. A careful study of the display shown above will reveal many worth-while points which can be utilized to advantage not only now but throughout the coming year

standing accounts, especially those that have in the past been inclined to be slow. Farmers have heretofore been, as you know, considered dilatory in their payments even when in a position to pay, but if their accounts and the accounts of wage-earners are allowed to run until conditions change on account of unsatisfactory crops, lower wages or prices, or for any other reason, merchants will have to face hard times with large amounts outstanding, having lost the opportunity of putting their business upon a safe and sound footing during the period of agricultural and business prosperity.

"The Credit Men's Association has in the past done much to assist and improve the position; the educational value of their work has been great, and if it can continue along the same lines it should in a few years help to place the retail trade of Canada on a very much sounder and more satisfactory basis. Even I can remember when long credits were the rule and cash business almost unknown.

Conflict Between Bankers and Merchants

"At times there appears to be a certain conflict of interest between bankers and merchants—this I am sure is only imaginary—we are both working towards the same end, and a banker's best customer is the successful merchant; bankers prosper only when their customers prosper. It is true that at times you find a banker holds an assignment of your retail customer's open accounts; but remember the wholesalers got the benefit of the money when the advance, secured by the assignment, was made. It may be that in some cases it would have been better had the merchant been allowed to go to the wall in place of being bolstered up by such advances, but so far as my experience goes these loans are made to help the merchant tide over a temporary stringency, due to disappointing sales, weather conditions, bad country roads, etc. In other words, when business in consequence of conditions has been disappointing, a merchant is very reluctant to allow his acceptances to go back, and if by an advance of this nature he can be helped over a temporary difficulty he and his creditor are both helped.

Most Loans Repaid

"You must remember that the majority of such loans are repaid as expected and the retail merchant's credit helped or saved. It is only when advances have been unwisely made by the banker that you have cause to complain, but even then the banker has only had a profit of six or even eight per cent. on his goods, and has, like you, overhead expenses to meet. No business works on as narrow margins—the turnover alone saves the banker, not the gross profit. Do not think that I am making a special plea for the banker; he is fallible like his neighbors, but bear in mind we are trustees for the shareholders of the bank.

Preparing for the Future

"What you gentlemen are probably more interested in, however, is what steps should be taken to prepare for the after-war reconstruction period in Canada. What can be done now to put our financial affairs in shape? I would say get your business 'snug.' Do not trade upon borrowed capital if it is possible to get along without it, but as most merchants must borrow, keep your business liquid. See that your stocks are no higher than necessary for the proper carrying on of your business. I would even suggest losing a few sales rather than risk overstocking. No doubt with the difficulties you have at present in obtaining deliveries it is almost impossible to keep stocks down, but all our tasks are hard to-day, and while we cannot expect perfection, we can aim at it. What, with your permission, I would like to impress upon you is to have a clear-cut plan.

"Look to the future and study it, and do not be satisfied with looking only at last month's sales and collections. Then what I consider at least as important as watching your stock is to watch your customers' accounts for signs of weakness. Accounts that are not satisfactory should be liquidated while there is yet time. Do not wait until the storm comes before reefing your sails and collecting your slow accounts. They will realize more now than under changed conditions; if they are weak now, they will probably be bad later on.

Co-operation With Retailer

"In what way can we as credit men—for we claim fellowship with you—help the merchants to carry out this programme? Chiefly I think by co-operation and consulting freely. In the past credit has been too freely granted by

(Continued on page 66.)

High Court Reverses Magistrate's Decision

Case Under the Lottery Act Decided in High Court—Interesting Chain System Activity For Exploiting a Credulous Public—Dangerous Example to Follow.

A CASE of some interest and importance was recently decided when the Appellate Division of the High Court quashed the conviction standing against William Harding of Hamilton, who had been convicted in the Police Court of a breach of the Lotteries Act of Canada.

The said William Harding was a gentleman who had a proposition of enabling you to get an eight dollar pair of shoes for a gross expenditure of $2.00. This gentleman was not a regular resident of Hamilton, but was merely biding there while he presented to the citizens this great opportunity. The system was a variation of the endless chain, which in the past has been known to roll up a tidy fortune through a contribution of dimes.

How the System Works

William Harding's system was as follows: First, a person interested in a new pair of shoes was a necessity, a smooth tongue readily supplied this interested party. Then came the unfolding of the plan. The interested party subscribed 50 cents for which he received four tickets, these tickets he went out and sold to four other parties interested in boots, on the understanding that the presentation of the ticket and 50 cents entitled them to four tickets from the head of this boot philanthropy. With two dollars in hand the first apostle of the system would return and would be provided with an order on a prominent firm of shoe jobbers in Hamilton for the delivery of pair of shoes. That in brief was the scheme. The man actually did get the boots, at least some did get them and there was no charge of fraud in connection with the case.

Now of those four purchasers of tickets from the original buyer probably a considerable number, seeing that they had purchased, would be likely to spend another half dollar to get in the running for that pair of boots. It would look at first blush as though the originator of the idea was in a bad way and would have to purchase a lot of shoes, without very much coming in. That is quite true, and very probably a goodly number of shoes were thus disposed of for there was no hint at the proceedings that there had been any attempt to defraud, even though similar schemes in the past have usually ended dramatically by the benefactor departing somewhat suddenly at some time, and leaving a large number of people who had contributed more or less largely to the scheme with nothing to show for the outlay. There was no suggestion, however in this case of the dramatic departure being part of the programme.

Where Did the Originator Profit?

How then did the benefactor profit? In this wise. The first man sold to four others; providing that they were all equally interested they each sold to four others or 16 different parties, these sixteen in turn sold to four each, making 64 and this sixty-four to four others each or 256 and this two hundred and fifty six in turn passed on their good fortune to four others or 1,024. This is, of course, an extreme illustration but it illustrates the principle. Up to the present the business is only six steps removed from the originator, yet there are over a thousand people interested. Now these parties having, it is presumed, parted with an initial fifty cents it is reasonable to suppose that a very considerable number of them might be expected to be interested enough in the scheme to invest another 50 cents. Very possibly, however, they might not be as fortunate as the first salesman in finding four others of an optimistic temper enough to induce them to embark on the adventure. In the initial stages the game must have been fairly costly, but as it advanced, the number of people engaged would ensure a fairly continuous stream of half dollars coming in, and the chances would be that a very much smaller percentage of boots would be going out. Unquestionably there must have been some profit in the business, for William Harding who had no place of business in Hamilton rented an office to care for the inflowing tide of half dollars.

The Case in Court

Everything went well till a constable laid hands upon him and brought him before the police magistrate on the grounds that he had been running a common lottery in defiance of the Lottery Act. He appeared before Magistrate Jelfs of Hamilton and was found guilty despite the spirited argument of his counsel, C. W. Bell, that there was no evidence of a game of chance shown. Mr. Bell urged that whatever the possibilities of the scheme were it was not a lottery, that every one investing had it in their power to make sure of the goods for which they had paid. The magistrate, however, continued to uphold his judgment, and as a result the case was appealed and came recently before the appellate division of the High Court at Osgoode Hall where the following question was tried: "Was there any evidence upon which the court could find the accused guilty of the charge set forth under the clauses in the criminal code respecting lotteries?" The court answered the question in the negative and the conviction was quashed.

Since the receipt of the judgment the defendant has left Hamilton for other scenes of activity.

It is a simple scheme, but it requires a great many dupes, and despite the dictum of the late Mr. Barnum that one was born every minute, the supply would likely run out if there was any considerable adoption of these tactics. Moreover the scheme is sailing close enough to the wind to make it a rather dangerous one in which to indulge.

Transient Traders' Tax Upheld

Efforts of Oil Firms Selling Direct to Farmers to Reduce License Fees Meet With Failure—Review of Recent Activities.

THE latest activities of some oil concerns who make a practise of selling coal oil from tank cars direct to the farmer and consumer have been quashed in York country. It has been necessary that a license fee of $300 be paid by all transient traders, and the efforts of the oil concerns interested have been directed towards getting this amount reduced to $50. The question came up at a meeting of the county council who were inclined to consider the matter favorably until the retailer's point of view was presented. Discussion of the matter finally led to their maintaining the license fee of $300 instead of granting a reduction to $50.

There has been considerable activity evidenced by some oil concerns during the past few months in their operations throughout the province of Ontario in taking orders for coal oil from farmers and others and having same delivered in special individual tanks direct from the railway sidings. Some time ago representatives of the firm were arraigned before one of Ontario's chief county magistrates on charges of selling coal oil without having first obtained a license. In this they were found guilty and a fine imposed. Appeals to higher courts were made by the company until one court allowed their appeal.

This resulted in an amendment to the Statutes which aimed at eliminating such methods of trading and the municipal act now covers the transient trader's activities in selling coal oil in this manner as follows: "or who go from place to place or to other men's houses to take orders for coal oil which is to be delivered afterwards from a tank car moved on a railway line, or who go from place to place or to a particular place to make sales or deliveries of coal oil or other oil from such tank car."

This latest move to reduce license fees may be followed out in other counties and it might be well for dealers to guard against this possibility.

Halifax Scene of Terrible Disaster

ST. JOHN, N.B.—Builders' hardware and other building supplies were almost the first demand from the stricken city of Halifax after the disaster which overtook that seaport on the morning of Thursday, December 6. When the munition transport, laden with explosives, collided with a Belgian relief vessel in Halifax harbor, caught fire it blew up a large portion of the city, and the surrounding country to a distance of seventy-five miles felt the effects.

The immediate and most appalling result was the utter destruction of a portion of the city, almost two miles in length, stretching along the harbor front, where whole rows of buildings were blown down or collapsed. Fire following added to the destruction and to the loss of life. The death list though not yet known may number 3,000 killed with thousands more or less badly injured and every second person in the city suffering from cuts or bruises.

There was not a house in the city which did not feel the effects of the 4,000 tons of explosives. In the greater part of the city, where the damage was not more extensive every pane of glass was shattered and in even the most sheltered spots the glass on two sides of the buildings was blown out.

After the first frantic efforts to succor the injured and care for the dead, so soon as the needs of the city could be expressed, a list of requirements was drawn up in answer to the offers of aid which already were pouring in. First and foremost among these was window-glass and putty. Every dwelling and place of business was open and exposed to the winter air. The disaster was followed by a snowstorm and blizzard with biting cold weather which has made the lot of the survivors one of hardship as well as sorrow.

Not only in Halifax but for miles around does the demand for window material exist, glass having been shattered in Truro and at other places seventy-five miles away.

After glass and putty, the demand in Halifax was for wall-board, tar paper and light building materials from which could be fabricated in the shortest time temporary shelters for the homeless and which would be required also for the conversion of buildings into emergency hospitals and shelters.

As most of the large hardware establishments were in the path of the destroying force, the local stock of such materials was largely destroyed, but even if this had not been the case no city would have a stock equal to such an emergency.

Supplies donated by neighboring cities, and sent from the New England States, included these essentials in their first shipments but it will be a long time before the demand for these goods for the rehabilitation of the city will be fully supplied.

Complete details are not yet available to the number of firms who have suffered damage, but reports now in indicate damage to the following: The Dunlop Tire and Rubber Goods Co., whose offices and warehouse were wrecked; The Gutta Percha and Rubber Co., whose building was undamaged except for broken glass; The Starr Mfg. Co., of Dartmouth, and The Consumers' Cordage Co., of Dartmouth.

Proposed Amendments to the Fraudulent Advertising Act

New Legislation Proposed to Meet the Conditions Presented by the Difficulties of Getting Conviction Under the Old Act.

THE question of fraudulent advertising has been a vexed question for some time past. Many parties have been accused of advertising in such a way, but owing to the loopholes existing in the present law many cases that seemed to present fraudulent methods have been allowed to escape through technical difficulties in its enforcement.

To meet these difficulties, amendments of the Criminal Code have been suggested and will come up for consideration in the near future. The original Act passed on June 12, 1914, is reproduced herewith, the parts in capitals being the proposed amendments.

"His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

"1. The Criminal Code, chapter 146 of the Revised Statutes, 1906, is amended by inserting the following section immediately after the section 406 thereof:

"a. Every person who EITHER HIMSELF OR BY HIS AGENT, SERVANT, EMPLOYEE, OR ANYONE ON HIS BEHALF, knowingly publishes or causes to be published any advertisement for either directly or indirectly promoting the sale or disposal of any real or personal, movable or immovable property, or any interest therein, containing false or MISLEADING statement, or false representation which is of a character likely to or is intended to enhance the price or value of such property or any interest therein, or to promote the sale or disposal thereof, OR IS LIABLE TO MISLEAD ANYONE AS TO THE TRUE VALUE OF SUCH PROPERTY, shall be liable upon summary conviction to a fine not exceeding two hundred dollars, or to six months' imprisonment, or to both fine and imprisonment, OR IN THE CASE OF A CORPORATION TO A FINE NOT EXCEEDING FIVE HUNDRED DOLLARS.

"THE PRODUCTION BY THE INFORMANT OR ANY ADVERTISEMENTS CONTAINING ANY STATEMENT ALLEGED TO BE FALSE OR MISLEADING SHALL BE PRIMA FACIE EVIDENCE THAT THE SAME WAS KNOWINGLY PUBLISHED BY THE PERSON WHOSE NAME SHALL BE MENTIONED THEREIN, AS THE ADVERTISER, OR PROPRIETOR, OWNER, AGENT, MANAGER, AS THE CASE MAY BE, OF THE BUSINESS REFERRED TO IN SAID ADVERTISEMENT. THE WORD PERSON SHALL INCLUDE AN INDIVIDUAL OR PARTNERSHIP CO. OR CORPORATION."

MORE POWER FOR MERCHANTS OF SASKATCHEWAN

The Retail Merchants' Association of Saskatchewan recently waited upon members of the law amendments committee of the Saskatchewan Legislature with a request for more latitude for the credit in the small debts court, the giving of power to local J.P.'s to have debtors brought before them and be examined for discovery; the increasing of the provincial fee for hawkers and pedlars and statutory power being given to cities and towns to declare a half holiday each week during certain of the summer months. In dealing with the first request it was outlined that the association desired that the retail merchant be given the privilege of obtaining executions for a sum smaller than $50, the amount now settled in the small debts court. The merchants' deputation consisted of Messrs. Polson, Hutchinson and Raymond. A fee of $200 was suggested as a fair taxation on hawkers and pedlars.

USE OF ELECTRICITY ON FARMS IN NEW ZEALAND

Much attention has been given to the advanced uses of electricity in the farming and dairying districts of the South Island of New Zealand, in the vicinity of the Lake Coleridge Government hydro-electric plant. This section takes in the country surrounding Christchurch. Electric power is used extensively by dairymen about their barns and sheds for lighting and the operation of milking machines, creameries, etc. In one case a farmer reports that the charge per annum covering all of these uses was only $87.60 for a herd of 60 cows.

The Government now has under consideration a big project for a hydro-electric station in the North Island. It is expected that this will provide power as cheap for the use of the general public as has been furnished in the South Island.

Something New for the Cardwriter

A Series That Will Give Ideas and Instructions for the Cardwriter Who Has Already Mastered the Rudiments of the Work.

By Robt. T. W. Edwards

Fig. 1.

THIS month we are showing what we believe to be something out of the ordinary. This is a combination lesson and one by which you should be greatly benefited if you set out to master both the ideas and the new letter formation.

This lesson is a combination one in this way. First an entirely new alphabet is used—something quite different to anything we have previously shown and which to the best of our knowledge has never before been used for show card purposes; second, we show how to produce real snappy Christmas show cards by using transparent water colors over a pen and ink drawing. This is a feature which we have used before but are showing again with some new ideas; and third, it is shown how to make attractive show cards by combining the air brush work with the ordinary brush work. Altogether you should derive great benefit from this lesson. It is a timely one and you will have a good opportunity of putting it into practice at once.

We will first briefly review the past few lessons. We have endeavored to give our readers something different in each lesson this year. A new formation of letters was shown in each lesson as well as some new ideas which would be of help to the cardwriter. In the last few lessons we have taken up the use of the air brush for decorating show cards and so far only the simplest work has been illustrated, but as we continue you may expect something more complicated. Of course to do the latter work you must possess an air brush outfit such as we illustrated some months ago. It is rather expensive but the work is very interesting and will be a considerable help to you in decorating your window backgrounds, etc. But whether you are the owner of an air brush or not you will find many helpful hints in these lessons.

Now to get back to this month's lesson you will note that many of the letter formations in the alphabet resemble to a certain extent some of those shown previously. This is unavoidable but you will note a certain characteristic which is followed out all the way through and which gives them a distinctive appearance not possessed by ordinary type. There is something original about it. Outside of the originality of this letter formation is its practical side. It is entirely of single stroke construction and

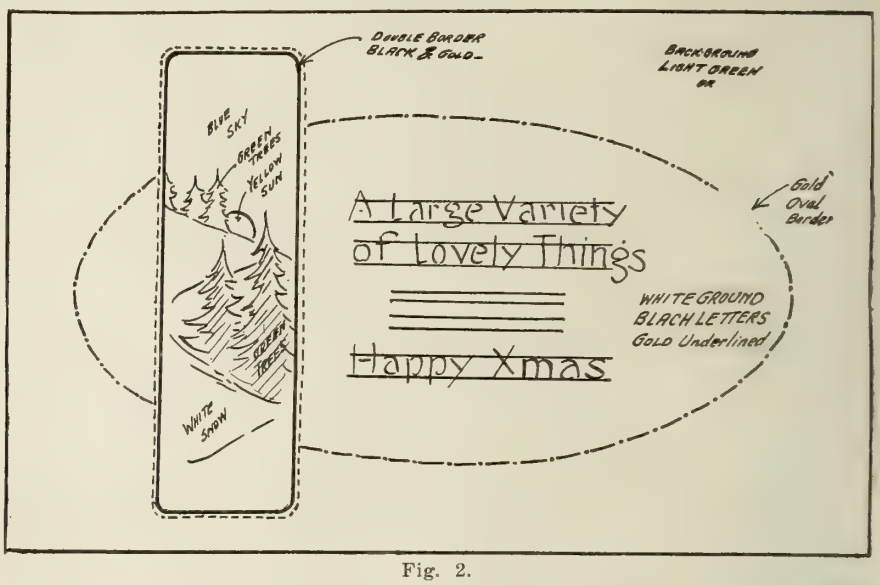

Fig. 2.

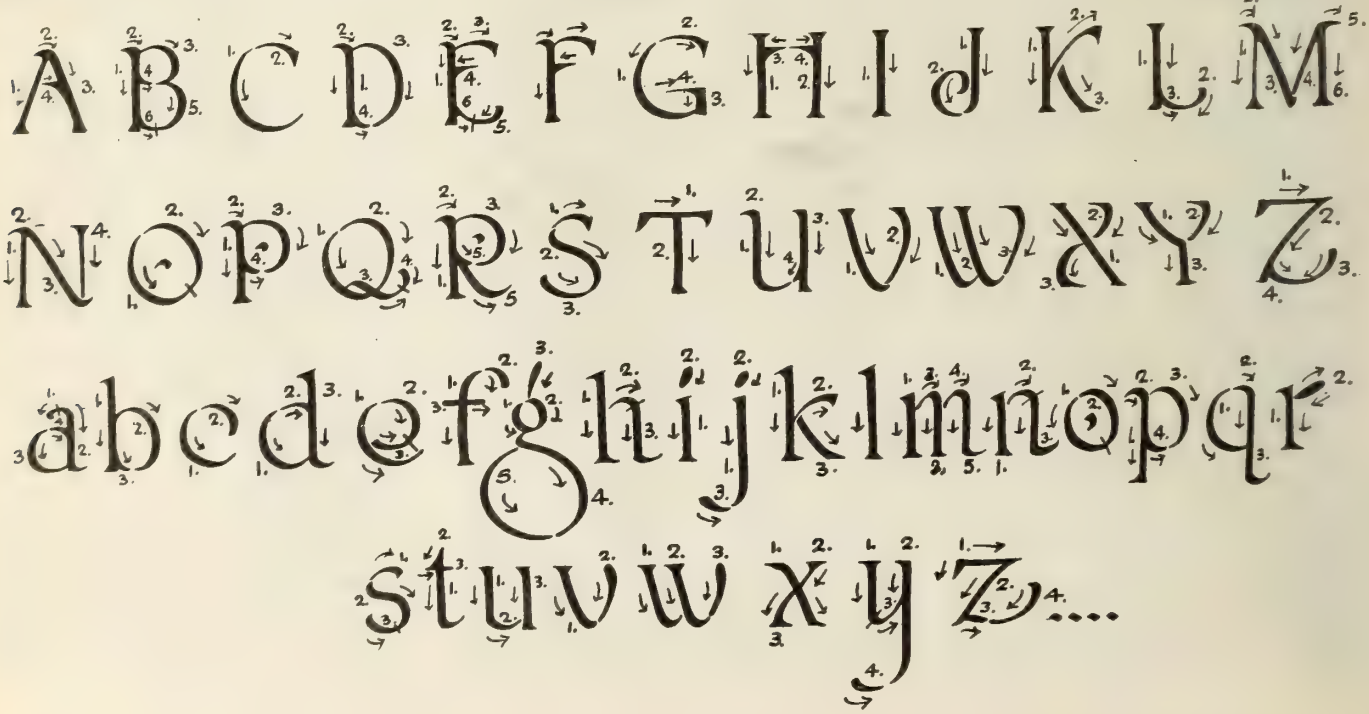


can be made either with the round writing pen or the chisel-pointed red sable brush. As the principle of the pen and brush are practically the same, except that the former is more rigid to work with than the latter, and those principles have been delved into so many times in previous lessons, we will leave you to make out its formation for yourselves. It is all quite simple. Draw the strokes in the direction in which the little arrows are pointing and make them in the order in which they are numbered and you should have no difficulty whatever. The main thing is practice.

The second feature is one at which all cardwriters are expected to show what they can do—that is the making of fancy Christmas cards entirely by hand. You may remember that a year ago we gave instructions along similar lines but here are some new ideas that will help you out in making fancy Christmas cards.

A summary glance at the completed cards reproduced here may give you the impression that there is a great deal of work attached to the making of them, but when you take the work step by step it is much easier than one would at first anticipate. Follow the detailed explanation of each card and you will have little trouble.

Some of these cards are original though many of them are copies. All can be done just as well and just as easily, but we find it is best to have some little sketch to get the idea from, so look up your last year's collection of Christmas ideas that all cardwriters should have and you will find many things that will give you inspiration and which can be easily sketched out on a card.

Before proceeding to make cards see that you possess all the necessary materials—white cardboard, black waterproof ink, drawing pen (stub preferred), a sheet of carbon paper, and a set of transparent colors. If you have a lot of coloring to do it is advisable to get a jar of air brush ink of each color required. These inks are transparent and they can be mixed with water or mixed together to produce any shade required. For instance, to produce a light green take a small quantity of dark green and lighten it with yellow. You can get an excellent green for coloring holly leaves this way. Red, green, yellow, blue, and brown along with the black will produce all the required colors.

The most simple method of transfering a drawing to the card is by tracing it with the carbon paper between it and the cardboard. This will leave you an outline which can be retraced with the pen and black waterproof ink. After this

is dry color in with natural Christmas colors.

This method is clearly shown in Fig. I. This is a pen drawing after the tracing is made and the black ink has been applied. This is now ready to be colored. Card "A" shows this same design used on an 11-in. by 14-in. card all colored in the natural colors ready to be put on display. A bright scarlet color should be used for the flower. Card "B" shows a combination of "paste on" and drawn design. The scenery is pasted on and retouched and the holly around it is a pen drawing colored with natural holly colors. This sort of a card is an easy one to make providing you have the little winter scenes in stock. They can be obtained from postcards, etc.

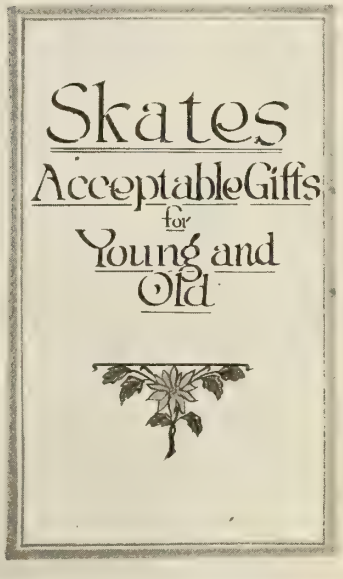
Card "C" is a very appropriate one for a toy display. The "Jack-in-the-box" is one of the oldest child's toys and is very effective in drawing the kiddies' attention to the window.

The three small Christmas cards show some very effective cards which can be used on small showings or as individual tickets. "D" shows a card with a sprig of poinsettia design. This can be easily sketched on with a pencil and colored with the natural colors. It is not necessary to be as accurate with the small as with the larger ones.

Card "E" shows a design bringing in the old fashioned Christmas bell worked in with a couple of holly leaves. The bell can be given a light wash of yellow after the black ink is used for shading it.

"F" shows "Old Santa" in a very characteristic attitude. This drawing was gotten out of one of last year's newspapers and transferred on with the carbon paper method. These three cards are white, size 5½ by 7.

"G" shows an excellent card for use



in a Christmas furnishing window. It is the right shape and the layout and design is just enough to suit a men's furnishing window display. The pot

(Continued on page 46.)

EDITORIAL COMMENT

NEVER before in the history of the hardware trade has the retailer had such an opportunity to sell labor-saving devices. Housewives are doing their own work in increasing numbers and they want devices that save steps and make work easier.

* * *

THE Halifax catastrophe should be regarded as a war loss, and all Canada should assume the responsibility for rebuilding the homes and offices, and putting every man, woman and child so far as is humanly possible in at least as good and comfortable position as they were before; and in addition should provide for all injured and dependents. This great responsibility must not be left to municipal grants or private charity already overtaxed as at present proposed. Any other plan than national responsibility would fall short of doing full justice to the people of Halifax.

NO CHANGE IN STEEL PRICES

ON excellent authority it is stated that the United States Government anticipates making no change in the present schedules for steel prices. Committees now in session at Washington have had the matter under discussion in conformity with the original announcement that set prices would only hold until the end of the year. The steel men have indicated that any further reduction (and it was thought some further reduction had been contemplated) would seriously impair the efficiency of the industry, and it is now felt almost certain that the present schedules will be maintained by the Government.

This should relieve the feeling of uncertainty which has existed to some degree among manufacturers and result in their devoting their energies entirely to production. The gradual readjustment to the price schedules still continues and by the end of the year it is expected Government prices will have been established by practically all manufacturers. These revisions apply largely to Government orders and are not likely to result in any great change in prices for commercial business.

MAKE YOUR DISPLAY "PULL"

GETTING returns from the store windows is no longer considered impossible; in fact, the advantage of the window display to the hardware store cannot be overlooked. Real dividends are produced from effective advertising as represented in the display window and at no time is this more apparent than during the present holiday season. Spending time to arrange attractive displays for the Christmas trade will bring real dollars and cents returns. To encourage this form of advertising, HARDWARE AND METAL is conducting its Annual Christmas Window Display Contest which all merchants should encourage their clerks to enter, not from the mere fact that they may win one of the prizes, but that the stimulus provided in offering these prizes may result in a higher standard of window display advertising.

For the last-minute shopper to whom the window display means so much, it would be well for all those who have already arranged their windows to look them over to see if any more "pulling" power can be incorporated. Perhaps the addition of extra price cards might help—in examining the displays other points may appeal in the nature of an improvement. Have every feature covered thoroughly for the remaining days—then have your display photographed and entered in HARDWARE AND METAL'S Window Display Contest.

BINDER TWINE SUPPLY ASSURED

FOLLOWING a period of negotiations with the United States Food Administration undertaken with a view of obtaining sisal fibre at lower prices than those quoted by the agency of the Yucatan interests, the sale is reported of 100,000 bales of Mexican sisal fibre at 19¼ cents ex-ship New York. Allotments are to be made by the Food Administration to the different manufacturers of binder twine.

It is possible the government may decide on the exclusive use of Yucatan sisal in the manufacture of binder twine. This it is stated would release considerable shipping now employed in transporting New Zealand hemp and other fibres and the bulk of the Manila hemp crop would be available for the manufacture of cordage which will be needed in the shipping industries.

It is estimated the supply of spot sisal in the United States aggregated approximately 250,000 bales and with the supply available at port for prompt movement, a shortage of binder twine for the 1918 crop is not anticipated.

Firmness in the sisal fibre market follows this sale and dealers now have a basis for operations that has been lacking since midsummer. No advance in price is represented in the sale figure and it is not expected that any will be made for some time.

All Food Distributors to be Licensed

Far-reaching Proposals of Advisory Committee to Food Controller, Will, if Adopted, Radically Change Conditions Existing To-day.

By Hardware and Metal's Special Correspondent at Ottawa

RADICAL PROPOSALS

Every retail grocer in Canada to be licensed.
All present dealers to get licenses under certain conditions but proposed plan would make it harder for new men entering the trade.
New dealers to have previous experience and at least $1,000 capital.
License number to appear on all stationery.
Nominal fee charged for license.
Wholesale grocers and foodstuff manufacturers to be licensed also.
Status of retailer, wholesaler and manufacturer to be clearly defined.

OTTAWA, Special.—A number of more or less sensational changes in the conduct of the grocery business in Canada have been proposed to Hon. W. J. Hanna, Food Controller, by representatives of retailers, wholesalers and manufacturers acting through an advisory committee.

These changes have been summarized above and are so comprehensive and far reaching that if they become effective—and there is every possibility that a number of them will—it is the feeling of prominent members of the trade that many of the old standing abuses that have crept into the distribution of food products will be eliminated. They involve some rather drastic changes.

Influential members of the trade were called to Ottawa to confer with the Food Control Department on methods calculated to better the present existing conditions. It was later found out that these men were wanted to act in somewhat of an advisory capacity in framing proposals that if put into effect in the end tend to lower cost of distribution of food and therefore ultimately reduce the price.

In the rough, the program outlined is somewhat as follows:

The Retailer's License

Every retailer would be required to have a license under the new proposals. This would be granted to all existing businesses. These businesses would however be compelled to maintain a certain standard. The stores would have to be kept in sanitary conditions and have a certain measure of equipment. This necessarily means they would have to be inspected.

For the man who desires to get into the trade the course would not be quite so simple as it has been in the past. To obtain a license it would be necessary for the applicant to have served an apprenticeship of some years in some grocery business. In this connection two years has been mentioned. He would moreover have to have a certain financial backing. The capital to begin with would in all probability be placed in the neighborhood of $1,000. The store he occupied would have to possess sanitary conveniences and sanitary equipment capable of the proper protection of the goods to be sold. Only under some such terms would a license be granted, if these suggestions go through.

The license fee would be merely nominal. It is probable, for instance, that a small business would carry a license fee of only a dollar a year while a business having a turnover of a hundred thousand would have a license fee of five dollars, and five dollars for every additional $100,000.

The funds thus obtained would it is suggested be used for administration expenses. What are these expenses likely to be? There is a suggestion of the appointment of provincial committees with representatives of the manufacturing, wholesale and retail interests. These would form advisory committees to work in conjunction with the Deputy Food Controller, while a committee from these committees would form a Dominion advisory council. The expenses of these organizations would be met by the license fee imposed, so that there would be no call upon the government for assistance. So far the proposal applies only to foodstuffs.

Defining the Status of the Different Branches of the Trade

A definite understanding of the status of each branch of the trade is another important item on the proposals. This will decide the conditions that constitute a manufacturer, a wholesaler or jobber, or a retailer. There have been tendencies at times for these different activities to overlap one another. Under this new regime the character of each distributing activity will be definitely defined.

All Food Activities to be Licensed

To achieve this result every manufacturer, wholesaler and retailer will be licensed. This license will empower them to conduct activities along the defined line of the department to which they belong. No wholesaler, for instance, as such, will be permitted to sell direct to the consumer, save in the case of hotels and restaurants. If the wholesaler so desires he may also on the payment of a small fee and on giving certain undertakings be granted a retailer's license. This license number, however, as well as his wholesale license number must in such a case appear on all his stationery, letter-heads, bill forms, etc. In this way it is made perfectly patent and above board the kind of business that the firm is doing.

This license according to the proposals of the committees of the various branches of the trade would also prohibit the selling by manufacturers at cut rates to large mercantile activities. The manufacturer under the condition drafted to be presented to the Food Controller's department would not be prohibited from selling direct to the retailer if he so desires; but he would be required to sell at a figure not lower than he would be willing to sell the same quantity of goods to the recognized wholesale trade.

It will be seen that these proposals if acted upon by the Food Controller's department ensure a very clear cut line between the different branches of the trade. The petty patronage of the well-to-do man who has been accustomed to buy his food at wholesale would be eliminated. The wholesaler who does this type of business would have to make that fact amply manifest, or else be in danger of losing his license. Thus the trade that legitimately belongs to the wholesaler would be his and the retailer would be free from wholesale encroachments.

That, roughly speaking, is a sketchy review of the probable next move in the Food Administration program as far as present developments are concerned. If the proposition finds favor with the Food Controller, and there is little likelihood that it will not—in a number of respects at least—then it may appear in the form of an Order in Council at a very early date.

They are startling changes. Until the details have been worked out, it is not possible to go fully into the merits or otherwise of the proposals. More definite information will be available next week. The Order in Council may be placed on the statute books at any time.

Trade agencies have for a long time past been urging the necessity of an Inland Trade Commission, to deal with such points as are now being brought up by the representatives of the retailers, wholesalers and manufacturers.

SOMETHING NEW FOR THE CARD-WRITER

(Continued from page 43.)

of poinsettia flowers is cut from a postal card and pasted on over a light green panel which has the tendency to make the "paste on" design stand out.

Card "H" gives you a suggestion of how to use a black background. The lettering and border is of pale green and the snow effect is put on last with white. This is simple work but effective.

You will note that we use here a square faced letter on account of it being better adapted to this particular kind of work.

Card "I" shows a Conventional Christmas design which makes a neat card.

Air Brush Work

Stencil cutting, as you read in another air brush lesson given recently, plays a great part in air brushed cards. It is in fact one of the most important branches of the work, being used in so many different ways. This lesson shows how stencils are used for making scenic and background work. Your attention is called to card "J" along with Fig. II., the latter being used as a guide to show the correct colors used on the card and where to place them.

First you need a stencil which will cover up all but the background of the card. That is, the oval and scenic panel must be covered. Spray this with a pale green. Next cut a stencil so as to just leave the sky exposed. This should be done in a light blue. The evergreen trees is the third and last part of the card that needs a stencil for its coloring. This one is more irregular but can easily be done with a sharp knife. The black outline of the drawing is done with a waterproof ink after the air brush work is completed. The sun can be put in either by air brush with the use of a stencil or can be painted on with an opaque color.

This is only one of the many scenic effects that can be made up with the aid of the air brush. It is a simple style of card to make because it can quite easily be changed so as to give it an entirely different appearance. Follow closely the directions and cut the stencils from heavy oiled Manila paper and you should have good results.

The Drive on the Last Minute Shopper

Winning Out on the Home Stretch—Put "Selling" Punch in Window Display—Newspaper Ads. Should Carry a Distinct Message — Store Interior to Clinch Sales—Every Department Can Make Appeal.

IT is on the homestretch that most races are won and business in many ways resembles a race where it is necessary to put on a little extra pressure in the final drive to achieve the objective in mind. No doubt the majority of merchants have been advocating the early buying of Christmas gifts but it is not always possible for your customers to arrange this and there are others who always wait until the last minute to make their purchases. To these then, special attention must be directed and a hard drive now will do as much to boost your sales during the few remaining days as the efforts of the past three or four weeks. This is exemplified in more than a business sense and has been proved only recently in the remarkable success of the last week's campaign of Canada's Victory Loan when as much money was raised as in the previous two weeks.

Put "Selling" Punch in Window Display

Has your window display proved its "selling" power as yet? If not, there's need for investigation. Are you using enough price cards on the articles shown to tell the prospective purchasers what they can get for 50c, 75c or $1.00? Some of your customers will want to limit certain purchases to $1 or less—if they know from your window what they can get, they are likely to come into your store and buy—if there is nothing to enlighten them, they will look farther and in this way your window loses its selling force. In this issue is reproduced a window display which has proved its real "pulling" ability. There may be a suggestion in it for you—it is not too late to rectify any shortcomings for the last-minute shoppers.

Newspaper Ads. Should Carry a Distinct Message

And what of the newspaper space you have been using? Has it brought the results you expected or is there a hitch somewhere that you can't explain? The ads. in the newspapers are followed very carefully for suggestions and as in the case of the window display, showing the price counts for much. On the opposite page is given a suggestion for a newspaper ad. made up from electros taken from those furnished through HARDWARE AND METAL'S electro service. The use of cuts gives the reader something tangible on which he may qualify the suggestions offered—in giving him the price you secure his confidence in the value of the goods offered and he can plan his expenditures ahead. This assists materially in the sale and tends to lessen considerably the work of your employees.

Store Interior to Clinch Sales

In the store itself an air of brightness is a decided factor in clinching sales on lines shown in window displays or mentioned in newspaper ads. Holly and streamers are by no means out-of-place in the hardware store and it might be well also to emphasize this important point: "Display your goods." Have everything out in plain sight—people won't ask if you have certain goods—they want to see what you have, make their selection and hurry along. Getting the goods out in plain view and priced is another means of saving clerk hire—a very important item in these days of labor shortage.

Every Department Can Make Appeal

It should hardly be necessary to enumerate the lines which sell during the holiday season. An appeal can be made from every department in the store. In the cutlery, there is the silver plated ware, cut glass, carvers in cases, pocket cutlery, scissors in sets, razors and shaving accessories; in the electrical, irons, percolators, heaters, toasters, reading lamps, etc.; in the tools, saws, hammers, drills, planes and levels; in the housefurnishings, washing machines, stoves, aluminum and enamel ware; in the sporting goods, sleighs, skates, snowshoes, toboggans, etc.; in fact, every department carries an appeal to some Christmas shopper which the merchant should be prepared to cater to.

For the final drive then look over the window display, prepare your newspaper advertisement with extreme care and keep the interior of your store brightened up and alive with well arranged merchandise. The large number of sales are yet to be made so the final end of your Christmas sales campaign should be arranged to bring the greatest possible proportion of this business to your store.

Last Minute Christmas Shopping

Lamp, $3 to $6.

DAYS and hours before Christmas are very, very few, and there still remains much gift-buying to be done. Probably you will welcome suggestions — and so here and now we provide them, in the hope that they will be welcomed by you.

Lantern, 95c to $1.50.

Flashlights 50c to $3.00.

Car, $5.00 to $7.00.

Thermos Bottles, $1.00 to $5.00.

Useful Gifts.

Pair of Pincers
Lawn Mower
Wheelbarrow
Scales
Brushes for various uses
Tools of all sorts
Garden Requisites
Gloves and Mitts for Working

For the Farmer.

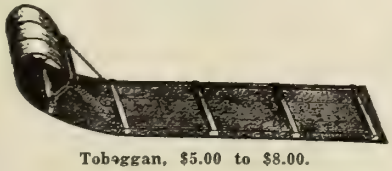
GIFTS AT 25c., 50c., AND OVER

WE have grouped articles according to price—this for the assistance of those who want the gift they may make not to exceed a certain sum. See the tables where gift-suggestions are grouped after this idea.

Padlock, 50c to 95c.

Horton's Hardware Store
Hurston

Clocks, $1.00 to $3.50.



Toboggan, $5.00 to $8.00.

Casseroles, $3.00 to $6.00.

Bells, $1.50 to $4.00.

The above is offered as a suggestion to retailers for a Last-Minute Christmas advertisement. The illustrations can all be had at a cost of 20c each, postage paid, from HARDWARE AND METAL. The advertisement can be adapted as to size and quantity of matter. The table idea, with gifts grouped as to price, is recommended.

EVENTS IN THE TRADE

BUSINESS CHANGES

Ottawa and Westboro.—John Stewart, hardware, has sold assets.

Grandview, Man.—C. B. McLean, of H. J. McLean & Co., hardware, has withdrawn.

Rocanville, Sask.—W. A. Gabb has purchased hardware and furniture business of H. W. Webb. Mr. Gabb has been engaged in the hardware business in England and in Canada for a number of years.

INDUSTRIAL NOTES

Montreal.—Sclater Asbestos Company has dissolved, Mrs. Wm. Sclater continuing under same style.

Calgary.—The Calgary Rolling Mills are building an addition to their plant.

Winnipeg.—The Prest-O-Lite Co. will build a factory at St. Boniface, to cost $10,000.

Toronto.—A building permit has been issued by the City Architect to the Liquid Air Society to erect a one storey tile and steel addition to their factory at 18 Boler street. The cost will be $2,600.

Winnipeg.—E. F. Hutchings, president of the Great West Saddlery Company, recently stated his willingness to subscribe half a million dollars to the Victory Loan provided he could secure exemption for his son and another man, both valued employees.

FIRE LOSS

Toronto.—The plant of the Polson Iron Works, engaged upon shipbuilding contracts, was recently damaged by fire to the extent of $200,000.

St. John, N.B.—Estey & Company, rubber goods, was recently damaged by fire and water.

Sault Ste. Marie.—Fire on Dec. 3 of unknown origin caused a loss of several thousand dollars to the Standard Chemical Co. plant. The loss in the fire was $7,000.

PERSONAL

O. C. James, who recently was with the Miller, Morse Hardware Co. of Winnipeg, is now with Rice Lewis & Sons of Toronto.

Lawrence Russel, who for several years has been sales manager of the Armstrong, Whitworth Co. of Canada, Montreal, has been appointed assistant general manager of the company.

Herbert Johnston of the sales staff of the Armstrong, Whitworth Co., Montreal, has been appointed city sales manager, to succeed L. Russel, recently appointed assistant general manager.

JAMES B. LORD,

President of the Boston Varnish Co., who was recently re-elected president of National Varnish Manufacturers' Association.

L. W. Adam of Bethlehem, Pa., has been appointed to the position of General Superintendent of the Nova Scotia Steel & Coal Co's. plant at Trenton, N.S. Mr. Adam will reside at New Glasgow, N.S.

EARLY CLOSING BY-LAW

St. Thomas, Ont.—City Council has passed a by-law governing all stores in the city, with the exception of cigar stores and restaurants, compelling them to close at 7 o'clock.

NEW GARAGE

St. Thomas, Ont.—The Auto Sales Company of Canada, with head offices in Quebec has opened a garage showroom and stock accessories.

CONTEST FOR NEW NAME

The Canada Metal Co. are giving three $50 Victory Bonds for the three best names submitted for a laundry tub which they are placing on the market. The only conditions outlined are that the contestant must be a master plumber or engaged in the plumbing department of a hardware business.

ST. JOHN, N.B., NEWS

The new council of St. John Board of Trade has several leading hardware men among its members, including Hon. W. H. Thorne, of W. H. Thorne & Co.; R. B. Emerson, of Emerson & Fisher; M. E. Agar, carriage hardware, and W. F. Burditt, local manager for Frost & Wood.

The International Shipbuilding Co. has announced that their plans for an early start will not be seriously affected by the destruction of the saw mill at Nordin, N.B., which was burned recently.

Robertson, Foster & Smith, wholesale and retail hardware, whose premises were badly damaged by fire, have resumed business.

DAMAGED BY EXPLOSION

The Dartmouth plant of the Consumers' Cordage Company, Limited, was considerably damaged in the Halifax explosion.

Many of the employees were injured, fortunately none fatally. R. L. Graham, manager, however, was badly bruised and cut about the face. The company is at work on the necessary repairs and will soon have everything in normal shape. All orders on hand and any new business, it is said, will receive prompt attention. Orders which the Dartmouth plant cannot handle will be rushed forward from the company's Montreal factory.

DU PONT'S PURCHASE BRIDGEPORT COMPANY

The paint and wood finishing business of the Bridgeport Wood Finishing Co., Still River, Conn., has been purchased by E. I. Du Pont de Nemours & Co., of Wilmington, Del.

The acquisition is in line with the expansion of the Du Pont interests in the American paint field. The Du Pont Company already has purchased and now operates Harrisons, Inc., of Philadelphia, one of the oldest paint companies in the country.

This purchase extends the Du Pont interests in the American paint field, as some time ago they purchased Harrisons, Inc., and now with the Bridgeport Wood Finishing Co. paint business their entry into this field is being watched with considerable interest.

SECURE TEMPORARY QUARTERS

The Alabastine Co. of Paris, who recently suffered loss by fire, have secured temporary quarters and are refitting them to meet their requirements. They expect to be ready to resume manufacturing on or about February 1, 1918.

New Glidden Co. Buys Canadian Concern

Cleveland, Ohio, and Toronto, Canada — New Company Will Manufacture Paints as Well as Varnishes— New Lines to be Added.

ONE of the most important of recent transactions in the paint and varnish trade in the Dominion has just been concluded by the outright purchase of The Glidden Varnish Company, Ltd. of Toronto and its associate, The Glidden Varnish Company, of Cleveland, by a newly formed corporation headed by Adrian D. Joyce who was until recently director and general manager of sales and distribution of the Sherwin-Williams Company. The new company will be known as the Glidden Company and is capitalized at $2,500,000.

ADRIAN D. JOYCE,
President The Glidden Co.

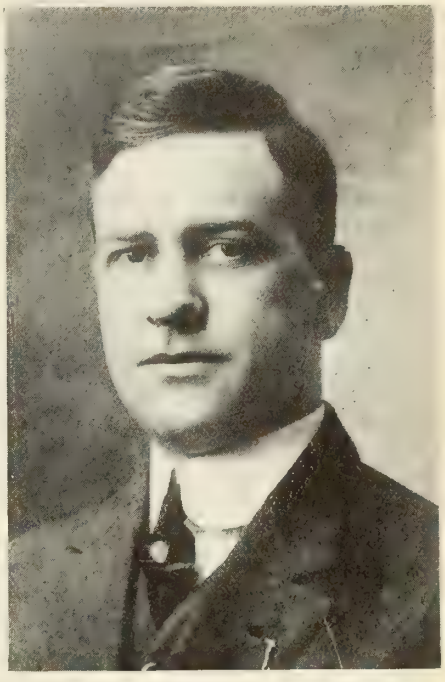
O. A. HASSE,
Vice-President The Glidden Co.

Associated with Mr. Joyce are O. A. Hasse, formerly manager of paint and varnish sales for the Sherwin-Williams Company, and R. H. Horsburgh, controller of the same company. They will occupy the position of vice-president, and secretary-treasurer, respectively, in the new corporation. All these have resigned their connection with the Sherwin-Williams Company and it is stated that the new company will not be affiliated with any other paint and varnish interests.

Members of the Glidden family, including F. A. Glidden, heretofore president of the company, will retire from the new corporation, but the balance of the organization will remain intact and will be enlarged as necessity demands.

Active plans are already under way for the broadening of the new concern and extending its business into new fields. Particular attention will be given to the manufacture of paints, which have been a subordinate product of the company. In addition to the complete lines of varnishes, enamels, paints and stains, many new paint specialties will be added.

The promotion of Jap-a-lac household finishes, one of the company's internationally known trade-marks will be given greater impetus while the entire line of paint and varnish products will be grouped and advertised under the name "Glidden." Glidden auto finishes, it is said, will receive special attention in sales promotion.



R. H. HORSBURGH,
Secretary-Treasurer The Glidden Co.

Montreal Motor Show Dates

Annual Motor Show of Montreal Automobile Trade Association to be Held January 19 to 26, 1918—Large Number of Entries Expected.

THE Fifth Annual Motor Show of the Montreal Automobile Trade Association will be held on the third floor of Almy's department store, on St. Catherine Street, January 19 to 26, 1918. Plans which are developing give promise of making this one of the most successful shows ever held and the attendance is expected to be a record-making one.

In order that accommodation may be afforded for the 130 styles of cars to be shown a huge outside elevator has been planned and will be built in ample time. In addition to this it will be necessary to make a large entrance on the south side of the building, just off the third floor, so that cars may be readily unloaded.

Already, it is stated, the available space of 46,000 square feet has been allotted and forty-five exhibitors are planning to show their individual lines.

Some 245 exhibits of automobile accessory lines are promised. Thus the entire third floor of this large building will be taxed to capacity and a very attractive, unique and complete showing is expected.

Manager T. C. Kirby has spent several weeks in planning this big event and preliminary plans have been well matured. It is expected that with such a comprehensive showing of motor cars and with the display of a big range of accessories hardware men who now, or who contemplate, the handling of this line another season will come to Montreal and personally inspect all that is new in motor cars and in accessories.

It is eight years since the first automobile show was held in Montreal and at that time the total number of exhibitors was thirty-four against the three hundred and forty individual exhibitors expected this year.

The utility of the automobile being so generally recognized to-day, this show will prove of greater interest than any previous show held here—and as accessories are becoming more standardized it is anticipated that there will be a real business interest upon the part of visitors—such as would prevail in a show of other standardized lines of goods.

During the show week it is indicated that steps essential to the formation of a Dominion-wide automobile trade association may be taken and arrangements completed.

Hamilton Bicycle Dealers Meet

Decide on Minimum Cash Deposit of $10 on Bicycles—Early Closing For Summer Months—Quebec Dealers Organizing—Need of Co-operation.

THE Hamilton Bicycle Dealers' Association upheld its nation-wide reputation as an active and hustling trade organization on Monday night, December 3, when the fifth annual convention of the local trade was held at the I.O.O.F. Temple with some twenty-five dealers and trade representatives present. The attendance was swelled by the participation of eight out-of-town officials of bicycle manufacturing and jobbing companies whose interest in the Hamilton Association is indicative of the importance which is attached to trade bodies generally.

N. S. Ferries, proprietor of the Wentworth Cycle Works, became a fifth-termer when he was unanimously selected to succeed himself as president for the fourth time. C. Webb of Webb and Underhill was elected vice-president, and R. Dixon was re-elected to the office of secretary-treasurer.

Minimum Deposit of $10

A unanimous decision was reached to close all bicycle stores in the city at nine o'clock each evening, or earlier if desired, except Saturdays and the nights before holidays. This will apply to the whole year. It was also decided to close all bicycle stores Wednesday afternoons for the five months from May to September inclusive, except when statutory holidays interfere. It was also agreed that a minimum cash deposit of $10 would be accepted by all dealers on the purchase price of a bicycle under any circumstances. Time payments were left to the discretion of the individual tradesmen. Several of the members openly disclosed their methods of arranging for time payments, one dealer pointing out that a good plan consisted of adding $5 to the cash price of a wheel and refunding $4 if the wheel is paid for within thirty days, $3 if it is paid for within two months, etc. It was the consensus of opinion that a customer should not be allowed a year in which to complete payments.

During the convention President Ferries announced that a communication received from L. Quevillon of Montreal showed that the dealers of that city and of the Province of Quebec were being organized into a Provincial Bicycle Dealers' Association. The Hamilton Association was congratulated on its very evident success during the past four years by a number of the speakers from out of town. The latter included S. License and W. Wright, representing the Humphrey Bicycle and Motor Company, Toronto; C. Dixon, H. Rawlinson and R. Gray of Hyslop Bros., Toronto; E. M. Peer and Frank Long of the Canada Cycle & Motor Company, Weston, and W. M. Gladish, Toronto. It was the first appearance of Mr. License as a representative of the Humphrey company, while Mr. Dixon, bicycle manager of the Hyslop company, was making a stop-over on a trans-continental business trip.

C. Dixon, of Hyslops, the first "outsider" to be called for an address, remarked that an association enabled the dealers to get acquainted, in which case it was always found that a business rival is not the scoundrel which had been imagined. He voiced the opinion that the Victory Loan Campaign would stimulate business generally, rather than cause a depression.

Steve License, of the Humphrey Bicycle & Motor Company, said: "I have never seen such a spirit of get-together before in my life as is evident here." He declared that no retailer wanted to get the reputation of being cheap. All worthy dealers wanted the reputation of handling good goods and of being real business men.

"All dealers look to the Hamilton association for guidance," declared E. M Peer of the Canada Cycle & Motor Company. He advised the organization to hold meetings more frequently. Further, he declared that the price-cutting game is very serious—particularly for the man with a small business.

H. Rawlinson pleaded for a trade association for the whole of Canada. He also advised all dealers to read trade journals.

"A trade paper is worth while to all," followed up President Ferries, who also drew attention to the many stunts put over by the committees in charge of the Victory Loan Campaign. "Could the Victory Loan have been so successful had not the advertising work been so complete?" he asked. The bicycle dealers could take a big lesson from the work of the loan boosters.

Million and a Half Boxes of Tin Needed

Canada's Requirements Will Reach This Great Total to Meet Minimum Requirements—It is Hoped That Present Shortage May Shortly be Relieved—Extensive Regulation Likely.

So much has been said regarding the tin plate troubles of late that there is a general wearying among the trade as well as among manufacturers. That we may keep our readers well informed, however, the following summary of recent developments may be interesting.

The Food Controller's office has recently issued a set of questions asking the manufacturers of food and other containers to state what their consumption of tin plates has been for the past years of 1914-15, '16 and 1917, part of the latter year being of course only estimated. This questionnaire was sent out that facts might be obtained as to the exact purposes for which tin was used for containers, and specific information was to be submitted showing how much tin was used for making tobacco, grease, chemical, drug, oil, paint, varnish and any other canned goods containers.

On Nov. 13, in accordance with arrangements previously made, a meeting was convened in the Food Controller's office, Ottawa, when representatives of the various paint, packing and other can and packing companies met and discussed with Deputy Minister F. C. T. O'Hara the situation as it stood, from various angles. This committee appointed at an adjourned meeting a smaller committee, composed of T. N. Anderson, of the American Can Co., Hamilton; Fred R. Whittall, of the A. R. Whittall Can Co., Montreal, and F. S. Corrigan of Sheet Metal Products Co. of Toronto, with instructions to proceed to Washington where it was proposed to interview the department there with reference to supplies wanted for Canada.

Mr. O'Hara was present when these men discussed the matters left with them for consideration and dissuaded them from their intention to visit Washington, relating his own experiences and from these he felt that they would be as well to communicate with Washington by wire. This they agreed to do. The minimum requirements for Canada in 1918 were estimated to be 1,500,000 boxes. In the messages sent to Washington the United States department was asked as to the definite method to be followed in submitting applications for tin plate, as all plates coming to Canada, of course, come from there.

It is clearly defined that manufacturers in estimating their needs are to state them clearly and conservatively, as any attempt to over-estimate will be detrimental. The department at Washington is using great care that all supplies are sent out carefully and are also well distributed. A joint form of questionnaire has been agreed upon as between the Canadian and United States food control departments. It is confidently hoped now that in a comparatively short time the present serious shortage may be at least somewhat relieved.

MEETING OF CREDIT ASSOCIATION

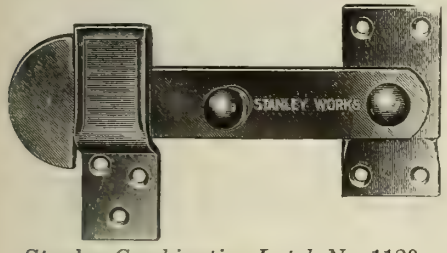
Winnipeg, Man.—A meeting of the wholesale section of the Canadian Credit Men's Association was recently held when a conference upon matters pertaining to wholesale business took place with representatives of the government.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

COMBINATION LATCH

The Stanley Works of New Britain, Conn., is now selling a new Combination Latch No. 1120 for swinging or sliding doors. This new latch is extra heavy, self latching on sliding doors, reversible



Stanley Combination Latch No. 1120. (Cut one-third size)

and strong. It is stated it will not catch on harness, for it can be swung over and out of the way and can be had japanned or Stanley Sherardized finish. These come packed one set in a wrapper with screws, one half dozen in a carton.

4-ONE BOXES

The Canadian Wood Products, Ltd., 1,000 Gerrard St. E., Toronto, are now putting on the Canadian market 4-ONE boxes which it is stated are used by many manufacturers in packing their products. It is stated the strength of 4-ONE boxes is measured in terms of steel wire and not in terms of wood, the peak load being carried by the wire.

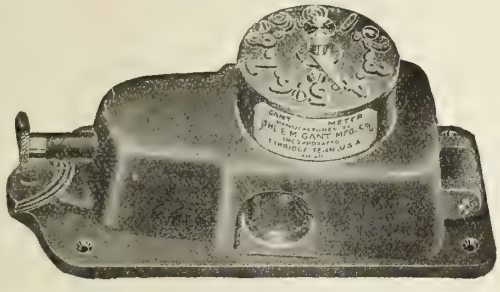
4-ONE boxes, knocked down, consist of four separate sections, top, side, bottom, side, connected only by continuous steel binding wires and of two separate end pieces.

4-ONE boxes are made by folding these four separate sections at right angles to each other, which tensions the wires at the corners, causes the top and bottom sections to overlap the side sections along the full length of the corners, and gives tight, square corners. The end pieces are nailed or stapled to the cleats from the inside.

It is claimed that under external strains the four separate box sections slide on each other at their edges, causing the strains to be taken up immediately by the tensioned steel binding wires and to be borne by these steel binding wires and to be borne by period of strain, and that bulging strains also are resisted by the steel binding wires.

NEW MODEL GANT METER

The Gant Meter for measuring all kinds of cotton, sisal and Manila rope, cable, etc., is offered the trade by John E. Chumbley & Co., Nashville, Tenn. The J. H. Hanson Company, Ltd., Montreal, are Canadian distributors. It is stated that this machine will handle any size from ¼-inch to 1-inch in diameter, and that there is no danger of over-measurements or under-measurements. It is claimed no yard sticks, tape measures or floor measures are necessary, it is always ready for use and is a big time-saver. To operate, simply thread rope in meter, take hold and pull. It is stated the indicator on dial registers accurately up to 100 feet when it automatically

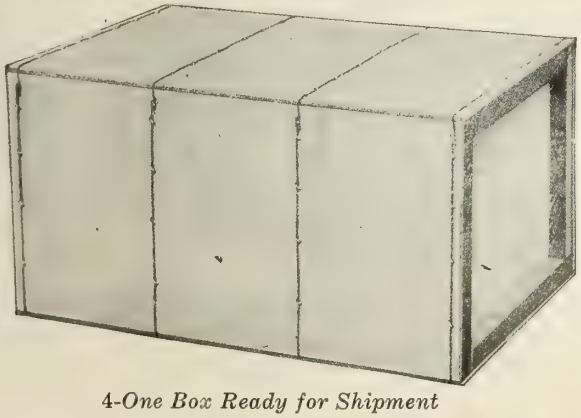


The New Model Gant Meter

clears itself, but it can be cleared after any measurement. The weight of this machine is six pounds complete.

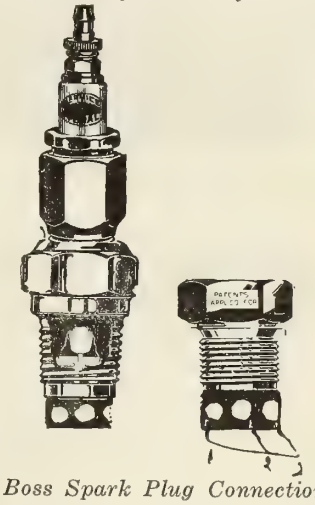
BOSS SPARK PLUG CONNECTION

The Relax Company, Norwood, Ohio, has recently brought out the Boss Spark Plug Connection which it is stated is designed to prevent oil and carbon deposits from gathering on the points of the spark plug which causes it to foul, miss, and also crack the porcelain. It is



4-One Box Ready for Shipment

claimed that by shielding the points of the spark plug, as the Boss Spark Plug Connection does, protecting it from flying carbon deposits and excessive oil clogging on these points, the real cause of motor missing and porcelain cracking is eliminated. This, it is claimed, reduces all spark plug trouble and assures greater efficiency with any make spark



Boss Spark Plug Connection.

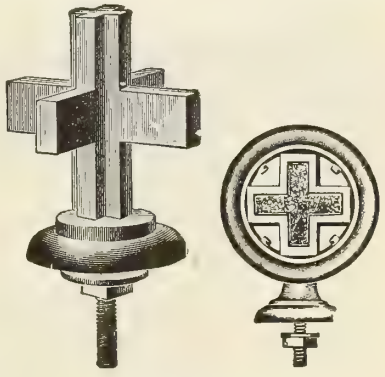
plug. The Boss Spark Plug Connection, it is stated, assures the proper ignition from the spark plug and makes it fire with a hot spark each time.

The "Boss" is made in ½ and ⅞ inch sizes. It will fit any make car and is fully guaranteed by the manufacturer.

RADIATOR EMBLEMS

It is stated that the automobile of the veterinary, like that of the physician, should carry the sign of the profession to readily identify it to traffic officers and others who can help to expedite its progress.

These emblems are of heavy metal with crosses enameled in correct tone of blue, rest of emblems being gold-plated



Radiator Emblems—for the cap of the radiator.

or finished in best grade heavy nickel-plate.

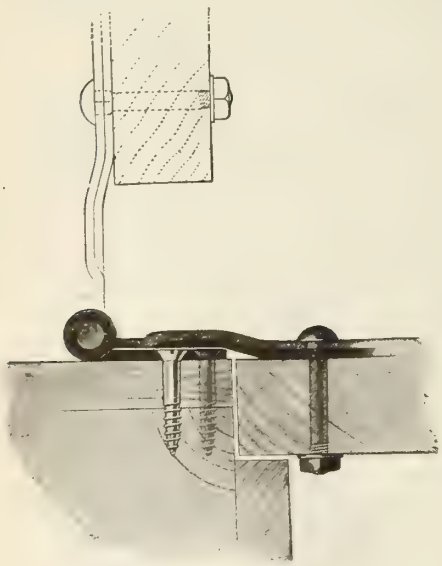
No. 5430B and 8063B are furnished complete with bolt, washer and nut for instant attachment to the radiator cap.

No. 8615B can be attached to the front of the radiator by means of strong wire lugs with which it comes equipped.

Selling Modern Garage Door Hardware

Improved Type of Garage Calls For High Grade Hardware — Swing Garage Door Hardware—Door Holders Save Windshields and Headlights — Sliding Garage Door Hardware—Developing the Demand.

THE proper housing of his car is more and more engaging the attention of the auto owner and during the past few months the sales of garage hardware have increased very materially. One of the most important features in connection with this rapid growth has been the tendency of car owners to build



It will be noted that the use of this hinge permits the full use of the entire space as the door swings clear of the opening.

garages of a style corresponding to their homes. The buyer for one of Canada's large retail establishments enlarged on this phase of the business to HARDWARE AND METAL'S representative as follows: "It is not so long ago since a garage was considered only in the light of a protection to the car against the elements of summer weather. With the approach of winter the tendency was to store the car away in some convenient store room but to-day, with the almost universal use of cars during the winter, the owner wants his car where he can get it without trouble and he wants a garage that will guard against the cold of winter. There has been a decided improvement in the class of garage built with an increasing demand for hardware to correspond. To further illustrate my point I might say car owners in building a garage bear in mind the architecture of their home—if brick is used in the home, the garage is built of brick, a stucco home will usually mean a garage to correspond. This is what has brought about the increased sale of garage hardware of the better type."

In selling garage hardware there are many items employed and an outline of these follows. This can only be termed general as there are so many angles to be considered but one point emphasized to HARDWARE AND METAL'S representative which should be borne in mind by all merchants in soliciting this trade is to "have the owner consult the hardware man before placing his order for doors." The wisdom in this policy will be seen when the various types of doors used is considered.

Swing Garage Door Hardware

The manufacturers of hinges who cater to this trade now market lines which are a decided improvement over the old style tee and strap hinges in strength, appearance and convenience. One of the lines most frequently sold is the style shown herewith which are offset, throwing the door out and on a line with the door frame, which eliminates the possibility of hitting the edge of the door as when hung in the old way. These hinges also are ball bearing which makes them work easily and they are so protected that they do not rust and break. A common method of application is the use of two large hinges up to 36 in. for the top and bottom of the door with a smaller size in the center.

Doors which swing on hinges may be bolted top and bottom by chain and foot bolts which correspond in style and finish to the hinges. Heavy bolts and latches are also used and the latches are so arranged that they may be securely fastened by a padlock if so desired. Another big feature developing in the sale of garage hardware is the application of a

Showing a door holder applied and method of release.

night latch or cylinder lock on the garage door which is keyed the same as the front door on the home. This eliminates the necessity of carrying extra keys and

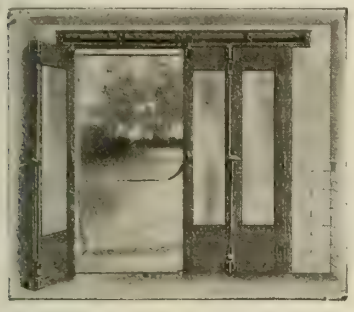
is a decidedly popular method of locking. With this style of lock a heavy pull is usually applied to open and close the doors.

Door Holders Save Windshields

There has been a great deal of damage done to cars through the slamming of garage doors on a windy day. Door holders are now sold which hold the door open and in this way secure the owner against the possibilities of a broken windshield or headlight. One style now being marketed is shown "applied" to the doors of a garage in one of the illustrations herewith.

Sliding Garage Door Hardware

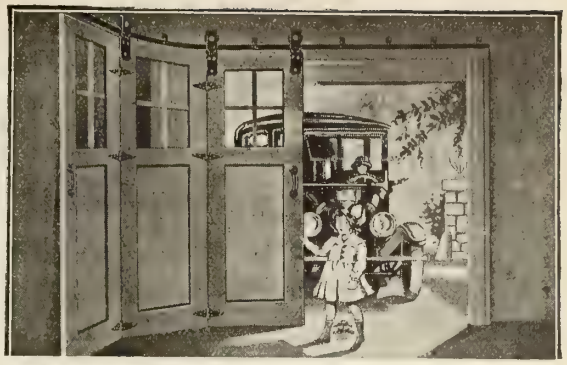
For those who prefer hangers, many



Doors hung in this manner present a splendid appearance. They fold over each other and back against the wall.

styles are offered. These permit the doors to open in almost any way wished as will be seen in illustrations which accompany this article.

There are those whose garage space is limited and must have the door against one corner of the building. For these a hanger, which carries the entire door across the inside corner of the garage to the wall at right angles, has been devised. There are others whose door openings are in the centre of the garage front and space on either side is limited, so that the door must be built in two or may be three sections. A similar arrangement to the single one above which permits the doors to swing to opposite corners takes care of this man's requirements.



Showing doors in section arranged to slide around one side of the garage.

It is stated that one of the neatest arrangements employed in hanging doors is one which permits the use of small individual doors that fold back over each other. This method is used in building doors in three, four, or six sections and makes a very attractive arrangement that appeals strongly to those whose outlay for a garage is considerable.

One consideration which has led to the increased demand for the private garage with the consequent demand for hardware is the abuses to which many motorists' autos are subject to when left in public garages. There have been many cases where owners have been arraigned in police court to answer charges of speeding when it has developed that some employee of the public garage has made use of the car for a "joy-ride." Then in winter the owner who uses his car wants it right at hand where he can make use of it at any time instead of having to go to the public garage or phone for some one to bring it over and in this way incur unnecessary expense.

Ways of Developing the Demand

There is a real need in every district for hardware of this class. It is not a luxury,—it is essential that there be a greater or less variety available for the garages that may be built. But it is very certain that the new business to be had must be developed carefully and with well directed effort.

It would be a very excellent plan in the first place to make a list of the owners of cars in one's community. These are excellent prospects. A personal letter written to such owners and calling attention to the lines carried by the dealer would serve to secure the care-

(Continued on page 66.)

GETTING VALUE FROM CHRISTMAS WINDOW DISPLAY

DURING the next few days the greatest returns are witnessed from good window displays. Have yours so arranged that the last-minute shopper won't pass you by. Suggestions are given on other pages of this issue. Arrange to get all the holiday business possible — the window display will be a big factor in securing desired results.

HARDWARE AND METAL'S annual Christmas window display contest will be conducted as usual this year. The growing interest evinced by Canadian retail hardwaremen in this contest is evidenced in a wider and more representative response each year.

Two contests will be conducted in accordance with past custom—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions are set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

LET US HAVE YOUR ENTRY

EIGHT PRIZES WILL BE OFFERED AS FOLLOWS:

Places under 5,000.		Places of 5,000 and Over.	
First Prize	$10.00	First Prize	$10.00
Second Prize	5.00	Second Prize	5.00
Third Prize	3.00	Third Prize	3.00
Fourth Prize	2.00	Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town trimmer as to those in the larger towns and cities.

The contest closes Tuesday, January 1. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, HARDWARE AND METAL, 143-153 University Ave., Toronto," and marked "For Christmas Window Contest."

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

SOME declines in the price of hardware commodities during the past week have been of more than passing interest. One of the lines to show a lower price is that of bright and galvanized fence staples. Wholesalers point out, however, that this decline comes not through any weakening in wire products but rather a readjustment to a lower level in conformity with the present price of wire. Copper bars, brass bars, plain copper sheets and brass spring sheets are other lines which show a lower tendency. This movement is induced through the possibility of getting copper early in the New Year at the price established by the United States Government. Turpentine is another of the lines to give evidence of weakness with declines recorded. On the other hand advances have been numerous and include such lines as motor accessories, ammunition, disinfectant, insect powder, lawn border, pipe vises, oval slide vises. While the manufacturers of American ammunition have advanced their cartridges, loaded paper shot shells, empty brass shot shells, percussion caps, empty paper shot shells and primers, the Canadian manufacturers have not yet announced a change but there is general expectation that there will be an advance in the near future. Manufacturers of metallic ammunition and loaded shells advise that by reason of Government demands their output for domestic consumption will be much below normal. There is a possibility that merchants will be able to get only a percentage of their orders. Business for the Christmas trade and for winter lines has been seasonably good, with a good run on snow shovels, snow shoes and kindred lines.

MONTREAL MARKETS

MONTREAL, Dec. 12.—The markets are rather quiet, for the most part, this week. Some changes are recorded; among them a change of about 10 per cent. in United States ammunition, representing an advance. Cotton twines are advanced again, about 5 per cent. Wood hay rakes are advanced through a change of discount, the former discount of 45 per cent. being reduced to 40 per cent. This applies in like manner to horse pokes. Prices are announced on galvanized and bright wire staples. Galvanized iron is weaker. Coal oil is very firm and an advance is looked for. Linseed oil is quoted three cents lower. Rope manufacturers are endeavoring to make sure of a supply of raw materials for next season's binder twine. One large firm has shipped a large amount of glass to its Halifax representative. It is stated that very little glass remains in any building in Halifax.

New Discounts Announced On American Ammunition

Montreal.

AMMUNITION.—The announcement is being made of a new discount on American ammunition. This is equal to about 12½ per cent. and will effect all lines of metallics, military and sporting, and pistol sizes. It will also apply to caps, primers and loaded shells. Quotations are now made on a basis of 10 per cent. advance on list. This sets a new record for ammunition of United States manufacture, and it will be a question as to whether more careful use of the product will result.

Cotton Twine Is Up About Five Per Cent.

Montreal.

COTTON TWINES:—All lines of cotton bag twines have been advanced, this being equal to approximately 5 per cent. The advance will affect cone and ball twines as well. This increase is indicative of the strong situation in the cotton market, and sets a new high record for the product.

Wood Hay Rakes Up; Also Horse Pokes

Montreal.

HORSE POKES, WOOD HAY RAKES:—There has been an advance this week in the quotations on wood hay rakes. The discount formerly applying to this line was 45 per cent. and this is now reduced to 40 per cent. Likewise, the discount applying to wood horse pokes, extensively used in some places, is reduced in like manner, the discount of 40 per cent. now being effective.

Galvanized And Bright Wire Staples Are Higher

Montreal.

STAPLES.—New prices are announced for staples. These are selling as follows:—Bright, in 100 lb. kegs, $5.50 and in 25 and 50 lb. boxes $5.75 per 100 lbs. Galvanized are quoted at $6.25 per keg and in the 25 and 50-lb. boxes, $6.50. These prices will be welcomed by many dealers, who are now placing some of their spring business for nails and wire, and who will therefore be guided as to the basis for taking orders for spring delivery to their customers.

Nails Are Holding In Firm Market

Montreal.

NAILS AND WIRE.—There is a steady but firm situation in wire nails at present owing to difficulty manufacturers experience in getting wire rods at anything near the established government price. Business in this line is confined to small compass, with the base price for standard wire nails, $5.50 and for cut nails, $5.75. Smooth steel wire, base price, is $6.50.

Limited Demand For Standard Iron Pipe

Montreal.

IRON PIPE.—Confined to standard sizes principally, the demand for iron pipe continues light. A few orders are received by the jobbers, but these are usually small in size. In other lines of the staple goods, orders are mostly from country dealers and some report business from this source very satisfactory.

Country Business Fair For Steel, Iron, Etc.

Montreal.

IRON AND STEEL.—Fair orders of a sorting nature continue to be received by jobbers. Retail dealers seem to be keeping their stocks in reasonably good shape, as indicated by the frequency of

orders received. No changes are reported.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0.17½-0 19
Black Diamond tool steel, per lb.	0 18-0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 18-0 19

Weakness Evident In Galvanized Sheets

Montreal.

SHEETS AND PLATES.—Readjustment of prices has been effected on various gauges of galvanized sheets, and these are in a downward direction. The consumption is not very large. Favorable quotations are now to be had compared with those of a few weeks ago, and trading will probably be freer in view of better prices prevailing.

MONTREAL—		
BLACK SHEETS—		100 lbs.
10 gauge		$12 50
12 gauge		11 60
14 gauge		11 50
16 gauge		10 75

10¾ oz. (28 English)	10 55	10 75
GALVANIZED SHEETS—		
10¾ oz.		$10 00
28 ga.		9 65
26 ga.		9 25
22 and 24 ga.		9 05-10 45
20 ga.		10 30
18 ga.		10 15
16 ga.		8 70- 8 85

Makers Hope To Get 1918 Stove Material

Montreal.

STOVES AND RANGES.—There is little movement reported in stoves for the immediate present. Many are now taking or arranging to take stock. For the requirements of business manufacturers are confident, or at least hopeful, that the needed supplies will be forthcoming, but it is a little early to be able to stare the situation as it will obtain in the coming months. Readjustments that are necessary will probably be made soon, so that manufacturers can know with more definiteness what they may expect in supplies.

Coal Oil Very Firm; Likely To Go Higher

Montreal.

COAL AND GASOLINE.—There has been an advance in coal oil in some of the U.S. centres, and local oil dealers state that this will probably mean an advance for coal oil here of baut 1 cent per gallon within the week. An advance generally follows when one has been made in the south. Gasoline sales are down to a much smaller compass now, and in the country districts particularly, as few automobiles are being used. This is the case hereabout, at least, where some 6 to 8 inches of snow has fallen. Palacine still sells at 20c; Royalite at 17c and Electroline 20c, while gasoline is quoted at 32½c per gallon.

Rope Prices Firm; Binder Twine Outlook

Montreal.

CORDAGE AND ROPE.—There is a continued firm tone to the rope market and while there are no changes in price, there is strong indication of a readjustment in the near future. The supplies that might have been obtained from Russian ports has been held up owing to ice that has now formed and these ports are closed. The Italian hemps are just about as scarce. Attention is therefore being turned to other parts, and it is stated that arrangements are now proceeding, upon the part of some of the large manufacturers across the border, who, working in conjunction with the U.S. Food Controller's department, hope to bring about better conditions. For instance, it is not too early to consider the binder twine situation, and as a result of negotiations about to be undertaken, the large amount of twine required, it is hoped, will be assured. By working in concert with the Food Controller and securing his assistance and good offices in treating with the Mexican authorities, it is hoped to thus provide for the needs of the coming season, in so far as binder twine is concerned.

Lead Products Are Normal And Unchanged

Montreal.

LEAD PRODUCTS.—The request for lead products is rather confined, and small trading obtains. The amount of work requiring manufactured products is now quite limited, but the amount of business anticipated so late in the season is not large. There are no changes reported following the readjustments of last week and the following prices are quoted:

MONTREAL—	
Lead pipe, lb.	$0.14-$0.15
Lead waste pipe, lb.	0.15- 0.16
Lead traps and bends	Net list
Lead wool, lb.	0.14
Lead sheets, 3 lbs. sq. ft.	0.11½- 0.12
Lead sheets, 3½ lbs. sq. ft.	0.11½- 0.12
Lead sheets, 4 to 6 lbs. sq. ft.	0.13

Some Old Copper Sold; Market Quite Dull

Montreal.

OLD MATERIAL.—While the quiet condition that has prevailed regarding old materials for some weeks is not greatly changed, some supplies of copper and other scrap have gone forward. Dealers are willing to buy, and prices are maintained. One dealer is paying $27 per ton for No. 1 machinery scrap, and $19 for stove plate. Lead pipe also is being quoted as high as 6¼c.

MONTREAL—		
Tea lead	$ 0 04	....
Heavy lead pipe	0 05	0 06¼
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....
Scrap zinc	0 06	....
Heavy copper	0 22	0 23
Old cast iron, per gross ton	22 00	25 00
Wrought iron, No. 1, per gr. ton	22 40	23 00
No. 1 machinery scrap	27 00	....
Heavy melting steel	18 00	20 00
Pipe scrap	15 00	17 00
Stove plate, per ton	17 00	19 00
Old rubbers, boots and shoes	0 07½	0 08
Overshoes, lumbermen's rubbers boots	0 06	....
Bicycle tires	0 03	....
Auto tires	0 04½	0 05½

Ingot Metal Dull; Tin Tendency Firmer

Montreal.

INGOT METALS.—Little trading is being effected for ingot metals and the market remains much as it was last week. Tin is very firm and the tendency is to a higher level, but no new prices are quoted.

COPPER.—Very little interest centres around copper for the week. Trading is light and surplus stocks are just fair. The price is from 33c to 34c per lb.

LEAD.—Slow, with light trading, characterizes the situation in lead, which is selling at 9c to 9½c per lb.

TIN.—At New York, Straits tin is quoted at 86c. This is held firmly, but bidders in the New York market get few responses, as stocks are short. The local price is 79c to 80c per lb.

SPELTER.—Normal conditions prevail on spelter, with small movement. Prices are quoted 10½c to 11c per lb.

ALUMIUM.—Market is quiet with small volume of trading being effected. From 16c to 18c per lb. is being asked.

ANTIMONY.—Steady and firm, with a limited amount of trading, which is being effected at around 18c lb.

TORONTO MARKETS

TORONTO, Dec. 13.—Building materials of various kinds were in active demand in Toronto during the week as a result of the catastrophe at Halifax. Glass and putty moved eastward in fairly large quantities. There was a quick response on the part of wholesalers to supply the needs of the stricken city. One of the important lines to change in price during the week was ammunition of American make, in which a considerable advance was recorded. Canadian makes of ammunition have not yet advanced, but it is expected there will be a change in these lines in the near future. A decline was recorded in the price of bright and galvanized fence staples. Other lines in which advances have been recorded are quite numerous and apply in a number of instances to automobile accessories. Business for winter lines has been good during the week.

American Ammunition Goes To Higher Levels

Toronto.

AMMUNITION.—An advance was recorded in the price of Winchester and Remington ammunition during the week through the changing of the discounts. Where sporting cartridges, primers, BB caps and .22 rifle ammunition was formerly quoted at a discount of 2½ per cent. off list, prices have been advanced to 10 per cent. on list. Empty paper shot shells are now quoted at 15 per cent. advance on list, and include such lines as Leader, Repeater and New Rival. Empty brass shot shells No. 1 Rival are now quoted at 15 per cent. advance on list. Gunwad felt and cardboard are also quoted at 15 per cent. advance on list. Percussion caps, GD, FL, EB, or ground edge, are quoted at 10 per cent. advance on list. Musket 4-split U. S. army and 6-split varnished, together with musket 6-split foil-lined and musket Spanish ribbed shells, are quoted at 10 per cent. advance on list. Loaded paper shot shells in case lots are quoted at 15 per cent. advance on list. Canadian makes of ammunition have not yet advanced, but there is a very strong situation. Manufacturers of metallic ammunition and loaded shells in this country advise the trade that by reason of Government demands their output is much below normal. Wholesalers advise that in order to get their percentage the retail trade should place orders for their requirements without delay. Prices and terms are subject to cancellation without notice. An advance in Canadian-made ammunition is expected in the near future.

Copper Bars And Brass Bars Go Lower

Toronto.

COPPER BARS, BRASS BARS.—Lower quotations on copper brass, brass bars, copper sheets and brass sheets were made in certain quarters during the week. Copper bars, ½-inch to 2-inch, in full lengths, were quoted down 5c per pound at 43c per pound. Plain copper sheets of 16-oz base and heavier were quoted down 2c per pound, making the quotation 46c. Brass spring sheets, 24-gauge and heavier, were down 5c per pound, and were quoted at 43c. Brass rods, ½-inch to 1-inch, were quoted at 39c per pound, making the range of prices 39c to 40c. The possibility of getting lower-priced copper by the domestic consuming trade in the United States has had a weakening effect on the market.

Wooden Tubs And Bakeboards Advance

Toronto.

WOODENWARE, BRUSHES.—A considerable advance in the price of wooden tubs was announced during the week. No. 0 tub is now quoted at $16.50 per dozen, the former price being $13.75. No. 1 tub has been advanced to $14.25 per dozen, the former price being $11.85. No. 2 tub is now uoted at $12 a dozen, which is an advance of $2. No. 3 tub is quoted at $10.50 per dozen, an advance of $1.75 per dozen. Wooden bakeboards have also been advanced, and one manufacturer is now quoting on the following basis: 18 x 24 in., $8 per dozen; 18 x 28 in., $8.90 per dozen; 20 x 30 in., $10.25 per dozen. Paint brushes are in very firm market, and there is strong probability that an advance may take place in these lines about the first of the new year. There is a shortage of bristles, and manufacturers assert that this is causing a very firm situation.

Cement Market Gives Indication Of Firmness

Toronto.

CEMENT.—There is a firmness in the market for cement, which seems to indicate the possibility of higher prices.

DONAHEY in Cleveland Plain Dealer

"Dearie, did you roll up your cuffs?"

Cost of manufacture has been increased through the fuel situation and labor situation. In carload lots cement is quoted at $2.40 per barrel, and in small lots at $3 per barrel. There is a fairly good demand for cement at the present time in the finishing of buildings and in sewer work. Demand in this respect has been up to a normal month at this season of the year. Those closely in touch with the situation intimate that there is strong probability of a change in price in the near future.

Vises Record Advance Of 10 To 16 Per Cent.

Toronto.

VISES.—Pipe vises of National brand have advanced approximately 16 per cent. No. 21 is now quoted at $3.50 each, the former price being $3 each. National oval slide vises is another of the lines to be moved to higher levels, the advance in this instance being approximately 10 per cent. Following are the prices now being quoted: No. 603, $3.25 each; No. 603½, $5 each; No. 604, $5.50 each.

Disinfectants And Powders Have Advanced

Toronto.

DISINFECTANTS, LICE POWDER, FLY SCOOT.—A substantial advance has been recorded in Zenoleum disinfectant, which now makes the following prices to the retail trade: 8-oz., $2.40 per dozen net; small size, $5 per dozen net; medium size, $8.40 per dozen net. Prices at which these lines are to be sold to the consumer are: 8-oz., 30c each; small, 60c each; medium, $1 each. Lice powder has been increased in price, and is now quoted at $2.40 per dozen. The resale price to the consumer has been established at 30c each, an advance of 5c. Fly scoot in small size is now quoted at $4.50 per dozen and large size at $10 per dozen. Prices for the consumer have been established at 60c for small size and $1.25 for large size, which is an advance of 10c in the instance of the former and 15c in the latter instance.

Lawn Border Higher For Spring Booking

Toronto.

LAWN BORDER.—Prices for spring shipment on lawn border have been arranged, which show a substantial increase over those recently prevailing. Twelve-inch is now quoted at 6c per foot and 18-inch width at 7¾c per foot. This is one of the products manufactured from wire, and gives some indication of the firm situation existing in the raw material.

Away Behind On Gas Ranges And Coal Heaters

Toronto.

STOVES, ENAMELWARE.—Some manufacturers of gas ranges and coal heaters report that they are hopelessly behind in their orders on this class of stove owing to the heavy demand that has recently developed on these lines. The demand for gas ranges at this time of year is stated to be unusual, and is attributed to the desire on the part of the householders perhaps to economize in the use of coal. With a small heater attachment they can burn refuse and chips, and perhaps a bit of coal, and get a fair amount of heat, together with the gas consumed at the time of cooking meals. There has been a fairly good demand for wood-burning stoves from the districts in which wood is plentiful.

Manila Hemp Shows Greater Firmness

Toronto.

CORDAGE, TWINE.—There was a slightly firmer undertone to the market for Manila hemp products as the result of a small advance that has been registered in the fibre during the past week. As a result of the condition in the primary market at the present time some manufacturers have refrained from announcing their booking prices for delivery next spring. When conditions in the primary market become a little more settled it is expected manufacturers will announce their booking prices. In the local market the sorting business is light at this season of the year and the heavier demand that is expected from the shipbuilding concerns of the eastern provinces has not yet started. Quotations held unchanged at 39c base for pure

Manila rope, 33c per pound base for British Manila and New Zealand hemp, and 27½c for sisal rope.

Coal Oil Market One Of Firmness

Toronto.

COAL OIL, GASOLINE.—There is a firmer situation in the market for coal oil as a result of changes which have been made in the United States market for this product. In the New York district an advance of 1c per gallon was recorded during the week. The reason for the advance is attributed to the extensive use of coal oil for heating purposes and also to the fact that the supply is being curtailed owing to larger percentage which is being passed into the heavier products for treatment to yield a greater supply of gasoline. Consumption of gasoline in this week was perforce curtailed owing to the extreme difficulty automobiles experienced in getting through the snow. Gasoline is quoted at 31½c per gallon. Coal oil is quoted at prices found in current quotations. An advance in coal oil would not come as a surprise.

Fence Staples Decline 25c Per Keg

Toronto.

STAPLES, WIRE, NAILS.—Of prime interest in the market for wire products is a decline in the price of wire fence staples of 25c per keg, which now makes the price of bright staples $5.50 per keg of 100 lbs. and $6.50 per keg for galvanized fence staples. The usual extra of 25c is charged where amount taken is in 25-lb. or 50-lb. quantities. Wire nails are in very firm market. Some manufacturers who have been endeavoring to buy wire rods in the United States state the best offer they could get for nearby delivery was somewhere between $70 and $80 per ton. The United States Government price on wire rods is $57 per ton, but this does not apply to shipments for export. Manufacturers of wire rods are left free to make their own prices on such quotations. Intimations were made that if it became necessary to purchase rods at these prices that nails would have to advance to $5.75 per keg. There are intimations that nails may advance in the United States, and should this take place there would in all probability be a sympathetic movement in the Canadian market. Quotations were made during the week on the basis of $5.45 per 100 pounds. Wire products of various kinds held steady during the week, smooth steel wire being quoted at $6.50 per 100 pounds base.

Compression Coupling Tees Advance on Lists

Toronto.

COUPLINGS. — Solderless compression coupling tees have made a considerable advance on list prices. Tees with tubing both ends and pipe thread on other end on 5/16-inch size have been advanced 9c on list price, making the list price now 30c each. For ⅜-inch tee, with tubing both ends and pipe thread on other end, the list price has been advanced 10c, making the price now 40c list each. For ¼-inch tees the list has been advanced 7c and is now quoted at 25c each list. These couplings are used for connecting joints on gas, oil or gasoline pipes to fit copper, brass, aluminum or steel tubing. In small quantities these couplings are subject to a discount of 25 per cent. to the retail trade, 30 per cent. discount in quantities of 50 and 35 per cent. in quantities of 200.

Electric Lamp Adapters Go Higher

Toronto.

LAMP ADAPTERS.—An advance of 2c on list prices of electric lamp adapters has been made effective. Adapter for oil burner with fibre candelabra socket is now quoted at a list price of 35c each. Adapter for gas burner with fibre candelabra socket has also been advanced to 35c list. Lamp base adapters which enable the use of a miniature base lamp with a candelabra socket have declined 1c on list and are now quoted at 6c list each. The regular discount from these prices in quantities less than 25 is 25 per cent. In quantities of 25 the discount is 30 per cent. and in quantities of 100 the discount is 35 per cent.

Chain Tire Lock Lists Advance 100%

Toronto.

TIRE LOCKS.—An advance amounting to approximately 100 per cent. on the list prices has been made effective in chain tire locks. The attachment consists of heavy steel safety chain, with chain three feet long, which permits of fastening around several tires and insures against tires being stolen. Type with galvanized chain ends have been advanced to $1.35 list each, the former list price being 65c. Bright chain with enameled ends and pantasote cover is now quoted at $1.55 list, the former list price being 80c. Bright chain with enameled ends and oil-tanned leather cover is now quoted at $2.10 list each, the former list being $1 each. Bright chain only has been discontinued as has also the bright chain with enameled ends and enameled duck cover. These tire locks are subject to a discount of 25 per cent. to the retail trade.

Automobile Locks Decline 25c on List

Toronto.

AUTO LOCKS.—A decline of 25c on list price of the auto lock has been made effective, which now makes the list price $1.25 each. During the past year this line registered an advance to the amount of the decline now recorded. The device consists of a polished, cast-brass case, with adjustable tempered steel shackle, with double-locking bolts and is capable of twelve changes. It is used for locking one or two of the levers together with part of the frame and one spoke of the steel wheel and it becomes impossible to turn corners. It is possible to start the car but it is impossible to make a turn when this device is attached to the steering wheel. This line is subject to a discount of 25 per cent. in small quantities, 30 per cent. discount in quantities of 12 and 35 per cent. in quantities of 48 and over.

Decline in Price of Radiator Covers

Toronto.

RADIATOR COVERS. — Any price movements in the downward direction come as welcome news after the long period of rapidly advancing prices. Radiator and engine covers for the extra large and large cars have been decreased in price while the price of the medium sized covers has been advanced. For extra large cars where the list price was formerly $14.70 it has been reduced to $13. Radiator cover only for extra large cars has been reduced 15c on list price to $6 each. For large cars the radiator and engine cover is now quoted at $12 list each, being a decline of $1.35. Radiator cover only for the large car, on the other hand has been advanced 65c on list, making the price now $6.15 each. For medium sized cars there has been a considerable advance on the radiator and engine cover, the new list price being $10.75, an increase of $1.75. Radiator cover only for medium cars has been advanced 50c which now makes the selling price $5 each. Discounts on these lines remain unchanged at 25 per cent. in quantities of less than a dozen, 30 per cent. in quantities of 12 and 35 per cent. in quantities of 48.

Grease Cups Go Up 2c to 4c on List Price

Toronto.

GREASE CUPS.—An advance of 2c each has been made on the price of the nickel-plated grease cups which now makes the price of the 5/16-inch and ¼-inch by 32 thread 33c each. Brass grease cups ⅛-inch thread have been advanced 5c each on list, making the price now 45c each. Nickel-plated ⅛-inch thread, capacity ½ oz. has been advanced 3c on list, making the price now 50c each. Discount on grease cups is 25 per cent. for small quantities, 30 per cent. in quantities of 24 and 35 per cent. in quantities of 96.

Shackle Bolts Show An Upward Tendency

Toronto.

SHACKLE BOLTS.—An increase of 5c on the list price has been registered for shackle bolts of 7/16-inch and ½-inch diameter and 10c on bolts of 9/16-inch and ⅝-inch diameter. The price for the two former sizes is now 65c each list and for the latter two sizes 70c list each. These bolts range in length from 3½ inches to 4½ inches. This bolt is used generally for fitting shock absorbers to the medium-priced cars and is furnished with nickeled grease cup and castellated nut. Discount from above list prices is 25 per cent. on quantities

of less than a dozen, 30 per cent. on quantities of 12 and 35 per cent. on quantities of 48.

Roof Patches and Patching Strips Quoted

Toronto.

PATCHES.—Prices are now being quoted on Stick Tite windows, roof patches and patching strips for mohair tops. List prices on Stick Tite windows are as follows: No. 1, $1.25 each; No. 17, 80c each; No. 3, $2 each; No. 4, $2.60 each; No. 6, 80c each; No. 7, $1.05 each; No. 8, $1.60 each; No. 9, $1.35 each. Patching strips of same brand are quoted list as follows: No. A, 50c; No. B, 55c; No. D, 65c; No. F, 70c. Above prices on windows and patching strips are subject to a discount of 25 per cent. in small quantities, 30 per cent. in quantities of 12 and 35 per cent. in quantities of 48. Stick Tite roof patches are quoted at list prices as follows: No. A, 45c per box; No. B, 50c per box. Patches are subject to a discount of 25 per cent. in quantities of less than 24 boxes, 30 per cent. in quantities of 24 and 35 per cent. in quantities of 96 boxes.

Cut-Out Outfits Decline; Radiator Covers Higher

Toronto.

CUT-OUTS, RADIATOR COVERS. — A decline of 15c in the list price of O.K. cut-out outfits has been recorded during the week. With this decrease in price the outfit is now sold at $1.75 list, subject to a discount of 25 per cent. in less than dozen lots, 30 per cent. discount in lots of 12 and 35 per cent. discount in quantities of 48 and over. No. 12 radiator covers for 1916 Ford cars have been advanced 55c each on list price, making the quotation now $2.85, while the No. 13 radiator cover for 1917 Ford cars has been advanced 70c on list, making the list price now $3.30 each. Radiator covers carry a discount of 25 per cent. in lots of less than one dozen 30 per cent. in lots of 12 and 35 per cent. in lots of 48.

Weather Protectors Are Lower in Price

Toronto.

WEATHER PROTECTORS.—One of the lines to show a decrease in price during the week is that of weather protectors for Ford cars. This device is designed to insulate the floor from the excessive heat of the engine and drives the warm air back under the car by closing the lever slots. In like manner it is designed to keep the cold from entering around the lever slots in the winter time. The list price is now $2.25 each, which represents a decline of 25c. Discount to retail trade is 25 per cent., in quantities of 6 a discount of 30 per cent., and in lots of 24 a discount of 35 per cent.

Wire Strainers Advance 10 Per Cent.

Toronto.

WIRE STRAINERS.—An advance of approximately 10 per cent. has been made on the price of wire strainers, wire fry baskets and wire sink strainers. On one line of strainer, the No. 716, the increase has been considerable, amounting to 50 per cent. The present price of this number is $1.35 per dozen as compared with 90c formerly. The price of No. 725 is now $4 per dozen, which represents an approximate increase of 10 per cent. Fry baskets No. 208 are quoted at $2.25 to $2.50 per dozen and wire sink strainers at $1.60 to $1.80 per dozen. Above prices are net to retail trade.

Motor Goggles and Pole Sockets Go Up

Toronto.

GOGGLES, POLE SOCKETS.—An advance of 10 per cent. has been made effective on motor goggles. No. 25 assortment containing a set of three dozen is now quoted at $24 per dozen. An advance of approximately 10 per cent. has been made effective in No. 7 pole sockets which now makes the selling price $10 per gross net. These latter are sockets for curtain poles.

Joy Riding.

Celluloid Handled Knives and Toothpicks Up

Toronto.

KNIVES, TOOTHPICKS. — An increase in the price of celluloid handled table knives has been made during the week. In the round handle dessert knives No. 710 the price is now $3 per dozen net while the table knives are quoted at $3.10 per dozen net. Square handled dessert knives No. 744 are quoted at $3.10 per dozen and square-handled table knives at $3.25 per dozen. Hardwood toothpicks have advanced 50c per case and are now quoted at $4 per case net of 100 packages.

Toilet Paper Goes Down 15 Per Cent.

Toronto.

TOILET PAPER.—A decline of 15 per cent. has been put into effect on toilet paper during the week through the changing of the discount to 35 per cent. off list. The former discount was 25 per cent. off list price. List prices on various brands are as follows: Crystal, $7.60 per case of 100 rolls; Majestic, $8.70 per case; Saxony, $10.90 per case; Popular, $12 per case. Discount of 35 per cent. applies to case lots. In three case lots the discount is 35 and 5 per cent. and in 10 case lots the discount is 35 and 10 per cent.

Manicure Scissors and Pocket Scissors Up

Toronto.

SCISSORS.—An advance amounting to 10 per cent. has been announced in manicure scissors and pocket scissors. For the manicure scissors No. 3490 the price is now $6 per dozen. For No. 63 pocket scissors the new price is $2 per dozen. Above prices are net to the retail trade. Scissors are much in the same category as pocket knives. In the latter commodity there is a very material shortage at the present time.

Certain Makes of Valves Show Big Advance

Toronto.

VALVES.—Considerable higher prices have been made effective on Pratt & Cady valves through the changing of the discounts. On the extra heavy bronze globe and angle valves S.E. the new price is on the basis of 35 per cent. on list, the former price being 30 per cent. on list. One of the heaviest advances is in the bronze renewable ring gate valves ¼-inch to 2-inch. On this line where they were formerly sold on the basis of list plus 40 per cent. they are now sold at list plus 60 per cent. The following table will show the lines in which changes have been made, together with the previous discounts and the new discounts:

	Former Discount	Present Discount

Pipe Cutters and Parts Go Higher

Toronto.

PIPE CUTTERS, PARTS.—A considerable advance has been made in the price of Barnes pipe cutters and Saunders pipe cutters, together with the parts therefor. Where Barnes pipe cutters were formerly quoted at 37½ per cent. off list they are now quoted at 30 per cent. off list. Parts for Barnes pipe cutters are now quoted at 25 per cent. off list, the former discount being 32½ per cent. Saunders pipe cutters that were formerly quoted at 27½ per cent. discount from list are now quoted at 16 2/3 per cent. discount. Parts for Saunders pipe cutters are now quoted at a discount of 10 per cent. off list, the former discount being 22½ per cent.

Stocks and Dies Take Upward Swing

Toronto.

STOCKS, DIES.—A substantial advance has been made effective in Pratt & Cady stocks and dies through the changing of the discounts on these lines. Stocks and dies No. 1086 are now quoted at a discount of 10 per cent., the former discount being 22½ per cent. Stocks and dies No. 1087 that formerly sold at 10 per cent. off list have been advanced to net list. No. 1085 stocks and dies are now quoted at list plus 30 per cent., the recent price being net list.

Cotton Twine Goes Up 2c Per Pound

Toronto.

COTTON TWINE.—An advance of 2c per pound on cotton twine has been made effective as a last-minute change just before HARDWARE AND METAL is about to go on the press. The range of prices on three-ply is now 48½c to 60c per pound and on four-ply 52c to 65c per pound. The high price in the raw cotton market is responsible for the increase, spot cotton in the New York market having reached 31c per pound during the week.

Priority Established For Coke Shipments

Toronto.

IRON AND STEEL.—Due to the fact that the United States Government has considered the situation in coke serious enough to place it fourth on the priority list for movement of freight by railroads, it is thought the supplies available might show some improvement in that country in the not distant future. Priority orders have been issued effective December 12 whereby preference is given in the following order: First, railroad fuel; second, to livestock and perishable freight; third, to military supplies and shipments for the United States Government; fourth, to coal to and for by-products coking plants; fifth, to coal and coke and raw material for current use. Canadian smelters are experiencing the same difficulty in getting supplies of coke, and it is possible the new order will help the situation materially. Prices of iron and steel held unchanged during the week.

Prices On Sheets Held Steady During Week

Toronto.

SHEETS, PLATES.—The market for sheets and plates held steady during the week after a period of more or less rapid readjustment. Some concerns have consistently held their prices at fairly high levels, as they assert it will be increasingly difficult to get supplies of sheets and that present prices are not inconsistent with the outlook for the future. Quotations were made on the same basis as last week. Demand for sheets is reported fairly good.

Corrugated Sheets In Light Demand

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—There was quietness in the market for corrugated sheets, conductor pipe and eavetrough during the week, as the season of the year naturally militates against a demand. Prices remained unchanged at the recent readjustment.

Boiler Tubes Go To Australia And Japan

Toronto.

BOILER TUBES.—A Toronto dealer states that a carload of boiler tubes has been sold to Australian buyers and another carload to Japanese buyers. Stocks of these tubes were reasonably good at the time of sale, and the transaction was permitted to be carried through only because these tubes had been in warehouse here before the recent order prohibitng sale except under special permit in each instance. These sales have accordingly reduced the available stocks for Canadian trade by this amount. Prices held unchanged during the week.

Solder Again Goes To Higher Levels

Toronto.

LEAD AND ZINC PRODUCTS.—Owing to the situation in tin a further advance in solder has been made effective during the week. Guaranteed solder has advanced 1½c per pound, and is now quoted at 42½c. Strictly half-and-half is quoted at 39½c, an advance of 1¼c. Commercial solder has been advanced 1c per pound to 36¼c, while wiping solder has been advanced ½c, and is now selling at 38½c. Lead sheets and lead pipe held steady in price during the week.

Stagnant Market For Old Materials

Toronto.

OLD MATERIALS.—Stagnation characterized the market for old materials during the week. Wholesalers held their prices steady during the week, but did not show any keenness to buy. On the other hand, holders of old materials showed a disposition to refrain from offering their goods. Mills in the United States are showing very little interest in buying.

Tin Continues In Active Market

Toronto.

INGOT METALS.—Tin continues to be the centre of interest during the week. Canadian tin is still quoted lower than on the New York market. Interest in copper is beginning to revive owing to a conference that is to be held in Washington on Friday of this week between the copper producers and the War Industries Board. Business in ingot metals is reported fairly good.

COPPER.—Producers of copper have started to make assertions that the established price of 23.50c is not in conformity with the productive cost at the time of the making of the price. It will be pointed out at the forthcoming conference in Washington that labor troubles at the mines have added greatly to the cost. The general impression is, however, that the Federal Trade Commission believes that the original price fixed by the Government was higher than the facts warranted. In the local market the prices ranged from 30c to 32c for casting copper.

TIN.—There is active interest in tin in the local market and prices were firmly maintained at the quotations of last week. In one instance where quotations were made on a basis of 75c to 80c per pound the range was narrowed to 77c to 80c. One large dealer continued to quote on the same basis as last week. In the primary market in New York quotations as high as 86c per pound have been made on Straits tin.

SPELTER.—There was an easier trend to the local market in certain quarters and prices were quoted ¼c under the low quotations of last week, making the range from 9¾c to 10½c per pound. The question of spelter prices is to come up for discussion at Washington in the near future.

LEAD.—There was a quiet market locally for lead, with demand fair. Prices held unchanged at a range of 8¾c to 9c per pound. Fixation of a maximum price by the United States Government is an item that is scheduled for discussion in the near future.

ANTIMONY.—While some concerns continued to quote at a range of 16c to 18c per pound, one concern gave a firm quotation of 18c per pound. Business in this metal is not heavy at the present time. In the primary market dullness was manifested.

ALUMINUM.—Quotations held unchanged at 60c per pound. Interest in this commodity is not very keen at the present time. Prices in the United States market held unchanged during the week.

PIG IRON.—Smelters of foundry iron continue to make sales for delivery in nearby weeks on the basis of $50 per ton. The coke situation is giving considerable concern. Canadian smelters are piecing out their supplies of coke by the use of materials that have not been thoroughly seasoned.

LONDON MARKETS

LONDON, Dec. 13. — Price changes have been sufficiently numerous during the week to keep the interest keen on quotations. Turpentine and fence staples are two lines that show lower prices while advances have been recorded on rifles, calf meal, skates. Sleigh bells are in active demand now that real winter with plenty of sleighing is here. Business in this district is seasonably good. Christmas and winter goods are moving freely, with hand sleighs, skates, toboggans, snowshoes and other articles in good demand. Prices on the majority of lines continue firm, while collections are reported very satisfactory.

Single Shot Rifles Have Been Advanced

London.

RIFLES. — Higher prices have been put into effect on Stevens single shot rifles and prices which now prevail are as follows: No. 14½, Little Scout, $4 each; No. 26, Crack Shot, $5 each; No. 12, Marksman, $6.50 each; No. 17, Favorite, $8 each.

Snowshoes Moving Freely

There is an active demand for snowshoes now that there is plenty of snow. Prices that prevail on the various lines are as follows: 10 x 33-inch Boys', $2.35 per pair; 11 x 36-inch Ladies', $2.85 per pair; 12 x 42-inch Men's, $3.25 per pair; 14 x 42-inch Men's, $4 per pair.

Calf Meal Registers An Advance During Week

London.

CALF MEAL.—An advance was recorded during the week on Royal Purple calf meal and the new prices are as follows: In 25-lb. boxes, $4.50 per 100 lbs.; in 50-lb. boxes, $4.40 per 100 lbs.; in 100-lb. boxes, $4.30 per hundred pounds.

New Line Electric Grill

A new line of electric grill has been placed on the market known as Canadian Beauty Grill No. 285, the list price of which is $7, and Canadian Beauty Toaster Stove No. 235, the list price of which is $5.50 each. The above prices are subject to a discount of 25 per cent.

Fence Staples Show Decline Of 25c Hundred

London.

STAPLES.—A decline was made effective in the price of bright and galvanized fence staples. Bright are now quoted at $5.50 per keg of 100 pounds and $5.75 per hundred pounds in 25-lb. boxes. Galvanized staples in 100-lb. kegs are quoted at $6.25 per 100 pounds and in 25-lb. boxes at $6.50 per hundred pounds.

Wire Nails Firm

There is a firm market for wire nails, but prices in the local market hold unchanged at $5.45 base per 100 lbs. for standard steel wire nails and $5.75 base per hundred pounds for cut nails. Manufacturers find it difficult to get quotations on wire rods in the United States markets for anything near the Government established price of $57 per ton.

Skates Have Advanced; Hockey Sticks In Demand

London.

SKATES. — As intimated in these columns last week there was a strong possibility that skates would advance, such advance having been put into effect in this district during the week. Star brand hockey and spring skates have been advanced approximately 15 per cent. through the changing of the discount, these lines now being quoted on the basis of 20 per cent. off list as compared with the former discount of 30 per cent. Following are the list prices on some of the best selling lines of Starr skates, which prices are subject to a discount of 20 per cent.:

Spring, Acme, No. 100, $1.30 per pair; hockey, plain, No. 153, $1.25 per pair; hockey, N.P. Bull Dog, No. 154, $1.65 per pair; hockey, N.P. Climax, No. 173, $2.50 per pair; hockey, N.P. Scotia, No. 176, $3.25 per pair; hockey—N.P. Mic-Mac, $5 per pair; hockey, N.P. Velox, $6.50 per pair; hockey, tube, $6 per pair; hockey, N.P. Ladies' Beaver, No. 157, $2.50; hockey, N.P. Ladies' Beaver, flanged, No. 162, $3 per pair.

Hockey Sticks, Pucks And Skate Screws Moving

London.

HOCKEY STICKS, PUCKS, SCREWS.—Skating accessories are having a good sale at the present time now that the ice is in good shape. Boys' Red hockey sticks are quoted at 85c per dozen; Boys' White hockey sticks are quoted at 85c per dozen; Men's Rock Elm at $2 per dozen; Spalding line hockey stick at $3.75 per dozen and MicMac hockey stick at $4.75 per dozen. Oval head skate screws, ⅜ x 6, are quoted at 25½c per gross, while ⅝ x 6 are quoted at 26¾c per gross. Boys' hockey pucks are quoted at 90c per dozen and men's regulation puck at $1.45 per dozen.

Snow Shovels And Hand Sleighs In Good Sale

London.

SHOVELS, SLEIGHS. — There is a good sale of snow shovels at the present time, induced by the recent storm. Steel snow shovels are quoted on the basis of 12½ per cent. off list, while wood snow shovels, 16 x 20-inch, are quoted at $4.25 per dozen, and 18 x 20-inch at $4.75 per dozen. Galvanized snow shovels 15 x 18-inch are quoted at $7.75 per dozen, while 15 x 21-inch are quoted at $8.50 per dozen. Hand sleighs are also in good sale and are quoted on the basis of 35 per cent. off list. Leather ankle supports are quoted at $2.65 per dozen and perfection steel ankle supports at 75c per pair.

Flashlights Moving Freely

There is an active movement in flashlights and batteries at the present time, the discount on these lines being quoted at 33 1-3 per cent. off list. Automobile headlight conaphores are quoted at a discount of 25 per cent. off list.

Sleigh Bells And Gongs Having Good Sale

London.

BELLS.—Now that good sleighing conditions are here there has been a free movement of collar bells, team bells, shaft gongs and chimes. Following are prices that prevail on some of these lines:

Collar bells on strap—No. 2, $1.30 doz.; No. 3, $1.45 doz. Steel team bells—No. 7, $1.30 doz.; Rough bell metal team bells—No. 2, $3.35 doz.; No. 3, $3.85; No. 4, $5.50; No. 5, $6.50. Swiss team bells—No. 2, $4.60; No. 3, $5.90; No. 4, $7.50; No. 5, $10.75. Shaft gongs—3 bell steel, N.P. No. 7, 45c pair; 4 bell steel, N.P. No. 13, 70c pair; 4 bell brass, N.P. No. 90, $1.35 pair; 4 bell bell metal, N.P. No. 16, $2.35 pair. Swedish chimes—No. 1400 x 4 bell, $2.10 each; No. 1500 x 4 bell, $2.50 each; No. 1700 x 6 bell, $3.35.

Turpentine Down 3c; Linseed Oil Steady

London.

TURPENTINE, LINSEED OIL.—A decline of 6c per gallon was recorded in turpentine during the week, which makes the price of single barrel lots 71c per Imperial gallon and in two to four barrel lots 70c per gallon. In five-gallon lots the price is 78c. The decline was due to an easier situation in the primary market. Linseed oil is having slow sale at present and prices hold steady as follows: 1 to 2 barrels, raw, $1.48 per gallon; boiled, $1.51. Three to five barrels, raw, $1.47; boiled, $1.50. Six to nine barrels, raw, $1.45; boiled, $1.48.

White Lead in Oil Unchanged

Prices were unchanged for white lead in oil. In ton lots pure grade is quoted at $16.20 per 100 lbs. and in less than ton lots, $16.55 per 100 lbs.

WINNIPEG MARKETS

WINNIPEG, Dec. 13.—The recent drop in the temperature has greatly stimulated business in skates, hockey sticks, etc., and with curling now under way, curling stones and brooms are beginning to move; sorting orders in general hardware lines continues fair with god sales reported on cutlery, silverware and other seasonable lines.

Black And Galvanized Sheets Register Decline

Winnipeg.

SHEETS.—A further drop in the American markets on sheets has likewise affected the Winnipeg markets and prices to-day show a decline varying from 50c to $1.05 per 100 lbs. on galvanized sheets and $1.25 to $2.50 per 100 lbs. on black sheets according to the gauge. To-day's market prices are quoted herewith:

	Per 100 lbs.	
Galvanized Sheets—	Premier	Apollo or Fleur-de-Lis
10¾ oz.	$11 20	$11 20
28 ga.	10 90	10 90
26 ga.	10 60	10 60
24	10 45	10 45
22	10 45	10 45
18-20	10 30	10 30
16	10 20	10 20
Black Sheets—		
28 ga.	9 00	....
26 ga.	8 90	....
22-24	8 85	....
18-20	8 80	....
16	8 50	....
14	8 40	....
12	8 50	....
10	8 50	....

Canada Plate Has Been Reduced In Price

Winnipeg.

PLATE.—The recent weakness of the American markets has caused a decided drop in the price of Canada plates which show a reduction of $1.75 per box on half polished and $1.25 per box on full polished. Prices quoted to-day are as follows:

Canada plates, 18 x 21 in.; 18 x 24 in.; 20 x 28 in., half polished, $10.25 box; full polished $11.75 box.

Batteries Advance 2c To 4c Each

Winnipeg.

BATTERIES.—Owing to increased costs of raw materials entering into the manufacture of North Star batteries, another advance has been found unavoidable and new prices show an increase of 2c on No. 6 and 4c on No. 8 making to-day's prices as follows:

No. 6 Batteries of 12 $32.50; boxes of 50, $33.50; lots of 25 to 50, $36; less than 25, $41.

No. 8—Barrels of 50 $84.50; boxes of 25, $86; lots 12-25, $90; less than 12, $100.

Sweat Pads Go Up 40c Per Dozen

Winnipeg.

SWEAT PADS.—The firmness of the cotton market has recently caused advances in many articles of such manufacture, the most recent among these being sweat pads which again show an increase of 40c per doz. and are quoted to-day on the following basis:

Brown and white, No. 162W x 11 in., $6 80 doz., $77.50 gross; 12, $6.95 doz., $79.20 gross.

Red edge, No. 63W x 11 $7.20 doz.; $82.10 gross; 12, $7.35 doz.; $83.80 gross.

Crosscut Saw Handles Up 10%

Winnipeg.

SAW HANDLES. — Cross-cut saw handles which have remained firm for a considerable period show an advance of approximately 10 per cent. over former prices and are quoted to-day at the following prices: No. 2, 40c each; No. 3, 40c pr.; No. 107, 60c pr.; No. 9, 50c pr.; supplementary handles $1.80 doz.

Pipe Cutters Up 5 to 7½ Per Cent.

Winnipeg.

PIPE CUTTERS.—New prices have just been issued by the manufacturers of pipe cutters and show advances ranging from 5 to 7½ per cent., making to-day's prices as quoted:

Barnes, No. 1, $2.70 each; No. 2, $3.60 each; No. 3, $6.00 each.

Extra wheels, No. 1, 16c each; No. 2, 20c each.

Saunders, No. 1, $2.10 each; No. 2, $3.15 each.

Extra wheels, No. 1, 18c each; No. 2, 24c each.

Wrenches Show An Upward Trend

Winnipeg.

WRENCHES.—Owing to the ever increasing cost of production a further advance has been necessary on Perfect handle wrenches and includes both the pipe and nut patterns. To-day's market prices are given herewith:

Perfect handle nut wrenches, No. 615 x 6 in., $13 doz.; 8 in., $15.60 doz.; 10 in., $18.20 doz.; 12 in., $23.40 doz.; 15 in., $31.20 doz.; 18 in., $41.60 doz.

Perfect handle pipe wrenches, No. 643 x 8 in., $1.25 each; 10 in., $1.40 each; 14 in., $1.90 each; 18 in., $2.75 each; 24 in., $4.00 each.

Cotton Products Go Still Higher

Winnipeg.

COTTON PRODUCTS.—Among other lines affected by the firmness of the cotton market is chalk lines, wrapping twine and candlewick sacking, all these commodities showing further increases. To-day's ruling prices are herewith quoted:

Chalk lines, No. 18, $3.60 gross; No. 21, $4 gross; No. 24, $4.50 gross; No. 30, $5 gross. Wrapping twine 3-ply, 57½c lb.; 4-ply, 60c lb. Candlewick packing, 58c lb.

Shaving Brushes Go To Higher Levels

Winnipeg.

SHAVING BRUSHES.—Prices on rubberset shaving brushes which have remained firm for the past six months again show an upward trend with the usual Christmas demand. A few of the more familiar numbers are quoted herewith: No. 402, $3.25 doz.; No. 318, $7.20 doz.; No. 228, $1.40 doz.; No. 221, $7.50 doz.; No. 405, $4 doz.; No. 100, $9.80 doz.; No. 49-1, $6.40 doz.; No. 49-3, $8.25 doz.; No. 50-2, $5 doz.

Turpentine And Linseed Oil Steady

Winnipeg.

TURPENTINE, LINSEED OIL.—The turpentine market shows increased firmness, and despite rumors of further advances still remains as formerly quoted viz. barrels 80c gal.; ½ barrels, 83c gal.; 5 gal. lots, 85c gal.; 1 gal. lots, 85c gal. plus the usual extras for containers.

Firm markets are reported on linseed oil and while no change in prices is recorded at present, a change would not be surprising owing to transportation difficulties and severe weather together with reports of a smaller yield than expected in the Argentine. To-day's ruling prices are raw, $1.65 gal.; boiled, $1.68 gal.

WEEKLY PAINT DEPARTMENT

Developing Action in Paints

Interior Finishes For Householder, Factory or Office—Motor Boat and Motor Car Owners Good Prospects—Use of Varnish on Autos Beneficial.

THERE is only one way to make your paint department successful and that is to study it from the standpoint of sales every month in the year. It is by no means impossible to keep your goods moving even in zero weather and it is in your own interests that every effort be put forth to keep the dust from accumulating on what should be active winter lines.

The many finishes now being marketed for interior work offer a field of activity which it would be well for all merchants to examine closely. It is possible now to make sales for floor paints, wall paints, varnish stains for use on floors, walls or furniture, varnishes and kalsomines, etc. It is not only to the householder that sales for these lines can be made but to the owners of manufacturing plants, office buildings, store buildings and automobile owners.

Appeal to the Householder

To the householder, whether town or farm, the use of paint should not present such terrible difficulties, either in having the professional painter do the work or in taking care of the job himself. Full directions for use should be given with the various finishes and it will be found by no means difficult for anyone to apply these products. With the scarcity of help now existing, the ease with which the amateur can secure results should be pointed out.

Give Factories and Offices Attention

It takes a great number of the small sales made to householders to result in a big volume of business, however, and it should be the aim of every merchant to encourage the liberal use of paint by factory owners and those owing office buildings. Clean, bright, attractive offices and warehouses add prestige to the owner, and result in better work from the employee. These paints are being fully demonstrated every day and here the merchant can find an outlet for his paint products which will materially increase his sales.

Soliciting the Motorist

During the winter season owners of motor boats and automobiles who store their pleasure craft usually intend painting and varnishing before using again and utilise their spare time in accomplishing this object. Motor boat owners are splendid prospects for paint, for even more than the automobilist do they like to handle this work themselves and in offering suggestions and giving instruction on the uses of the various kinds suited to their purposes the merchant developes a connection which will result in business in other lines as well.

To the motorist who stores his car during the winter, an appeal similar to that used on the motor boat owner should be productive of results. Even those who drive all winter must lay up their cars at some period for refinishing and it should be advisable to keep closely in touch with all motorists so that any contemplated move towards painting could be taken advantage of.

Use of Varnish Economical

A careful study of the question reveals the fact that frequent varnishing preserves the painting and exterior finish of cars and constitutes a measure of economy which should be strongly impressed on car owners. Frequent varnishing is a decided necessity if the best economy in painting is to be had. With the rapid growth of the motor industry, and large increases in automobile owners it might be well for merchants to watch this phase of their paint business carefully.

FOOD CONTROLLER MAY LEGISLATE FOR CO-OPERATIVE DELIVERY

One of the Matters That is Likely to Come Up for Decision in the Near Future

There is every likelihood that the matter of co-operative delivery will be one of the next matters that will be dealt with by the Food Control Department. It is generally felt that here is a place where there is a totally unjustifiable overlapping and consequent increased expense, such as should not exist at the present time. HARDWARE AND METAL is reliably informed that this matter is under consideration and may be expected to occupy the attention of the Food Department officials in the near future. At present it is impossible to say how extensive any legislation on this matter might be, whether it would be restricted to the smaller places, where experience has taught that it is entirely practicable, or whether an effort will be made to introduce some such system all over the country.

This matter will probably be decided in the next week or so.

Canada Paint Winnipeg Convention

Western Salesmen Canada Paint Co. Meet in Winnipeg—Business For Year Reviewed—Outlook Promising.

THE salesmen of the Canada Paint Co. held their Western annual convention recently at Winnipeg at which the Western representatives only were present. The convention extended over a period of four days, opening on Monday and winding up Thursday night.

W. J. Bland, salesmanager of the Canada Paint Co. in the West, took charge of the meeting, reviewing the lines manufactured by the company very thoroughly. In going over the year's business it was announced that a very satisfactory increase had been made over the previous year which would seem to be in accordance with the general increase in business in Western Canada.

The representatives of the Canada Paint Co., this year are going out with a complete line of paints and varnishes, and the salesmen seem to feel that with the advertising which has been prepared, they should carry the C-P proposition in Western Canada through 1918 successfully. The representatives were very enthusiastic and showed the lively Western spirit throughout the whole of the Convention. With the increased possibilities for more and better business in Western Canada increases in the sales of the many lines which the Canada Paint Co. have to offer are expected from the salesmen.

Optimism prevailed throughout the whole of the Convention, which was brought to a close on Thursday evening by an At Home held in the offices and factory of the company. It was stated that this was one of the most successful Conventions ever held by this Company.

Jamieson's

PURE PREPARED

Paints & Varnishes

"Sprucing Up" about the house

This is the season when the busy householder has time and inclination to do a little painting inside the house. So don't keep *Jamieson's Pure Prepared Paints* in the background just because cold weather has set in. Catch your customer's eye with a nice display of interior finishes and you'll keep paint sales moving steadily all winter.

"Jamieson's" will give your customers permanent satisfaction.

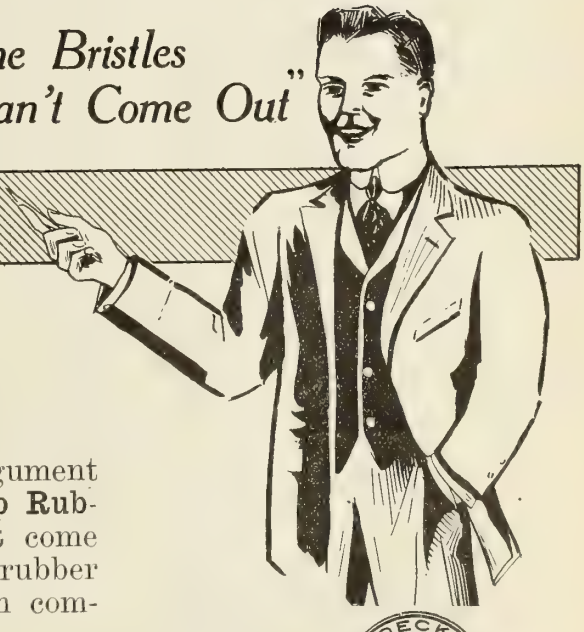
"The Bristles Can't Come Out"



BOECKH'S STEEL (RUBBER SET) GRIP BRUSHES

THERE'S a double-barrelled sales argument in that name—"Boeckh's **Steel Grip Rubber Set** Brushes." The "bristles **can't** come out," because they are first set in hard rubber and then bound tightly and firmly with compressed steel Ferrules.

Master Painters, as well as amateur painters, appreciate the "Painting satisfaction" that is assured by "Steel Grip-Rubber-Set."

BOECKH TRADE MARK EST'D 1885 TORONTO

The Boeckh Bros. Company, Ltd.

TORONTO, ONTARIO

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 12.—The features of the week in paint markets are confined to a reduced price of three cents per gallon on linseed oil; an advance on shellac, following increased costs for methylated spirits and gums, and a change of terms as affecting the various lines of insecticides. Business is normal for this season of the year, with the prospects for future trade conditions very satisfactory. Some are finding a better enquiry for spring lines than they had a year ago and all seem to be very hopeful of a good start being made for early spring. Shellac is now selling at $4 in barrels, being an advance over the old price of 50c per gallon.

Linseed Oil Is Down Three Cents Gallon

Montreal.

LINSEED OIL.—A weakening of price is recorded in the linseed oil market, representing a decline of 3 cents per gallon. The immediate cause of this lowering tendency is traceable to a decreased price for seed, representing three cents per bushel. In so far as the shipping situation for seed is concerned there is probably a worse condition than has prevailed heretofore. Receipts in Winnipeg have fallen off. The severe weather has prevented the delivery of large quantities of seed, and in some instances the haul has been directly reduced as much as 70%. If shipping be secured soon from South American ports, it will probably relieve the matter of deliveries and Argentine flaxseed may then come forward.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.36-$1.40	$1.38½-$1.43
5 to 9 barrels	1.35- 1.39	1.37½- 1.42
10 to 25 barrels	1.34- 1.38	1.36½- 1.41

Shellac Advanced 50c Per Gallon

Montreal.

SHELLAC. — There is an advance in shellac recorded by jobbers here. This is attributable to the increased costs for the raw materials such as methylated spirits and gums. It amounts to about 50c per gallon all round. Quotations are made at $4 for white in barrels and $4.25 per gallon in jugs. Orange is quoted at $3.75 per gallon in barrels, and at $4 in gallon lots.

Turpentine Unchanged; Southern Shipping Slow

Montreal.

TURPENTINE. — Normal conditions prevail in this market and no changes are reported for the week. In the southern Atlantic centres some fluctuating of price has taken place, a weaker tendency developing from the shipping situation. Dealers here state that they have ample supplies for the immediate future. Present demand is light.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.72-$0.75
1 barrel lots	0.74- 0.75
Small quantities	....- 0.83

Terms Changed On Insecticide Lines

Montreal.

INSECTICIDES.—A matter of interest to hardware dealers who stock various lines of insecticides is that of the changed terms effective this week. Formerly, these were billed on the basis of 2%, net 60 days. Now the terms are 1%, net 15 days. This has been found necessary owing to the fact that jobbers and manufacturers are required to pay spot cash for their needs, and even then often are required to await delivery for several months. This will reflect one of the difficulties confronting manufacturers and jobbers, and it will be seen that they are still shouldering large responsibility in financing. Included under this head are the following: Paris green, calpoiso, arsenate of lead (dry and paste), dry lime sulphur.

Mixed Paint For Spring Promises Well

Montreal.

MIXED PAINT.—Paint grinders are busy making their requirements for spring, and with the steady lot of orders that are being received they will be kept well engaged for some weeks to come. Present orders are limited, but for the most part satisfaction is expressed with conditions. Travellers are doing good work, and the condition at country points is reported as being very good in view of the placing business that is being secured.

White Lead In Oil Bookings Received

Montreal.

WHITE LEAD IN OIL.—Small orders obtain these days for this line and the business of consequence is confined pretty well to the orders coming to hand for later shipment. Many dealers order limited quantities to be sent along with their spring paint shipments. No changes locally are reported and the following prices are being quoted: Five ton lots, per hundred, $15.50; one ton lots, $16 and less quantities per 100 lbs., $16.35.

With Firmness Of Tone Putty May Go Higher

Montreal.

PUTTY.—There is a smaller movement of putty this week. Demand is confined to small compass, there being few large orders. Severity of the weather makes it impossible to carry out any program of outside work, either new or of a repair nature. A very firm tone is evident, and some jobbers express their belief that there may be higher quotations in the immediate future. Prices are: Bulk, in casks, $3.60 per 100 lbs.; drums of 25, 50 or 100 lbs., $4.45 per 100 lbs., and bladders, in barrels, $4.70 per 100 lbs.

TORONTO

TORONTO, Dec. 13.—There was an active movement of glass and putty from this market during the past week by reason of the Halifax catastrophe. It is estimated by one large dealer that in all probability about five carloads of glass were dispatched to the relief of the Eastern city. This will have the effect of reducing stocks of glass still further. Should the prohibition of the manufacture of glass take place in the United States it would mean that the end of existing supplies in Canada would be reached that much sooner. Turpentine was in weaker tone during the weak with declines registered. Owing to the difficult situation in obtaining tinplate it is asserted in reliable quarters that there is a possibility that the supplies of cans will be exhausted within twelve months and that manufacturers will have to resort to other kinds of containers.

Linseed Oil Goes To Lower Levels

Toronto.

LINSEED OIL.—A decline of 3c per gallon was made effective in some quarters on linseed oil during the week, which now makes the low quotation $1.36 per gallon for raw linseed oil, with the higher quotation at $1.48. The flaxseed market gave evidence of a sagging tendency during the week and cash prices declined 5½c per bushel at Winnipeg. Some of the large dealers in linseed oil in this market, however, maintained their quotations during the

"It is the best and most economical White Lead we have ever used!"

The letter below expresses most clearly and convincingly the opinion held by people all over Canada about

Brandram's Genuine B. B. White Lead

The Niagara, St. Catharines & Toronto Railway Company are large buyers of paint for their cars and boats. Each year the Steamer "Dalhousie City" requires to be painted, and over a ton of ordinary white lead was the quantity required to cover her. We persuaded them to try Brandram's Genuine B.B. White Lead this year, and they ordered a ton, thinking, of course, that there was no difference in White Lead.

When the steamer was repainted, over 500 lbs. remained. That is, it took just three-quarters as much Brandram's Genuine B.B. White Lead as it did of ordinary White Lead.

This surely substantiates their claim and ours that Brandram's Genuine B.B. is the best and most economical White Lead

Every merchant should handle this best white lead even if he does not carry B-H Paints.

THE NIAGARA, ST CATHARINES & TORONTO NAVIGATION CO., LIMITED
PURCHASING AGENT'S OFFICE

R. WILSON, PURCHASING AGENT

ST. CATHARINES, ONT. October 27, 1917

Mr. W. C. Jackson,
c/o Brandram-Henderson Lt'd.,
Toronto, Ontario.

Dear Sir:-

I am forwarding today, under separate cover, to Mr. Lorriman, the photo of our Steamer Dalhousie City which you were asking about in your letter of Oct. 20th.

This photo is a retouched photo the the G.N.R. have been using for their advertising purposes and I have requested Mr. Lorriman to return this to me when it has served his purpose.

In regard to your B.B. Lead, I cannot say anything better except that it is the best lead we have ever used. It has more covering capacity, doesn't settle in the containers and is the most economical lead we have used.

Yours truly,

R. Wilson

Purchasing Agent.

RW/P

If interested, tear out this page and keep with letters to be answered.

week and expressed the opinion that ultimately there will in all probability be firm and higher prices, especially in the event that Argentine seed does not come into the United States market. A change has been made by oil distributors in less than barrel price, the differential between single barrel lots and less than barrel lots having been advanced 3c, making the basis now 10c per gallon for small lots over the single barrel prices. Cans are charged additional on the basis of 55c for gallon cans, 70c for two-gallon cans, 80c for three gallon cans, 95c for five-gallon cans and $1.25 for ten-gallon cans. The reason for the advance in small lots is attributed to the fact that under winter conditions linseed oil weighs more per gallon than under mild weather conditions.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.36-$1.48	$1.38½-$1.51
3 to 5 bbls.	1.36- 1.47	1.38½- 1.50
6 to 9 bbls.	1.35- 1.45	1.37½- 1.48

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Declines 6c Per Gallon In Week

Toronto.

TURPENTINE.—There was a weakness in the local market for turpentine as indicated last week which has worked out in a decline of 6c per gallon in some quarters from the high quotations of last week. There were further declines in the primary market amounting to 2½c per gallon. The weakness is attributed to the entire absence of space for exporting from the Southern ports, together with the increase in receipts growing out of the rapid marketing of the turpentine secured from the scrape. The weather has been particularly favorable of late for the gathering, distilling and shipping of the scrape. Locally the demand for turpentine is somewhat light.

	Imp. gal.
1 barrel	$0.71-$0.74
2 to 4 barrels	0.70- 0.73
5 gallon lots	0.78- 0.81

Putty And Glass Sent Forward To Halifax

Toronto.

PUTTY, GLASS.—There was an active movement of glass during the week to the stricken city of Halifax. It is estimated that no less than ten to fifteen carloads of glass were hurriedly dispatched to the East, together with considerable supplies of putty. The Mayor of Halifax having indicated that the urgent need was for glass and other building materials no time was lost in seeing that this district contributed a fair share. This need for glass has reduced existing stocks and should it turn out that the United States Government prohibits the manufacture of glass as one of the non-essentials, the time of absolute shortage of glass in the Canadian market will have been shortened considerably by the Halifax disaster. Prices held firm in the local market.

Putty was also in active demand for repairing work at Halifax. Prices held unchanged at those given in current quotations.

May Be No Paint Cans Available In 12 Months

Toronto.

MIXED PAINTS.—One of the leading manufacturers of cans in the Dominion is the authority for the statement that owing to the scarcity of tinplate there is a possibility that within twelve months there will be no paint cans to be had and that the paint manufacturers will have to resort to some other method of putting up their products, either by using containers such as those now used for putty and white lead or some other form. There is strong possibility that the United States will place an embargo on the use of tinplate for anything except for war purposes. Prospects in the Canadian paint trade seem to shape toward a good season next year, as there is anticipation in some quarters that considerable building will have to be undertaken, especially in the cities, to provide for the accretion in population due to industrial activities. Booking orders continue of fairly good volume.

White Lead In Oil In Quiet Market

Toronto.

WHITE LEAD IN OIL.—There was quietness in the market for white lead in oil during the week with no indication that prices are likely to be changed in the immediate future. Demand for white lead in oil is light at the present time except in the instance of paint manufacturers who are now getting ready for their 1918 business. Pure white lead in oil is quoted on the basis of $16.20 per hundred pounds in ton lots and $16.55 in less than ton lots.

Paint And Varnish Remover Advances

Toronto.

PAINT REMOVER.—An advance of 60c per gallon was recorded in the price of Cumoff paint and varnish remover which now makes the selling price $3 per gallon. Other lines of paint and varnish remover hold unchanged at prices given in current quotations.

CANADA FUNDAMENTALLY SOUND

(Continued from page 39.)

both merchants and bankers; we should try to correct this and to shorten terms where possible. The war has done one good thing for us in Canada in that it has given us as citizens of an agricultural country this opportunity to 'clean up.' High prices, while hard on the consumer, have made the farmers rich, and they have given the careful wage-earner more ready money; take advantage of these conditions to get your outstanding accounts paid. I do not think there need be any conflict between merchant and banker in this connection; we are both interested in having the business of the country placed on a sound footing. Any man who has carried on a legitimate business or is doing so now should be able to pay his legitimate debts, and if he is a wise man he will do so. If, on the other hand, he cannot, you had better have that inquest now rather than a year from now.

"There should be co-operation also between us when a mutual customer meets with misfortune. In such a case we should get together and consult—in fact, exchange confidences. However, these cases are always exceptional and should be treated as such.

Man Who Neglects Books

"In my experience the country merchant who neglects his stock neglects his book accounts, and book accounts not collected in season have a strange habit of becoming bad debts.

"I do not know that I have been able to tell you anything new—probably not—for there are singularly few new things in this world, and probably fewer in business than in most lines; but to sum up: (1) In my experience straight, honest dealing pays in the long run. (2) Look after your collections while the collecting is good. (3) Carry no more stock than your business requires, for dead stock means depreciation at all times, and if I am right it will mean serious depreciation in the years that are ahead."

Following the address of Mr. Moffat, President Lamont referred to the excellent work the trade newspapers are doing in Canada, and called on G. D. Davis, editor of HARDWARE AND METAL.

Mr. Davis reviewed briefly the work of the trade newspapers, and pointed out that the trade papers were really pioneers in many branches of the work which is now being carried on by the credit men. He also outlined the increased efficiency found in many retail stores to-day when compared with conditions of a few years ago. There is also a marked improvement in the collection methods of retailers and a general tendency towards doing a cash business wherever possible.

The report of the Improved Mercantile Agency Service Committee was delivered by L. F. Monypenny. A report on the "Special Information Sheet" was dealt with by F. W. Black, Swift Canadian Co., Ltd.

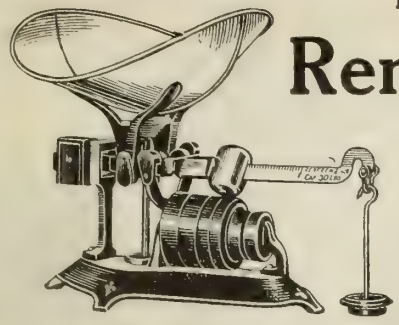
MODERN GARAGE HARDWARE

(Continued from page 53.)

ful consideration of the car owner and if he contemplated building he would quite naturally examine the various sets of garage hardware available. Accompanying this personal letter a circular, furnished by the maker, might be sent and this would be explanatory through illustration.

One large retailer has made it a plan to approach the contractor when he comes into the store for nails, etc., and to enlist his recommendation to the car owner of one of the lines carried by him. This has proven to be excellent.

It is a good plan in the larger centres to keep in close touch also with the architects as they are in a particularly good position to know what is being contemplated in the way of larger and more elaborate garages. It would also be considered essential to use the daily newspaper in enlisting interest.



The

Renfrew

Household Scale

Capacity ½oz. to 30 lbs.

Capture This Ripe Business!

Could you only peep into all the kitchens in your town, what an eye opener there for you! Precious few scales you'd find, guarding the housewife's purchases in these expensive times. Think of the waste! How dead easy to convince and sell that long list of possible customers of yours! Push scales this spring!

Every Renfrew Household Scale is **guaranteed** accurate, and there is a Government Inspector's Certificate of correct weights besides. Neat—compact—handy—just the scale you can sell easily with little talk. The Renfrew often sells itself. Push scales—display them. Write to-day for attractive proposition.

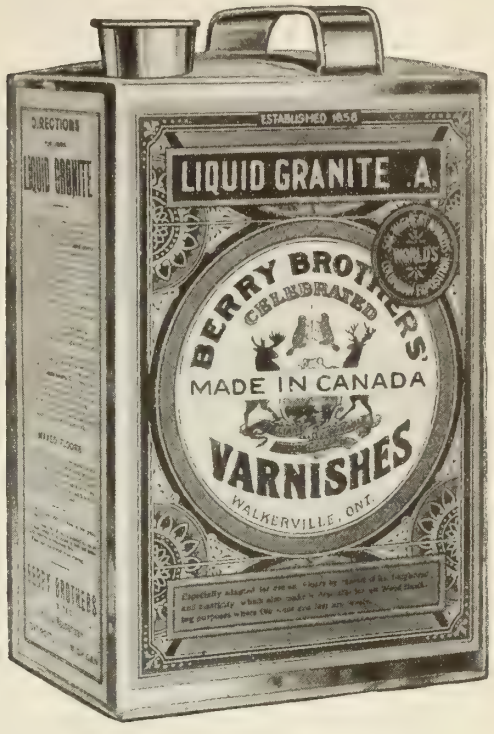
CHICAGO STEEL BENDING BRAKES

MADE-IN-CANADA

Used by over ten thousand Sheet Metal Workers in U. S.

Mail us a post card to-day for catalog and full particulars.

The Steel Bending Brake Works Ltd., Chatham, Ont.



THE great demand for Berry Brothers' Varnishes and Enamels grows greater as consumers realize their economy. They not only produce the most beautiful interiors, but their lasting quality offsets the high cost of labor.

Most buyers realize that labor is the chief item of expense in finishing operations. Those who do not, will thank you for reminding them, as it costs no more to apply "Berry" Finishes that last for many years than the kind that wears out the first year. The difference in the price per gallon is nominal.

Liquid Granite Floor Varnish, Luxeberry Enamels (White, Ivory and three shades of Gray), Luxeberry Wood Finish and Luxeberry Wall Finishes are a few among the many "Berry" products it pays to push because they make permanent customers.

BERRY BROTHERS

Farmers Are Planning for a Big Crop in 1918

They must make their farm produce the maximum crop, for they are going to get high prices for everything they sell. No field can go uncropped in 1918 simply for the want of a fence. They must buy fence—the fence they should have bought two or three years ago, but which they said they would not buy at the high price. They would wait until the price dropped. But they are not going to—they have their eyes open now. No, we didn't do it. We do not pretend to possess the necessary power to open a farmer's eyes—much less his pocket-book. But the farmer has become educated to the higher prices — mostly from hearing the higher price for what he has to sell rather than the price he has to pay for what he buys. He is going after a big crop for 1918 and must have fencing. It is a necessity, not a luxury. A farm is useless without it.

Are You Prepared

to supply the farmers in your section with their fencing requirements in 1918? They look to you as their local hardware dealer to supply them with fencing. Here's your chance to strengthen your connection with the farmers—your customers. Show mail order houses in the Spring that you realize the importance of fencing to the farmer as well as they do. "Ideal" Fence will satisfy every farmer. You want satisfied customers—repeat orders—more profits. There is only one way for the farmer to buy "Ideal" Fence. That is through the dealer. Prepare now for the big fencing season in the Spring. Write us for the "Ideal" Fencing proposition.

The McGregor Banwell Fence Co., Limited - Walkerville, Ont.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

In your preparation for the Christmas rush, don't neglect a stock of

THE RIGHT WAX TO WAX RIGHT

Floors beautifully polished with Ramsay's Wax add cheer to the Christmas home-coming.

A. RAMSAY & SON CO., MONTREAL

TORONTO **Established 1842** **VANCOUVER**

Big Market for Brushes

Will you let us say to you that there is a much larger market in every community than is generally perceived. We make a hundred or more different kinds of brushes. For example, there are **Meakins Brushes** for horse stables and carriage cleaning, for garages and automobile needs, for butchers, barmen, stove-makers; for walls, radiators, floors, bannisters, cornices; for kitchens, parlors, schools; for cream separators, gun barrels, bottles.

We do not suggest that you carry stocks or even a sample of every variety of brush, but we do suggest that you have our catalogue and familiarize yourself with our various brushes in order to be able to suggest the right brush to the right person for the right need.

Sell from our Catalogue—Just a last word: Meakins Brushes are good brushes—and our catalogue will tell you why. Our catalogue is valuable. Have you a copy?

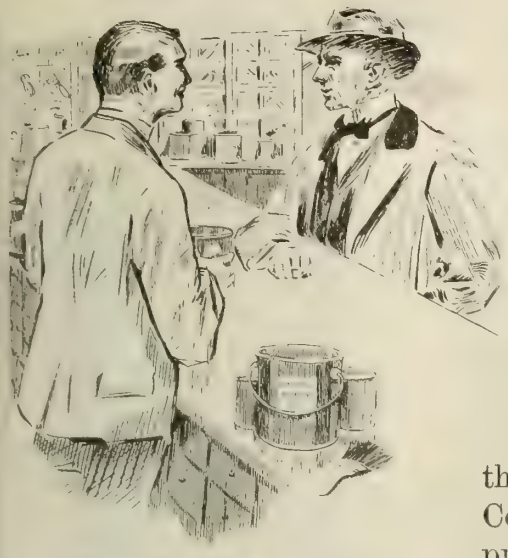
"There's this advantage in painting in the Fall"



Moore's House Colors Give Good Results In any Season.

"The cooler weather means slower drying, and slower drying means a more durable finish."

Here's a strong and reasonable argument with which to combat the prevalent idea that Spring is the only time to get good results from Moore's House Colors. Then, too, the absence of flies and dust is a factor that makes for a more satisfactory job. Moore's House Colors are made from the very best and most lasting pigments combined with Pure Linseed Oil, and the best liquid dryers. Dries hard, but retains sufficient elasticity to prevent cracking and peeling.

The Best Share For Every Plow

CRESCENT FORGE & SHOVEL CO. TRUE TRADE FIT MARK HAVANA, ILL. U.S.A.

CRESCENT PLOWSHARES

Fit Practically Every Plow in Western Canada

OUR WARRANTY: We warrant all goods of our manufacture to be made of the best quality of steel for the purpose intended, and to be made in a workmanlike manner. Fitted plowshares are warranted to fit the plow for which they are intended. The fit of every share is carefully tested before leaving the factory, and every precaution is taken to prevent mistakes, which occasionally occur. Should any share prove defective in fit, material or workmanship, it will be cheerfully replaced free of charge.

Made in Over 1000 Patterns

HOYT METALS

MEMO

December 15th

for your Babbitt Metal file

HOYT FROST KING BABBIT is no experiment. This metal is the result of experience in alloying for over forty years. In placing this metal on the market we are positive we are giving the trade the most efficient and durable babbitt for all round engine and machine work that can be manufactured. We have never had a complaint as to its quality, and have had many letters stating emphatically the superiority of this metal over other babbitts that have been used in the past.

The Hoyt Metal Company believes you will serve your best interests by giving this alloy a trial.

Ontario or Quebec?

Victory Loan money—the $415,000,000—which Province will get most of it? It involves the question of labor. Some say that Quebec will benefit most. THE POST for last week the answer.

Priority Board for Ontario

THE embargo which the United States has put on certain raw materials is hurting Canadian industry in several ways. The feeling is growing that Canada should have a Priority Board which will work in conjunction with a similar board at Washington to assure Canada sufficient supply of needed raw materials to enable Canada to continue certain industries without let or hindrance. The Canadian Manufacturers' Association had a meeting this week to enquire into the whole matter. Read about the proposed solution of a serious difficulty in this week's issue of THE FINANCIAL POST (out to-day).

Saving Billions for Uncle Sam

ONE thousand or so big business men of the United States have volunteered to serve the United States Government, without pay, to help the Government get goods at rock-bottom prices and to organize industry at this time of pressure and crisis. Read in this week's POST this second article of a series by FINANCIAL POST Editor, who went to Washington to get his material and facts first-hand.

$30,000,000 Per Month

IT is authoritatively announced that Canada will receive British munitions orders every month throughout 1918 to the tune of at least $30,000,000—this in addition to what similar business we are getting and to get from the United States. This spells continued industrial and commercial prosperity for Canada. Read about it in this week's POST.

Securities News—Every man owning Canadian securities needs to know just how the market stands with reference to the securities he holds or may think of buying or selling. In THE POST, for 6 cents a week, he can get the very best and latest news about every listed Canadian security, and a rare amount and quality of authoritative and well-informed information. THE POST is invaluable to investors. Also, it is readable in the extreme.

Subscription price is $3 per year. It is published every Saturday.

FINANCIAL POST OF CANADA

BRIGHT OUTLOOK FOR 1918

THERE *never was a time in the history of the Canadian Hardware Trade when wholesalers and retailers were more interested in motor accessories than at the present time.*

Many splendid new motor accessory departments have been opened in Canadian hardware stores during 1917.

The outlook for 1918 *is even more promising. Information at hand indicates that many firms who have not heretofore gone into the motor accessory business contemplate entering the field in a big way in* 1918.

The buyer of one of the oldest and best established hardware stores in a Canadian city of 20,000 *population told a* HARDWARE AND METAL *editor a few days ago that although up to the present they have held aloof from going after the motor accessory business in a big way, they are planning for a new department for* 1918.

Still another large wholesale and retail hardware firm is now preparing a catalog (the first one) of motor accessories and is planning for big business in 1918.

Another of the largest and best known Canadian wholesale hardware firms realizing the growing demand from retailers for motor accessories, is planning to greatly extend its motor accessory department during 1918, *and last week added to its stock another entirely new line of accessories.*

The foregoing are only three of many firms in Canada contemplating going into the motor accessory business in a big way during 1918.

WANTED — RELIABLE, ENERGETIC hardware clerk, 8 to 12 years' experience. Capable of taking charge. Apply, stating salary and giving full particulars, to Box 170, Hardware and Metal, Toronto.

The firm who inserted the above advertisement in HARDWARE AND METAL showed good judgment.

Naturally, replies would only come from clerks who were in the habit of reading HARDWARE AND METAL—and every hardware merchant realizes that a clerk who reads HARDWARE AND METAL is the kind of clerk he wants, because he will be thoroughly informed on market conditions, new selling plans and the best methods of window display and advertising. The above advertisement brought in 23 replies. It cost only 67 cents.

USE THE WANT AD. PAGE.

BRIDGE IGNITION TROUBLES

It's the span of a bridge that usually gives way first. Rarely the abutments fail. Just so with the ignition system. The heretofore overlooked link between the source of energy and the plug—the plug connection—generally causes ignition troubles. The

HANDY TERMINAL

Grips Like a Vise

Eliminates this last source of trouble. Every iota of power reaches the plug. Instead of working loose, vibration and jar make the jaws of the HANDY set firmer. Particles of foreign matter cannot work between the jaws. The electrical contact cannot be broken. The vise-like action insures permanency.

The jaws of the HANDY are threaded on the inside. These threads engage the threaded center bolt of the plug. Pulling up on the ring with the first and second fingers (see illustration) compresses the spring—the jaws release their hold. Reversing the action, clamps the jaws again. No nuts to tighten or loosen—nor fish out of the drip pan. No tools required.

The magneto cable is fastened by a ferrule and gripped permanently. The stripped wire is held by a copper clip. The unsoldered connection can't work loose.

The HANDY is the last word in convenience. There are three sizes to fit every make of plug. You can supply them for any service.

The HANDY TERMINAL has no competition. It is an absolute field of its own. Every motorist is a prospect for a complete set, because they are essential to trouble-proof ignition.

And the HANDY is a big winter seller, too. Write us if your jobber isn't stocked. Our promptness depends upon yours.

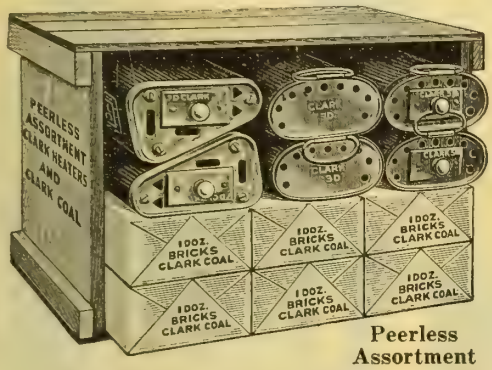
Clark HEATERS



Peerless Assortment

Big Hit Assortment

Junior Assortment No. 2

Junior Assortment No. 1

The Heaters that the Majority of People Prefer to Buy

More *Clark Heaters* are made and sold each year than all other heaters combined. This is sound and sufficient reason why you should "bank" your heater sales on *Clark* products. It positively indicates *greater sales* and *bigger profits* for you.

Clark Heaters are handsome and durable. They fit snugly in at the feet in carriage, wagon, sleigh or automobile. They give a comfortable, easy rest for the feet and the heat chamber is constructed to radiate warmth upward and outward, just where it is needed. **No flame, odor or smoke. Neither is it dangerous or injurious to robes, clothing or anything else.**

Clark Carbon Bricks

A scientifically prepared carbon, densely compressed into bricks and yielding a much higher percentage of heat than any other heater fuel—it is undoubtedly the world's best. One brick in a **Clark Heater** will furnish a strong and steady heat 12 to 16 hours. Yields at least 25 per cent. more heat than any other brick of the same size on the market.

Clark Bricklets

This is a convenient and economical size which does away with the necessity of breaking a large brick when only a moderate heat is required from six to eight hours.

Order now and get in on the big sale that comes with the first of the winter weather. Send for New Clark Heater Assortment. Just right to start sales with. Includes attractive show cards, signs and printed matter with each assortment. See your jobber now.

Ideas that sold the goods

No. 9 of a Series of Prize Stories by Men Behind the Counter

It isn't often that a salesman knows his customer as well as Mr. F. C. Nolting, of No. 13 North State Street, Elgin, Ill., knew "Charlie." But had his customer been a stranger, Mr. Nolting's story would be no less interesting, because of the way in which he carried his customer from one reason to another, finally clinching his argument with a demonstration of the effectiveness of the light given by this portable electric lamp.

"There's something you ought to have, Charlie," I said, as my customer picked up an Eveready DAYLO which I had purposely left on the show case to attract attention.

"Why should I buy one of these things?" he asked. "They're pretty enough but I haven't any use for one."

I answered him by saying that an Eveready would come in mighty handy, for instance, when he put the horse in the barn at night.

"I wouldn't use an Eveready for that," he said, "for I have electric lights in my barn and besides I have an automobile now, not a horse."

"Well," said I, "if you have an automobile it's all the more reason you should have an Eveready. Suppose you had to change a tire out in a country road some night, or locate engine trouble—one of these tubular Evereadys would certainly come in handy."

"Yes," said Charlie, "but that doesn't happen often."

I replied by asking him if he remembered the time that he dropped a silver dollar one night on the walk in front of his house and how it rolled off into the grass—how he spent fifteen minutes looking for it and burned his fingers with matches in the futile attempt—and how I happened along with an Eveready and located it in less than a minute.

"But that doesn't happen often either," Charlie again replied. "Maybe once in a lifetime."

"But," said I, "do you remember the night your wife slipped in the muddy walk and almost ruined her new dress—do you remember how she fell over the mat that someone left at the top of your cellar stairs? And how many times does she have to go down into the cellar at the risk of missing her step or falling over something?"

I had only to remind him of the time he almost set his house afire one night looking for the snow shovel under the back porch to convince him of the usefulness of Eveready DAYLO.

"But does that lamp give much light," he said.

I took him back of the store into a dark bin and flashed the light all around, at the same time talking Eveready quality and service to him and telling him why the Eveready was always dependable.

"Oh! don't talk so much," said he, "wrap it up." I did, and the sale was made.

Wanted

SITUATIONS VACANT

FIRST-CLASS HARDWARE MAN—ACCOUNT our location applicant must be able to speak German. Good wages for good man. Box 507, Hardware and Metal.

SITUATIONS WANTED

HARDWARE TRAVELLER IS OPEN FOR AN engagement, having several years' experience in the line, with first-class references, or would like to take up agencies for the City of Montreal and Province of Quebec. Box 508, Hardware and Metal.

FOR SALE

HARDWARE BUSINESS FOR SALE IN GOOD town in South Ontario; been established 40 years and a money maker; stock, $9,000, but can be reduced. Owner retiring; move quick if you want a good business. Apply, Box 505 Hardware & Metal.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

Mr. Hardwareman

Have you ever considered the advantages of advertising your wants in HARDWARE AND METAL? One of the most important of these is the fact that there is no waste circulation. HARDWARE AND METAL goes only to the people who are directly interested in the trade. We have offices in Montreal, Toronto, and Winnipeg. If you like you can have a box number in care of either one of these offices, whichever is nearest to you. We will then notify our representative there and he will promptly forward any replies which may come in answer to your ad. Remember, Thursday noon is the latest for receiving want ads for the current issue.

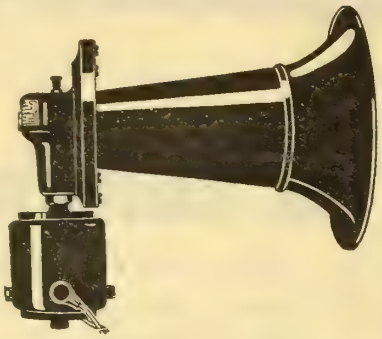
THE SOUND of KLAXON is the SOUND of BIGGER PROFITS



Type "L" Klaxon

KLAXON Horns are a money-making business-building line for hardware dealers to handle.

KLAXONS are the most thoroughly reliable and widely known warning signals on the market to-day. You don't have to argue a prospect into buying a KLAXON. Simply show him the style he needs and the sale is made.

Now is the time when automobile owners will be fixing up their cars for the coming season and if you carry the right line of automobile supplies, you stand the best chance of getting the most business in your district.

There is a KLAXON for every kind and size of automobile—for trucks, motorboats and motorcycles.

The KLAXON Type "L" is used on high power cars where electric current is available. It has the advantage of getting the signal ahead and away from the driver.

The HAND KLAXON is in big demand for smaller cars that have no batteries or electric lighting systems.

Hand Klaxon

At each of our distributing houses, we carry a complete line of accessories and supplies for Automobiles, Motorboats, Motorcycles. This line includes:

KLAXONS

Automobile Cable
Tire Chains
Bumpers
Ford Harness Sets
Spark Plug Wires
Standard Speedometers

Hand and Electric Tire Pumps
Automobile Jacks
Conophore Lens
Boyce Moto-Meter

"Over the Top"

Right down in the front trenches of metal working, in the no-man's land of production

Starrett Hack Saws

are doing their bit. The sharp, hardened tungsten steel teeth cut their way through rod or sheet, steel or copper as a machine gun cuts its way through opposing infantry.

While the excellence of Starrett blades has long been an accepted fact, never before have they been accorded the confidence they enjoy to-day. The rush and bustle attendant upon forced production have created a demand for a hack saw blade that will "stand up"—cut quicker and last longer.

Because we have made careful and thorough tests we are able to tell you just which numbered blade is best suited for each class of work. The result of these important tests, together with the unexcelled quality of Starrett Hack Saws have placed our blades in the first rank of industrial preparation.

What blade to use is indicated on page 208 of our Catalog No. 21MA. Send for your copy.

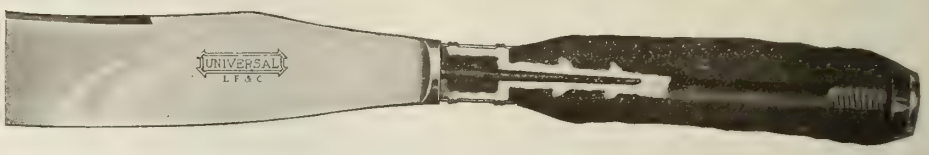
Reasons Why—of UNIVERSAL Carvers

All Universal Carving Knives begin as high grade crucible cutlery steel, and pass under many hands, hammers and heat treatments before they are sharpened ready for use; and tempered so a good edge can be placed on the blade with the Steel, whenever it becomes dull. The average user of a carving knife complains that when the knife is first purchased it has a splendid edge; but, when the knife becomes dull, a good edge cannot be regained.

That is not true of Universal Carvers whose blades, especially tempered, take a quick edge with the use of the celebrated Lee Steel, in each Universal set.

Prove this by cutting a sheet of paper with the carving knife, as it comes in the case, then draw the knife's edge *squarely* across the sharpening steel, *removing the entire cutting edge.*



The space around the tang of the blade, where inserted in the handle and around the screw that holds the cap, is completely filled with metal, cast into countersunk grooves, to resist a strain in any direction. **We guarantee** that the parts will not separate with use.

Being the same color **all through** they do not change, fade or discolor, as covered by our guarantee.

Then take the knife, stroke each side of the blade six or eight times on the Steel at an angle of 15 degrees, from heel to point and you have restored a perfect cutting edge to the blade.

A carving knife is put to *harder use than a butcher knife;* having to cut hot meats; works against all bones and joints that may be in the meat; and strike on the platter, which has a tendency to dull the edge very rapidly.

A Universal edge can be restored so quickly with a Lee Steel that it will be a delight to the carver to use the Steel frequently; the more often, the better.

In addition to this "sharpening" feature, the perfected stag handles which are supplied with Universal Carvers are fastened in by a secret metal process which absolutely prevents the tang coming out of the handle, a too common occurrence with other makes of carvers.

Further, the Universal handles will not crack, break, shrink or come loose from the blades, when immersed in hot water.

All Steels furnished with Universal carvers are the celebrated Lee, having 400 line cuts in its circumference and slightly magnetized; made under a process known only to the manufacturer.

The Lee Steel gives a smooth, sharp cutting edge that is not so easily attainable with any other Steel on the market.

Universal Carvers are made by

LANDERS, FRARY & CLARK

Master Cutlers for over Half a Century

NEW BRITAIN **CONNECTICUT**

If interested, tear out this page and keep with letters to be answered.

When we extended Christmas Greetings to our friends in 1916 we were in hopes that this time the war would be over, and that we could once more return to the happy thoughts and good wishes that were universal at this season before the awful calamity overtook the world. But such things are not to be. Peace on earth and good-will to all men are again postponed, and we fear it will be many generations before all will be included.

Win-the-War is about the only thing that counts. There is no doubt that we will win it. Victory may be postponed for a time and we may have some dark moments, but in the end we are sure to win.

All circumstances considered we extend to you our Very Best Wishes—not forgetting the kiddies.

No. 77
Flexible
Storm-proof
Door Hanger

Hanging a Barn Door Properly

This, our No. 77 Flexible Storm-Proof Barn Door Hanger, is especially recommended where the owner of the barn is to hang the door himself. No great care is required in attaching the Hangers to the door as the equalizing pin in the centre of the wheel-truck ensures even distribution of the load to each wheel. This Hanger will work smoothly and easily at all times and unless there has been absolute carelessness in attaching there can be no such thing as an improperly hung door where this fixture is used.

The Flexible Hinge Joint allows plenty of swing and yet holds the door rigid, and the Improved Storm-Proof Rail covers the wheel truck and the space between door and rail.

Packed perfectly the "National" way—one pair in a box with bolts, lag screws and end-stops; also full illustrated directions for attaching Hangers and Rail.

Have you a "National" Catalog?

National Mfg. Co., Sterling, Ill.

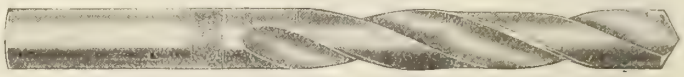
Butterfield

TWIST DRILLS

Carbon and High Speed
for Every Purpose

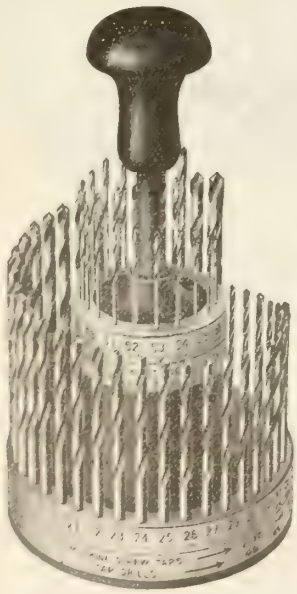
Butterfield Drills will give you the round, clean, accurate holes you have been looking for, with a minimum of grinding and absence of breakage.



Butterfield Drills are not an experiment. They are the result of long and careful investigation of the principles of "hole making."

To 99 men out of every 100 a twist drill is simply a tool for making holes; one is as good as another so long as the finish is equal. The beauty of a **Butterfield Drill** lies more than "skin deep," however.

Long and thorough research, combined with the most careful and exhaustive experimenting, has revealed to us the weak points in ordinary drill construction, and enabled us to produce a drill from which the faults and weaknesses of others have been eliminated.



Butterfield Drills are manufactured on machines which embody the "last word" in mathematical accuracy and precision. Designed and used for the one purpose only, with the result that every finished drill is the nearest to perfection of any yet produced.

NON-BURN ASBESTOS BRAKE LINING

When safety hangs by a fibre, look well to that fibre

In brake lining it's the quality of the asbestos **fibre** that counts—and high-grade fibre grows scarcer every day.

But that's another argument for Non-Burn, for it's made at Asbestos Headquarters—by Johns-Manville. We mine our own asbestos, and of the thousands of tons produced annually, our experts choose for Non-Burn only the choicest fibre, strong and uniform.

Years ago, making linings and blocks for big hoists, we learned the value of fibre selection. And to-day this same high quality of raw material is the secret of Non-Burn safety, of its long wear and economy—the one biggest reason why you should ask for Non-Burn when you buy a car—and insist on it when re-equipping. Get it from your dealer.

To the Trade—J-M Non-Burn is sold only through recognized jobber-dealer channels, and on an exceptionally attractive basis. Write for details.

BAILEY IRON PLANES

THE STANDARD FOR MORE THAN FIFTY YEARS

Made by the most skilled Plane makers in the world.

The average Carpenter invariably demands a *Bailey*.

He learned his trade by their use as did his father before him. You never have to "carry over" a *Bailey Plane*. They are always in demand and constitute one of the most staple articles a Hardware Dealer stocks.

Improvements are constantly being made in their manufacture, tending to make them daily more popular and more sought after by discriminating Carpenters and Mechanics.

If you do not carry these Planes, arrange to do so at once. You will be surprised how your Plane sales will increase.

Introduced Under Favorable Auspices

Attractive Windows Make Impression Favorable to the Store—Doing Business Without Counters—Stoves in Separate Room—C. C. Falconer, of Winnipeg, Outlines Successful Features Adopted in His Window Displays and Stove Selling.

"BY the character of your windows will you be judged; they are the medium of introduction to your store." In these words, C. C. Falconer of Winnipeg, Man., expressed the importance which he places on window display to HARDWARE AND METAL'S representative and Mr. Falconer's further views on this topic as well as others dealing with his methods of merchandising are outlined herewith:

Planning Ahead Advisable

Windows, properly, timely and effectively dressed, are, in my judgment, the greatest advertising force and power a retail store has to-day. Fortunate indeed is the store possessing large and expansive windows whereby they may display at all seasons of the year the many articles pertaining to that particular season. Plan your windows well in advance, fully a month ahead. When you have decided just what is going in a particular window, it is easier then to plan your display, which should be done at least one week in advance. A good idea is a list of window trims under different headings, under which you list the many articles that are appropriate to that particular display. By so doing you avoid the risk, when planning your window, of forgetting some very necessary articles that are essential to its selling effect. I prefer the simple display, not crowded, where it is possible to concentrate the eyes of the public on some one or two lines or articles rather than confuse them with a crowded display, which leaves a general impression rather than a definite one.

Window and Newspaper Advertising Hand in Hand

These windows, of course, work in harmony with your newspaper advertising. As you display, so advertise, and as in your news copy you quote prices, so in your window quote prices. Price cards should harmonize in size with the article displayed. Windows to have the

The store window is counted a very valuable asset by C. C. Falconer, of Winnipeg. The above reproduction of one of his windows shows that he believes in showing a price and makes use of showcards to emphasize important features.

A description of the stove department in this Winnipeg store is given in the article herewith, but the photographer has brought out the details splendidly and each feature is clearly shown. It will be noted that oilcloth forms one line which is not usually found in a hardware store, but Mr. Falconer states that it sells and that is an important feature in successful merchandising.

desired pull should have a few neat and well worded signs of fairly good size that say in a few chosen sentences just the thing which you would like to have the privilege of saying to them personally.

Keeping the Public Interested

Change your displays often, keeping the people interested to the extent of having them talk about your windows, which are really your store. Once you get them talking about you, it is evident they are thinking of you, get them thinking of you and nine chances out of ten when they want anything in your line they will know where to go. The logical way to determine the value of window displays is from the results obtained and as these become apparent, hardwaremen generally will appreciate more fully the fact that the windows are the most valuable space in the store. By working them for all they are worth, they will return big dividends for money and time invested.

Studying the Interior Arrangement

But Mr. Falconer does more than arrange his windows attractively. As pointed out in a former article Mr. Falconer's store is located in the foreign district of Winnipeg and a very big percentage of his trade is done with foreigners. It was necessary then to devote special study to the people with whom he was dealing and the interior of his store is arranged with the idea of taking care of this class of trade.

As will be seen from the photo herewith of the house furnishings department, every article is displayed so that it can be pointed out easily. This is essential in that many of his customers do not know the proper names of the goods they want and have to make the selection themselves. This same idea is carried out in the other departments as well.

No Counters in Store

There are no counters in this store—the proprietor does not believe in them. He would rather have displays of hardware, etc., on boards or doors which will permit customers to walk right up to them and make their choice. The majority of his customers do not know exactly what they want by name, and do not want the one waiting on them to know that they do not know what they want. By being able to go right up to the article, sales are much more easily made.

Display Tables Successful

Mr. Falconer is full of ideas for displaying goods and helping sales along. One of his ideas is to have a small display table, carrying two large market baskets full of goods, with an upright behind the stand bearing a card, "Special To-day." These are in red letters, and it is his firm conviction that to be successful a sign card must be bold. He drew attention to the fact that one of these tables was showing teapots at 23c, and while he made a large number of sales of these, he said the value of it was that it drew attention to the fact that they were selling teapots, and once the customer's attention was drawn, they usually managed to sell a better teapot at $1.25 from the shelves.

Incidentally the idea of contrast has been used in the shelving where the enamelware is displayed. Formerly these were of an ordinary light oak color but recently Mr. Falconer conceived the idea of painting the whole background white. It is remarkable the way this shows up the stock of enamelware.

He has a novel way of showing curtain rods and accessories in which they do a big business. These are nailed on a board, a card being nailed to the side of each, bearing the number, price and length. The number refers to a stock box on the other side of the board, in which the accessories are kept. Mr. Falconer states that the only way to sell curtain rods is by displaying them. In that way a customer can see and select exactly what she wants.

Special Room for Stoves

One of the most important departments in the store is that devoted to stoves. This department is located in the basement. The basement prior to the change was very ordinary with rough shelves for carrying stock and things that lay around as they usually do in a basement. A portion of the cellar was taken and equipped with a nice clean floor, wall board on the walls, and a raised platform for displaying the stoves around the room. This was cut off from the other part of the cellar and entrance gained by a stairway leading from the centre of the store. An effort was made to make this show room as light and as

attractive as possible. The wall board was decorated a cream shade, the joints being covered with two-inch moulding with oak finish. A touch of color was given to the platform. At the entrance to the stairway, an electric sign in red and white with the words "STOVES AND RANGES" was installed.

Stove Selling Requires Careful Study

Mr. Falconer is a firm believer in the fact that ranges can be shown to best advantage in a strong light. He stated that if he were building a store he would have a special place built for displaying stoves in which the natural light was cut off and provision made for strong artificial light. It is very easy to see that he is right in this respect as the strong light used in his basement certainly shows the nickel parts up to advantage, and makes the black parts look more attractive in contrast.

Another idea he had in mind when providing a separate room for customers to purchase stoves was to allow them to make their choice in silence. If there is any question of credit to be asked, this can be done without fear of being overheard. Mr. Falconer says that in the matter of making a $50.00 sale it is worth while going to extra expense of this kind.

Mr. Falconer has some splendid ideas on selling stoves, and his success in developing this branch of the business may be attributed to a careful study of his customers' needs. The following points were brought out by Mr. Falconer and may assist others to whom the selling of a stove presents difficulties.

Your own locality will help you decide as to the variety and class of stoves to handle. Avoid, if possible, having too many styles on display, as the process of elimination is then too slow and your prospect is apt to be confused. This applies more particularly when two or more make up a party where it is necessary to focus all their eyes on some particular style and get them to concentrate their minds. First and perhaps the most important step is the location of your display. My experience is that a separate department is preferable, where concentration is possible without the annoying interruptions which are common when the display is on the main floor and prove most embarrassing to both buyer and seller.

The next and equally important contribution to the sale of a range is the condition of your display. Have it at all times spotlessly clean by polishing frequently. This should never be necessary before your customer, and it is a compliment to them to have your display in first-class shape when they enter which creates a most favorable impression. Never display anything on your range with the possible exception of a nickel kettle or teapot. Distinguish important features with paint, such as painting the inside of the warming closet and oven with aluminum, which under the electric light, or otherwise, looks bright and larger. Paint the fire-box, oven damper, and any other such feature. Display a couple of small neat cards on your range, featuring in one or two words only some striking features of your range—we are now ready to receive our prospect.

We presume, of course, that you have on display only such goods as are worthy of your unqualified approval and will live up to the reputation you wish your store to have. Sales are founded on the customer's confidence and efforts must be directed towards making your prospect understand the true merits of the article you are seeking to sell.

First Five Minutes Important

To my mind the first five minutes are of vital importance and worth the next fifteen. Get their name and address early in the interview, and if you are acquainted with their locality or know some one who is, say so and call them frequently by their name. This gives you an intimacy that brings you closer together and helps considerably.

Proceed cautiously, follow their eyes intently, discern from their expression their approval or disapproval, discover the "buyer," who is not always the one who pays for the stove.

You have been fencing for an opening, and by this time you will have had time to pretty nearly know how to start, which should be slowly and deliberately with no semblance of a stampede. Let every argument sink in. You will be guided much by the expression of approval or disapproval, and by the questions they may ask. Neglect no argument in your summing up. If there is a disposition on the part of your prospect to hesitate, keep on talking, even at the expense of repetition.

Guarantee of Satisfaction Essential

Your final argument should be—your guarantee of satisfaction. This must be made emphatic and clear cut without any jokers. If the range in question does not burn, cook and bake to the purchaser's complete satisfaction, state that you will be willing to take it back and refund the money. This creates confidence, without which no sale is a success. Many foundries now furnish a

The housefurnishing side of the store is very bright and attractively arranged. The display tables are shown on which "Special To-day" goods are featured. Mr. Falconer states that one of these tables shows teapots at 23 cents, and although sales were made, the value of the display was that it drew attention to the fact that they were selling teapots and they could usually manage to sell one up to $1.25 in value

facsimile bond which is added assurance that the makers are also behind you in your guarantee.

Ultimate Cost One to be Considered in Quoting Price

This, remember, all takes place before a price is mentioned. You know by this time whether they are interested in a particular one, and by this time price is not the stumbling block it might have been if quoted at the beginning. Price alone is not a sound selling idea. Ultimate and not first cost is to-day the controlling factor in estimating the true value of a range.

Now comes a very important question, if you have been able to avoid it thus far,—how much? Answer it fearlessly and boldly—this range is worth so much, giving of course the best cash price, but don't mention cash; you are to assume that they intend to pay cash. Right here again care must be exercised, for perhaps you have given them a large capsule or a bitter pill to swallow, and as a good doctor or nurse you must make it easy for them.

Tell them again of the many satisfied users and of your unbounded faith in its giving them like satisfaction, and if for any reason whatever it does not, that you will remove it. Tell them what an important article a good range is in any home where it is used so constantly and that a few dollars should not stand in the way of their getting the best. Appeal to her vanity (if a lady is one of the party) by telling her how nice it would look in her kitchen with its beautifully polished nickel, and to his (if he is along) appetite, with an appeal outlining its baking qualities.

I have not ventured to go into all the little details of recommendations which each range possesses. Selling ideas are put in by the makers, and a careful study of their literature will bring out many important details.

Clearly Defined Terms on Time Basis

In dealing with those who wish to buy on time, Mr. Falconer employs the following plans and makes no departure from same under any consideration. Three months is the limit of time when the price is given as so much—one-third cash, the balance in three equal payments; for payment of two months' duration, the same terms, with a 5% better price. The cash price is 5%, better again, which is a spread of 10%, between three months and cash. The lien note on the time sale has specific days of payment set forth. These prices are printed in plain figures, and (provided the credentials on the time proposition are satisfactory) customers can take their choice.

Whether cash or time and after the deal is closed, as a final and parting reminder, I assure them of the genuineness of the guarantee of satisfaction, which means so much more to them now than it did in your selling argument.

It was stated to HARDWARE AND METAL'S representative that 75% of the stoves sold were for cash and in ten years Mr. Falconer states that he has not lost $25.00 on his stove business.

On the right hand side of this basement provision has been made for showing go-carts and sulkies in summer time. There are hanging shelves for displaying sulkies, these being at a convenient height to allow of the go-cart going underneath. It is very convenient in summer time when the demand for stoves is not so heavy.

Trunks and bags are carried and beds and mattresses are sold from samples. These are two lines which hardwaremen are taking on to-day with marked success.

For getting things done immediately, Mr. Falconer devised what he calls a "Do it next" book. This is meant for his clerks, and in this he writes things he requires done at once as he walks around the store. He requires the clerks to check off the various things as they are performed.

This store is full of evidence that the proprietor is full of ideas and is not afraid to put them into practice. Most of them are selling ideas, and the fact that he is able to run a high class store in a foreign district with several other dealers within a few feet of his store speaks well for him.

Improving the Co-operation of Business

How the U.S. Government is Planning to Use Industry to Better Advantage — Flag-Waving in Congress Has the Effect of Improving the Organization—Fixing Prices and Eliminating Unnecessary Business — Concentration, the Password Now

By a Staff Representative at Washington.

Washington, D.C.

IT has been intimated several times in the course of these articles that the system under which the United States Government is utilizing the business men of the country is far from perfect. There is a very great deal of dissatisfaction particularly among business men with reference to the system. There is a strong agitation for new methods and a probability, even a certainty, that new methods will be adopted.

The Advisory Commission of the Council of National Defence, with its wide system of subordinate committees, had one weakness. The members of many of these committees were acting in a dual capacity. They were advising the government in matters pertaining to the selection and purchase of supplies, and at the same time they were selling to the Government.

For instance, the chairman on the committee on Petroleum was President Bedford of the Standard Oil Co., unquestionably the ablest oil man in the country. But, when the Government wanted to buy oil, it was necessary to go to Bedford! The chairman of the committee on coal production was F. S. Peabody, president of the Peabody Coal Co. of Chicago, and, naturally enough, the Peabody Coal Co. could not be passed over when the question of buying government supplies came up. The Peabody Coal Co. might not want government orders but the Government needed a part of the output of the Peabody Coal Co.!

There was no actual loss to the country through the dual activities of the committee members. In all probability the country benefited in a monetary way. The Bedfords and Peabodys who sat on all the committees gave the government the benefit of their knowledge unreservedly and in most cases arranged to supply goods at lower prices than they would have accepted had they come to Washington to represent their own interests only. But it did not look right. It is bad in any business deal to see all the participants on one side of the table. The buyer should sit on one side and the seller on the other. Then, if both parties are alive and honest and know their business, neither side loses.

Trouble Starts in Congress.

TROUBLE began to crop up in Congress. Back in Tallahassee, Bill Jones, who makes tacks, had got it into his head that he could turn out shell fuses if the Government would give him an order with a long enough price to cover the cost of installing the new machinery. He didn't get the order but the Delaware Bridge Works, say, got a big order and the vice-president of that concern was a member of a committee working with the Munitions Board. If Bill Jones had wanted to get the facts he would have found that the Delaware plant was equipped to make fuses and that an absolute guarantee of delivery within a certain time had been given and a finely shaved price had been accepted. But Bill Jones, after the manner of his kind, does not pay any attention to these factors. He goes back to Tallahassee, frothing at the mouth and talking graft.

There were Bill Joneses all over the United States of America during the first half of the year. They poured out of the incoming Washington trains and filled the Washington hotels to overflowing.

through the capitol . . . " Or words to the same effect.

And then up got a Congressman to recite the sad experience of Caleb Spry, who

The temporary buildings erected at Washington by the Advisory Commission in 50 days. Right: Julius Rosenwald, head of committee on supplies.

One man from Idaho wanted to sell his mine to the government. A Vermont wholesaler was looking for orders to ship prunes in carloads. A blacksmith from Podunk wanted shell orders. They filled the outgoing trains, and the smokers rang with their discontent and their chorus of "graft"!

The sad part of it was that each disgruntled order-seeker had the ear of a Congressman or a Senator. When Bill Jones arrived back at Tallahassee he got hold of his Congressman and filled him with his tale of woe—Washington reeking with graft, fostered and encouraged by iniquitous system of advisory committees. The Congressman saw a chance to break into print.

The Storm Breaks

About June the storm broke in Congress. The representative from Tallahassee, or Podunk, or wherever it was, got up and cited the case of Bill Jones, patriot, who went to Washington to place his plant at the disposal of the Government and who was refused an order whereas the *bloated interests* (the speakers' italics) were grabbing everything through their representatives on the advisory committees!

"It is a monumental crime, a barefaced steal!" orated the Congressman. "Never will the Gates of World Freedom be stormed by our brave armies with the Star and Stripes at their head, if we permit this base trafficking, this sordid manipulation of the machinery of Government! Shades of George Washington and Thomas Jefferson; and God bless the American flag and our dear old grandfathers and may the clean and bracing winds of democracy sweep

couldn't get an order for prunes in carloads. And so on *ad infinitum, ad nauseam* The country began to think that Washington was riddled with graft and that the men who were so unselfishly giving their time and best services to the country were self-seekers.

The New System

But after all, good results came out of the political uproar. A bill was put through Congress which made it impossible for a man to sit on a committee of the Council of National Defence who was interested in any company which would be selling to the Government. The bill had the effect of breaking up many of the committees. It led, however, to the beginning of a new order, out of which, it is believed, still better results will come.

The new plan is for each industry, each branch of business, to organize on its own account and to appoint committees to deal with the Government. These committees are to have full authority to speak for the industry they represent. They are not in any sense government servants. When they go to Washington they will sit on opposite sides of the table from the Government officials and the advisory committee members.

This system is now being worked out. It is not yet completed by any means but most of the large industries have already organized. Reference has already been made to the fact that a committee of three representing the automobile interests was in Washington recently to go into the matter of steel. These three men had full power to speak and act for every manufacturer of automobiles or accessories in the country. What success they achieved in getting supplies of steel for next year's cars was due to that fact.

All industry will gradually reach the point where organization is effected and then things will be in capital shape to link business and industry more closely still with Washington. The advisory committees of the Council of National Defence will still be there to advise and direct the efforts of the Government. The industrial committees will be ready to act for industry itself. Any arrangements will be a mere matter of negotiation between fully authorized bodies. Hours will accomplish what otherwise would take months.

More Radical Steps Still

But business men are not satisfied yet. They feel that the country is not yet down to hard training for war.

The other day a federal charter was obtained by an inventive individual for the manufacture of a new kind of soap pipe, to blow bubbles with! Toys are still necessary enough because, no matter how grim the world struggle may become, all the sunshine and joy should not be taken from the lives of the children. But there are plenty of factories already established to turn out all the toys that will be needed.

The soap-bubble man will proceed to tie up $40,000 capital and employ 30 hands, mostly men, in the manufacture of soap pipes!

There is a growing feeling among the business men of the United States that the time has come for the suppression of unnecessary industry, certainly for the sharp checking of all new ventures into unnecessary fields. Soap bubble charters are not consistent with the waging of war.

The Chamber of Commerce, for instance, has issued a bulletin on the subject, in which the following statements are made:

"New enterprises which are not fundamental to the efficient operation of the country's necessary activities should not be undertaken. This will not result adversely upon business or conditions of employment because every man and every resource will be needed during the war. All effort should be centred to help win the war.

"There is no uncertainty or ambiguity about this statement. Every man who wants to help win the war has now an acid test to apply to any new enterprise or undertaking.

"Men who are considering new enterprises,—public improvements, dwellings, factories, industrial work of every description, etc., should be guided by this test."

Fixing of Prices.

Perhaps the biggest and most tangled question awaiting adjustment is the matter of price fixing. In most lines of business it is recognized that price fixing has become necessary but it is very strongly felt that the fixing must be done in the right way. Business men are not prepared to see some government official with half-baked ideas and a mass of undigested information in his head proceed to say what prices shall be. They know too well the chaos that would result.

At the same time they feel that they themselves should not be allowed to fix the prices. The plan to be followed is for the Government to get all the necessary information from each industry and then reach an understanding on that basis.

Here is a case in mind. The Attorney General of the United States—I think that is his title—had launched an indictment against a certain group of men under the Sherman Act. Let us say that these men were coal dealers (they were not) and that they were charged with combining to fix prices. The case was pending in the courts and the Attorney-General was pushing it hard and was sure of a conviction.

At the same time Secretary of War Baker, was negotiating with the coal men of the country with a view to fixing a price for coal. The coal men suggested a price which would be suitable to them and which at first flush looked very fair to the Government officials. The price was agreed upon and somebody, in the name of Secretary Baker, issued a public statement announcing the price and commending the coal men for their patriotism in consenting to the figure.

And the price set was just 25 cents less than the price at which the men on trial had been selling!

An excited man rushed up to the offices of the Secretary of War and demanded to see Mr. Baker. A Secretary of War has to be securely protected by officials of one kind and another and by ante-rooms. The excited individual was promptly stopped.

"What is your business with Mr. Baker?" he was asked.

"I'm the Attorney-General of the United States," stated the caller.

Somebody was summoned who vouched for the fact that he was the Attorney-General and he gained entry to the inner office. Here he showed Mr. Baker that his department had, figuratively speaking, upset the apple cart. Not only had he made acquittal certain in the pending trial but he had fixed a price that was too high.

The upshot of it was that a new investigation was made and, on the information supplied by men in all branches of the business, the Government decided on a new price quite a bit lower than the first one.

It is perhaps, unfair to hang this incident on the coal men, but it was necessary to name some industry in order to make the telling intelligible. The point aimed at is, that the proper basis for price fixing is that outlined very concisely in another Chamber of Commerce bulletin:—

General Basis for Prices

"There has not been developed as yet a clear policy with regard to securing the assistance of business men in connection with the control of prices. In some cases the government has called upon those interested in a business to participate in the actual fixing of the prices. This has resulted in a fixing of prices by negotiation,—which is clearly harmful. In the judgment of the undersigned Committee, men elected by an industry to represent it should be called upon by the government for full information which would be helpful in fixing prices, but the actual determination of the price should be a semi-judicial function.

"This means that wherever prices are determined by the government it is es-

Christmas Bells in War Time

By ARTHUR STRINGER

From spire and tower, in silvery tune,
The chimes like birds take flight,
Where that dim golden boat, the moon,
Drifts slowly down the night.

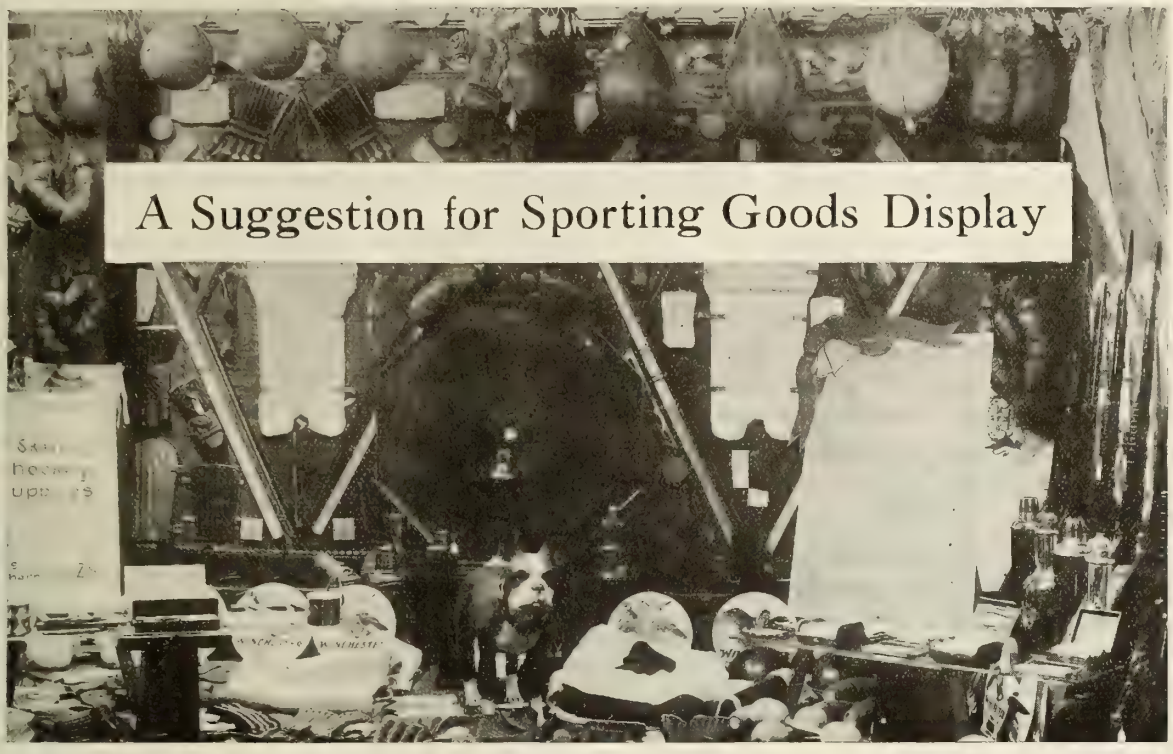
Aloud, alert, alone, they cease
And wake, these midnight bells,
Proclaiming, through their clamor, Peace
Where Peace no longer dwells.

Yet chime by chime, like homing birds,
They float, soar up, recede,
A gust of old-time gladdening words
That back to Sorrow lead.

For as we listen, bell by bell,
They bring about us here
Our ghostly dead who sleep so well
We dare not dream them near.

So be still blithe, O Bells, and gay,
Since through the old glad sound
Our dead come home this Christmas Day
From grave-strewn Flanders' ground!

Reprinted by courtesy MacLean's Magazine.



THERE IS STILL TIME

EFFECTIVE *window displays are by no means confined to any one department. The photograph above shows a very effective display arranged with goods taken from the sporting goods department, and during the past few weeks displays embracing goods from almost every department of the store have been reproduced. These are shown with the idea of offering suggestions to retailers from which a basis for their own displays may be adopted.*

THERE IS STILL TIME for retailers to have their displays photographed and entered in HARDWARE AND METAL'S *annual Christmas window display contest. The growing interest evinced by Canadian retail hardwaremen in this contest is evidenced in a wider and more representative response each year.*

Two contests will be conducted in accordance with past custom—one for stores in places under 5,000 population; the other for places of 5,000 and over. No restrictions are set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.

Contestants will note that an equal number of prizes are offered to the small town trimmer as to those in the larger towns and cities.

SEND IN YOUR ENTRY NOW

EIGHT PRIZES WILL BE OFFERED AS FOLLOWS:

Places under 5,000.		Places of 5,000 and Over.	
First Prize	$10.00	First Prize	$10.00
Second Prize	5.00	Second Prize	5.00
Third Prize	3.00	Third Prize	3.00
Fourth Prize	2.00	Fourth Prize	2.00

The contest closes Tuesday, January 1. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, HARDWARE AND METAL, *143-153 University Ave., Toronto," and marked "For Christmas Window Contest."*

EDITORIAL COMMENT

A HAPPY CHRISTMAS

THOUGH in these days of war a little of the old-time merriment and good cheer may have dropped out of the Christmas celebration, though those who were once the centre of the festive gatherings may on this day be looking out across a shell-swept No-Man's Land, and the memory of this may cast its shadow on the day. Yet it is a day dear to the hearts of men, now as always.

We are living in serious times, and have been faced with great sacrifices and still further sacrifices will be necessary. But despite all this we may still face the Christmas season with a high courage and a happy heart; with our confidence still unshaken in the justice of the cause for which we fight; with our belief still firm in the assurance of an ultimate vindication and with the knowledge that generations yet unborn will reap from this bitter harvest of suffering and sorrow and tears in a better age, a better land and a kindlier civilization than we have ever known.

Surely despite the shadow of war this may still be a happy Christmas season. It is the sincere wish of the Editors of HARDWARE AND METAL that to every hardwareman there may be abounding reasons for a happy Christmas, that the Christmas spirit will pervade every home and that health, happiness and prosperity may be your portion during 1918.

UNION GOVERNMENT FOR CANADA

THE elections on Monday, in so far as the voting in Canada is concerned, resulted in the return of Union Government by a large majority. It is evident the electors have faith in the principle of Union and most assuredly the administration of the country's affairs demands efficient handling which it is to be hoped will result from this getting together of forces.

One of the gravest responsibilities that any Canadian Government could face is that of spending the $150,000,000 subscribed during the Victory Loan campaign. When it became known that the amount subscribed had run to such colossal figures, thinking men became grave. Governments run naturally to extravagance. Would the fact of such a grand total have the effect of breaking down frugal scruples on the part of those who direct the national expenditures? Would the government exercise a less rigorous degree of control over spending departments?

Union Government will have at least one demand made upon it: that is a frugality, a husbanding of our available funds such as would have been necessary had the total not run over the minimum objective of $150,000,000. Had that amount only been secured the Government would have been compelled to watch every dollar expended with hawk-like vigilance. It would have been a case of stretching every dollar to the maximum of its buying power. Those men now in power must see that the same degree of caution that would have been necessary in that contingency is employed.

The confidence of the people of Canada, expressed in the magnificent size of their Victory Loan investments, must not be accepted as an excuse for extravagance.

The Victory Loan must be paid back. Heavy interest charges must be met. The policy of the Government must be one of frugality and rigorous economy.

HANDLING PRICE ADVANCES

DISCUSSIONS as to whether a merchant should apply an advanced price to stock on hand or not usually end with the advocates of either procedure holding to their own views. There is no uniform method adopted although it is generally supposed that the dealer keeps his prices level with the market but this is not always the case.

The right of the merchant to ask the increased price for his goods on hand which have advanced is generally conceded, just as a decrease would result in his having to mark his goods down. However, there are many merchants who prefer not to take advantage of a change in price, their justification being their desire to speed up turnover.

With such a varied practice, some confusion undoubtedly results and more so under present disturbed market conditions. However, it must be taken into account that the rapid changes which have gone into effect since the outbreak of war will in many cases undergo a revision downward when abnormal conditions cease to exist. It is on a rising market that the merchant must increase his bank balance and in this way prepare for the day of the declining market.

How Grocery Trade Will be Regulated

All Food Merchandising Agencies to be Systematized and Regulated — Many Much Disputed Points to be Finally Settled—Profits on a Pre-War Basis—Full Details of Proposed Changes.

AT a meeting held in the Food Controller's office, Excelsior Life Building, Toronto, on Tuesday morning of this week an enthusiastic ratification was given by representative manufacturers to the Food Committee's Program that was outlined in last week's HARDWARE AND METAL. The Hon. W. J. Hanna in referring to the matter at the conclusion of the meeting gave it to be understood that definite action along these lines would be forthcoming, and that very quickly.

As announced last week all food distributors are to be licensed and their status in the distribution of food products is to be clearly defined. The present move of the government would seem to forecast similar steps in other directions and whereas the agitation has been centered on food stuffs, there is every reason to believe that government supervision will extend to all branches of the trade.

The main points of this regulation that will in all probability become effective within the next week or so are as follows:

THE REGULATIONS PROPOSED

The Licensing of Every Present and Future Channel of Distribution.
This will mean that all the distributing activities at present in existence will be licensed, and so regulated, and that anyone desiring to enter any of these branches of the distributing activity must assure the Food Controller of their willingness and ability to meet these conditions.

Retailer Must Live Up to Minimum Standard of Equipment to Obtain License.
The sanitary conditions and equipment must be satisfactory to the Food Controller, and the applicant must have not less than two years' training in the business.

The Distributing Activities to be Definitely Defined.
There is a set statement as to what constitutes a manufacturer, wholesaler, wholesale jobber, commission merchant, broker and retailer.

The Licenses Will Mean Regulation.
Licensed dealers must keep proper books, and take stock at least yearly. They shall not make profits in excess of pre-war profits. The licenses are not transferable, and must appear on all stationery and advertising matter. On certain lines the dealers may be required to make monthly reports of holdings.

License Fees Will Be Graded.
The license fee will be very moderate for the retailer, and will increase in proportion as the business increases.

A Penalty for Buying From Unlicensed Firms Who are Supposed to be Licensed.
It shall be an offence to purchase goods from a firm who should be licensed, but who has failed to take out a license. Subject to fine and possible cancellation of license of purchaser.

Combination Sales Forbidden.
No merchant shall be permitted to make the sale of any goods conditional on other sales. This clause will effectively deal with many so-called co-operative distributing agencies.

The Contract Selling Plan Sustained.
The manufacturer who has established a reasonable selling price may refuse to sell merchants who violate his selling contract.

No Discriminatory Price Will be Permitted.
On proprietary brands the manufacturer shall not have the right to discriminate by better terms or price (having regard to quantity) between one retailer and another.

Any Rebating Forbidden.
Any rebate on the part of any wholesaler shall be considered as an infringement of the Secret Commissions Act and render the party rebating subject to serious penalties.

Wholesalers' Books Shall be Open to Food Controller.

Wholesaler, Commission Merchant and Broker Must Not Sell to Consumer Except Under Retail License.
This license number must, of course, appear on all his forms and letterheads.

Wholesaler Must Make Monthly Reports to Food Controller.

THE COMMITTEE RECOMMENDS

Prevention of Overlapping in Work of Travellers.
Limits will be set to the number of times travellers may call on the trade.

Centralized Delivery System Proposed.

The Creation of an Organization to Administer these Provisions.

System of Stock Returns to Permit the Equitable Distribution of Supplies.

The Setting of a Profit on the Basis of Pre-War Profits.

THE report of the committee of the grocery trade that has been endorsed by manufacturers, wholesalers and retailers, and that has been submitted to the Hon. W. J. Hanna, and will in all probability become effective within a very brief space of time, begins with a preamble pointing out the necessity of organization if the necessary regulation of the trade is to be efficiently and intelligently carried out. This proposed organization would be able to exercise discipline in the different channels of distribution, making injustice to the individual an impossibility. The preamble also points out the necessity of clearness and conciseness in such an act; and that there must also be no hesitation in maintaining the principles outlined, and punishing any failure to meet these conditions.

The changing conditions of the times, it is pointed out, has led to privations and difficulty, and the food distributors have often been wrongfully accused of being the parties responsible for these conditions. It is pointed out as opposed to this charge that thoughtful decisions of the judges of the courts of Canada have maintained that the distribution of the manufacturer through the jobber, wholesaler and retailer is the most economical method of distribution.

That the conditions prevalent at present may be successfully met is the idea at the back of this preamble, following this effective putting of the case.

The report then continues as follows:

SUGAR

To sell goods for less than cost inflicts an injury, which demands a corresponding overcharge if the seller is to continue doing business, and thus creates a double wrong, and is vicious in principle and entirely contrary to sound business morals.

It is true beyond successful contradiction, and with a fuller knowledge it becomes a generally admitted fact, that the grocery trade has for many years sold sugar on a less margin than the actual cost of distribution.

It is further true, and is also admitted by those familiar with the subject, that the wholesale grocer can, and does, distribute sugar for a substantially smaller sum of money than the refiner could distribute it to the retail trade direct.

As stated, sugar has been distributed on a margin allowed by the refiner, which is considerably less than the actual cost of distribution, and it is unfair and undesirable that any business or enterprise should be conducted at a loss. The refiners allow the wholesale trade in the East 30c per 100 lbs., involving an investment of over $9.00, out of which 1% is allowed the retailer for cash, which is 9c per 100 lbs., leaving the wholesaler 21c per 100 lbs., or a fraction over 2%. This is the margin the wholesaler is allowed to provide for handling sugar into and out of his warehouse, storing, insuring, carting, charging to customers, collecting accounts, and loss by bad debts, besides overhead charges. It is obvious that the wholesale grocer loses money on every pound of sugar he sells.

Under such circumstances, where it is admitted that the wholesale grocer can distribute sugar at less than it would cost the refiner, and where it is clearly demonstrated that he does distribute it for less than it would cost the refiner, is it not a serious reflection on the

intelligence or honesty of the press and public when they continue to denounce the middleman as a profiteer and a grafter? The same is true so far as the wholesaler distributing all other manufactured goods at a less cost than the manufacturer could distribute them direct. In view of the conditions here stated, which are, beyond question, correct, would it not be fair to inform the public that the wholesale trade is really an economic factor in the conveyance of goods from the producer to the consumer?

CARTAGE

Your Committee, after consulting with a Committee of Retailers, are of opinion that such economy could be effected by a system of union or merged or central delivery, and would suggest that you take prompt measures to put the matter before the retail trade of all towns and cities of a population of 5,000, or over.

We further suggest that in bringing this matter to the attention of the retail trade, you, at the same time, should outline to them a practical plan for their consideration, so that immediate steps may be taken to put same into force.

PROPER REGULATIONS OF TRADE

For the proper and successful carrying out of the suggestions set forth in our report, we specially direct your attention to the absolute necessity of licensing all classes of manufacturers, wholesalers and retailers handling any household necessities.

Apart from the fact that it would be unfair to put some classes of trade dealing in food products under Food Control regulations, and at the same time overlook others, in our judgment it would be impossible to obtain the satisfactory result you are striving for, and in which effort we are willing and anxious to assist, unless every present and future channel of distribution to the consumer is so regulated and licensed.

Manufacturers, wholesale and retail grocers are not the only purveyors of food products.

Such lines are also sold by wholesale and retail produce dealers, wholesale and retail fish dealers, wholesale and retail flour and feed dealers, wholesale and retail butchers, wholesale and retail fruit and vegetable dealers.

All these are avenues of distribution to the consumer, and form a very large factor of which we must not be unmindful. Our report does not cover the various lines mentioned, but similar rules and regulations as outlined to apply to wholesale and retail grocers should be adopted for the other classes of trade.

TRADE CLASSIFICATION AND RULES AND REGULATIONS ADOPTED BY THE FOOD CONTROL ADMINISTRATION

For the purpose of conveniently carrying out the plan governing the conduct of trade under the Food Control Administration, it is, in our opinion, necessary to define the various classes and departments of trade, as well as adopt rules and regulations governing same.

So far as possible, the enumerated groups are intended to cover all classes of trade dealing in food products and goods generally used and recognized as necessary for household consumption.

This classification is covered in the following manner:—

1. Manufacturers
2. Wholesalers
3. Wholesale Jobbers
4. Commission Merchants
5. Brokers
6. Retail Merchants

The above groups are intended to cover all classes dealing in food products, and such other lines as are recognized as necessary for household consumption.

If it should be found that in active practice the sale of food products is conducted by other than the enumerated lines of trade, and it should become necessary to regulate same, further classification may be added.

The rules and regulations governing the already enumerated classes of trade are made with a view to fair dealing, and to prevent dishonest practices that may have been followed in the past on account of there being up to the present no clearly defined rules for the conduct of business.

DEFINITIONS AND CLASSIFICATION OF TRADE FOR THE PURPOSE OF THIS REPORT

Class 1.

Manufacturer.—A manufacturer is one who makes from his raw materials or other products a finished or partly finished article or articles, which may be put upon the Canadian market for household consumption, either in bulk form or in packages, and it may be under a proprietary or advertised brand.

Class 2.

Wholesaler.—A wholesaler is one who has no retail counter, and who does not sell to the consumer direct.

Class 3.

Wholesale Jobbers.—A wholesale jobber is one who regularly deals in merchandise, acting as an importer or dealer on his own account, and sells only to the manufacturers and wholesale trade.

Class 4.

Commission Agent.—A commission agent is one who handles goods for the owner on a commission basis only.

Class 5.

Broker.—A broker is one who acts as an intermediary between seller and buyer, selling on a brokerage or commission basis, and shall not be in any way directly or indirectly interested in the profit on the sale of goods he handles.

Class 6.

Retail Merchants.—Retail merchants are those regularly established in business for the sale of goods direct to the consumer.

SPECIAL COMMITTEE OF RETAILERS ENDORSE POLICY.

Ottawa, December 10th, 1917.

We, the undersigned members of a Special Committee of the "Grocers' Section" of the Retail Merchants' Association of Canada, Incorporated, representing the Retail Grocery Trade of Canada, having met to consider what assistance we could give to the Food Controller, in order to enable him to best conserve the food products of Canada through a properly organized system of distribution, and having submitted our report to your Committee, which covers the most important feature in connection with your enquiry regarding the retail grocery trade, and having also considered very carefully the report which was prepared by the members of your Committee, representing the Wholesale Grocery Trade, we have much pleasure in unanimously endorsing the same, and we will use our best efforts to do all we can to assist the Food Controller to have the principles set out therein carried out, as we believe that by so doing the trade, as well as the consuming public, will be greatly benefited thereby.

Members of Special Committee.

D. W. Clark (Chairman), Toronto; D. McLean, Toronto; W. C. Miller, Toronto; A. Laniel, Montreal; J. Sansregret, Montreal; T. Bowman, Ottawa; B. G. Crabtree, Ottawa; R. C. Cummings, Ottawa; J. C. Campbell, Ottawa; E. M. Trowern, Ottawa.

Signed on behalf of the above Committee.

E. M. TROWERN,
Secretary, Dominion Board,
Ottawa.

RULES AND REGULATIONS GOVERNING THE SALE OF ALL CLASSES OF FOOD PRODUCTS SOLD IN CANADA BY PERSONS, FIRMS OR CORPORATIONS CARRYING ON BUSINESS UNDER THE CLASSIFICATIONS AS SET FORTH IN CLASSES 1, 2, 3, 4, 5 AND 6.

Rule 1.

All Food Purveyors Subject to License.—Every person, firm or corporation engaged in the sale of food products in Canada, shall be subject to license or regulations of the Food Controller.

Rule 2.

Licensed Dealers.—Every person, firm or corporation engaged in the sale of food products in Canada, who shall be required by the Food Controller to do business under license, shall keep proper books of account, shall take stock at least once in twelve months, and shall prepare annually a financial statement showing assets and liabilities.

Rule 3.

To Prevent Profiteering.—Every manufacturer, wholesaler, wholesale jobber, commission merchant, broker and retailer, shall be under direction of the Food Controller, and shall not be permitted to make profits in excess of pre-war profits.

Rule 4.

License Not Transferable.—Licenses are not transferable.

Rule 5.

Display all License Numbers.—License numbers shall appear on all invoices, copies of orders left with purchasers, also on all letterheads and communications. In cases where more than one license is taken out, all license numbers must be shown.

Rule 6.

Advertisements.—Every licensee shall display the number of his license on all his advertisements.

(NOTE.—An amendment was passed, making it necessary to show license numbers only on advertisements where prices were quoted.)

Rule 7.

Monthly Reports.—On the lines enumerated under Rule 8, and such other lines as may be added, all licensees may be required to make monthly reports, in duplicate, on forms to be supplied by the Food Controller (the licensee keeping the duplicate on file in his office) showing the stock on hand on the last day of each month, together with the arrivals during said month. Such reports must be mailed to the Food Controller or his agent on or before the fifteenth day of the following month.

Rule 8.

Enumerated Lines.—The following are the enumerated lines of goods referred to in Rule 7:—

Sugar.
Oleomargarine.
Cheese (bulk Canadian).
Canned Goods: Tomatoes, Corn, Peas, Beans, Pork and Beans, Corned Beef, Salmon, Condensed Milk, Evaporated Milk.
Dried Beans (Canadian).
Rice.
Prunes.
Raisins.

And such other lines as may be added by the Food Controller.

Rule 9.

Application For License.—Application for license must be on form prescribed by the Food Controller, and must be accompanied by cheque and statement of the class of business or businesses under which the applicant desires to be licensed.

Every person, firm or corporation doing business under more than one class—where licenses are required—must obtain a separate license for each class in which he does business.

Rule 10.

License for Classes 1, 2 and 3.—The annual license fee for Classes 1, 2 and 3 shall be on the following basis:—

$50 for annual turnover of $500,000, or under, and $5.00 additional for each $100,000.

Rule 11.

License Fees for Classes 4 and 5.—The annual license fee for Classes 4 and 5 shall be $50.00.

Rule 12.

License Fees for Class 6.—The license fees for retailers shall be on the following basis:—

Turnover of	$20,000	or less.....	$1.00	per	annum
"	" 20,000	" $40,000...	2.00	"	"
"	" 40,000	" 60,000...	3.00	"	"
"	" 60,000	" 80,000...	4.00	"	"
"	" 80,000	" 100,000...	5.00	"	"

and $5.00 for each additional $100,000 turnover.

Rule 13.

Penalty Clause.—No person shall knowingly buy any food commodity in the Dominion of Canada from any unlicensed person, firm or corporation required to have a license under these regulations. The penalty for deliberate violations of the Food Controller's Regulations shall be a fine of not less than $50.00 for the first offence, $100.00 for the second offence, $500.00 for the third offence, or cancellation of license at the discretion of the Food Controller.

Failure to make application to take out a license within fifteen days after being duly notified by the Food Controller will subject such person, firm or corporation to a fine of not less than double the license fee, and a further penalty of $5.00 per day for each day delinquent after such notice.

Rule 14.

Combination Sales.—No retail merchant shall be permitted to sell or offer to sell any article on the condition that purchaser shall be required to buy other goods. Each article must be sold on its merits and not in combination.

REGULATIONS GOVERNING THE LICENSING OF MANUFACTURERS.

Rule 1.

A manufacturer of food stuffs for household consumption must be licensed to do business in Canada.

Rule 2.

A manufacturer shall have the right to sell his goods on the following basis:—

1. Direct to the consumer.
2. To the consumer through the retailer.
3. To the consumer through the wholesaler and retailer.

Rule 3.

In the sale of any proprietory or trade-marked line of goods to the consumer, through the medium of the wholesaler and retailer, and upon which the manufacturer has established a reasonable selling price to the consumer, and who is using the retailer and wholesaler as a medium of reaching the consumer, the manufacturer shall have the right to protect his interests (and that of the trade who are assisting in the distribution of his products) by refusing to supply any dealer who violates his selling contract.

Rule 4.

On any proprietory or trade-marked brand, the manufacturer shall not have the right (having regard to quantity) to sell to one retailer on a better basis as to price and terms than to another retailer, neither shall he have the right to sell to a wholesaler on a lower basis of price, quantity and terms than to another wholesaler, having regard to the price, quantity and terms ruling on the date of sale.

FORM OF APPLICATION FOR MANUFACTURERS

I/We, the undersigned, carrying on a manufacturing business in.....

.....

(Here name lines manufactured)

do hereby make application for license to manufacture in Canada.

Our cheque, payable to the Food Controller, accompanies this application, and we undertake to conform to the rules and regulations as laid down by the Food Controller from time to time.

Our turnover for last year was:—

.....

REGULATIONS GOVERNING LICENSES

Class 2.

Wholesalers must be licensed to do business in Canada.

1. Wholesalers may import, buy from, or sell to, other members of the trade, manufacturers or producers, either direct or through the medium of brokers or manufacturers' agents.

2. A wholesaler in selling to another wholesaler shall be expected to allow a reasonable share of his margin over cost, but in no case shall he be permitted to sell at a higher figure than the regular price of such goods.

3. A wholesaler selling a proprietory or copyrighted brand of food products, the price and terms of which have been fixed to the retail trade by the manufacturers or packer thereof, shall not be permitted to charge more than the price fixed by the manufacturer or packer, and to sell at less than the stipulated price by rebating or otherwise will be considered equivalent to a violation of the Secret Commissions Act, and will render the offender subject to such penalty as the Food Controller may impose, but shall not be less than $50.00, and if persisted in shall involve the cancellation of his license.

4. To prevent profiteering, the wholesaler shall be under control of the Food Controller as to his profits, and will not be permitted to sell at more than a reasonable profit. To guard against excessive profits being charged, his books and records shall at all times be open to inspection by the Food Controller or his agents, and such records shall be kept so as to show distinctly the cost and selling prices of any staple article upon which monthly returns are required. Should it be found by such inspection that excessive prices are being charged, the Food Controller may take whatever action he may deem necessary in order to prevent a recurrence of such practice, or at his discretion may cancel the license.

FORM OF APPLICATION FOR WHOLESALE GROCERS

Class 2.

I/We, the undersigned, carrying on a wholesale grocery business, do hereby make application for license to trade as wholesale grocers under Class 2 of the Food Controller's Regulations.

I/We beg to state that our business is being carried on as a strictly wholesale grocery business (and is not a concern whose members or stockholders are made up of retail merchants) and we are not in any way connected directly or indirectly with any plan or agreement by which our stockholders are to receive dividends, rebates or allowances on the basis of their purchases.

My/Our cheque (payable to the Food Controller) accompanies this application, and we undertake to conform to the rules and regulations as laid down by the Food Controller from time to time.

My/Our turnover for last year was:—

.....

REGULATIONS GOVERNING LICENSES OF WHOLESALE JOBBER

Class 3.

Rule 1.—A wholesale jobber may import, buy from, or sell to, other members of the wholesale trade, either direct or through the medium of brokers. If such wholesale jobber shall sell also in the retail trade, he shall in addition be required to take out a license under Class 2.

Rule 2.—A wholesale jobber shall be required to make monthly reports on all such lines as may be required by the Food Controller.

Rule 3.—The annual license fee for Classes 2 and 3 shall be on the following basis:—

$50.00 for a turnover of $500,000 or under, and $5.00 additional for each additional $100,000.

Rule 4.—To prevent profiteering, a wholesale jobber shall be under control of the Food Controller as to his profits, and will not be permitted to sell at more than a reasonable price. To guard against excessive profits being charged, his books and records shall at all times be open to inspection by the Food Controller or his agent, and such records shall be kept so as to show distinctly the cost and selling price of any staple article upon which monthly returns are required, and should it be found by such inspection that excessive prices are being charged the Food Controller may take whatever action he may deem necessary in order to prevent a recurrence of such practice, or at his discretion may cancel the license.

MANUFACTURERS, WHOLESALERS AND RETAILERS ENDORSE ACTION.

We, representing as we do, the trade from manufacturers to retailers, and realizing the deep obligation upon us as handlers of foodstuffs to conserve the food supplies of all classes of the community so as to adequately feed our brothers in arms and those allied with us, believe that constructive legislation is necessary to avoid bringing into unjustifiable disrepute a majority of honest traders, and at the same time to avoid profiteering, and the unnecessary waste of foodstuffs. We are, therefore, in accord with the Food Controller's idea to proceed as rapidly as possible with Government rules and regulations to regulate those engaged in supplying the necessaries of life. Having studied the working of food control in the United States we hereby express our willingness to give our best assistance and support in carrying out such regulations as may be made by the Food Controller from time to time. We also express the hope that such regulations may be made as simple as possible for the better carrying out of the same.

This resolution was moved at the meeting on Tuesday by H. G. Flint, of the Canadian Shredded Wheat Co., and seconded by R. L. Innis, of the Dominion Canners, and unanimously adopted

FORM OF APPLICATION FOR WHOLESALE JOBBER

Class 3.

I/We hereby make application for license as a wholesale jobber.

My/Our business is not directly or indirectly connected with any plan by which any stockholder in our firm or corporation is to receive dividends, rebates or allowances on the basis of their purchases.

My/Our cheque, payable to the Food Controller, accompanies this application, and we undertake to conform to the rules and regulations as laid down by the Food Controller from time to time.

My/Our turnover last year was:—

REGULATIONS GOVERNING LICENSES FOR COMMISSION AGENTS, OR COMMISSION MERCHANTS

Class 4.

Rule 1.—A commission agent or merchant shall not charge directly or indirectly a commission on the sale of food commodities in excess of that which ordinarily or customarily prevails under normal conditions in the locality in which such commission agent's or merchant's business is located, and in the particular branch of trade in question.

Rule 2.—The licensee shall remit promptly following the sale of food commodities received on consignment, and shall render to the consignor an account showing the true sales, and with charges only for service actually performed and expenses actually incurred by the licensee.

Rule 3.—The licensee shall not charge or receive for himself, on the sale of any food commodities, both a commission and an extra profit, except as provided in Rule 4 following.

Rule 4.—The licensee shall not directly or indirectly sell consigned food commodities, with the sale of which he is entrusted on commission, to himself, or to anyone interested with him, or interested in his firm for the purpose of re-sale.

Rule 5.—The license fee for a commission agent or merchant shall be $50.00 per annum.

FORM OF APPLICATION FOR COMMISSION MERCHANTS OR AGENTS

Class 4.

I/We hereby make application for license to trade as commission agents. We agree to conform to the rules and regulations governing our business (Class 4) Food Controller's Regulations.

My/Our cheque for $50.00 payable to the Food Controller, accompanies this application.

.....

REGULATIONS GOVERNING THE LICENSING OF BROKERS

Class 5.

Rule 1.—No broker shall buy or sell any food commodity for his own account unless he is also regularly engaged in or holds himself out to the trade as conducting a business other than on a brokerage basis.

Rule 2.—Any broker conducting business on other than a brokerage basis shall be required to take out an additional license covering the other class in which such broker does business. Providing always that in no case shall such transaction be of the nature of a speculative one.

Rule 3.—If the broker does business under Class 3, to prevent profiteering, he shall be under control of the Food Controller as to his profits, and will not be permitted to sell at more than a reasonable price. To guard against excessive profits being charged, his books and records shall at all times be open to inspection by the Food Controller or his agents, and such records shall be kept so as to show distinctly the cost and selling price of any articles upon which monthly returns are required, and should it be found by such inspection that excessive profits are being charged, the Food Controller may take whatever action he may deem necessary in order to prevent a recurrence of such practice, or at his discretion may cancel the license.

Rule 4.—The license fee for brokers doing business under Class 5 shall be $50.00 per annum.

Rule 5.—In the event of a broker carrying on business under any other classification than Class 5, he shall be subject to the regulations governing either or all of the other classes of trade.

FORM OF APPLICATION FOR BROKERS

Class 5.

I/We hereby make application for license to trade as brokers, under Class 5 of the Food Controller's Regulations.

I/We agree to conform to the regulations.

My/Our cheque for $50.00, payable to the Food Controller, accompanies this application.

REGULATIONS GOVERNING THE LICENSING OF RETAIL GROCERS

Class 6

Definition of Retail Grocer.—A retail grocer is one who sells direct to the consumer, and deals in the following enumerated lines:—

Cereals, flour, bread, biscuits, starches, baking powder, etc.

Sugar, syrups, confectionery.

Vegetables, potatoes, tubers and other root crops, and culinary vegetables.

Fruits and nuts.

Preserved meats and food preparations.

Preserved fish and preparations.

Dairy products, milk, butter, cheese, eggs and poultry.

Aromatics and condiments, coffee, chocolate, tea, spices, flavoring extracts, essence.

Fats, oils, soaps, candles, kerosene, vinegar.

Preserved fruits and vegetables, jams, jellies, etc.

Detergents and apparatus, alkalis, brushes, sponges, brooms, matches, etc.

(Continued on page 68.)

EVENTS IN THE TRADE

INDUSTRIAL NOTES

Moose Jaw, Sask.—Line, Hansen & Kimball Co., auto' accessories, has been succeeded by Line & Kimball.

Regina, Sask.—International Harvester Co. of Canada, Ltd., has increased its capital from $1,000,000 to $15,000,000.

Brantford, Ont.—The Steel Company of Canada propose building an addition to their plant here at a cost of $100,000.

Hamilton, Ont. — Cummer-Dowswell, Ltd., manufacturers of wringers, etc., have changed name to Dowswell, Lees & Co., Ltd.

Toronto, Ont.—The city architect has granted a permit to the Canadian Fairbanks-Morse Co. to erect a one-storey munition shop adjacent to their present plant on Bloor Street. The estimated cost is $5,000.

Detroit, Mich.—Local capitalists have organized the Detroit Shell Company with a capital of $2,000,000 and possessing an initial order for $30,000,000 worth of munitions. John Kelsey, president of the Kelsey Wheel Co., is head of the new organization. The industry will employ between 8,000 and 10,000 men.

Sault Ste. Marie, Ont.—The Algoma Steel Corporation will make considerable additions and improvements to its plant, including the installation of 25 by-product coke ovens, with by-product equipment. Construction will be started immediately, and it is expected that the plant will be completed by the middle of 1918. The contract for the installation of the coke ovens has been awarded to the Wilputte Coke Oven Corporation, New York.

MONTREAL NEWS

Mr. Kearns, of B. & S. H. Thompson, was a Quebec visitor the past week.

Mr. Martin of the Channel Chemical Co. of Toronto was a visitor to Montreal this week.

The Sprustex Company of Chicago was represented in Montreal this week by Mr. Davidson.

Robert Misson of the Sherwin-Williams paint staff has been confined to his home through illness.

Harry James, of Shurley & Dietrich, Galt, was a Montreal visitor this week calling on the hardware trade.

E. W. Poole of the firm of McArthur Irwin, painters' supplies and manufacturers, is spending a few days in Toronto.

C. W. Robinson of the Chicago Spring Butt Company was a business visitor this week, calling on the trade in interests of his firm.

APPOINTED MANAGING DIRECTOR

H. M. Ashby Appointed Managing Director of the Sherwin-Williams Co. of Canada

H. M. Ashby who in October, 1915, was appointed general manager of the Sherwin-Williams Co. of Canada has been appointed managing director of this firm. Mr. Ashby was born in London, England, and came to America a number of years ago, starting in with the Alston Mfg. Co., later becoming connected with the Sherwin-Williams Co., paying particular attention to manufacturing and organization work.

H. M. ASHBY,

Appointed Managing Director of the Sherwin-Williams Co. of Canada at last Directors' Meeting.

His ability soon won him the important position of manager of the Chicago division of the Sherwin-Williams Co. of America. In October, 1915, Mr. Ashby gave up this position to assume the duties of general manager of the Sherwin-Williams Co. of Canada. Under his able managership the company has continued its growth, and at the recent directors' meeting he was appointed managing director of the Sherwin-Williams Co. of Canada. Mr. Ashby will continue to manage and direct the operations of the company as he has been doing for the past two years.

PERSONALS

G. H. Smith has been elected president of the International Petroleum Co., succeeding Walter C. Teagle.

Herbert Johnston has been appointed Canadian sales manager of the Armstrong Whitworth Co. of Canada, Montreal, not city sales manager as was stated in last week's issue.

Frank Stott and O. Jacobs, representatives of the Miller Morse Hardware Co., Winnipeg, were callers at HARDWARE AND METAL'S offices, Toronto, this week, on their way to their homes in Cobourg, Ont.

Service Force Convene

The McGraw Tire & Rubber Company's service force held a three-days' convention from November 26 to 29. The policies to be effective in future work were defined. Furtherance of trade educational service was discussed to demonstrate the value of tire conservation. The "Care of Tires" book recently issued, which explains ways and means of lengthening tire mileage, was favorably commented on by the force.

INCORPORATIONS

Barrie, Ont.—Otton Hardware Co., Ltd., has been granted Provincial charter.

LIEUT. CECIL J. BEACHAM DIES

Lieut. Cecil J. Beacham who for many years represented British manufacturers in Canada and other parts of the world fell in action near Ypres on October 9, 1917. Lieut. Beacham enlisted in Canada in January, 1916, and received his commission in France on June 25 of this year. Lieut. Beacham represented among others Abel Morrall, Ltd., Clive Works, Redditch; Newey Bros., Birmingham, and F. and H. Ayres, sporting goods manufacturers, London.

SILVEX CO. INSTAL EXTRA EQUIPMENT

The Silvex Company, makers of Bethlehem Spark Plugs and other automobile accessories, are installing much new equipment in their new factory, including a battery of thirty Gridley Automatics. These, together with those taken from the old plant, will be used in turning out shells and glands for spark plugs.

Under normal operation the new Silvex plant will now have a capacity of 50,000 spark plugs for each eight-hour day.

METAL BILL DESTROYS GERMAN MONOPOLY

The British House of Commons has given second reading to the bill known as the Non-Ferrous Metal Bill which gives the Government control of all dealings in metals not containing iron, and is intended to destroy what hitherto has

been a virtual German monopoly in these metals. The bill has been criticized strongly inside and outside of Parliament.

BICYCLE DEALERS' ASSOCIATION GROWS

Ottawa Valley Bicycle Dealers' Association Becomes a Unit in National Association of Canada—Officers Elected

Ottawa, Ontario.—At a war-time banquet in the Russell Hotel, Ottawa, on Wednesday evening, December 12, the Ottawa Valley Bicycle Dealers' Association was formally organized as a unit in the National Bicycle Dealers' Association of Canada. In addition to the adoption of a constitution and the election of officers, the members of the new body dealt with plans for various matters for the coming season. It was decided to hold a "Bicycle Week" in the late spring and steps were taken for the holding of a bicycle road race. A trophy for this event was promised the Dunlop Tire & Rubber Goods Company. The membership fee for the new association was placed at $2 per year. Officers were elected as follows:—President, George Henzell; vice-president, Fred Hurd; secretary-treasurer, Herb Howe. The executive committee is composed of the above and H. Byshe and George Bourne.

Store and salesmanship methods and the advantages of co-operation between the dealers with respect to hours, demonstrations, service and window-dressing arrangements formed the subjects for a number of instructive speeches by local retailers and visitors. Addresses along these lines were made by four trade representatives of Toronto, including Messrs George Braden, D. J. Rogerson, E. M. Peer and W. M. Gladish.

"There is no satisfaction in one man trying to undersell his competitor by five or ten cents," declared Mr. Rogerson, who pointed out that the manufacturers stood with their hands tied if they did not enjoy the support of the retailers and if the latter did not try to co-operate among themselves.

E. M. Peer, Canada Cycle Motor Co. of Toronto, declared that the bicycle industry in Canada was getting back quite a few of its expert mechanics and the result was already being noticed in both quantity and quality. He also drew attention to the great success of bicycle week last spring all over the country because of co-operative methods. He emphasized the value of a "stunt" in advertising a bicycle store.

"Does everybody in Ottawa know that you are in business?" asked W. M. Gladish of Toronto in describing many methods and opportunities which dealers could use to boost business. "In all the cities and towns which I have visited during the past few months I have found that practically all bicycle dealers have doubled their floor space or doubled their orders for stock and have doubled their sales during the past year."

BICYCLE DEALERS' CONVENTION

Montreal, Quebec. — Plans are under way for the holding of a bicycle dealers' convention in Montreal during the Montreal Motor Show, January 19 to 26, for the purpose of organizing a Provincial Bicycle Dealers' Association for Quebec as a branch of the National Bicycle Dealers' Association of Canada. A feature of this gathering will be that a number of the bicycle and tire manufacturers will have exhibits at the show.

ONE IN TEN BOUGHT VICTORY BONDS

The latest returns in the Victory Loan campaign show a total of 782,714 subscribers, or one subscriber for every ten people in Canada. This establishes a new record with respect to the proportion of the population of a country subscribing to its War Loans.

The achievement in connection with

HON. F. COCHRANE.

Minister without Portfolio in the new Union Government who was elected for the riding of Temiskaming. Hon. F. Cochrane is head of the Cochrane Hardware Co, Sudbury, Sault Ste. Marie, North Bay, Cochrane, Copper Cliff, Ont.

—International Press Service.

Canada's Victory Loan, while primarily due to the splendid spirit of patriotism that pervades the country, is another evidence of what may be accomplished through advertising backed by an adequate selling organization.

Emphasis was placed in advertisements on the privilege and duty of every Canadian to assist in the war financing of his or her country, and upon the fact that if Canada's financial needs were to be met the great masses of the people would have to buy Victory Bonds. The meaning of a "bond" and the security behind Canada's Victory Bonds were explained in simple, every-day language. Similar educational work was done voluntarily by almost all newspapers through their news and editorial columns.

The press publicity created an atmosphere and a knowledge of the situation that in addition to securing large numbers of subscribers without personal solicitation made it possible for the personal workers to do their work quickly and effectively and with infinitely greater results than could have been obtained without the educational, inspirational and selling advertisements in the press.

MARITIME COMMERCIAL TRAVELLERS ELECT OFFICERS

W. H. Smith, of Robertson, Foster, & Smith, wholesale hardware, St. John, was elected president of the Maritime Commercial Travellers' Association at their annual meeting held in Halifax. Other officers elected include: Vice-president for N. S., C. W. Smith; vice-president for N.B., C. E. Patterson; directors for N.S., C. Blackie, F. W. Budd, Percy T. Strong, W. W. Lane, R. G. Morton, F. G. Carten; directors for N.B., L. C. Armstrong, E. R. Fenwick, E. A. Hoyt, M. H. Dunlop, J. C. Earle, G. G. Waters.

The annual report showed a membership of 1,278, of whom 714 are registered in Nova Scotia and 564 in New Brunswick. The membership shows a gain. The resources of the association show a total of $135,644, an increase of $7,588 during the year.

The chairman of the Halifax Relief Committee addressed the members, thanking them for valuable aid rendered during the week following the recent catastrophe. Instead of entertaining the members at the close of the meeting, according to the usual custom, the president-elect donated a sum equivalent to the cost of such entertainment to Halifax charitable institutions.

Sheet Steel Manufacturer Offers Suggestions

States Fewer Gauges and Sizes Would Benefit Entire Trade —Outlines Reasons.

MANUFACTURERS of steel sheets have been experiencing some difficulty in taking care of orders placed with them—not so much from the volume of business, as from the variety in gauges and sizes. This point in relation to gauges and sizes was enlarged upon to HARDWARE AND METAL by one manufacturer who strongly advocates their reduction by sheet metal workers to a more efficient basis.

To emphasize his contention, this manufacturer stated that he had received an order from a jobber for shipment to a sheet metal worker for 23 items, the total amount of the order being 54 bundles.

We know sheet metal workers who carry a very limited number of sizes and gauges in stock and who can handle any job coming their way, and although at times they have what seems to be a little waste, yet in the end they do not waste a pound. In the interest of economy, conservation, and general efficiency in war time, and later on in time of peace, we would strongly recommend that the number of gauges and sizes called for by the sheet metal workers be reduced to a more efficient basis. We do not believe that this customer of our jobber needs 23 sizes so that he can do business effectively.

To summarize the benefits, if the boiling down process could be standardized or carried out properly, we would say:—

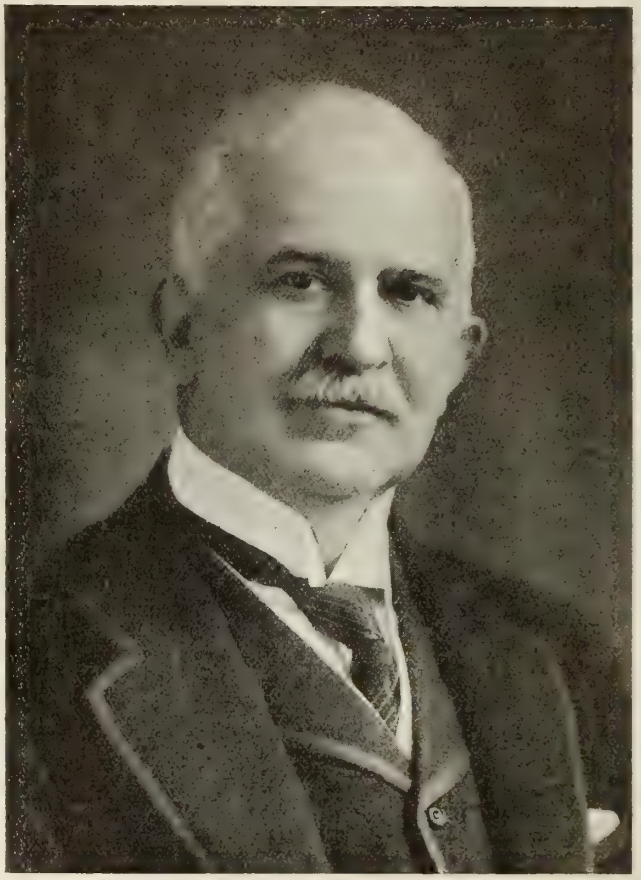
First—the steel plant rolling the sheet bars will execute the order more quickly because they like large items.

Second—the rolling mill making the black sheets will get out better tonnage on big items, and will also be inclined to give preference to good-sized orders, rather than small cut-up specifications.

Third—in making the galvanized sheets, it would be possible to carry a much better stock of each size if it were not necessary to have so many sizes and the same is true of gauges, hence quicker shipments could be made and the customers would not need to carry such large stocks, because they can depend on the manufacturer's stock.

Lastly—the sheet metal worker need not tie up so much money because he can get quicker shipment. He will need less space if he has fewer sizes and gauges. There would not be required so much handling and throwing around of the sheets, which is a very disagreeable item in the usual shop.

It is undoubtedly true that every time the rolls are changed in a steel mill, benefit to a certain customer results but the tonnage output of the mill is decreased. If certain specific forms of steel only are required the roll changing is a good thing but if the total tonnage output of the mill is to be stimulated it is just the contrary. If, as stated by this manufacturer, fewer gauges and sizes would result in increased tonnage without working any hardship on the sheet metal worker, the point might be well worth considering.



SIR A. E. KEMP

Overseas Minister of Militia, sustained in election on Monday in East Toronto. Sir A. E. Kemp is president of the Sheet Metal Products Co., Toronto.

International Press Service.

ONE-DELIVERY-A-DAY PLAN

The success of co-operative delivery in many towns and cities of Canada and the United States has been so evident that further curtailment of this part of store service to a one-delivery-a-day basis is now under the consideration of both governments. In the United States the following statement has been authorized by the Council of National Defense:

One regular delivery a day as a maximum for retail stores throughout the United States, and co-operative delivery systems in all the smaller cities and towns, are now direct objectives of the delivery campaign started some time ago by the commercial economy board of the Council of National Defense.

To Canvass Entire Country

The board's recommendations have been adopted as a whole or in part in cities with a total population of approximately 16,000,000, and as a result at least 15,000 men called for war service have not had to be replaced from the limited labor supply available for the essential industries. All this, however, has been preliminary. Agents of the State councils and other representatives of the board are now to go over the country town by town and press for the adoption of the entire programme.

"We have been content to let the changes proceed by easy stages, because experience was needed," said A. W. Shaw, chairman of the board. "At the outset we were able only to say it was evident that these changes would produce important savings of labor. But now we have actual results to show it. One store, for instance, has saved 24 out of 167 men by adopting the recommendations.

Co-operative Delivery Saving

"The savings from co-operative delivery systems are even greater. An agent of the board has made a careful, first-hand study of 21 of these systems. They require a total of 207 men, as compared with 659 men required for the individual systems replaced—a saving of 452 men, or 68 per cent.—and the service to the customer is practically everywhere as good as it was before, and in some places better.

"It is now plain that in these two ways—by co-operative systems in the smaller communities and one delivery a day throughout the country—more than 150,000 men can be released to meet the increasing need of workers in agriculture, shipbuilding, munitions making, mining, railroading, and the other vital work."

At the present time representatives of the retail trade are in Ottawa conferring with the Food Controller on many important subjects as outlined elsewhere in this issue and the question of delivery is one on which action may be expected within the very near future.

INCORPORATIONS

Montreal.—Wad Mop Co'y, Ltd. has been incorporated to manufacture and deal in brushes, brooms, mops, cleaning and polishing apparatus, etc. Capital stock is $35,000.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

THE week has been one in which further important changes have been made in goods pertaining to the hardware trade. Advances have been recorded in scissors and one of the large makers of firearms in the United States has announced a considerable increase in price. A number of advances have also been recorded in automobile accessory lines, including acetylene burners, garage pumps, chamois skins, lap robes, brake lining. The law requiring that headlights without glare be used comes into effect in Ontario on January 1, and some of the wholesale hardware houses and automobile accessory dealers are preparing to take care of the demand with a kind of headlight to fill the requirements of the law. Brass and copper tubing and brass sheets have registered declines. Cotton gloves have been moved to higher levels owing to the high price of raw cotton. Waste is another line which is affected by the situation in the raw cotton market. Intimations are made that higher prices are not improbable around the first of the New Year. Window glass is also in a strong market with indications that higher prices may soon be asked. Manufacturers in the United States are experiencing much difficulty in manufacturing operations owing to the shortage of fuel. Supplies of glass in Canada have been considerably reduced through the recent catastrophe at Halifax. There is a firm situation in brushes of various kinds owing to the increased cost of manufacture and the scarcity of bristles. Cement has been increased in price for January shipment. Severe cold weather and snowfall recently has created a heavy demand for snow shovels, skates, sleigh bells, sleighs, snow shoes, toboggans, horse blankets, sidewalk scrapers and kindred lines, with the result that jobbers' stocks in these lines are fairly well depleted. Manufacturers' stocks in these lines are also in a depleted condition. As a result of this condition it is apparent that stocks will be abnormally low at the end of the season. Business in all seasonable lines is reported very good. Bookings for spring delivery have kept up to quite normal volume.

MONTREAL MARKETS

MONTREAL, Dec. 19.—All jobbers are either beginning or completing their annual stock-taking duties and the situation of the jobbing trade is quiet. A good spirit prevails among the trade. Christmas lines have sold well and nice repeat business has been received by many. Good sleighing in the rural districts has had the effect of stimulating an active demand for regular lines in a small way, and for the special holiday goods to a greater extent. Difficulty is experienced in getting supplies through from the English manufacturers and in certain classes of goods this works a real hardship. One of the larger United States cutlery makers is accepting business for next year, but on the basis of delivery late in the fall. Several changes in an upward direction are noted in automobile accessory lines. Mirrors have advanced 25%. Head lights, tail and side lights are 12½% higher. Tire chains of the Dreadnought type are up 10%. Motor robes in the plush-lined qualities advanced 35%. Cotton wrapping twines shew a firm tendency. Winchester guns and rifles have taken a 10 per cent. advance.

Licenses Obtained For Some Container Tinplates

Montreal.

TINPLATE.—One of the larger manufacturers states that he has been able to secure a license covering some of his requirements for tinplates. These will have to be used for the making of food containers or for dairy stock, which is considered an essential line of goods by the Food Controller's department. This manufacturer is hopeful of securing much needed supplies after the first of the year.

Electric Headlights Advanced Ten Per Cent.

Montreal.

HEAD LIGHTS.—There has been an advance in the price of electric head lights of approximately 12½%. This applies to all sizes and styles and the same discount is applicable to side and tail lights as well. Higher costs for basic materials are given as the reason for the increase thus represented.

Tire Chains Are Quoted At Higher Prices

Montreal.

TIRE CHAINS.—A new list has been issued on tire chains which represents an approximate advance of 10 per cent. This applies to the Dreadnought lines. They are put out in the regular as well as the special sizes. The Ford size, 30 x 3½, is now listed at $4.50; the 33 x 4 size at $5.30; the 34 x 4 at $5.50; 35 x 4½ at $6; 36 x 4½ at $6.20; 35 x 5 at $7, and 37 x 5 at $7.80. From these prices the dealer is given the regular trade discount.

Plush-Lined Robes Are Up 35 Per Cent.

Montreal.

MOTOR ROBES.—An advance of no less than 35% is recorded for the popular plush-lined robes. These sell well and are a quality line of goods. Increased costs of labor and raw materials coupled with the scarcity of these are given as the reasons for necessary advances.

Ordinary Mirrors Advanced 25 Per Cent.

Montreal.

MIRRORS.—An advance of 25% has been made in the price of mirrors. This applies to the regular lines carried by the hardware trade and is effective immediately. Higher glass costs and higher prices for quicksilver are the reasons for this advance.

Winchester Firearms Advanced About 10%

Montreal.

GUNS AND RIFLES.—Following the announcement last week of an advance in Winchester ammunition comes the news this week of a new price schedule on Winchester Repeating Arms Company's line of rifles and guns. This is effective at once and the advance, which approxi-

mates 10 per cent., will make a new high record for this line of firearms.

New Truck Tires Are Being Stocked

Montreal.

AUTO TRUCK TIRES.—A new line of truck tires is placed on the market this week and are offered in "Continuous Tread" and the "Block" and "Cushion" types. A full line for all makes of cars will be offered and in 16 different sizes. They will be available for the electric as well as for the other standard makes of gasoline driven trucks.

New Garage Systems For Winter Heating

Montreal.

GARAGE HEATING SYSTEMS. — There is an increasing demand for steam heating plants for privately-owned garages. These are rather inexpensive, considering the advantages to the man who has his car in use during the winter months. Where they have been tried out the results are reported satisfactory. A one-car plant can be had for $91 to the owner and other prices range upward to $345 for the car garage outfit.

Standard Wire Nails And Wire Unchanged

Montreal.

WIRE NAILS, WIRE.—Local sales of nails are confined to the sorting feature. No changes are made in quotations which are as last week at $5.50 base, for the standard wire and at $5.75 for cut nails. Some jobbers report a fair number of orders for spring shipment. Standard smooth wire is still quoted at the base price of $6.50 per 100 lbs.

Country Sorting For Iron And Steel Bars

Montreal.

IRON AND STEEL.—The volume of business obtaining in iron and steel is limited to the sorting orders sent in by country merchants. Jobbers report the usual quiet conditions that are anticipated in the Christmas week, particularly for staple lines. No changes of price are recorded for the week.

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80

Black Diamond tool steel, per lb.	0 18-0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 19-0 19

Market On Sheets Remains Unchanged

Montreal.

SHEETS AND PLATES. — Jobbers and importers are busy with stock-taking and report a quiet condition of trade. This is a characteristic of the season, and they look forward to some satisfactory solution of difficulties after the first of the new year. This will not be possible to a great extent, but in view of the severity of embargoes and the shortage of supplies they hope that some methods may be adopted by the governments which will enable a fair amount of stock to be brought forward. Prices are held unchanged and are quoted here as follows:

MONTREAL—		100 lbs.
BLACK SHEETS—		
10 gauge		$12 50
12 gauge		11 60
14 gauge		11 50

18 ga.		10 15
16 ga.		8 70- 8 85

Coal Oil And Gasoline Conditions Normal

Montreal.

COAL OIL AND GASOLINE.—Gasoline is quiet. The amount of snow on the ground has made it rather impossible to run motor cars outside in country districts and the sale of the gasoline product is, therefore, restricted. Fewer cars are in use in the city, too. Coal oil demand continues very good with price unchanged. Palacine is quoted at 20c per gallon, Royalite at 17c and Electroline at 20c. Gasoline is still 32½c per gallon.

Rope Prices Hold; Movement Is Small

Montreal.

ROPE AND CORDAGE. — There is small movement of rope or cordage products and prices are firmly maintained. Jobbers and manufacturers hope for a solution of some of their troubles in the near future. The deliberations of the government's various control and regulation boards are expected to reveal some definiteness with regard to future supplies. Stocks held are ample for the needs of the present and immediate future.

Lead Products Are Held Unchanged

Montreal.

LEAD PRODUCTS. — Small movement is recorded for lead manufactured products such as pipe and bends. There is a limited amount of work being done by the plumbers and the holiday season finds the line generally quiet.

MONTREAL—	
Lead pipe, lb.	$0.14-$0.15
Lead waste pipe, lb.	0.15- 0.16
Lead traps and bends	Net list
Lead wool, lb.	0.14
Lead sheets, 3 lbs. sq. ft.	0.12½- 0.13
Lead sheets, 3½ lbs. sq. ft.	0.12- 0.12½
Lead sheets, 4 to 6 lbs. sq. ft.	0.11½- 0.12

Old Material Slow With Prices Held

Montreal.

OLD MATERIALS.—There was some activity in old iron and steel for a few days, but this was very temporary. Dealers in old junk do not expect much movement for the next few weeks, when there should be a demand for several of the lines. Prices are held, although these cannot be stated as firm or with firming tendencies. It would be well for those who hold any considerable quantities of old materials to weigh the transportation and other troubles in all their aspects before disposing of stocks.

MONTREAL—		
Tea lead	$ 0 04	....

Tin Advances Two Cents; Other Ingots Unchanged

Montreal.

INGOT METALS.—The holiday season finds business quiet in general and this is quite so with regard to ingot metals.

COPPER. — Small interest and little trading. Request is for small lots and these are selling at 33c to 34c per lb.

LEAD.—No changes of price are recorded in the price of lead. In the New York market there is a slightly firmer tendency, owing to the delays in securing replenishing stocks.

TIN. — Locally, an advance of two cents per pound commands the week's interest in ingots. This is probably a result of the accentuated primary tendency to higher levels, where an advance in Straits tin of over $25 per ton is announced. Local quotations are 81c to 82c lb.

SPELTER.—Spelter is unchanged and of limited interest, with quotations made at 10½c to 11c per lb.

ALUMINUM. — Unchanged and with small trading being done. Quotations are on the basis of 16c to 18c per lb.

ANTIMONY. — There is no feature, and in the primary market as well as the local quiet prevails. Prices range around 18c per lb.

TORONTO MARKETS

TORONTO, Dec. 20.—There has been a steadily upward swing in hardware lines during the past week and it includes such commodities as butcher knives, clothes lines, acetylene burners, garage pumps, chamois skins, lap robes, transmission brake lining. Wholesale dealers have now completed the compilation of their prices on fishing tackle. This advance was recorded some three or four weeks ago but net prices according to the new schedule had not been arranged until the present time. There is a scarcity of glass rolling pins

in this district induced through the difficulties attending the manufacture of this line. Business has been good in this district, the Christmas trade being fully up to that of last year despite the heavy drains on people in the shape of donations for patriotic purposes.

Butcher Knives And Clothes Lines Higher

Toronto.

KNIVES, CLOTHES LINES.—An advance in American butcher knives has been made effective during the week, the increase in the 6-inch amounting to 75c per dozen and in the eight-inch $1.25 per dozen. No. 2000 by 6-inch is now quoted at $4.75 per dozen and No. 2000 by 8-inch is quoted at $7 per dozen. An advance of approximately 10 per cent. has also been made effective on Niagara hemp clothes lines, making the price on 40-foot now $2.10 per dozen.

Scarcity Of Glass Rolling Pins At Present

Toronto.

ROLLING PINS.—There is a scarcity of crystal glass rolling pins at present and indications seem to point to a continued scarcity owing to the situation confronting the glass manufacturers. Crystal glass pins are now quoted at $3.50 per dozen. Opal glass rolling pins are being quoted subject to arrival at $4.50 per dozen. There is no assurance when these stocks are likely to arrive and wholesalers consequently must make quotations with some reservation.

New Prices On Fishing Tackle Now Completed

Toronto.

FISHING TACKLE. — Wholesalers have now arranged their prices on fishing tackle for spring, 1918, delivery. It was announced recently in these columns that an advance of from 20 to 30 per cent. has been made effective. On this basis prices on steel rods, bamboo rods, reels, lines, fish hooks and bait have been arranged. Following are the prices to the retail trade on some of the various lines:

Rods

Trojan rod No. 401 or Vim steel rod, three joints, 7-foot, $1 each. Van Dee bait rod No. 501 or Sunnybrook B.B.C., 6, 7, 8 and 9 foot, three joints, cork grip, $1.35 each.

Van Dee casting rod No. 505 or Sunnybrook B.B.C., 5½-foot, three joints, cork handle, $1.95 each.

Brookside special bait rod No. 203 or Samson B.X.A., 6½-foot, three joints, cork handle, $4 each.

Brookside casting No. 207 or Samson B.C.R., 6-foot, $2.20 each.

Brookside casting Kalamazoo No. 205 or Samson B.C., 5½-foot and 6-foot, $3.10 each.

Bristol steel telescope rod No. 10, $4.60 each.

Henshall No. 11, 8½-foot, celluloid handle. $5.75 each.

Split bamboo rods, three-piece, nickel mountings, wood grip in cloth bag, $17.20 per dozen.

Reels

Single action reel 102 P., 1¾-inch diameter, $2.85 dozen.

Single action reel 104 P., 2-inch diameter, $3.25 dozen.

Single action reel 106 P., 2¼-inch diameter, $3.75 dozen.

Double multiplying reel 2904 P.N., 2-inch, $11.50 dozen.

Double multiplying reel 2906 P.N., 2½-inch, $13.20 dozen.

Lines

Eureka cotton drab lines in 15-foot hanks, 12 connected: Size 2, $1.70 per gross; size 3, $1.90 per gross; size 4, $2 per gross; size 5, $2.35 per gross. This line is sold to retail at two for 5c, which is the cheapest line now carried.

Eureka cotton drab lines in 25-foot

REASONABLE ENOUGH.
"Hey, mister, will you please be a U-boat?"

hanks are quoted as follows: Size 2, $2.85 per gross; size 3, $3.10 per gross; size 4, $3.50 per gross; size 5, $3.90 per gross. This class of line retails at 5c each.

Favorite waterproof twist lines No. 204 on cards of 50-foot lengths, are quoted at 75c per dozen. This line retails at 10c each.

Fish Hooks

Carlisle ringed hooks, No. 12 to 1, $1 per thousand; No. 1-0, $1.25 per thousand; No. 2-0, $1.45 per thousand; No. 3-0, $1.70 per thousand; No. 4-0, $1.95 per thousand; No. 5-0, $2.16 per M.

Kirby & Limerick ringed hooks, No. 12 to 1, 65c per M.; No. 1-0, 80c per M.; No. 2-0, $1 per M.; No. 3-0, $1.15 per M.; No. 4-0, $1.30 per M.; No. 5-0, $1.50 per M.; No. 6-0, $1.90 per M.; No. 7-0, $2.45 per M.

Carlisle mounted single gut, No. 12 to 1, $2.10 per gross; No. 1-0, $2.60 per gross; No. 2-0, $2.90 per gross.

Bait

Cow Dung, Jack Scott, Silver Doctor, Blue Jay, Cahill, Parmachene Belle, Professor, March Brown, Hare Ear, Montreal, Soldier Palmer, Royal Coachman, 60c per dozen.

Acetylene Burners Advance 5c On List

Toronto.

BURNERS.—An advance of 5c on list price has been recorded on Alco de Luxe and Alco acetylene burners. The list price of former is now 35c each and of the latter 25c each. The Alco de Luxe is made to fit all American lamps and has hexagon base and nickel finish, and is carried in ½, ⅝, ¾ and 1 ft. burners. Standard size is for ¾ ft. burner. Discounts on these lines of burners is 25 per cent. in small quantities, 30 per cent. in quantities of 36 and 35 per cent. in quantities of 144 burners.

Garage Pumps Advance $4 On List Prices

Toronto.

PUMPS.—An advance of $4 each on the list prices of double action garage pumps, without gauge and with gauge. List price on style without gauge is now $21.75 each and with gauge $23 each. Cylinders on these pumps are 2-inch and 3½-inch in size. The large cylinder feeds the small one, which in turns pumps the compressed air into the tire. This pump is mounted on a wooden base, 8x30x2-inches. Discount from list price to retail trade is 25 per cent. and in quantities of six pumps 30 per cent.

Chamois Skins Show Higher Price Range

Toronto.

AUTO ACCESSORIES.—An advance in the price of chamois skins has been announced during the week amounting to 5c to 10c list on each skins. Following are the list prices that prevail on various sizes: 10 x 13 in., 50c each; 12 x 16-inch, 80c each; 15 x 20-inch, $1.40 each; 16 x 21-inch, $1.60 each; 18 x 24-in., $2 each. These prices apply to the American oil tanned chamois skin. Prices on French chamois skins are as follows: 23x33-inch, $1.90 each; 15x23-inch, $1.30 each. Above prices are subject to a discount of 25 per cent. to retail trade. In quantities of 12 the discount is 30 per cent. and in quantities of 60 skins the discount is 35 per cent.

Lap Robes Advance $5.50 On List Price

Toronto.

AUTO ACCESSORIES.—An increase in the price of Glengarry lap robes has been made amounting to $5.50 on list price. Where the former list price was $18.50 the new list price is $24 each. In quantities less than half dozen the discount is 25 per cent., in quantities of 6 the discount is 30 per cent. and in quantities of 24 the discount is 35 per cent. These robes have taken on firmness and higher prices have been incidental to the advance in the price of wool. The size of the robe is 58 inches by 80 inches.

Transmission Brake Lining Goes Higher

Toronto.

BRAKE LININGS.—A considerable advance has been made in the price of Fordoid transmission brake lining. This lining is made of asbestos with a small percentage of cotton. Both of these raw materials are high in price. List price on this commodity is now $5 per set of three piece as compared with the former list price of $3 per set. Discount on this article is 20 per cent. to the retail trade. In quantities of twelve sets the discount is 20 and 5 per cent.

Firearms Advance Approximately 10%

Toronto.

RIFLES, SHOTGUNS.—An advance of approximately 10 per cent. has been made effective on Winchester rifles and shotguns. New lists and discounts have been issued on this line. List prices have been advanced considerably and the discount changed. On one model 1894 round barrel rifle, where the list was formerly $19.50 it has now been advanced to $24. Selling price is now at 5 per cent. advance on list where the discount from the old list was 15 per cent. advance on list. Following are the new list prices on some of the popular models:

Model 1873 repeating carbine, list price $26 each.

Model 1873 rifle, octagon barrel, list price $28.

Model 1886 carbine, round barrel, $30.

Model 1886 repeating rifle, round barrel, $31.

Model 1886 repeating rifle, octagon barrel, $32.

Model 1890 .22 calibre take-down, octagon barrel, $20.

Model 1892 carbine, round barrel, $23.

Model 1892 rifle, round barrel, $24.50.

Model 1892 rifle, octagon barrel, $25.

Model 1894 carbine, solid frame, $23.

Model 1894 rifle, round barrel, solid frame, $24; octagon barrel, $25.

Model 32-40 and 38-55 calibres, take-down, round barrel, $30; octagon barrel, $31.50.

Model 25-35, 30 and 32 Winchester Special, solid frame, carbine, $25.50; rifle, round barrel, $27.50; rifle, octagon barrel, $29.50.

Model 25-35, 30 and 32 Winchester Special, take-down, rifle, round, $33.50; octagon, $35.35.

Model 1895 carbine, 30 Army or 303 British, round, solid frame, $38; rifle, same sizes, $38.

Take-down 30 Army or 303 British, round barrel, $44.

Single shot rifles are quoted as follows: Musket, solid, $27.50; take-down, $31; rifle, round, solid frame, $25, and take-down, $30; octagon barrel rifle, solid frame $27.50 and take-down $31.

Model 1903 .22 calibre automatic, round barrel, plain walnut stock, $32.

Model 1912 hammerless shotgun, 12, 16 and 20 gauge, standard take-down, $42.

Single barrel shotgun, 20 gauge, solid frame, $20.50; take-down, $26.50.

Scissors Advance 15 Per Cent. During Week

Toronto.

SCISSORS.—An advance of 15 per cent. has been made effective in Heinisch & Wiss scissors. Quotations made by different firms show a range of prices in the japanned straight trimmers, the following quotations being made: 6in., $9.65 and $10.25; 6½-in., $10.35 and $10.95 per dozen; 7-in., $11 and $11.55 per dozen; 7½-in., $11.50 and $12.25 per dozen; 8-in., $12 and $12.85; 8½-in., $12.75 and $13.50 per dozen; 9-in., $14.15 and $16.10 per dozen; 10-in., $18.80 per dozen. Japanned bent scissors are quoted as follows: 8-in., $12.75 per dozen; 8½-in., $14.50; 9-in., $17; 10-in., $20.60; 11-in., $22.50; 12-in., $24.25; 13-in., $26.65. Barbers' japanned scissors are quoted $12.85 and $14.10 for 8-in., $14.80 for 8½-in. japanned and $14.25 for 8½-in. nickel-plated.

No-Glare Headlights In Demand Next Year

Toronto.

HEADLIGHTS.—Owing to the law providing for headlights without glare on automobiles in Ontario after January 1 next, numerous different kinds are being placed on the market, some of which are being handled through the wholesale hardware trade. List prices quoted on the Osgoode are as follows: Up to and including 7¾-in., $3.50 per pair; 8-in. to 8½-in., $4.50 per pair, 8¾-in. to 9½-in., $4.80 per pair; 10-in. and larger, $5.40 per pair.

Shoe Waterproofing Placed On Market

Toronto.

SHOE DRESSING.—One of the new lines to be placed on the market is Viscol, a commodity designed to make boots and shoes waterproof. In quarter-pint containers the price is quoted at $2.25 per dozen and in half-pint containers at $3.75 per dozen. Now that snowy weather is here there is an anxious quest for some materials that will keep shoes and boots waterproof.

Booking Sap Buckets; Grindstone Fixtures Up

Toronto.

SAP BUCKETS, FIXTURES, GLOVES.— Some wholesale houses are now booking orders for sap buckets for the syrup season of next year. While the price of $19.50 per hundred at which they are being booked does not represent an advance over recent prices, the price does nevertheless show an advance over the opening price of last year. Grindstone fixtures have advanced approximately 15 per cent. during the week. For 15-inch the price is now $7.40 per dozen; 17-inch, $7.85 and 19-inch, $9.25 per dozen. Handles for the above are quoted at $1.75 per dozen. An advance has been put into effect by some wholesalers on cotton gloves, which has been induced by the high price in the raw cotton market and difficulty in securing the raw material. The cheapest line now quoted by one wholesaler is $1.30 per dozen pair. Higher-priced lines have advanced in a similar amount.

Fuel Oil Higher; Automobile Oils Firm

Toronto.

GASOLINE, OILS.—An advance of ½c per gallon was recorded in the price of fuel oil which makes the price in barrels 13c per gallon and in tank cars at 11½c per gallon. There is a firm situation in automobile oils which seems to indicate higher prices in this line of oils. Coal oils are holding in firm market although an advance has not yet been recorded. There is a heavy demand for this class of oil for heating purposes and also for lighting from the country districts where electric light or gas is not obtainable. Gasoline demand has been light during the past week, as the heavy storm effectually put a bar to its use to a very large extent. Gasoline is still quoted at 31½c per gallon and benzine at 30½c per gallon.

Cotton Waste In Very Firm Market

Toronto.

WASTE. — There is a very firm market for cotton waste and intimations are made in certain quarters that an advance is highly probable around the first of the New Year. One concern will not book any business on the present basis for future delivery. The stipulation that is made nowadays is that it must be for immediate acceptance and delivery. There is a continued strong market for raw cotton and this in turn is having its effect on the waste market. Manufacturers of waste usually arrange their prices about the first of each year on the basis of raw materials which they are then able to secure. In the meantime prices for immediate shipment hold unchanged.

Cement Prices Are Higher For Future

Toronto.

CEMENT.—As intimated in these columns last week that a strong market prevailed for this commodity and that an advance in price was highly probable, some concerns are now quoting on the basis of a 15c advance for delivery after January 1, which will make the price basis $2.55 per barrel. For immediate sale the price still holds at $2.40 per barrel in carload lots. Factors that have put firmness in this market are the high price of coal and labor. There is a normal business being done for this season of the year. Small lots of cement hold unchanged, largely because the demand is light at this season of the year.

Brass Tubing And Copper Tubing Decline

Toronto.

TUBING.—Following the decline recorded in brass bars and copper bars last week there has been a reduction in the price of copper tubing and brass tubing. On brass seamless tubing the price has declined 5c per pound, base size being now quoted at 50c per pound. Brass tubing, iron pipe size, has also declined a similar amount, the base price for ¾-inch and up to 3-inch being 50c per pound. Copper tubing has declined 7c per pound and is now quoted at 53c per pound for base sizes. A further readjustment in the downward direction has been made in the price of plain copper sheets to the extent of 2c per pound, making the price for base size 16-oz. and heavier 44c per pound. Planished copper sheets are quoted at 45c, while braziers' sheets are also quoted at 44c per pound. The assurance of lower priced copper for delivery during the first part of next year has worked out toward easier prices.

Firmer Feeling In Manila Fibre Products

Toronto.

ROPE, TWINE.—There was a firmness in the market for low grade and medium grade Manila fibres during the week at primary market points. There is next to none available of this class of fibre and very little offered for shipment. Prices on these lines are strong and the market has moved up slightly during the week. Mexican sisal remained quiet during the week. There has been no change in the rope situation with Canadian manufacturers. The recent disaster at Halifax did considerable damage to the plant of the Consumers' Cordage Company located there. The company's plant at Montreal will be called upon to do double duty until the plant at Halifax can be restored. Prices on rope of all kinds held unchanged during the week. Booking of rope for spring delivery has not yet started.

Endeavoring To Clean Up Stove Orders

Toronto.

STOVES, ENAMELWARE. — Manufacturers of stoves are busy endeavoring to clean up accumulated orders before the close of the year. They are handicapped in this, however, by the lightness of their stocks, which have been limited through the shortage of labor and raw materials. The season just closing, everything taken into consideration, has been a most satisfactory one so far as volume of business is concerned. Difficulties of manufacture have been numerous. The demand for enamelware is holding up well and prices remained unchanged.

Severe Weather Hampers Shipments

Toronto.

IRON AND STEEL.—The iron and steel industry felt the effects of the recent severe winter weather and deliveries from the United States have accordingly been delayed. There is a fairly good movement of steel and iron reported by Canadian jobbers although with the approach of the holiday season there is usually a somewhat lighter demand. Business concerns are then engaged in stock taking and they are interested in keeping their materials down as low as possible. There has been no change in the local situation so far as prices are concerned.

Further Settling Of Prices On Sheets

Toronto.

SHEETS, PLATES.—There has been a further settling to lower levels on certain gauges of black steel sheets. One concern reduced the price of gauges Nos. 20 to 28 to the extent of 50c per hundred pounds. In the instance in question No. 28 gauge is now quoted at $8.50, No. 26 gauge at $8.40, Nos. 22 to 24 gauge at $8.35 and Nos. 18 to 20 gauge at $8.30. In one quarter there was a further reduction in the price of galvanized sheets to the extent of 30c per hundred, which is indicated in the low quotations given hereunder. Following prices give the range of prices on black and galvanized sheets. As will be noted there is a wide range betwen high and low.

Prices On Corrugated Sheets Were Maintained

Toronto.

CORRUGATED SHEETS.—There was a steadiness in the market for corrugated sheets, there being no change in price since the readjustment in price recorded some two or three weeks ago. This is the season of the year when demand is expected to be at low point. Severe weather has further restricted inquiry.

Boiler Tubes Only For National Needs

Toronto.

BOILER TUBES.—There are some light stocks of boiler tubes available in this market but they can be had for domestic use only after the sanction of the Government is given to the effect that it is furthering the war efforts of the country to have them used. Prices held unchanged at recent quotations.

Position Of Tin Holds Products Firm

Toronto.

LEAD AND ZINC PRODUCTS.—There was a quietness in the market for lead and zinc products during the week, with no further price changes recorded. Tin continues to hold in a strong position and this is having its effect toward firmness on the solder market. There is a seasonably good demand reported, although at this season of the year it is usually expected to be light.

Stagnation Is Note In Old Materials

Toronto.

OLD MATERIALS.—There is a very inactive market for old materials at the present time, stagnation characterizing the situation so far as demand either from the mills or from the munition factories. There are rumors that prices are to be fixed on old materials some time early in the New Year and this is having its effect toward quietness in the market. Prices held unchanged during the week.

Now Negotiating Over Copper Price

Toronto.

INGOT METALS.—Tin continued to be the centre of interest in the local ingot metal market, with negotiations over the fixing of price on copper for next year perhaps following second. Demand for ingot metals is normal for this season of the year. With the holiday season near and the end of the year approaching stock-taking is mostly the order of the day. Merchants are therefore interested in keeping their stocks down to the minimum.

COPPER.—A conference was held at Washington on Friday of last week between the copper producers and the War Industries Board. Nothing is known as yet about the result of that conference. Rumors were current that the producers were desirous of having the price raised to 25c per pound. The general impression seems to prevail that the present price of 23.50c per pound is likely again to be adopted. In the local market prices held unchanged at 30c to 32c per pound.

TIN.—The strong situation in tin continues with a narrowing of margin price between small quantities and large quantities to 78c and 80c. In the United States market there is still the same uncertainty about getting supplies as the British Government has given no assurance as yet that supplies will be released. In some quarters in this district dealers report fairly good stocks of tin.

SPELTER.—Spelter was in a quiet market locally during the week with little interest manifested in the metal at primary points. Galvanizers were buyers of small quantities during the week but beyond this there was little activity in the primary market. Speculation continues as to what the Government price will be. Quotations were made in the local market on the basis of 9¾c to 10½c.

LEAD.—Interest in lead centres around the probable price to be established by the United States Government. In metal circles at primary market points the popular guess seems to conform to the present market of 6.25c to 6.50c. In the local market demand is somewhat quiet and prices held unchanged at 8¾c to 9c per pound.

ANTIMONY. — The market for antimony is quiet with prices unchanged locally at 16c to 18c per pound.

ALUMINUM.—Prices held unchanged at 60c per pound in the local market. In the United States market there is a good demand reported with the result that prices are firm.

PIG IRON.—Shortage of coke supplies continues to give Canadian producers concern over their probable output in the near future. There is a good demand reported and prices hold unchanged at $50 per ton for foundry iron.

LONDON MARKETS

LONDON, Dec. 20.—Price changes have been with but few exceptions in the upward direction and include advances on such lines as ammunition, linseed oil in small quantities, sad irons, trolley track, cross-cut saws. Business on winter lines continues good. Christmas trade is just fair up to date, although merchants expect the last few days just before the holiday to be busy ones. The majority of concerns are figuring on taking stock beginning the first of the New Year. Travellers for factories and jobbing houses have ceased their rounds until after January 1.

American Ammunition Registers Advance

London.

AMMUNITION.—Through the changing of the discount of Winchester and Remington ammunition a considerable advance has been recorded. Where the discount was formerly 2½ per cent. off list it is now quoted at 10 per cent. on list. List prices remain as heretofore. The advance includes rim fire, centre fire, pistol and sporting centre-fire cartridges. Felt and paper wads have also been advanced and are now quoted at 15 per cent. advance on list. Empty and loaded paper shot shells are quoted at 15 per cent. advanced on list.

Sad Irons And Trolley Track Higher

London.

SAD IRONS, TROLLEY TRACK.—Mrs. Potts's sad irons have been advanced in price, the plain now being quoted at $1.70 per set, while the nickel-plated are quoted at $1.80 per set. Richard Wilcox trolley track is another of the lines to show a higher price during the week. No. 31 is quoted at 19c per foot.

Crosscut Saws Up; Steel Toys In Good Sale

London.

SAWS, STEEL TOYS. — Arrowhead cross-cut saws is one of the lines to show a higher level of prices during the week. On this make of saws 5-foot length is now quoted at $4.50 each, 5½-foot length at $5.30 each and 6-foot length at $6 each. Steel toy castle builders are having a good sale at this season of the year. No. 0 is quoted at $4 per dozen, No. A at $6 per dozen, and No. AA at $8 per dozen. No. 1 is quoted at $12 per dozen, No. 2 at $24 per dozen, No. 3 at $48 per dozen, and No. 4 at $72 per dozen.

Glass Market Firm; Putty Is Unchanged

London.

GLASS, PUTTY.—There is a firm situation in glass owing to the difficulties attending the manufacture in the United States. Intimations from that quarter stated that stocks are very light and possibility of replenishing through manufacture becoming more and more remote. Prices in the local market held unchanged at 40 and 10 per cent. off list for single and double diamond and 33 1-3 per cent. on cut lights.

Putty held in a steady position with prices unchanged. Standard putty in 25-lb., 50-lb., and 100-lb. drums is quoted at $4.65 per 100 lbs., and pure putty is quoted at $1.25 per hundred in advance over standard putty.

Nails Hold Steady; Rope Market Quiet

London.

NAILS, ROPE.—There was a steadiness in the market for nails during the week and prices held unchanged at $5.45 base for standard steel wire nails and $5.75 per hundred pounds base for cut nails. Rope is also holding steady in a quiet market. Demand is not heavy at this season of the year and manufacturers have not yet issued their spring booking prices. Pure manila rope is quoted at 39c per pound base, British manila and New Zealand rope at 33c per pound and sisal rope at 27½c per pound.

Big Run On Oil Heaters Due To Coal Shortage

London.

OIL HEATERS.—Owing to shortage of coal supplies in some districts there is a big sale of coal oil heaters. There is a heavy demand for coal oil incidental to the use of these heaters and the market for this latter commodity is firm. No. 520 Perfection oil heater is quoted at list price of $5.75, No. 525 at $5.50 and No. 530 at $6.25 each. Above list price is subject to a discount of 25 per cent. to the retail trade.

Snow Shovels Going Well

Snow shovels continue in active demand owing to the need for shoveling snow. Prices hold unchanged at a discount of 12½ per cent. from list prices.

Flashlights and Batteries Moving

There is a fairly good movement of flashlights and batteries owing to the suitability of these lines as gifts. Discount remains unchanged at 33 1/3 per cent. off list.

Hand Sleighs And Skates Selling Well

London.

SLEIGHS, SKATES.—With the prevalence of winter conditions there has been a good movement of hand sleighs and skates. Sale for these lines is no doubt helped along by the fact of their suitability as Christmas presents for the boys and girls. Discount on hand sleighs holds unchanged at 35 per cent. off list while the discount on Starr skates holds unchanged at 20 per cent. off list, the higher price announced last week.

Hockey Sticks and Skate Straps

Interest in hockey sticks and skate straps is no less marked than for sleighs

and skates. Prices on these lines hold unchanged at the quotations of last week. Boys' red and white hockey sticks are quoted at 85c per dozen. Men's rock elm at $2 per dozen, Spalding at $3.75 per dozen and MicMac at $4.75 per dozen. Canvas skate straps are quoted at 80c per dozen pair for 20-inch, $1 per dozen pair for 30-inch. Russet leather straps, 20-inch are quoted at $1.35 per dozen pair and 30-inch at $1.75 per dozen pair.

Lanterns And Globes Hold In Steady Market

London.

LANTERNS, GLOBES.—There is a steadiness in the market for lanterns and lantern globes and prices hold unchanged. Short or long pattern lanterns are quoted at $12 per dozen. Lantern globes, either short or long pattern, one dozen to case, are quoted at $1 per dozen, three dozen to case at 90c per dozen; six dozen to case at 85c per dozen. Harvest tools were also unchanged at a discount of 25 per cent. off list.

White Lead in Oil Steady

There was no disposition to change the price of white lead in oil during the week and quotations were made on the basis of $16.20 per 100 lbs. for pure in ton lots and $16.55 for less than ton lots. Elephant pure in ton lots is quoted at $16.80 per 100 lbs. and in less than tons at $17.15.

Linseed Oil In Small Lots Makes Advance

London.

LINSEED OIL.—An advance of 3c per gallon in the price of linseed oil in quantities less than a barrel, which now makes the differential between single barrel lots and less than barrel quantities 10c per gallon. Prices in barrel lots hold unchanged from those quoted last week as follows: 1 to 2 barrels, raw $1.48, boiled $1.51 per gallon; 3 to 5 barrels, raw $1.47, boiled $1.50; 6 to 9 barrels, raw $1.45, boiled $1.48.

Turpentine Holds At Decline

The turpentine market holds at the decline of 3c per gallon recorded in these columns last week, quotations being made on the basis of 71c for single barrel lots, 70c per gallon in 2 to 4 barrel lots and 78c per gallon in 5-gallon lots.

WINNIPEG MARKETS

WINNIPEG, Dec. 20. — Price changes for the week show an upward trend in general. However, the number of lines affected is not so numerous as usual. Prominent among the changes are those in steel hoops, solder, ice saws, scythe stones, shaving soap, blow torches, and mangles. Reports indicate that the Christmas trade throughout the country will again this year be heavy, especially the last remaining days, as the recent cold spell, which has registered from 25 to 35 deg. below zero, has prevented many people from shopping earlier. Jobbers report great activity in sleighs, skates and cutlery for immediate shipment. However, shortage of labor and transportation difficulties have hindered greatly in keeping stocks of all lines well assorted.

Solder Goes Higher By 2c Per Pound

Winnipeg.

SOLDER.—The recent advances in both tin and pig lead have, as recently predicted in HARDWARE AND METAL, reacted on the solder market, and prices have advanced 2c per lb. To-day's market price for half-and-half is 43c lb. in full cases and 44c lb. in less than cases.

Ice Saws And Scythe Stones Advance In Price

Winnipeg.

SAWS, SCYTHE STONES.—Following the recent advances in saws, new prices have just been issued on ice saws, and show an increase of approximately 15c per foot. Prices ruling to-day are as quoted: 5-ft., $4.25 each; 5½-ft., $4.70 each; 6-ft., $5.10 each.

Prices on scythe stones, which have remained firm for many months, again move upward, showing a substantial increase, and are quoted to-day as follows: Leader or Red End, $6.50 gross; Black Diamond, $12.60 gross; Quick Cut, $10.50.

Clothes Mangles Go Higher By 5 Per Cent.

Winnipeg.

MANGLES.—Manufacturers of clothes mangles have again advanced prices about 5 per cent., and new price just issued on Royal or Victor mangles is now $23 each.

Shaving Soap Goes To Higher Price Levels

Winnipeg.

SHAVING SOAP.—Prices on shaving soaps up to the present have shown very small advances to the trade, as the extra cost of production has been borne by the manufacturers. However, further increases in raw material have necessitated a revision of prices, which are as follows: Williams' or Colgate's shaving sticks, $3.25 doz.; shaving cream, $3.25 doz.; shaving powder, $3.25 doz.; cakes, 70c lb.

Blow Torches Advance Approximately 10%

Winnipeg.

TORCHES.—Further advances were predicted in the December 1 issue of HARDWARE AND METAL on blow torches. New prices have just come to hand, and show an increase of about 10 per cent. over old figures. The embargo on imports still remains in force, and shipments are coming in only on licenses as issued from Washington. To-day's prices on some of the more familiar numbers are herewith quoted:

Clayton & Lambert Torches—No. 32, $7.70 each; No. 38, $6.95 each; No. 37, $6.55 each; No. 31, $7.30 each.

Fire Pots—No. 71, $13.10 each; No. 72, $10 each.

Steel Hoops Higher By 50c To 75c Per 100 Lbs.

Winnipeg.

HOOPS.—Owing to increased cost of production, a further advance has been found necessary on steel hoops, and prices have moved up from 50c to 75c per 100 lbs., making to-day's market prices as follows: ½ in., $9.75 per 100 lbs.; ⅝ in., $9.50 per 100 lbs.; ¾ in., $8.75 per 100 lbs.; ⅞ in. to 1¼ in., $8.50 per 100 lbs.; 1½ in to 3 in., $8 per 100 lbs.

Prices On Axes Are Firmly Maintained

Winnipeg.

AXES.—Prices continue to hold firm on all lines of axes in spite of advances in production. However, they are much lower in price compared with the amount of material required to manufacture than many other lines such as hammers, etc., and further revisions will no doubt be necessary in the near future. Prices ruling to-day are as follows: Single bit, $12 to $14.50 doz.; double bit, $14.50 to $16.50 doz.

Quotations On Bolts Are Firmly Maintained

Winnipeg.

BOLTS.—The demand for bolts of all kinds continues favorable, and prices continue firm, as quoted herewith:

Carriage Bolts—⅜ and smaller, 5% off list; 7-16 and larger, 5% on list.
Machine Bolts—⅜ and smaller, 5% off list; 7-16 and larger, 5% on list.
Plow Bolts—All sizes, 5% on list.
Stove Bolts—All sizes, 50% off list.
Shaft Bolts—All sizes, 5% on list.
Tire Bolts—All sizes, 25% off list.
Sleigh Shoe Bolts—All sizes, 5% on list.

Horseshoes In Active Demand Due To Weather

Winnipeg.

HORSESHOES.—Horseshoes continue to move freely with the recent drop in temperature. Prices on all lines remain unchanged, and are to-day quoted as follows:

Iron—No. 0 to 1, $6.75 per 100 lbs.; No. 2 and larger, $6.50 per 100 lbs.. Snowshoes—No. 0 to 1, $7 per 100 lbs.; No. 2 and larger, $6.75 per 100 lbs. Steel—No. 0 to 1, $7.20 per 100 lbs.; No. 2 and larger, $6.95 per 100 lbs.; featherweight, $8.35 per 100 lbs.

Turpentine Easier; Linseed Oil Firmer

Winnipeg.

TURPENTINE, LINSEED OIL.—No change is reported on turpentine, although primary markets are reported to have an easier tone. Prices ruling to-day are given herewith: Barrels, 80c gal.; half-barrels, 83c gal.; 5-gal. lots, 85c gal.; 1-gal. lots, 85c gal—plus the usual extras for containers.

Prices on linseed oil remain unchanged, but a firmer market is reported from eastern points, indicating that prices may go higher. To-day's prices are as follows: Raw, $1.65 gal.; boiled, $1.68 gal.

WEEKLY PAINT DEPARTMENT

Advertising to Bring Paint Sales

What You Insert, Not How Much, That Counts—Cultivating the Customers—Window and Interior Displays Should be Up-to-the-Minute.

ADVERTISING is one of the quickroutes towards the development of a successful paint department and there should be no let-up with the arrival of winter weather. Window and store arrangements should supplement the newspaper space used and intelligent salesmanship will influence profitable sales.

In conducting an advertising campaign it must be borne in mind that not only is a liberal amount of trade wanted from those who can be classed as regular customers but the advertising should be so effective that your circle of patrons may be greatly increased. It is not only necessary to secure the trade of those on your own side of the street but profits are enlarged by all that you bring in from across the way.

Quality Not Quantity of Space

It is not by any means necessary that a large amount of space be used in your newspaper advertising but distinct, attractively arranged ads which will prove effective are desirable. The secret of the successful use of space depends entirely on the ability of the advertiser to compile "selling copy"—to attract the reader and hold his attention—to present the arguments so forcibly that investigation follows. It is very seldom that ads can be prepared on the spur of the moment and prove winners. It is necessary that copy be arranged in advance, that considerable time and thought be given to it. Give real business reasons as to why paints, varnishes, enamels, etc., should be selected now and from your stock. Give some intimation as to what they will do—in economy, beauty, preservation and, too, in pleasure.

It must be remembered that to many a can of paint is only a can of paint. It is necessary then that in presenting your proposition you must know what points will be the quickest to impress the prospect. Hammer hard on these, drive them in and word your ads so that the reader will understand and remember. Your customer is concerned only in the essential points and your copy must present these in the briefest possible form and yet be complete. When an ad has been completed, go over same carefully, not from your standpoint but looking at it from the outsider's angle. Do your ads bear this inspection—would you buy paint or varnish or enamel if the arguments were presented to you as you intend presenting them to your prospects? Read over papers and magazines and see what type of ads make an appeal to you. You will find that it is not those inclined to be newsy, that carry a superfluity of confusing borders and illustrations, but those which are simple, sincere and carry the strongest message in the fewest words. Yours is an average viewpoint in this respect and the ads which you prepare will make their appeal to others on the same basis.

An interesting story, simply and sincerely told, will carry conviction. You are offering in your paint department something interesting—something that really means an actual profit to your prospect. The proper kind of advertising is that which causes people to know and remember what you offer and to act in the matter of purchase.

Store Service Must Back Advertising

Handling inquiries resulting from the advertising should not be left to one who does not know the line. It is assumed that the advertising concerns an article of merit but unless customers are handled promptly and efficiently the sale may be lost. It is the actual sales made which count and a complete knowledge of the line effectively presented to your prospect will usually result in sales.

Confidence in the goods handled is most essential to their successful distribution, for otherwise how can you impress your prospects? Enthusiasm works hand in hand with knowledge and confidence in your goods and is really the driving power which effects sales.

It is too frequently the case that advertising from the paint department is spasmodic—there is no consistent drive which keeps the line prominently before your customers at all times. Letting your paint department sleep at certain periods of the year is unfortunately a habit some merchants have acquired. It is essential that this line be kept before your customers persistently—the continuous sale resulting from an aggressive campaign will surprise those who only think of paints at certain seasons of the year.

Special attention should be given to those customers who purchase paint. One sale leads to another from this department as surely as night follows day, if watched and developed carefully. The man who buys varnish, stain or enamel or wall paint now will remember that merchant whose goods prove satisfactory when the season arrives to paint his verandah floor or the outside of his house. The sale of a small half pint tin of enamel may be the forerunner of an order for gallons of house paint later on—keep in touch with your customers, let them know you appreciate their business—make them permanent adherents of the goods you sell.

Advertising can undoubtedly be of great educational value. Impress on the people in your territory the name of your store, the brands you carry, the service you are rendering. Build your business on a solid foundation—look to the future—your customers will be glad to specify their paints and varnishes by name when they feel confidence in your store and the brand you sell.

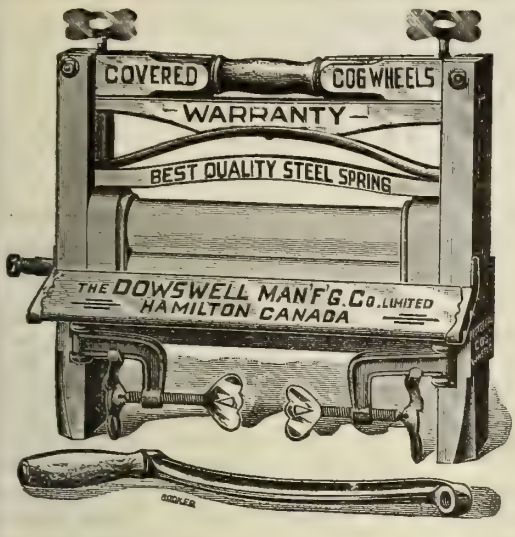
Window and Interior Displays

This article has dealt largely with the advertising as it concerns the newspaper but this must be supplemented by window displays and an attractive interior arrangement. Paint in its many forms lends itself particularly well to display purposes and it requires no expert to make a success of this feature. Study should be given to the displays, of course, and the manufacturers furnish many attractive selling helps which assist the merchant materially in arranging his goods.

The window is an excellent means of bringing the many lines from your paint department to the attention of the public effectively. Space should be given to paint in the windows regularly—this is another means of keeping this department active and in the minds of your prospective customers which should be made use of consistently.

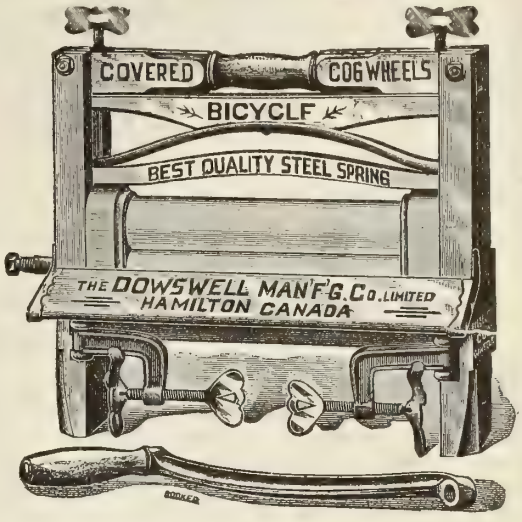
To the merchant who uses newspaper space and window displays regularly it would seem hardly necessary to point out how important a part the interior store arrangement can be made to play. This feature should not be overlooked by any merchant and at all times at least one item from your paint stock should be exhibited where all those entering your store must see.

Sales to those whom you wish to make or retain as permanent customers is the goal sought by all merchants. Persistent advertising backed by store service of a high order will attain this result and the paint department can be made to play a big part in the success of the retail hardware store of to-day.



High-Grade Clothes Wringers

Fitted with Live Rubber Rolls. Durable and Highly Elastic. Our line includes various designs and grades. Suitable for private families and public institutions.



We manufacture them in every detail under our own roof, from the best of materials and every bolt, screw and nut are Electro Galvanized to prevent rust. When doubtful in ordering your requirements, always order the BEST.

Two of the Easiest Hand Washers on the Market

The PLAYTIME, Hand or Power, is especially adapted for the farm. It is easily attached to a gasoline engine or operated by hand with little effort.

The NOISELESS "Silent and Safe." The simplest, lightest and easiest running dolly type washing machine yet produced. The secret of its power is double chains working in a grooved pulley.

Write for particulars of these and other lines we manufacture, you can't go wrong in stocking them. The selling features are there, both in finish and ease of operating.

Dowswell, Lees & Co., Ltd.

Hamilton, Ontario

If interested, tear out this page and keep with letters to be answered.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 20.—The paint men have been taking stock and getting ready for their winter grinding operations. Consequently, there is little to report. Linseed oil has been up and down in price for the past week, and this remains unchanged in range.

Linseed Oil Erratic; Seed Deliveries Small

Montreal.

LINSEED OIL.—Quietness marks the market for oil, which is selling in small quantities only for immediate delivery. Retailers are buying sparingly owing to the uncertainty of conditions and the possibility of lower prices has tended to retard the placing of spring business. There has been a somewhat uncertain tone the past week, with an advance and a decrease, leaving quotations much as they were reported for last week. Jobbers are quoting boiled at from $1.40½ to $1.45 per gallon and raw at from $1.38 to $1.42 per gallon. It is stated that spot supplies of flaxseed are not large, and deliveries have been increasingly short of late. Seed has recorded an advance within the past week of 15c per bushel.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barrels	$1.38-$1.42	$1.40½-$1.45
5 to 9 barrels	1.35- 1.39	1.37½- 1.42
10 to 25 barrels	1.34- 1.38	1.36½- 1.41

Turpentine Quoted 70c; Primary Market Firm

Montreal.

TURPENTINE.—A weakness has developed locally in the price of turpentine, making the quotations as low as 70c per gallon in barrels. There is little movement recorded. In the Southern market the tendency is stronger.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.70-$0.75
1 barrel lots	0.74- 0.75
Small quantities	- 0.83

Much Satisfaction Re Paint Bookings

Montreal.

MIXED PAINTS.—Much satisfaction is expressed regarding the volume of placing business from country dealers for spring delivery. These continue to come forward in good volume and compare very favorably with other years. They are better than were anticipated in many cases. Travellers will be in for the holidays this week, and with the usual quiet prevailing in wholesale channels at this season sorting business continues light.

Putty Demand Light; Prices Hold Unchanged

Montreal.

PUTTY.—Although whiting has been quoted higher in some instances—that is, for the English product—the price of putty has been unchanged. The situation follows the United States conditions quite largely, and while there is a firm market, no new prices are anticipated for the balance of the year. Notwithstanding this, if oil should be increased as a result of the conditions relative to deliveries of flaxseed, a somewhat higher tendency for putty is thought possible in some centres. Bulk putty is selling at $3.60 per 100 lbs. in casks; 25, 50 and 100-lb. drums, $4.45 per 100 lbs., and bladders, in barrels, per 100 lbs., $4.70.

White Lead In Oil Quiet And Unchanged

Montreal.

WHITE LEAD IN OIL.—There is light movement in the sale of white lead in oil. Market conditions are generally as they were last week, with the usual sorting request. Some of the dealers are also asking for limited quantities to be sent forward with the spring orders for paint materials. With pig lead firm in the New York markets a firmness of tone prevails, but with no change of price. In five-ton lots the quotations are $15.50 per 100 lbs.; for ton lots, $16; and for smaller lots, $16.35 per 100 lbs.

TORONTO

TORONTO, Dec. 20.—There was a firmer undertone to the market for linseed oil during the week, due to an advance of approximately 15c per bushel in the price of flaxseed. There was a continued weak feeling in turpentine and prices were reduced in some quarters.

Linseed Oil Was In Firmer Tone During Week

Toronto.

LINSEED OIL.—With an upward trend to the flaxseed market during the week there was a corresponding firmness in the market for linseed oil. Cash flaxseed on the Winnipeg market made a net advance of 15½c per bushel during the week, which now brings the price well above the three dollar mark at $3.11½ per bushel. Delivery of flaxseed has not been as heavy during the past week as in some recent weeks. In six days the inspections at Winnipeg amounted to 116 cars. The latest authentic estimate places the exportable supplies of Argentine seed at 28,000,000 bushels. Earlier in the season the amount was estimated at 40,000,000 bushels. Frost has caused considerable damage to the crop in that country. This Argentine seed under normal conditions would not begin to move until the month of February. Under present difficult conditions in shipping there is no assurance that there will be any free movement of seed by that time. Well-informed opinion in certain quarters inclines to the belief that prices of linseed oil are likely to hold firm or even advance. Demand for oil from large buyers has been fairly good. Conditions in the oil cake market are holding steady, with a good demand and prices firmly maintained.

	Raw, Imp. Gal.	Boiled, Imp. Gal.
1 to 2 bbls.	$1.38-$1.48	$1.40½-$1.51
3 to 5 bbls.	1.38- 1.47	1.40½- 1.50
6 to 9 bbls.	1.37- 1.45	1.39½- 1.48

Less than barrel lots 10c per gallon higher than single barrel price.

Turpentine Shows Lower Price Range

Toronto.

TURPENTINE.—There was a grading downward in the price of turpentine during the week to the extent of 1c to 1½c per gallon, making the range in price in single barrel lots from 70c to 72½c per gallon. There was a slightly firmer tendency in the primary market at Savannah during the week, but this market has shown a tendency to fluctuate somewhat rapidly within recent weeks. Local demand is not heavy, which condition is incidental to this season of the year. Dealers assert that if the demand were heavier there would be a much firmer situation at the present time.

	Imp. gal.
1 barrel	$0.70-$0.72½
2 to 4 barrels	0.69- 0.71½
5 gallon lots	0.77- 0.79½

Glass Market One Of Considerable Firmness

Toronto.

GLASS, PUTTY.—Conditions in the manufacture of glass have shown no improvement during the week. Advices from the manufacturing interests in the United States during the past week stated that the recent cold weather has greatly interfered with the supply of natural gas, and that plants have been

A Christmas Thought *for* B-H Dealers

As you look back over the past year's business, call to mind the number of new customers who have come to your store because it was a B-H store. Think of all it has meant to have a paint agency that carries real prestige.

Think of what the manufacturer of such a paint can do to back up its agents and help them toward real prosperity. Think of all the manufacturers of B-H Paint are doing to back up B-H Agents.

Thinking thus, you will appreciate the fact that it is no mere empty phrase when we wish you

A Prosperous 1918

We ourselves have prospered in the year that is drawing to a close. We believe every one of our agents has had a better year than he could have had without our agency. We're looking forward to greater business in 1918—and we now have in course of preparation new business-bringing sales helps to ensure for you the biggest year of paint business you've ever enjoyed.

If interested, tear out this page and keep with letters to be answered.

greatly handicapped as a result. The recent wage scale which was negotiated to take effect December 1 is 28 per cent. higher than the rate for last year. Some of the manufacturers started their plants about December 1, while others through the shortage of fuel did not commence operations at all. Some of those who did commence operations have since closed down temporarily owing to the fuel situation. Stocks in the United States are reported to be exhausted and the source of new supply almost entirely cut off. Manufacturers have withdrawn their prices and announcement will be made later as to what the charges will be. Stocks of glass in Canada have been depleted to a certain extent through the Halifax disaster, and there is every indication that higher prices are likely to prevail in the near future.

There were rumors of the possibility of an advance in the price of putty during the week. One manufacturer withdrew prices for a time, but other manufacturers still continue to quote. In one quarter the belief was expressed that higher prices were probable through the action of the concern in question in withdrawing prices. Quotations continued to be made on the basis of last week and at prices given in current quotations.

Paint Business For Spring Promises Well

Toronto.

MIXED PAINT.—From present indications there would seem to be very good grounds for thinking that the paint trade for next spring will be quite satisfactory. Manufacturers report that booking business is good, and that retailers are showing no hesitancy about ordering their supplies for next year. Manufacturers are protecting their customers against a decline, in that they give them the advantage should a decline take place between now and the time of delivery. So far as indications go there would seem to be no grounds for looking for any easier tendency so far as prices are concerned. The belief is expressed by those closely in touch with the linseed oil situation that there is every likelihood of a firm upward trend in that commodity.

IMPROVING THE CO-OPERATION OF BUSINESS

(Continued from page 48.)

sential that such prices should be arrived at according to some general plan and upon a definitely declared basis Such general principles should be followed so far as possible wherever the government acts to control prices and would serve as a yard stick or standard between different industries.

"In other cases the government has not consulted business men but has conducted independent investigations and announced prices without giving any information as to the basis on which such prices were reached. This necessarily creates antagonism on the part of business men who are unaccustomed to autocratic control, and prevents the co-operative response which might be expected from business men if they had a clear understanding of what was being done.

"Knowledge of actual conditions existing in business in its intricate ramifications can be acquired only by years of intimate contact. In the judgment of business men it is essential to success in government control of prices and distribution to establish a basis upon which this knowledge and information of business men can be at the service of the government under such circumstances as not to be influenced by selfishness or the need of self-protection."

Thus is the basis of co-operation between government and business being clarified and strengthened. The business men of the United States are endeavoring in every way to assist in the efficient organization of the nation for war; and the government is showing a complete willingness to accept the co-operation. In both respects Canada has something to learn.

There is a general and thorough understanding of the lines on which the new organization is to be built. It can be summarized in the one word, concentration.

HOW GROCERY TRADE WILL BE REGULATED

(Continued from page 53.)

Rule 1.

A retail grocer shall only do business in Canada provided he conforms to the Food Controller's regulations, and is licensed in accordance with the rules and regulations governing such class of business.

Rule 2.

With a view to the better conduct of business, and as a protection to the consumer, the following shall be considered as the minimum standard to which applicants for licenses shall be required to conform.

(a) Sanitary conditions, and equipment must be satisfactory to the Food Controller.

(b) Qualification not less than two years' experience in the retail grocery trade.

FORM OF APPLICATION FOR RETAIL GROCER

Class 6.

I/We hereby make application for a license under Class 6.

I/We have been established in business since .....

At last stock-taking the value of stock on hand was .....

.....

(Province)

License fee must accompany application.

RECOMMENDATION OF THE COMMITTEE.

The members of the Committee called to formulate regulations for the control of foodstuffs handled by the various trades of Canada consider themselves as commandeered for the service of the state. In consequence, they have given their most earnest thought to drawing up these recommendations. They have been animated by a loyal desire to utilize their special knowledge and experience in connection with trade matters to the best advantage of the country at large. It is hoped that the following recommendations will assist the Food Controller for Canada in controlling and regulating trade, in conserving the foodstuffs of Canada, and in reducing the cost to the consumer.

In comparison with the factors of original production in the community, the business man, by whom is meant the manufacturer and dealer, is bearing more than is his due of the burdens of the nation's responsibilities. In addition to voluntary contributions to Patriotic, Red Cross and various other funds, he has to shoulder income, excess war profits, and, in certain cases, exceptional taxation not shared by the producers, whose profits by the very reason of multitude and the variety of production cannot within the limits of practicability be arrived at, and which, by reason of individual small volume of business, usually escape levy. What the Committee wishes to arrive at is a basis of control, which, while placing the manufacturer and merchant on a fair equality with other elements of the community, will eliminate all undue profits.

The following recommendations are therefore respectfully submitted:—

1. That a license system be established, covering all branches of trade in foodstuffs, and that a small license fee be imposed to cover the cost of operating this system; thus all expenses will be borne by the trade itself, and not by the taxpayer.

2. That with the establishment of a license system, there follow a comprehensive organization, so that each step from producer to consumer shall be effectively controlled.

3. That all rebate and secret commission operations be prohibited; that collusive methods now obtaining and now causing such unrest and suspicion, both within the trade and in the minds of the public, be prohibited; that combination sales whereby a merchant sells one commodity or any specified quantity of it, contingent upon the purchase of quantities of any other goods, be prohibited.

4. That for the reduction of business operating costs, the following suggestions be carefully considered:—

(a) **For the prevention of overlapping and duplication in the work of travelling salesmen,** some restriction should be imposed regulating the manner of times in one week travellers may call on customers of a wholesale firm in distributing centres, and the number of times per month in country districts.

(b) **For the adequate organization, according to local needs, of a centralized delivery system;** the restriction on the number of deliveries to retail customers and the fixing of times of delivery in various zones for the distribution of goods during the day should be arranged. Moreover, the number of times a wholesale house may be called upon to deliver goods be restricted, and the minimum weight of individual deliveries fixed.

5. That properly to administer and enforce a license system, a well equipped organization be created so that there may be removed the possibility of the work of the Food Controller becoming ineffective.

6. That a rigidly enforced system of stock returns be instituted, by which the Food Controller may be enabled to prevent hoarding in Canada, through which system any firm overstocked with goods may be compelled to distribute its surplus among other firms whose supplies are short.

7. That every trade and every branch of trade be rigidly controlled as to the percentage of profit or turnover, and that by the strict enforcement of regulations against profiteering and speculation such rates of profit be not allowed to exceed the rates of pre-war profits.

Signed: P. B. Tustin, chairman, chief Food and Dairy Health Department, Winnipeg; H. Blain, Eby-Blain, Ltd., Toronto; H. C. Beckett, W. H. Gillard & Co., Hamilton; H. Bruce Gordon, The Codville Co., Ltd., Winnipeg; G. M. Bate, H. M. Bate & Sons, Ltd., Ottawa; W. E. V. Jones, Leeson, Dickie, Grosse Co., Ltd., Vancouver; Robert Kelly, Kelly-Douglas Co., Ltd., Vancouver; Zeph. Hebert, Hudon, Hebert Co., Montreal; E. M. Trowern, secretary, Dominion Board, The Retail Merchants' Association of Canada, Ottawa.

MANUFACTURERS ENDORSE ACTION

Be it resolved that we, the manufacturing interests here represented, unanimously endorse the programme outlined and pledge our support to the Food Controller. We appreciate the seriousness of the food situation and realize that it is our duty to conscientiously conserve our food resources. We realize, too, that it is our bounden duty to bring this situation before the people of Canada, and we would suggest to the Food Controller that a letter be prepared to be sent to all the commercial travellers, who could have a great influence in moulding public opinion on this important matter.

This resolution unanimously adopted.

Lengthen the Life of Metal Work

It is a hard problem to keep rust and corrosion from eating the very life out of metal structures, therefore, economy demands the best possible preventive against these destructive elements.

CARTER'S Dry Red Lead

gives a perfect sealing coat that absolutely protects all kinds of metals from the elements that destroy them, and immeasurably lengthens the life of Metal Work.

We make Orange Dry Lead and Litharge,

Special Dry Lead and Litharge, for Color.

Varnish and Rubber makers,

Oxides for Potters and Storage Battery Makers.

All products are wholly Canadian made and highest standard qualities.

BERRY BROTHERS' CELEBRATED MADE IN CANADA VARNISHES

BRILLIANT DURABLE UNEXCELLED

WALKERVILLE, ONT.

BERRY BROTHERS' trade mark and label bear the same relation to their made-in-Canada varnishes and enamels as the Sterling mark on silver. Sixty years' experience based on "quality first" are sealed up in every can of "Berry" products.

Discriminating buyers have learned that "Berry "brands are absolutely reliable and true to description, and this wide reputation is a valuable asset for dealers handling our line.

The label of Berry Brothers is usually the only argument needed in marketing "Berry" Finishes.

Here are some profitable specialties. They are staples of the varnish trade and ready sellers.

LUXEBERRY ENAMELS—white, ivory and three shades of grey.

LIQUID GRANITE—floor varnish. Makes a smooth satiny finish. Lasting, waterproof, marproof, also adapted for bathrooms, window sills and casings, and all interior work where great durability is desired.

LUXEBERRY WOOD FINISH—for general interior work. Develops and preserves the grain of all woods and makes a handsome and lasting finish. Rubs perfectly.

LUXEBERRY WALL FINISH—produces artistic color effects on walls. Makes a soft velvety finish in twenty-one attractive colors and shades.

LUXEBERRY SPAR—for exterior work. Especially adapted for durability under extreme exposure—front doors, store fronts, marine work, etc. Makes a handsome finish and will not turn white under the severest conditions of wear.

Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

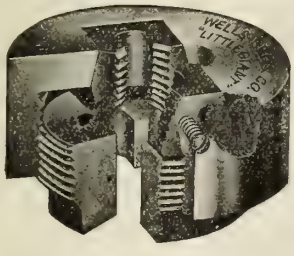
Little Giant Screw Plates

Little Giant Combination Screw Plates—like illustration—are handy sets for garage repair shops or for the owner who does his own repairing. There are taps and dies for cutting both U.S. Stand. and S.A.E. Stand. threads, a stock fitting all the dies, a tap wrench, and a bit brace die holder for hard-to-get-at places.



THE LITTLE GIANT DIE

Dealers can readily see the possibilities of a set of this kind. There is already a large demand for screw plates for automobile repairs. Cash in on this demand! Stock Little Giant Screw Plates and please your customers by selling them the best.

Ask for catalogue, terms, etc., and samples of envelope stuffers for dealers.

Wells Bros. Co. of Canada, Ltd.
GALT ONTARIO

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

Terms 2% 30 days, approved credit.

Prices—Ontario, Quebec and Maritime Provinces.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

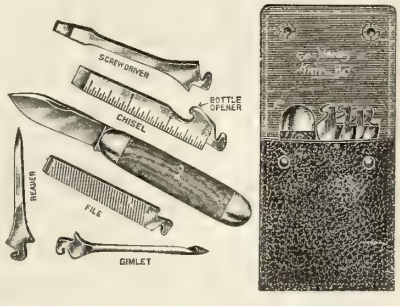
Can You Imagine a Man or Boy

Who Wouldn't Like to Own This Kit?

No matter what a man's occupation may be, he will find daily use for the "So Handy" Pocket Knife Tool Kit. Autoist, Sportsman, Hunter, Farmer, Boy Scout—these, especially, will find it a pleasing and practical pocket companion. Excellent, too, for use around the home.
Outfit comprises a splendid Jack Knife with cocoa handle and an exceptionally good blade, and the following tools which can be instantly attached to the knife handle: File, Chisel, Reamer, Screw Driver, Bottle Opener, Gimlet and Rule, all made of high grade steel, carefully hardened and oil tempered.

The So Handy Kit is made in five styles. Jobbers—get posted about this good specialty.



RETAIL PRICE $1.50.

Show your customers the difference between "Stephens'" Paint and "Just Paint"

You owe your customers the full protection of your experience—and it is mighty good business to give it.

Your customers will appreciate the information you can give them about Stephens' Paint. Too many householders have been bitten by the "cheap" paint bug. You know what "cheap" means in paint and you know, too, that there is nothing "cheap" about any "Stephens'" Product.

Point out to your customer that when he buys *"Just Paint" he* takes all the chances. When he buys "Stephens'" Paints we take the chances. Back of every can of "Stephens'" Paint is our unconditional guarantee that it will do all that we claim for it.

Educate your customers to buy only standard brand paints—"Stephens'" preferred.

If there is no "Stephens'" Agent in your district there is a good chance for you to get exclusive territory. We will give you every assistance to produce sales. Get our proposition.

A Man Named Rogers

MR. ROGERS was a hardware dealer. He came into the offices of the MacLean Publishing Company to compliment the editor of HARDWARE AND METAL on the very fine Special Spring Number—and it deserved the nice things Mr. Rogers had to say.

He told the editor that he had gone through all the issue, and saw there the advertisements of many firms from whom he bought goods and many from whom he bought nothing. But there was one firm's advertisement that was absent—the stove manufacturer from whom he had bought thousands upon thousands of dollars' worth of stoves. Mr. Rogers was so disappointed—even aggrieved—that he sat right down and wrote to this firm his views.

The sequel in regard to this firm doesn't matter in the telling of this story. What does matter is its application to you.

BE sure of this: many from whom you receive much business want your advertising to appear in their business newspaper. If it be absent, your hold on your customers may be weakened. You may even let some competitor steal away your customers—it has happened. And when your customer or customers have been won away from you, then you may say: "....." Well, what would you say? Would it not mean that it would have been cheaper to have spent money in advertising your business than to have lost customers?

And by the same token, if you keep on advertising, in an impressive way, in the business paper your customers read, you may win away from some non-advertisers the customers they have. It has happened.

Here are six trade newspapers some one or more of which may be read by your customers or desired customers:

CANADIAN GROCER
HARDWARE AND METAL
DRY GOODS REVIEW
MEN'S WEAR REVIEW
BOOKSELLER AND STATIONER
SANITARY ENGINEER

We'd like to hear from you about this matter —to send you copies of these papers and our advertising rates.

These six business papers are all leaders in their field and are published by

WOOD, ALEXANDER & JAMES

THE DEBTS DUE TO THE LATE FIRM ARE TO BE PAID TO THEIR SUCCESSORS, WOOD, ALEXANDER & JAMES, WHO WILL ASSUME AND DISCHARGE ALL LIABILITIES.

WE SOLICIT FROM THE PUBLIC A CONTINUANCE OF THE PATRONAGE SO LIBERALLY BESTOWED FOR SO MANY YEARS UPON THE LATE FIRM.

Hamilton, Ontario,
29th November, 1917.

Wood, Alexander & James

BRANCHES: Toronto Office, 25 Front Street East; Wood, Vallance, Limited, Winnipeg, Man.; Wood, Vallance & Leggat, Limited, Vancouver, B.C.; Wood, Vallance Hardware Co., Limited, Nelson, B.C.; Wood, Vallance & Adams, Limited, Calgary. Alta.

Don't leave that Lawn Mower Order until too late!

Make sure of delivery on Taylor-Forbes Lawn Mowers by placing your order with your jobber before the end of the month. It is so difficult at present to get raw materials that we require to know your wants early so that we may be in a position to contract for iron and steel while it is to be had.

Leaving your order until after the New Year may possibly spoil a good season on Lawn Mowers next Spring and Summer—so order now—don't put it off.

PIPE AND THE PUBLIC WELFARE

By R. C. McWANE

A Book Just Off the Press

Every sanitary engineer should be the possessor of this book. It deals with pipe-making of all kinds, cast iron, wrought iron, steel, wood and tile pipe. It is valuable because it gives the users of pipe a true idea of how pipe lasts under various conditions when in service.

Wanted

SITUATIONS VACANT

FIRST-CLASS HARDWARE MAN—ACCOUNT our location applicant must be able to speak German. Good wages for good man. Box 507, Hardware and Metal.

SITUATIONS WANTED

HARDWARE TRAVELLER IS OPEN FOR AN engagement, having several years' experience in the line, with first-class references, or would like to take up agencies for the City of Montreal and Province of Quebec. Box 508, Hardware and Metal.

YOUNG MAN WITH EIGHT YEARS EXperience in hardware and paint, open for travelling or inside position in Ontario about January first. Good references. Box 509, Hardware and Metal.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms, is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

CHRISTMAS Show Cards and Price Tickets with the Yuletide touch.

W. H. STEVENSON
Stevenson Bldg. TORONTO

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

Mr. Hardwareman

Have you ever considered the advantages of advertising your wants in HARDWARE AND METAL? One of the most important of these is the fact that there is no waste circulation. HARDWARE AND METAL goes only to the people who are directly interested in the trade. We have offices in Montreal, Toronto, and Winnipeg. If you like you can have a box number in care of either one of these offices, whichever is nearest to you. We will then notify our representative there and he will promptly forward any replies which may come in answer to your ad. Remember, Thursday noon is the latest for receiving want ads for the current issue.

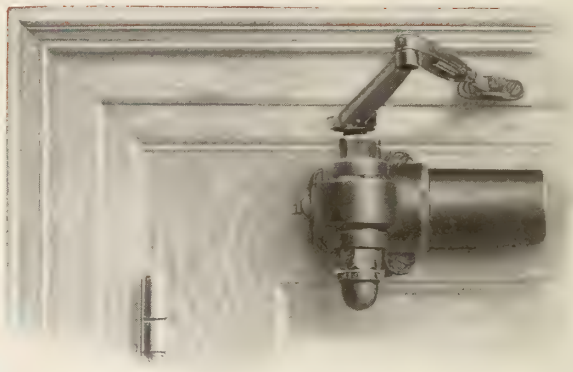
The Coal Pile Goes Down

When the door's left ajar

Half Pound of Coal for Every Minute That Door is Open Three Inches in Zero Weather.



It is estimated roughly that enough cold air enters a room in zero weather when an outside door is left unlatched to lower the coal pile a half pound a minute to restore the normal temperature of the room.

In the interest of economy it is advisable for every outside door to be fitted with a

TO-LO-GO

RIXSON DOOR CHECK

TO-LO-GO

to eliminate this big wastage of a much needed and scarce commodity during war time.

The hardware dealer who goes after the door check trade of his town on the economy basis will cash in on some nice business right now.

The **Rixson door check** has long since won a reputation for itself as the check that stands up under all conditions—the severest winter weather or the hottest summer days.

The check shown above is one of the several Rixson styles made for the different uses around a building—the public building. the store, the home.

SEND FOR DESCRIPTIVE LITERATURE ON THE RIXSON LINES

Immediate delivery from large stock. If you desire Spring delivery send specifications at once. Write now and secure your copy of new "TO-LO-GO" Catalog which will be ready for distribution by January first. It covers the complete range of hardware which we manufacture, including: Rixson Door Checks, Checking Floor Hinges, Builders', Cabinet, Refrigerator and Structural Hardware.

TONCAN METAL

Resists Corrosion

The maintenance expense on the Edgewater Beach Hotel, Chicago will be reduced because all of the window frames, fire-doors, sky-lights, eavestrough, conductor pipe and, in fact, all the exposed sheet metal work is made of Toncan Metal Sheets.

The ravages of corrosion hold no terrors for Toncan Metal Sheets and as a result, it means a great saving in repair bills to the building owner. Moreover, its first cost is moderate.

Nearly 100% pure, very dense and homogeneous, Toncan Metal Sheets will resist corrosive influences that a good quality steel or iron sheet could not withstand. Toncan Metal is made black, painted or galvanized, and is procurable in the flat sheet or various fabricated forms.

It Carries a Better Profit

"Did a customer ever come into your store and ask for five or ten pounds of Manila Rope?"

We will wager that if he did he was one in a thousand. The average customer does not think of rope in terms of pounds. He knows how many feet he wants for his hayfork, his well rope, or tackle, and he orders accordingly.

Why don't you sell

Plymouth Rope

to your customer on his basis—by the foot? You will satisfy him better and you will make a better profit.

Hundreds of dealers are now selling Plymouth Rope by the foot and they are enthusiastic over the results.

The small town dealer can successfully meet mail order competition by this method and meet it with a rope which will give unequalled service. Plymouth being the only rope which can be profitably sold by this plan, the Plymouth dealer has a direct advantage over his competitors.

Our Dealers' booklet containing full particulars together with the necessary materials for adopting this method will be sent on request by the Rope Service Department of the

Our Christmas Greetings

TO OUR CUSTOMERS---that great army of Friends, who, through their Good Will and Good Wish have made possible the successful development of our organization --AND TO OUR EMPLOYEES, whose Loyalty and enthusiastic efforts have contributed so much to our success, we extend at this season of joyous remembrance, our Greetings and Good Will---Not that we do not think of you often, but Christmas is the time when we like to tell you so especially and wish you Good Health and Happiness.

---AND OUR ABSENT ONES---who have crossed the Seas, we salute you. May you be victorious beyond our highest hope and soon return to enjoy the blessings of an honorable peace, and share in the prosperity and liberty for which you have so nobly fought.

THE
STEEL COMPANY
OF
CANADA
LIMITED

HAMILTON **MONTREAL**

OUR Quantity Bonus has enabled many of our dealers to earn over $1,200 each this year in bonuses ***over and above the liberal contract discount.*** Scores of the Sharples dealers received over $500 each in bonuses, and hundreds from $50 up. Our Bonus Checks for last year amounted to more than $50,000. This year (1917) we will pay out nearly

$100,000 in Bonuses

The secret of this, our dealers' success (apart from their natural sales ability) lies in the ***superiority and supreme saleability*** of the Sharples Suction-feed Separator and the Sharples Milker.

Sharples offers something ***different,*** a difference fully protected by basic patents. Anyone can build and offer for sale fixed-feed, disc-type separators, even the mail-order houses. But the Suction-feed principle is an extra saving feature no other manufacturer can offer—you have no cheap competition of the all-alike disc variety. In approaching a customer you have a real good reason for suggesting a trade-in on a new machine—as the Suction-feed will show a saving over any fixed feed machine, a saving that will pay for a Sharples Suction-feed inside of a year.

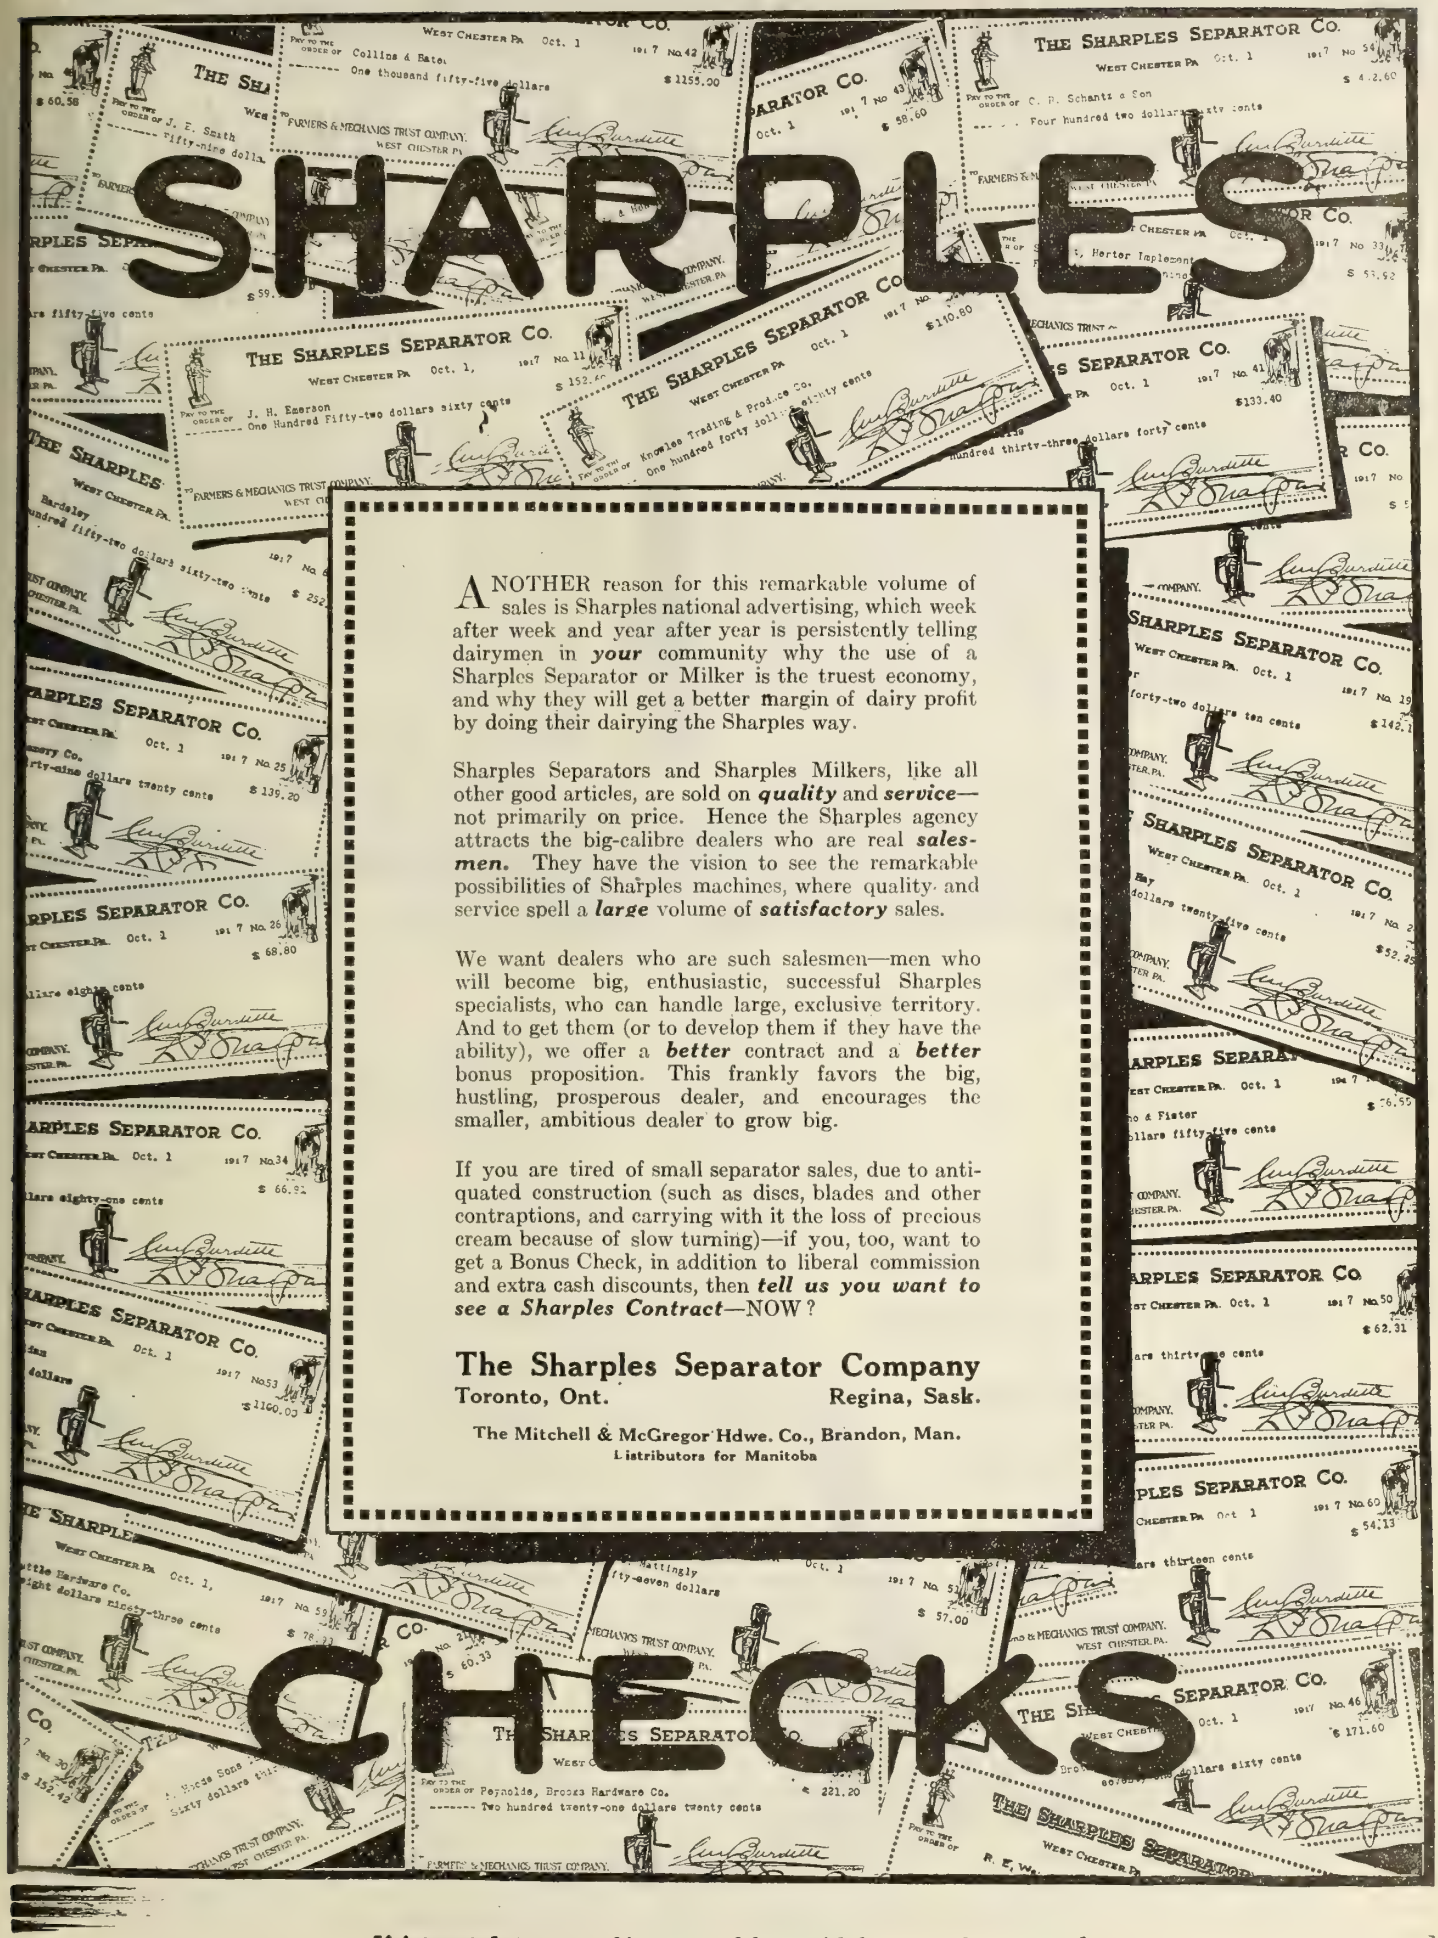
Again, any one can build a milker that simply draws the milk. But only Sharples can build a milker that by the use of compressed air gives the indispensable "Upward Squeeze" which massages the teats after every suck

The Sharples Separator Company

Toronto, Ont. **Regina, Sask.**

The Mitchell & McGregor Hdwe. Co., Brandon, Man.
Distributors for Manitoba

If interested, tear out this page and keep with letters to be ***answered.***



ANOTHER reason for this remarkable volume of sales is Sharples national advertising, which week after week and year after year is persistently telling dairymen in ***your*** community why the use of a Sharples Separator or Milker is the truest economy, and why they will get a better margin of dairy profit by doing their dairying the Sharples way.

Sharples Separators and Sharples Milkers, like all other good articles, are sold on ***quality*** and ***service***—not primarily on price. Hence the Sharples agency attracts the big-calibre dealers who are real ***salesmen.*** They have the vision to see the remarkable possibilities of Sharples machines, where quality and service spell a ***large*** volume of ***satisfactory*** sales.

We want dealers who are such salesmen—men who will become big, enthusiastic, successful Sharples specialists, who can handle large, exclusive territory. And to get them (or to develop them if they have the ability), we offer a ***better*** contract and a ***better*** bonus proposition. This frankly favors the big, hustling, prosperous dealer, and encourages the smaller, ambitious dealer to grow big.

If you are tired of small separator sales, due to antiquated construction (such as discs, blades and other contraptions, and carrying with it the loss of precious cream because of slow turning)—if you, too, want to get a Bonus Check, in addition to liberal commission and extra cash discounts, then ***tell us you want to see a Sharples Contract***—NOW?

The Sharples Separator Company

RELIABILITY

is an important quality of "Famous Five" files.

Mechanics can depend upon them to stay sharp for the longest possible time.

This is insured by the quality of our high carbon steel; the efficiency of its heat treatment; the perfection of our manufacturing process and the accuracy and evenness of the teeth.

Their RELIABILITY has made them standard grade tools in the estimation of all mechanics. That's why it pays to sell them.

Specify them when ordering from your jobber.

They are:

High Quality TOOLS

that you'll find very profitable

A complete assortment of Beveled Edge Shank and Socket Chisels, Pattern Makers' Chisels and Gouges, and Handled Turning Tools.

"Over the Top"

Right down in the front trenches of metal working, in the no-man's land of production

Starrett Hack Saws

are doing their bit. The sharp, hardened tungsten steel teeth cut their way through rod or sheet, steel or copper as a machine gun cuts its way through opposing infantry.

While the excellence of Starrett blades has long been an accepted fact, never before have they been accorded the confidence they enjoy to-day. The rush and bustle attendant upon forced production have created a demand for a hack saw blade that will "stand up"—cut quicker and last longer.

Because we have made careful and thorough tests we are able to tell you just which numbered blade is best suited for each class of work. The result of these important tests, together with the unexcelled quality of Starrett Hack Saws have placed our blades in the first rank of industrial preparation.

What blade to use is indicated on page 208 of our Catalog No. 21MA. Send for your copy.

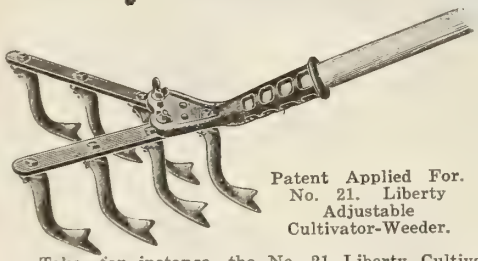
Every Amateur as well as Every Professional Gardener



Patent Applied For. No. 21. Liberty Adjustable Cultivator-Weeder.

will quickly recognize the labor-saving features of Gilson Garden Tools.

Take, for instance, the No. 21 Liberty Cultivator-Weeder, an implement of double efficiency, which cuts weeds and cultivates at the same time. It is adjustable, with a minimum width of 4 inches and a maximum of 10. The middle tooth can be quickly removed to allow of working on both sides of a row at once. Fitted with 5-ft. polished ash handle, shipped 6 to a crate, weight 24 lbs.

Our 5 and 7-point Scratch Weeders, with 6-inch and 14-inch handles, are ideal tools for close work in beds or for greenhouse work. The pointed tines are self-cleaning and will not clog in moist earth.

Every Gilson Garden Tool embodies some special feature, and for that reason sells more readily than the ordinary tool.

Regular advertising in Maclean's and Farmers' Magazines is working up a demand for Gilson Garden Tools. Cash in on this publicity.

Ask your jobber. If he cannot tell you, write us direct for information on all our lines.

LACO NITRO LAMPS COST LESS

Why do your customers buy lamps?

To give money to a lamp manufacturer—to consume current, or to actually get light?

The following tabulation of actual laboratory tests proves that cheap bulbs are expensive even if given to you free of charge, and dealers are profiting by passing along this good information.

NAME OF LAMP	WATTAGE AND CANDLE POWER CLAIMED FOR TESTED LAMPS	ACTUAL CANDLE POWER OF TESTED LAMPS	ACTUAL WATTAGE OF TEST LAMPS	COST 1000 C. P. LIGHT FOR 1000 HRS. AVERAGE COST CURRENT 2½¢ PER K.W.HR.			1000 HOUR LOSS
				LAMPS NEEDED	TOTAL WATTS USED	1000 HR. COST	
LACO NITRO	100	111.5	104	9	936	$23.40	NONE
COMPETING LAMP "A"	100	78.5	101	13	1313	32.83	$ 9.43
" " B	100	87.5	109.5	12	1314	32.85	9.45
" " C	100	66.9	103	15	1545	38.63	15.23
" " D	100	63.0	100	16	1600.	40.00	16.60

A Saving of 30% to 50% in Current Consumed During 1000 hours by Using Laco Nitro Lamps

Without cost to you, or your customers, our nearest office will have official laboratory tests made of any lamps submitted and will prove our claims.

The

Renfrew

Household Scale

Capacity ½oz to 30 lbs.

Capture This Ripe Business!

Could you only peep into all the kitchens in your town, what an eye opener there for you! Precious few scales you'd find, guarding the housewife's purchases in these expensive times. Think of the waste! How dead easy to convince and sell that long list of possible customers of yours! Push scales this spring!

Every Renfrew Household Scale is **guaranteed** accurate, and there is a Government Inspector's Certificate of correct weights besides. Neat—compact—handy—just the scale you can sell easily with little talk. The Renfrew often sells itself. Push scales—display them. Write to-day for attractive proposition.

The Renfrew Machinery Co., Limited

Head Office and Works, Renfrew, Ont.

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

The R. McDougall Co., Limited

GALT, CANADA

Again in Demand

The wooden tub is back—the high cost of the metal tub is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue.

Armco Iron Welding Material

Is the Favorite of Practical Welders Everywhere

Because of its unique purity and evenness and the absence of slag inclusions, it works freely and smoothly and makes possible a welded joint of 100 per cent. effectiveness.

For constructions which have to endure severe shocks and jars the high **ductility** of Armco Iron is of the utmost value in welded joints. Where Armco Iron has been employed as a filler the joints have the maximum strength and reliability.

A large manufacturer writes: "We have used various grades of imported and domestic iron in an effort to obtain one whose purity would suit our purposes. We introduced the use of Armco Iron a few months ago, and the results have been exceedingly satisfactory." Another: "We find that the Armco Iron rods are far superior to any welding rod we have as yet been able to obtain." A welding company: "We cannot say enough for Armco Iron welding wire. It works perfectly in the weld and retains its strength and toughness."

PAGE STEEL & WIRE COMPANY, of Monessen, Pa., are manufacturers and distributors of Armco Iron Wire for welding and electrical purposes. They carry an ample stock of wire 16 to 8 gauge and of rods ⅛ to ¼″ in diameter.

AMERICAN ARMCO INGOT IRON

The trade mark **ARMCO** carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

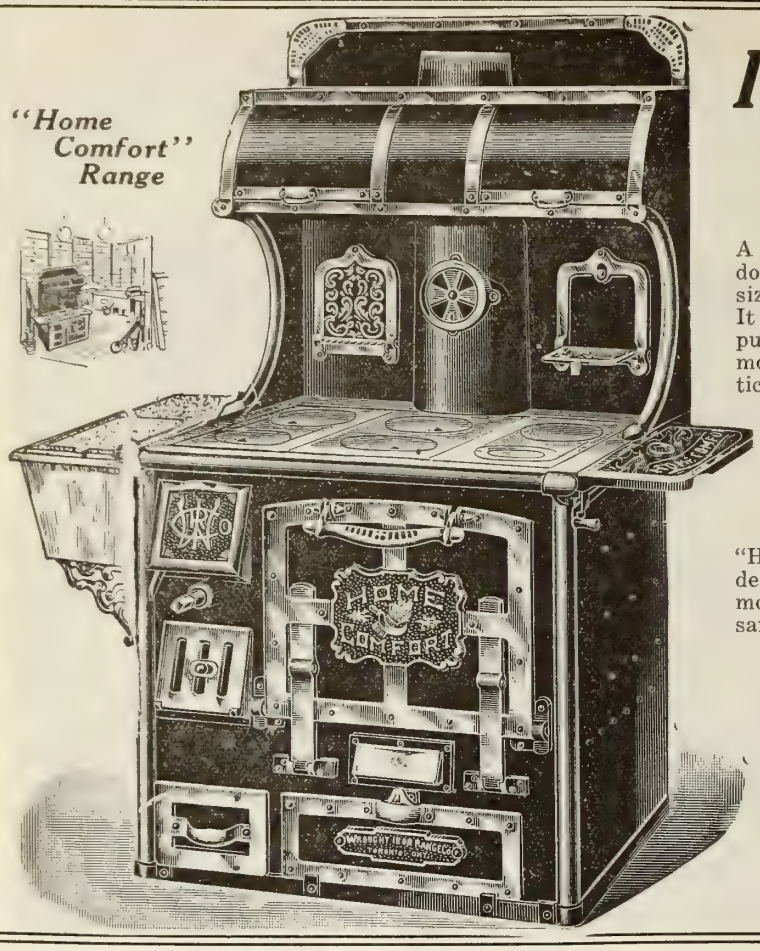
"Home Comfort" Range



It's Wise to Sell a Single Model

A dealer acting as agent for the "HOME COMFORT" doesn't have to keep a big stock. We make only one size and one style. This simplifies matters a whole lot. It used to be, and still is, the custom for the dealer to put forward on his floor the simplest and cheapest model of a range, and to sell his customers this particular range. Then having made the sale, the dealer would proceed to induce the customer to buy extras. For this purpose, the more expensive models kept in the rear would be used for the purpose of demonstration.

Experience has taught a good many dealers that it is wiser to sell but one model, a model like the "HOME COMFORT." It saves time and money—dealers do not have to carry a large stock. This single model plan pleases the customer, too, and makes it safe and easy to make a choice.

We have made the "HOME COMFORT" the most easily sold range on the market. Write for agency proposition. It's a good one.

Wrought Iron Range Co. of Canada, Limited

Office: 151 King St. West TORONTO, Ont. Factory: 22 Orillia St.

Have you placed your Lawn Mower Order?

We are very anxious that you place your order for Lawn Mowers as soon as possible. If we can know by the end of the month how many machines will be required we are confident of being able to make such arrangements as will guarantee delivery by April. Steel and iron markets are in a very unsettled condition at present and unless orders are placed soon the possibility of delivery on a specified date will be rather remote.

BEAVER BOARD

FOR BETTER WALLS & CEILINGS

How Lath and Plaster Sells Beaver Board

Every wall that cracks makes a customer for you. Every ceiling that falls makes another. Every day lath and plaster is selling more Beaver Board for Beaver Board dealers.

Old habits and old methods are gradually being displaced by the modern ways of doing things.

Beaver Board, like all real improvements, is winning on its merits. When you think that it has all the good qualities of lath and plaster and in addition it is warmer in winter and cooler in summer, cannot crack, warp or bulge, you will realize the enormous possibilities for profitable business.

Don't take our word for it. Dealers throughout the Dominion know these things from experience. They will be glad to tell you and we'll gladly send you their names.

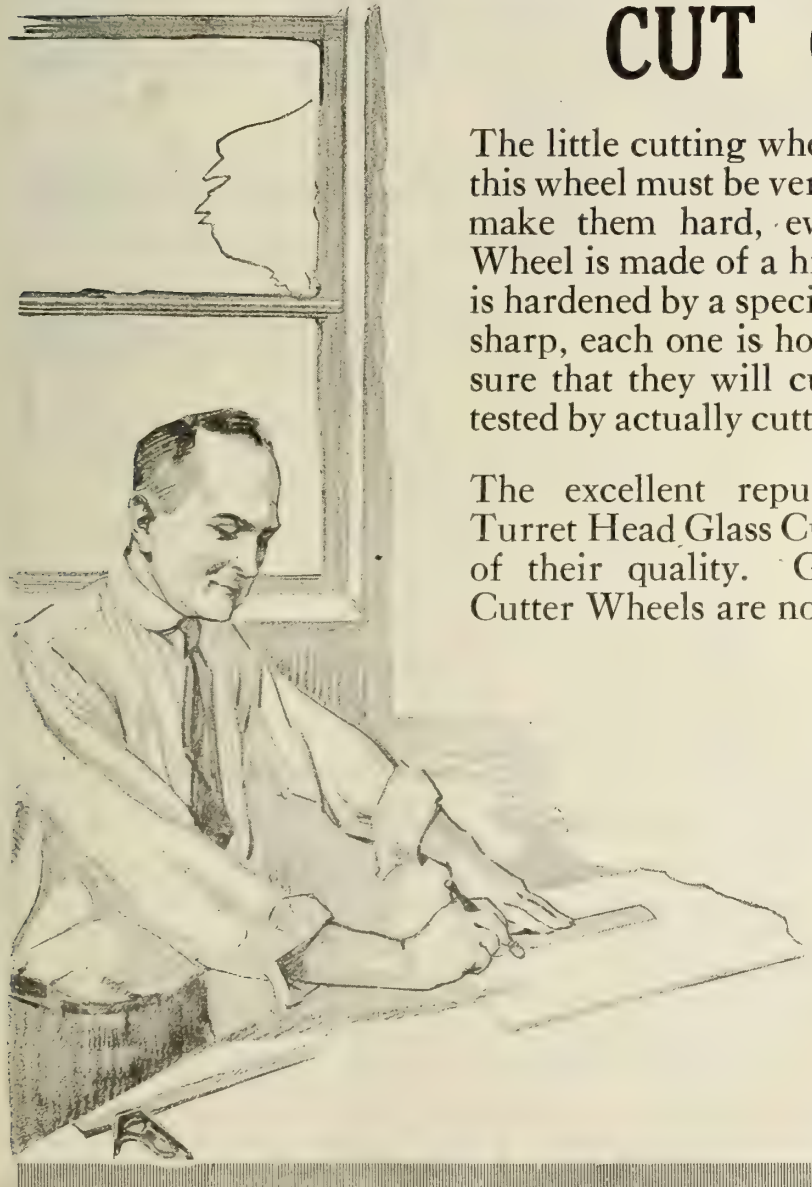
WHAT MAKES A GLASS CUTTER CUT GLASS?



The little cutting wheel. To cut glass properly this wheel must be very hard and very sharp. To make them hard, every Goodell-Pratt Cutter Wheel is made of a high-grade of tool steel, and is hardened by a special process. To make them sharp, each one is honed twice. Then to make sure that they will cut properly, each wheel is tested by actually cutting glass.

The excellent reputation of Goodell-Pratt's Turret Head Glass Cutter No. 1 is but one proof of their quality. Goodell-Pratt Cutters and Cutter Wheels are not afraid of any test.

Vol. 29 TORONTO DECEMBER 29, 1917 No. 52

Higher Freights: Higher Hardware

Opinions Vary a Little, but Heavy Goods Will be First Affected, and All Lines Possibly Later—Glass May Escape—Old Metals Depreciate—Prediction Made by "Hardware and Metal" in April is Fulfilled

PREDICTIONS made in HARDWARE AND METAL on April 28, 1917, of a probable increase in freight rates have been fulfilled. The announcement made as we go to press is that the Board of Railway Commissioners has granted an increase in freight and passenger rates ranging from 10 to 15 per cent.

The editorial printed in HARDWARE AND METAL dealing with the application of the railways is reproduced herewith:

INCREASED FREIGHT RATES PROBABLE

"The application of the Canadian railways to the Board of Railway Commissioners for an increase in freight and passenger rates is a natural climax to developments which have been taking place in the transportation situation in Canada and throughout the world as the result of war conditions. It is the outcome of adjustment in the cost of labor and supplies. If the increase of 15 per cent. now asked for is granted it will only cover a portion of the higher cost of operation and the railroads still have to face the problem of meeting other increased costs from earnings. This they may be able to do with more or less success while the present very heavy traffic continues but the future cannot be definitely forecast.

"So serious is the crisis which the railroads are facing that the application for the increase of 15 per cent. on freight and passenger tariff has been made under the War Measures Act in order that official action may be expedited. In view of the evidence which the railways are prepared to submit it is generally accepted that the increase being applied for will be granted. In that event June will probably see the new increased rates in force and the effect upon the earning statements should therefore be felt at a comparatively early date.

"The strength of the case which the railways are prepared to submit to the Commission may be judged from the fact that the systems making the application, the Canadian Pacific, the Grand Trunk, the Grand Trunk Pacific, the Canadian Northern, the Michigan Central, the T., H. & B. and the Pere Marquette, will submit figures to show that the increase of 15 per cent. does not cover the actual increase in the coal bill alone for 1917. This is based on the actual contracts which have been entered into by the companies referred to compared with the price paid in 1916 and the latter naturally represents an increase on what were normal prices prior to the war. The railroads will endeavor to take care of the other increases themselves and in this connection the very satisfactory volume of traffic is an important factor."

The Pith of the Matter

The judgment handed down by the Board of Railway Commissioners provides for a 15 per cent. increase in passenger rates in all parts of Canada except British Columbia, where the maximum rate is now 3 cents per mile. The judgment also permits, subject to the limitations of the Crow's Nest agreement and certain specific limitations, an increase in freight rates of approximately 10 per cent. in the West and 15 per cent in the East. The Crow's Nest agreement was made by the Canadian Pacific Railway with the Government and by its provisions rates on a large number of commodities are reduced. The judgment points out that there can be no question, in view of actual results, that the railways require greater revenues and must have them if proper efficiency is to be maintained and the demands of the country for transportation at all adequately met.

The Constructive View Of It

A good example of the constructive view taken of this matter of increased railway rates is found in the opinion expressed by Mr. Pepall, of Samuel, Benjamin & Co. (metals), Toronto. Interviewed on the subject by HARDWARE AND METAL, Mr. Pepall said:—

"I like to see any proposition in the country, no matter how small, whether it be the general store at the cross roads or the largest type of corporation, operating on a reasonable and legitimate profit basis, that is to say making a fair return on its investment. That sort of business is best for the country, best for everybody in the country.

"It is undoubtedly a fact that owing to high cost of both labor and material the railways are entitled to an increase in rates at the present time. Various forms of structural steel, such as bars and plates, have advanced between 100 and 200 per cent., and it is unthinkable that the railways could operate at a profit on the old basis in the face of these advances.

Probable Effect On Prices

"As to the probable effect on prices of hardware lines manufactured from metals by the use of coal, etc., I think that the increase in freight rates will mean only an inappreciable advance in the cost of such lines."

Heavy Goods Will Feel It

Another important opinion is that of Mr. Larson, of Rice Lewis & Son, Toronto:

"It is a matter for consideration by the wholesalers collectively," remarked Mr. Larson to HARDWARE AND METAL. "As yet no special consideration has been given to this. As a matter of fact suppose the increase works out to say 23 cents per hundred pounds where it was formerly 20 cents per hundred, it will not make more than a few cents difference on the heavier articles. Even such heavies as say a lawn roller weighing up to 300 lbs. would not be greatly altered in price by the addition of the new freight rate increase. It may not be worth while altering lists as far as goods already in hands of wholesale houses are concerned, but with new goods coming in under the new rate, that is different, and a matter for which the proper

course is collective action at this time on the part of the wholesale houses interested."

Decidedly Expects Advances

Mr. Williamson, of H. S. Howland, Son & Co., Toronto, notes the news of the increased freight rates with interest, and anticipates advances in prices to the retailer in consequence, though they may not be very formidable, and his opinion is given as a personal one only.

"Undoubtedly the railways are quite entitled to increases," he said to HARDWARE AND METAL, "and looking at it from a purely personal point of view without having gone deeply into the matter, I would say that it looks as if fifteen per cent. more on freight rates in the East is quite an increase, and this would inevitably be passed on to the retailer on the price of the goods. The matter adds to the immediate concerns of the wholesale hardware trade at present, and will have to be discussed in consultation by the members of the association. Beyond that at this time I should not care to express any opinion."

Glass May Not Advance Yet

As regards effect of freight rates advances on glass, practically all of which is imported, the opinion of Mr. Hobbs, of the Consolidated Plate Glass Co., Toronto, is interesting to the retail trade. He said to HARDWARE AND METAL:—

"I don't think that this will affect the prices of glass to the retailer immediately. Of course things like this do contribute to increases in price, but the present increase in freight rates is hardly sufficient, I think, in proportion to the value of glass consignments to warrant advances in the wholesale prices. Certainly there will not be any change in lists as an immediate result of the advance in freight rates. At the same time factors of this kind affect prices when there are enough of them. Though small in themselves many such factors will bring about advances in prices. United States glass manufacturers only recently demanded higher prices from us because of the cost of packing materials, etc., and a great many such changes would soon bring about increased glass prices."

Old Metals Depreciate

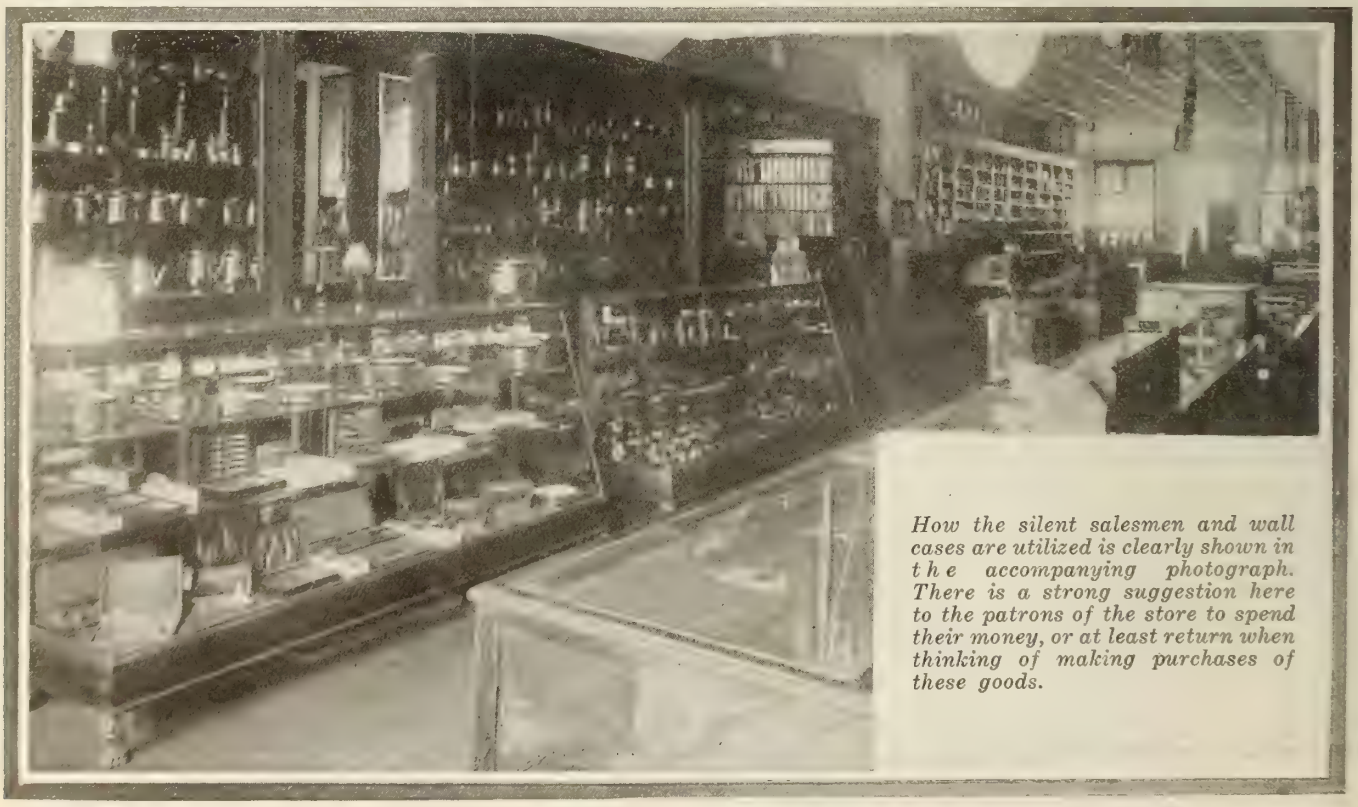
The advance in freight rates operates directly upon the value of old metals to their vendor at points away from the centres and depreciates the value of the metals by exactly the amount of the extra freight rates required for moving the consignments to the centres where they may be in demand in quantity. This is the point brought out by Mr. Knight, of Frankel Bros., Toronto.

"There is an embargo on all metals coming from the States," he pointed out to HARDWARE AND METAL, "and this means that any old metal supplies must come from Canadian points. Now the additional freight rates mean simply this, that a consignment of metal which before the advance would be worth to its vendor say $21 will now be reduced in market price by just the amount of the advance on freight for the carriage of the quantity involved, that is by 15 per cent."

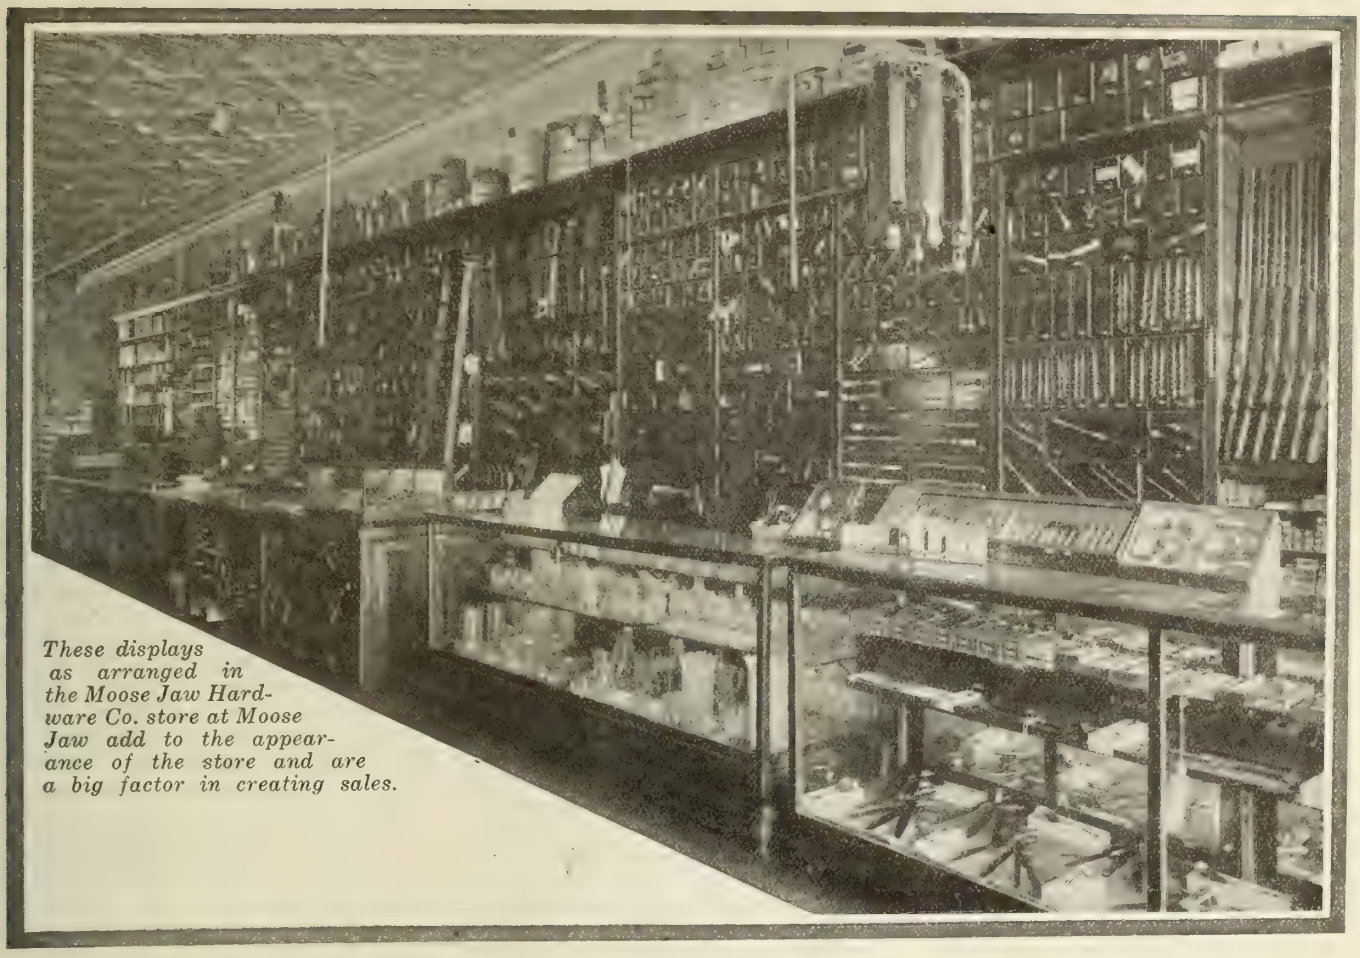
The Coming Line for Hardwaremen

One Year's Experience With Auto Accessories Elicits This Expression of Faith—Geo. J. Morrison, Proprietor of the Moose Jaw Hardware Co., Believes Great Possibilities for Development.

"THIS has been our first year to venture into auto accessories, but we have had great success, which has proved to us that this is one of the coming and, I believe, most profitable lines for the hardwareman to take up." In the foregoing, Geo. J. Morrison, of the Moose Jaw Hardware Co., Moose Jaw, summarized his reply to HARDWARE AND METAL'S query in reference to automobile accessories. It is becoming increasingly evident that the hardwareman generally is branching out into the auto accessory game and with marked success. As Mr. Morrison states:



How the silent salesmen and wall cases are utilized is clearly shown in the accompanying photograph. There is a strong suggestion here to the patrons of the store to spend their money, or at least return when thinking of making purchases of these goods.



These displays as arranged in the Moose Jaw Hardware Co. store at Moose Jaw add to the appearance of the store and are a big factor in creating sales.

"We have only to look around and see the great number of cars that are being sold every year. There, unquestionably, will be a wonderful demand for this class of goods, and the hardware stores will be looked to as the source of supply by a great many car owners."

The Moose Jaw hardware store is a tribute to the development of the hardware business in Western Canada, and its appointments throughout are of a nature designed to give quick, satisfactory service. The use of silent salesmen is extensively developed and shelf goods are sampled neatly on the drawers in which they are stocked.

The Cutlery Department One of Importance

One of the big departments in the store is that of cutlery. As will be seen in the accompanying illustrations, displays are maintained in the silent salesmen, and wall cases are utilized to set off nickel-plated, brass and aluminum ware. Mr. Morrison states that their stock of silverware, flatware and cut glass is such that they make a bid for and secure a very big Christmas goods trade, which is augmented throughout the year by sales for weddings, etc.

It will be noted that one entire case is given over to the display of cut glass, and it is being realized that this is a very profitable line which the hardware store can sell to advantage.

The arrangement of shaving accessories, scissors, butcher and paring knives, etc., in another case, is so attractive that it naturally suggests these goods to the customers on entering the store, with the result that more sales are recorded and ease in selling is quite evident.

The wall cases in which nickel-plated and brass goods are arranged are decided features in promoting a demand for these goods. These goods brighten the interior of the store wonderfully, and are a great factor in encouraging trade with the woman of the house.

GEO. J. MORRISON
Proprietor of the Moose Jaw Hardware Co., of Moose Jaw, Sask.

Sportsmen Have Direct Appeal in Gun Display

On the opposite side of the store a feature which appeals to the men, and particularly the sportsman, is the case in which guns of all descriptions are arranged. Even the small boy likes to look over the lines shown in this wall case, and the wishes of the boy are by no means a small factor in influencing sales of air guns and small bore rifles to the parents. The sporting goods department in all its branches is a big item in the store, and Mr. Morrison watches to see that those lines for which a sale can be made are constantly carried in stock. As the seasons change the displays are rearranged to meet the demands made and the wishes of the sportsman are catered to with extreme care.

A neat arrangement of ammunition and small accessories called for by the hunter is that directly below the guns. Shelving has been built to accommodate these items, and they are easily accessible, besides being in sight to remind customers whose supplies may be running low. The surplus stock of guns and rifles is kept in shelving directly above the display case.

Sampling Tools Creates Sales

The tool department follows the wall case of guns, the goods being sampled

(Continued on page 38.)

War is Demanding Standardization

Need for Uniformity is Being Met by Business Men of the United States—How Model Truck and Liberty Motor Were Evolved — What Government Asks the Organized Business Men of of the Country to Carry Out.

By a Staff Representative at Washington.

Washington, D.C.

EVERY business man knows the importance and the significance of standardization. The word ranks second only to efficiency. It denotes the realization of modern business that waste must be eliminated — the kind of waste that produces the same article a dozen different ways and makes repairs and replacements a matter of tremendous difficulty.

With reference to standardization in peace time opinions are not unanimous. Some do not favor it entirely. They feel that competition in design and variety in process of manufacture are healthy factors in trade and the means of satisfying the widely divergent tastes of the public. Some feel that in certain lines of goods there will never be possible a very rigid measure of standardization. Others, again, favor the most complete degree of standardization all through. They would have uniformity enforced by law in as many lines as conditions would permit. All agree that in many things standardization is very necessary and very beneficial.

With regard to war there can be no question whatever, no difference of opinion. Standardization of supplies is as necessary as discipline in the ranks. Bullets must be made the same to a tenthousandth part of an inch, rifles must be turned out absolutely to a model; guns, aeroplanes, motor trucks, gas helmets, everything used in the deadly business of war must adhere to set standards. This is the theory of war, at least; it is not always the practice.

The Moral of the Motor Truck

A young American engineer returned to the United States as soon after President Wilson's declaration of war as the limits of space and the handicaps of travelling out of France would permit. He had been serving with the French army in the engineering branch of the service for a couple of years, but got permission to return home as soon as his own country entered the war. In offering his services to *La Belle France* he had hoped, or at any rate expected, to assist in some of the more spectacular phases of war time engineering. It had developed, however, that he was on most intimate terms with the workings and the parts of motor trucks. No one was more capable than he in reassembling and doctoring disabled motor lorries. Accordingly he had been put in charge of a large workshop some distance back from the lines, where he worked anywhere from fourteen to eighteen hours a day—and saw to it that his staff did the same—at the highly useful if not spectacular business of repairing army trucks.

It was gruelling work in every sense of the word. When a shell lands in the neighborhod of a truck, the result is not hard to imagine. Generally the wreckage is left to rust where it has landed and the Western front is strewn with mangled remnants of wrecked cars. The need for trucks is very great, however, and anything that can be saved must be saved. Accordingly the young American and his staff had to tackle repair jobs that would have made any garage man on this side of the ocean throw up his arms in desperation.

But the great difficulty lay in the matter of duplication of parts. The French army had recruited and conscripted cars and motor trucks from all corners of the earth. There were French cars, English cars, American cars. There were so many different shapes and constructions that the repair depot had to carry no less than 20,000 parts! When a wrecked truck was brought in for treatment, it had to be identified, its origin traced back, its particular make and model determined and then the proper parts found. Necessarily work was slow and the difficulties great.

On his return to the United States, this engineer was a strong advocate of standardization. He had seen the lack of it in its worst phase and, to use an army term, he was "fed up with it." He told of one incident that illustrated effectively the dire results of lack of standardization.

Three motor trucks were parked by the side of a road back of the French line—a big English truck, a French truck of an antiquated model and a converted Ford. A shell landed close enough to scramble the three of them. Only the English truck was left sufficiently intact to be worth bothering with at all, but some of its parts had been scattered about and, when the repair men came to gather that machine together, they struck the job of their lives. There was three of everything in the mass of wreckage.

Standardizing the Truck

It hardly required the testimony of this officer and others who had had a like experience to convince Uncle Sam of the need for proper standardization. It had already been determined that only one type of truck should be used with the American army.

The means of attaining this end was supplied through the agency of the Advisory Commission of the Council of National Defence. Committees had been appointed to act with the General Munitions Board. The Committee on Army Vehicles consisted of William Butterworth, of Deere & Co., chairman; A. N. Thielaus, Studebaker Corporation; R. V. Bond, Kentucky Wagon Co., and E. E. Parsonage, of the National Implement and Vehicle Association. A committee on Armored Cars had also been appointed consisting of Col. J. H. Rice, of the Ordnance Department of the U.S. Army; Col. C. B. Baker, Quarter-master General, and F. A. Scott, of the General Munitions Board. Finally there was a committee on Automotive Transport, consisting of Karl W. Zimmerschield, of General Motors Co., Detroit, vice-chairman; Charles Clifton, representing National Automobile Chamber of Commerce; C. W. Stiger, representing motor and accessory manufacturers; H. L. Horning, representing tractor interests; Henry R. Sutphen, representing watercraft interests; Frank H. Russell, representing Aviation Engine Association of America; Coker F. Clarkson, secretary and general manager of Society of Automotive Engineers; T. W. Henderson, Henderson Motorcycle Co., Detroit, Mich.

The task of standardizing motor trucks for army use was in its various phases turned over to these committees of business men. The ultimate result was one of the miracles of manufacture that the war has brought about.

Engineers in Conference

The coöperation of all the manufacturers was first obtained. It was a very earnest evidence of coöperation that was demanded of them. They were asked to "go the limit," to throw in everything they knew to help in the planning construction of the perfect motor truck. They agreed.

New Government buildings in course of construction at Washington, D.C.

The concluding phase of the proceedings was when there gathered at Washington the head engineers of all the big manufacturers. They were collected together in one room, provided with plenty of material for the preparation of plans and then told to "go to it." It was impressed upon them that the country needed a truck as near perfect as was possible under existing conditions and that it was a patriotic duty with each and every one of them to help toward that end without a shade of reservation.

The story goes that the door was actually locked on them. This may or may not be true. But it is a fact that the conference brought forth wonderful results once they got down to work.

Imagine the situation; a score or more of jealous engineers who for years had been feverishly striving to excel each other in the improvement of truck construction. Each man there had shop secrets, exclusive processes, ideas that had been guarded as more sacred than the secret of the Sphinx; and they were asked to coöperate in the production of a perfect truck!

It did not take long for the ice to thaw. First one man laid a shop secret on the table, then another uncorked a hoarded kink and a third explained the nature of a projected improvement. In an hour all the cards were on the table and the group were up to their ears in details and specifications.

To-day every truck manufacturer has handed over to his rivals what was once supposed to be his chief stock in trade—his secrets of construction. But a truck is being produced for the use of the American army that will be as near perfect as it is possible to go to-day—a truck containing just one thousand parts where nearly two thousand were needed before. Every truck that goes to France will be of that model.

Activities incident to the war, have made enlarged quarters imperative.

The repair depots behind the American lines will carry one thousand parts only.

The Liberty Motor

The same story could be told with reference to the standardizing of the motor used for aeroplanes. It is, of course, generally known that the worth of a flying machine lies in the heart that drives it—speed, durability, facility, all depend upon the humming little mechanism in the nose of the machine. As the United States has felt, and perhaps rightly, that the only road to Berlin is one that cuts through the clouds—in other words, that the war can best be won in the air—the need for the finest motor possible was early recognized:

The same procedure was followed. The coöperation of the manufacturers was sought and obtained, the engineers were summoned to Washington and put into a room with the same instructions, "Evolve us a perfect motor." There was the same letting down of the bars, the same surrender of cherished secrets, the same mutual discussion of specifications and details.

The result was the Liberty motor. American aeroplanes will fly over the enemy lines with the assurance that the motive power throbbing in them comes from a motor that has all the good points American makers know and none of the faults they have been able to find and correct—a hundred per cent. machine as far as present knowledge goes.

In All Lines Now

The same idea is being carried through in all lines included within the needs of war. The army and the navy demand uniformity, absolute standardization, and Uncle Sam is putting the issue up to the business men of the country. On them is devolving the task of cutting straight roads through the rough hills of competitive construction. And the business men are living up to their task.

Reference has previously been made to waterproofing, as a line in which there was much mystery and mutual secrecy. Manufacturers jealously guarded their methods and processes from their competitors. Standardization for army purposes is being effected, however. Through the mutual efforts of the manufacturers the best methods are being determined for the waterproofing of clothing, tents, coverings, etc.

This is quoted merely as an evidence of what is going on in practically all lines.

And Now "Camouflage"

The standardization idea is being carried to all extremes and is being made to apply to what may seem the smallest details.

Every now and then a favorite artist drops from the pages of the magazines. His drawings are no longer seen and the public wonders what has become of him. In all such cases the answer is that he has gone into the service of the army. He is being employed on the devising and perfecting of "camouflage."

The war has coined many new words and phrases, but perhaps none more expressive or widely used than "camouflage," the art of concealment. The airship has provided the enemy with a far-reaching, all observing eye and it has become necessary to disguise batteries, hide roads and camps, cover "ammunition dumps" and, in fact, so change the appearance of everything the aerial observer can see that he will be deceived. The work must be well done, for the aerial observer uses a camera—and it is hard to deceive a camera!

With great thoroughness Uncle Sam is working on the standardization of camouflage. Hundreds of artists have been conscripted into the service and are being used in devising and preparing methods of disguise. They are attached to the various camps and the results that they obtain are duly reported. Information is exchanged among the various camps. Even this seemingly small phase of warfare is being worked out on a basis of absolute standardization.

The moral of it all is that the U.S. Government is obtaining tremendous results in the matter of standardization because the coördination of business men has been obtained. In no other way could the Liberty motor have been evolved. The system of national committees is making it possible to organize any industry to the point where anything needed for war purposes can be obtained.

Standardization is a matter for business men to handle and Uncle Sam has had the good, common sense to delegate it to business men.

And the results prove the wisdom of this course.

TRADE INQUIRIES

1474. **Washboards.**—A Glasgow firm who import washboards would be glad to hear from Canadian manufacturers seeking business after the war.

1484. **Agricultural tools and implements.**—A trading company in Sumatra, covering the Dutch Indies and Straits Settlements, etc., would like to get into touch with Canadian manufacturers of agricultural tools and implements with a view to business after the war.

1486. **Sulphite lye.**—A London manufacturing company wish to ascertain if they can obtain sulphite-lye, a by-product of the pulp industry, from Canada, and would be glad to hear from producers able to offer regular supplies. Full particulars obtainable at Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

1487. **Washboards.**—A London company who are large buyers of washboards would be pleased to hear from Canadian manufacturers looking for export trade.

1495. **Sulphite (wood) pulp.**—London firm ask for quotations c.i.f. Bilbao, Spain, or Genoa, Italy, for 100 tons and 1,000 tons of strong, easy bleaching and bleached sulphite (wood) pulp.

1497. **Heating appliances, flooring, etc., paints and oils.**—An inquirer in Newfoundland wishes to be placed in touch with Canadian manufacturers of church and house-heating appliances, maple flooring and cedar shingles, paints and oils.

1498. **Wire nails.**—A London firm ask to be placed in correspondence with Canadian manufacturers of wire nails, who can fill orders for shipment to India.

1501. **Disc harrows.**—A Belfast firm of agricultural implement dealers wish to get into communication with exporters of disc harrows, with a view to after-the-war business.

1502. **Tinned mattress wire.**—A Birmingham firm are open to purchase large quantities of tinned mattres wire, 23 gauge.

Tin Plate Situation Uncertain

Governments of Canada and United States Investigating Actual Requirements — Will Probably Distribute Supply According to Necessity Shown.

THERE has been a great deal of uncertainty of late over the tin plate situation and a great variety of opinion is abroad, much of which is based on no actual knowledge. It is known that last year the situation was serious enough to warrant a good deal of uneasiness, and that the limitation of tonnage that still exists must of necessity still be a disturbing factor. The renewed activities of the great munition plants and the consequent difficulty of getting steel plate is another serious factor.

There has been no suggestion to date, however, of any actual famine in the product. All the activities relative to the matter have been to conserve the supply for the most urgent demands. At present there are investigations under way to determine what are the actual requirements of varying lines of activity on both sides of the line. It is expected that once these investigations have been completed that there will be an apportionment of the available supply. Just how liberal this apportionment may be to Canada, nobody is able to say, but as the United States dealings with this country in other lines have been of a generous nature there is no reason to greatly fear on this point.

T. N. Anderson of Hamilton, sales manager for Canada of the American Can Company speaking of the matter states:

"There are all sorts of rumors and uncertainties regarding the tin can industry for the future. No one knows or will venture to say what action either Government might take on this question. Practically all of the plates used in Canada during the war period have come from the States and the States have used very extraordinarily large quantities of plates under to-day's conditions. As far as we know Canada has not been handicapped to a point worth mentioning to date and in these unusual times we cannot worry too much about the future under conditions quite beyond the control of tinplate users.

"Both Governments are accumulating data which will show tinplate consumption divided by lines for several years past and estimates for next year. Our belief is that this information will be used by the United States Government as a basis for determining the future and deciding how much tinplate they can spare for export shipment to this country and others."

Fred Whittall of the A. R. Whittall Can Co., Montreal, is slightly less optimistic than Mr. Anderson.

"The United States Government." he says, "will not allow any export of tinplates at the moment for other than the manufacture of containers for perishable food products. Clear and concise information relative to the purposes for which supplies are to be used must positively accompany all requests and no supplies are permitted forward in any case without licenses for each separate lot." Mr. Whittall states that he understands that consideration is now being given a request for some material for paint containers but that this is still under advisement by the government's board. Tinplate can be bought in the States at the present time, but in most cases it will be of little advantage to the Canadian manufacturer because of the embargo. Until present contracts are satisfied, little relief, Mr. Whittall states, is looked for.

THE COMING LINE FOR HARDWAREMEN

(Continued from page 35.)

very neatly on the fronts of drawers which contain the stock. Screwdrivers, auger bits, chisels, saw sets, braces, etc., are all attractively arranged and permit ease of selection from the customer's standpoint and rapid, effective handling from the salesman's end.

The builders' hardware, comprising lock sets, butts and hinges, etc., are splendidly arranged, and although building activities have ceased to some extent during war times, the line is kept prominently before the people and very satisfactory sales are being recorded. The surplus stock of lock sets, etc., is kept on shelving above the rows of drawers and, besides being easily secured, can be checked frequently and kept complete with little or no trouble.

The value of counter display cartons in the eyes of the proprietor of this store is visible to anyone in examining the photos, reproduced herewith. The attractive element usually features the goods shown in this way, and creates an inquiry, which can be satisfied either by the goods in the carton itself or other lines from stock

Making An Appeal From the Paints

Supported at an angle from the wall is a big display board, on which color blocks of the numerous shades carried in the paint department are hung. Apart from its convenience to those buying paint, this board serves to bring to the notice of all those entering the store the fact that the paint department should not be overlooked.

A careful arrangement of the display enhances the value of this department materially and the attractive labels on the tins add brightness to this important section of the store. The tins are arranged in shelving built to accommodate each size, and this feature adds to the general effectiveness of the paint display.

Each department has been carefully planned and great stress has been laid on the value of display. Keeping goods packed away in boxes or under counters does not meet with the approval of Mr. Morrison, for he believes that goods well displayed are half, or even more than half, sold.

The Moose Jaw Hardware Co. was established in the spring of 1900 by John Hawke and continued under his management until the spring of 1912. Up to that time along with the hardware business a tinsmithing, plumbing and steam fitting business was carried on. In 1912 Mr. Hawke retired and Mr. Morrison took over the business. At that date also the hardware was separated from the mechanical end, which was made into a separate company under the name of the Moose Jaw Heating and Plumbing Co. Mr. Morrison states that the separation of these two ends of the business was made, believing it was to their best interests to have them separated, and time has confirmed him in his belief as far as their own particular business is concerned.

Association Programme Along New Lines

AS we go to press, the Advisory Committee of the Ontario Retail Hardware and Stove Dealers' Association is in session at the Queen's Hotel, Toronto, planning out the program of their convention to be held next February. The dates of the convention, which will be held at the Royal Connaught Hotel in Hamilton, Ont., are Tuesday, Wednesday and Thursday, the 19th, 20th, and 21st of February, 1918.

Representatives of HARDWARE AND METAL were called in to the meeting to-day and suggestions have been made which will materially improve convention proceedings. The program will be run along entirely new lines—will start on time—run on time and it is believed the program will limit speeches to a certain time. It is believed this will result in all speeches being boiled down to the real thing.

Some meetings will be confined to retailers only and then there will be open meetings at which manufacturers, travellers and jobbers can attend. Several manufacturers have signified their intention of having exhibits.

It is expected a definite announcement in reference to the program will be made within the next couple of weeks.

Those in attendance were Jas. M. McGregor, of Oakville, W. F. McPherson, of Prescott, W. J. Carter, of Picton, John Caslor of Toronto, and A. J. Wright of Hamilton.

EDITORIAL COMMENT

THE NEW YEAR

FORECASTS as to abounding prosperity for Canada during 1917 have been fully realized. Business men can look back at the past year with considerable satisfaction and to the New Year with a large measure of confidence. Another year of war with its sorrow and suffering has passed and it is doubtful if business in Canada has ever been better than it is at the present time.

For the new year, prospects are even better than those existing at the beginning of 1917. Canada's billion dollar crop represents a new era in earnings —it is more than likely heavy spending will continue. However, there is a possibility that the war will end during the coming year—and everyone will welcome the day when hostilities do cease—and conditions following may bring real hardship. It is to the future then the business man must look, planning very carefully and deliberately, watching every move to see that no joker creeps in which will blind his vision to the after-war period when present prosperous conditions may be curtailed somewhat until a readjustment is effected.

PROHIBITION FOR CANADA

ALREADY one commendable measure has been put into effect by the new Union Government —that of prohibition for Canada. This step will be generally welcomed by business men throughout the entire Dominion who have helped put through legislation of a similar nature in practically every province with the exception of Quebec, and had an opportunity to review its splendid results. There is no question of doubt but that even to-day large sums of money are being sent out of the individual provinces for liquors which could well be diverted to better channels.

In those provinces which have enjoyed the benefits of prohibition for the last year or two, business men largely attribute individual prosperity and spending power to the removal of the temptation of the bars. The move to extend bone-dry conditions to the entire Dominion should result in a war-time efficiency which will undoubtedly be reflected in greater earning and spending power. The money spent in absolute waste will be directed towards better channels which should have a decidedly good effect on all lines of business.

PRICE FIXING EXTENSION URGED

THE activities of the Federal Trade Commission in the United States have been followed through their various ramifications with extreme interest, not only by those to the south of us but by the trade throughout Canada. The annual report just issued urges not only the extension of price fixing but calls for Governmental investigation of trade associations. The developments from such an investigation will be watched with great interest in Canada.

In commenting on the report, the *American Metal Market* says:—

Extension of the Government's price-fixing power to other products than food and fuel, and especially to iron and steel, is believed necessary by the Federal Trade Commission in the light of experience gained in investigating economic conditions since the United States entered the war. Recommendation that a temporary administrative body be established to determine reasonable prices for prime necessities and also to regulate the distribution of raw materials and finished products was made in the commission's annual report submitted to Congress.

Regarding the necessity for Governmental price-fixing, the report says in part:

"In this connection also should be considered the question whether bona-fide contracts made prior to the passage of a price-fixing law should be allowed to be enforced. This commission is of the opinion that the exact merits of the proposition might differ somewhat in different industries. With respect to the iron and steel industry, however, it believes that the greatest public advantage would be attained by not allowing such contracts to be fulfilled, at least over long periods of time.

"The need of a comprehensive investigation of trade associations, according to the report, has been developed from the commission's other inquiries. Lack of adequate trade information has been found to be one of the chief obstacles in many industries to the operation of natural competitive forces, and where trade associations collect such information it was discovered that temptation frequently results to control prices artificially and the channels of distribution. Publicity of trade association files, it is urged, would extend the knowledge of demand and supply and help to prevent abnormal fluctuations in prices, as well as tend to curb association activities of objectionable character."

How to Calculate Cost of Doing Business

The Operations Are Exceedingly Simple—The Tremendous Importance of Distinguishing Between the Percentage Cost of Doing Business as Reckoned on the Selling Price, and as Reckoned on the Cost Price—Getting a Desired Profit From Effort Over All Costs of Doing Business.

By John C. Kirkwood.

THE ascertaining of the percentage cost of doing business is as simple a calculation as can well be imagined—just simple addition and simple division. You add up your annual expenses—for rent, salaries, delivery, etc.; multiply the total by 100; and then divide by your total annual sales. The result is your cost of doing business in the form of a percentage.

Suppose that your total annual sales are $20,000; and that your total annual expenses (including an adequate salary for yourself and a desired profit over all) are $4,500; then your percentage cost of doing business (reckoned on your **selling** price) is:

$$\frac{\$4,500 \times 100}{\$20,000} = 22\frac{1}{2}\%$$

Note carefuly that this 22½% is a percentage on your **selling** price, not on the cost or invoice price of goods.

The Danger of Bad Arithmetic

Just what is signified by this warning to be careful to distinguish between the percentage on the **selling** price and the percentage on the **cost** or invoice price will be made clear by an illustration.

An article costs, let us say, $1.50, and sells for $2.25. That is, the gain on **cost** price is 75 cents, or 50%. This gain of 75 cents on the **cost** price is one-third of the **selling** price, or 33 1-3%. That is, 33 1-3% of the **selling** price is the same as 50% of the **cost** price. It would be quite wrong, therefore, to increase the **cost** price by 33 1-3%, which would give only $2.

To get the correct selling price, one must convert the percentage advance on the **selling** price to the equivalent percentage advance on the **cost** price; and then advance invoice or cost prices by the proper percentage. Many a retailer has bungled things here, to his great loss.

Costs Are Reckoned on the Selling Price

It is tremendously needful, in the interests of profitable trading, to make clear, and to understand clearly, the difference between the percentage as reckoned on the **selling** price, and the percentage as reckoned on the **cost** price of goods. And here let it be said that in common practice and talk, the percentage cost of doing business is reckoned on the **selling** price. That is, when a man says that his cost of doing business is 16%, he means 16% of his sales.

To illustrate this:

Brown does a business of $25,000 a year. His expenses, including a desired profit over and above all costs (which should include an adequate salary to the proprietor), amount to $5,000. Then Brown's percentage cost of doing business is:

$$\frac{\$5,000 \times 100}{\$25.000} = 20\% \text{ on his selling price.}$$

In this illustration, it is clear that the invoice cost of the goods sold by Brown is $20,000, for his $25,000 sales include $5,000 for expenses and profits. That is, Brown gains $5,000 on the cost price of his goods, or 25%. Thus it is seen that 25% on **cost** is the same as 20% on sales; or, vice versa, 20% on sales is the equivalent of 25% on cost. But when Brown talks of his percentage cost of doing business, he does not say, "It costs me 25% to do business," but, "It costs me 20% to do business," meaning 20% on **sales.**

Cut out this article and put it in your ledger, or elsewhere, where you can consult it whenever in need of its counsels and teaching.

Not often—perhaps never before—have you had the subject dealt with as in this contribution so fully and so plainly presented.

It would be well nigh impossible to exaggerate the importance of the subject of the cost of doing business in its application to every business, including the businesses of retailers whose capital is $5,000 or less. 95% of those who fail are doing business on a capital of $5,000 or less; 75% of the reasons for failure are personal, and, therefore, correctable; and 90% of those engaged in business get no profit from their effort. In the face of this authenticated history, it should be clear that every retailer should be greatly concerned to conduct his business better—and more profitably for himself.

Why Costs Are Reckoned on the Selling Price

In ascertaining the cost of doing business, it is simplest and easiest to make the reckoning on the **selling** price. You know your annual total sales; and you know your total annual expenses (including a salary for yourself, plus a desired profit over all). With these two known things, the percentage cost of doing business is a simple calculation; it is determined by the formula, as given previously, namely:

> Total annual expenses × 100 ÷ total annual sales = percentage cost of doing business reckoned on the selling price.

Converting Cost on Sales Into Cost on Cost

Knowing what is the percentage on the **selling** price, how is one to ascertain the equivalent percentage on the **cost** price, so that he may know the right percentage to add to cost or invoice price? Unless one knows how to make this calculation, one is apt to be at sea; and he may make grievous errors.

The formula for converting the percentage on the **selling** price into a percentage on the **cost** price is:

> Percentage cost on the selling price × 100 ÷ (100—percentage on the selling price) = percentage cost of doing business on the cost price.

Let us illustrate this formula by several examples.

When the percentage cost of doing business on the **selling** price is 16, then the equivalent percentage on **cost** is:—

$$\frac{16 \times 100}{100-16} = \frac{1600}{84} = 19.04\%$$

When the percentage on **sales** is 20%, then the percentage on **cost** is:—

$$\frac{20 \times 100}{100-20} = \frac{2000}{80} = 25\%$$

When the percentage on **sales** is 22%, then the percentage on **cost** is:—

$$\frac{22 \times 100}{100-22} = \frac{2200}{78} = 28.20\%$$

When the percentage on **sales** is 30% then the percentage on **cost** is:—

$$\frac{30 \times 100}{100-30} = \frac{3000}{70} = 42.86\%$$

These examples will suffice. You see how simply and rapidly you can ascertain what percentage to add to the cost price to equal the percentage on the **sales** price.

Some Illustrative Examples

Let us now apply what we have learned to actual examples.

We'll suppose that you have an article that costs you $3.00; and that your cost of doing business (reckoned on your **selling** price) is 18%. First of all we must convert this 18% to the equivalent percentage received on the **cost** price. Using the formula we have:—

$$\frac{18 \times 100}{100-18} = \frac{1800}{82} = 21.95\%, \text{ or, say, } 22\%.$$

So we ought to add 22% to the **cost** price. That is, when the article you have to sell—a hat, a pair of boots, an

oil stove, a picture, a piece of china, or anything else—costs you $3.00, and you add 22%, you get the correct selling price of $3.66 (which you may make $3.65 or $3.75, as you please; only you know that you should get at least $3.66 to obtain the right proportion of your costs of doing business, plus a desired profit).

But suppose you deceive yourself, and add only 18% to the invoice price, saying, "It costs me 18% to do business; therefore, I ought to increase the invoice cost by 18%." In such case, your selling price would be $3.54. As we have seen, you really require to get $3.66; so if you sell at $3.54 (probably at $3.50), you will be losing 12 cents and probably 16 cents.

You may think this not a very serious matter. Perhaps it is not in respect of individual items of small amount; but if you make the same error on all your sales for the year, the loss you sustain becomes a very heavy one and may mean that you will work all year for nothing, failing to obtain the desired profit.

Calculating Errors in a Year's Turnover

Let us look into this matter on the basis of a year's business.

We'll suppose that the goods you sell in a year cost you to buy $30,000; and that it costs you 18% of your sales to run your business (including an adequate salary for yourself, and a desired profit over all). 18% on sales, as we have seen, is 22% on cost. Which means that you ought to get $36,600 for the goods which cost you $30,000 to put into your store. Now if you add only 18% to invoice cost, you will obtain only $35,400—a difference of $1,200; that is, you would be losing just $100 a month, which may be the profit you have aimed at obtaining.

When one remembers that ample and official investigation shows that 90% of all those engaged in business get no profit from their effort, one has, in the above example, a hint as to why many men in business work year after year, for nothing.

Losing a Dollar 1,400 Times

Let us take another illustration. You are a hardware dealer, we shall suppose. You discover that your cost of doing business equals 17% of your sales (which 17% includes an adequate salary for yourself and a profit of $1,000 or so over all expenses, as a reward for your year's effort). Now 17% of sales is the same as 20.5% on cost (as per formula).

We'll suppose that you want to ascertain the correct selling price of a stove which costs you to lay down in your store $24. Clearly you must add 20.5%, which gives you a selling price of $28.92; or say, $29. But if you make the error (as many do) of adding only 17%, you get a selling price of $28.08, or, say, $28. That is, you would be losing a dollar on every stove sold.

Now, suppose that you are working on the assumption that it costs you 17% to do business (reckoned on your sales); and that you sell goods in the year which cost you to buy $40,000; and that you add (erroneously) on an average, 17% to **cost** or invoice price, your total sales revenue would be $46,800. But, as we have seen, 17% of sales is the same as 20.5% of cost price; which means that you should have obtained $48,200 for the goods that cost you $40,000 to buy. Because of your error in marking your goods, you have lost $1,400 which you expected and desired to get; and this loss of $1,400 probably means that you have worked all year for just wages; that you failed to obtain any profit on effort. It really means, in this example, when you sell goods costing you $40,000 for $46,800, that you are recovering only 14.5% on sales instead of the 17% required.

In order to save you time, the following table showing equivalent percentages in the cost of doing business is provided.

When the cost of doing business reckoned in the selling price is:	Then the equivalent percentage, reckoned on the cost price is:
9%	10%
10%	11.11%
15%	17.65%
16%	19.05%
20%	25%
25%	33 1-3%
30%	42.86%
35%	53.85%
40%	66 2-3%
50%	100%

For other in between percentages, use the formulas as follows:

(1) *To ascertain the percentage cost of doing business reckoned on the selling price:*

Total Annual Expenses × 100 ÷ *total annual sales.*

(2) *To ascertain the percentage to add to cost or invoice price, when one knows the percentage cost of doing business reckoned on the selling price (as ascertained per formula above):*

Percentage on sales × (100— *percentage on sales*).

Memo: Cut out this table and statement of methods, and paste same in your ledger.

It is worked-out illustrations such as those given that should convince you of the tremendous importance of knowing accurately just what it costs you to do business; of avoiding the fatal error of adding to cost price the percentage recovered on the selling price.

Be Sure to Provide for Salary and Profit

If your costs of doing business do not include a sum representing a desired net profit over and above your operating and other costs (which should include an adequate salary for yourself sufficient for your own and your family's needs), be sure to add to these costs the amount you desire as profit on your year's effort. Failure to figure in a net profit for effort and the risk of capital means generally a profitless year.

Brown's Case By Way of Illustration

As an illustrative example of this study of percentage costs, let us state a case.

John Brown, merchant, has total sales of $46,500. His year's expenses are as follows:

Rent	$ 600
Freight, etc. (on incoming goods)	400
Salaries (2 men besides himself)	3,500
Fixed Expenses (taxes, fuel, insurance, etc.)	200
Delivery, (including horse and wagon upkeep, stable, paper, twine, etc.)	600
Incidentals (including printing, advertising, postage, telephone, cleaning, repairs, etc.)	350
Losses (including bad debts, shrinkage, spoilage, thefts, donations and subscriptions, discounts given, etc.)	250
Interest (on capital, on bank overdrafts, etc.)	350
Depreciation (on furniture, horse, wagon, equipment, etc.)	150
Total	$6,400
Add to this the net profit Brown desires on his year's effort say	$1,600

or a total cost of doing business $8,000

That is, Brown's cost of doing business is (according to the formula previously stated):

$$\frac{\$8{,}000 \times 100}{\$46{,}500} = 17.2\%;\ \text{say } 17\%.$$

This 17% is on the selling price. Converted into a percentage on cost price, and following the formula previously stated, we have

$$\frac{17 \times 100}{100 - 17} = \frac{1700}{83} = 20.5\%.$$

That is, Brown would have to add, on an average, 20.5% to invoice costs to recover the $8.000 required costs of doing business + profit on effort.

If Brown's sales are $46,500, and if they include $8.000 (costs of doing business + net profit), then it is clear that the invoice cost of the goods sold in the year is $46,500—$8,000 = $38,500.

This illustration should prove suggestive and helpful to the man who wants to know how to calculate the costs of doing business, and how to apply these costs, when reduced to percentages.

This Way Fortune Lies

To sum it all up; and to make it very practical:

(1) Take your sales for 1917;

(2) Reckon up your expenses of doing business, omitting no item or class of item;

(3) Include an adequate salary for yourself, sufficient for your own and your family's proper needs;

(4) Include, also, a sum which you

(Continued on page 43.)

EVENTS IN THE TRADE

BUSINESS CHANGES

Rimbey, Alta.—O. B. Moore, hardware, has sold out.

Lawson, Sask.—Beaudreau & Folliott, hardware, have dissolved.

Winnifred, Alta.—Southern Alberta Hardware Co., Ltd., has sold out.

Birch Hills, Sask.—R. J. M. Sutherland, hardware, has sold to J. H. Millard.

Toronto, Ont.—H. W. Knight & Bro., manufacturers of electrical fixtures, have dissolved. Dissolution registered.

OBITUARY

Montreal.—O. Erdrich, of John Wilkins & Co., wholesale paper and twine, is dead.

Winnipeg, Man.—A. Y. Bayne, president, the Algoma Steel Bridge Co. of Canada, Ltd., is dead.

INDUSTRIAL NOTES

London, Ont.—London Foundry Co. has been sold to Wm. A. Kribs.

Toronto, Ont.—Cook & Brady, spark plugs, Toronto, have dissolved.

INCORPORATIONS

Prescott, Ont.—The Newell Manufacturing Co. has been incorporated, with a capital stock of $45,000.

Montreal.—The Wedgerite Piston Ring Co. has been incorporated with a capital stock of $49,000, and will manufacture piston packings, etc.

Owen Sound, Ont.—The Great Lakes Steel Corporation has been incorporated with a capital stock of $1,000,000 to manufacture and deal in iron, steel and all other metals from the ore to the finished product.

TAKES OVER AGENCY

John R. Anderson, who for some years has been head of the purchasing department of Lewis Bros. of Montreal, is severing his connection at the end of the year, having acquired the agency business of W. L. Haldimand & Son of Montreal.

Mr. Anderson's association with the hardware business dates back to 1896 when he started with Bowman, Kennedy & Co. (afterwards Jno. Bowman Hardware & Coal Co.) in London, Ont., serving a three years' apprenticeship. The following two years were spent in Toronto with Rice Lewis & Son and the Aikenhead Hardware.

In 1902, Mr. Anderson started travelling for the Jno. Bowman Hardware & Coal Co. out of London, going with H. S. Howland, Sons & Co. in 1904. In December, 1906, a change to Lewis Bros. was made and until 1912 Mr. Anderson covered the Niagara Peninsula and Western Ontario territory. In January, 1912, he took charge of Lewis Bros'. branch office in Ottawa and after one year there moved to Montreal to

JOHN R. ANDERSON

Who has taken over the agency business of W. L. Haldimand & Son, Montreal.

take charge of the purchasing department, which position he has since held.

In taking over the business of W. L. Haldimand & Son, Mr. Anderson will represent Dowswell, Lees & Co. (formerly Cummer, Dowswell Co.), Hamilton, Ont., Burrow, Stewart & Milne, Hamilton, Ont., Parmenter & Bullock Mfg. Co., Gananoque, Ont.; Nixon & Winterbottom, James Howarth & Sons and W. A. Tyzack & Co., of Sheffield, Eng.

MONTREAL NEWS

J. W. Dowling, president of the Wholesale Hardware Dealers' Association, has been confined to his home through a severe attack of pleurisy for the past three weeks. It is hoped that Mr. Dowling will be able to resume his duties within the next few days.

P. A. Jopp, manufacturer's agent and importer of dry colors and other lines, died at his home in Montreal, and was buried on Monday last.

PERSONAL

Leo Graham, manager of the Consumers' Cordage Company, and Clifford Prescott of J. Simmonds & Co., wholesale furniture and hardware, of Dartmouth, N.S., are among the unfortunate citizens who lost an eye as result of the Halifax catastrophe.

Mr. J. D. Chaplin, president of the Welland Vale Manufacturing Company, edge tools, etc., St. Catharines, Ont., is conceded to have been elected as Unionist member of the House of Commons to represent Lincoln county. Mr. Chaplin is president of the Chaplin Wheel Co. of Chatham, president of Canada Axe and Harvest Tool Co., president of the Wallingford Mfg. Co., and also head of the Metal Drawing Co. of St. Catharines, one of the large munition concerns in Ontario.

RE-ELECTED PRESIDENT

At the annual meeting of shareholders of the Dominion Sheet Metal Company, Limited, Hamilton, Ont., L. D. Mercer, Canton, Ohio; B. A. Epperson, Indianapolis, Ind., and C. B. Enlow, Evansville, Ind., were in attendance, being entertained at the home of A. T. Enlow, president of the company.

The board of directors was re-elected and A. T. Enlow was re-elected president and general manager.

Following the meeting a banquet to the staff was given at the Royal Connaught Hotel.

DEATH OF JOHN TAYLOR

John Taylor, founder of the firm of Taylor and Arnold, Ltd., general railway supplies, veteran in the business world of Montreal, where he started as a hardware merchant, died recently at Montreal.

Mr. Taylor was born at Ayr, Scotland, on March 18, 1833. He came to Canada in 1837 and had lived in Montreal ever since. After passing through the Montreal High School, he commenced business in 1851 with the wholesale hardware firm of Ferrier & Co. After a few years he joined the firm of Moreland, Watson & Co., and became a partner. This company organized the Rolling Mills, which eventually became the Montreal Rolling Mills, now part of the Steel Company of Canada. Upon the dissolution of Moreland, Watson & Co., he went into business with his brother, Homer, but after a few years this company dissolved and he entered business in the railway supply lines for himself, his brother Homer

taking up agencies in the same business. His brother Homer being killed on October 20, 1906, Mr. Taylor took into business his son-in-law, Thomas Arnold, who merged the two businesses and formed the firm of Taylor and Arnold, Limited.

ST. JOHN, N.B., NEWS

Stanley E. Elkin, general manager of the Maritime Nail Works, was elected on the Unionist ticket in the constituency of St. John-Albert, leading the polls. One of his opponents lost his deposit and the other is expected to do so when the soldiers' vote is in.

The contract for building a $35,000 power house and laundry in connection with the Algonquin Hotel at St. Andrews, N.B., has been awarded to the Rhodes, Currey Co., Ltd., of Amherst.

The New Brunswick Commercial Travellers' Patriotic Club raised $6,838 for patriotic purposes during the year, according to the report submitted at the annual meeting held in St. John this week. Officers elected were: president, W. A. Stewart; vice-president, D. McKinney; secretary, J. E. Augevine; additional directors, W. Connell, T. J. Gunn, M. H. Dunlop, J. E. Petrie, G. G. Walters, H. W. Wetmore, L. M. Owens, E. H. Cairns, J. E. Earle and G. E. Dawes.

Several of the St. John hardware stores had a new appeal for the Christmas trade this year. This opportunity was found in auto accessory departments which have been established during the year and in which many articles were found which could be featured as desirable presents. Good business is reported in this line.

The general lines and especially the fancy goods in the regular stock met a strong demand, the increasing tendency towards useful gifts throwing additional trade to the hardware stores. The tendency was not towards cheapness, however, and the more expensive gifts seemed to be in even more demand than usual. The Christmas season has been a good one in St. John.

COMMERCIAL CONGRESS OR SHORT COURSE FOR RETAIL MERCHANTS

Manitoba University will put on a special one week short course for retail merchants, February 4th to 9th, 1918. This course will consist of lectures each day on all subjects having a bearing upon retail merchandising. The course is being prepared to meet the requirements of the retail merchants of the West. In addition to the lectures there will be opportunities given for discussion or consultation periods.

For the last three years the Universities of Minnesota, Wisconsin and Illinois have provided short courses for merchants of their respective States. In each case, the attendance has continued to grow because the merchants have recognized the practical value of getting the best information possible on the various phases of merchandising. A committee of country merchants is co-operating with the Secretary of the Advisory Committee on Commercial Education to make this course one of the most interesting that has ever been offered to merchants in any part of Canada. Two of the very best men will be brought to Winnipeg to assist local experts in handling the various subjects to be discussed. It is altogether likely that Roy Soule, editor of "The Hardware Age" New York, and C. Prior Irwin of the Wisconsin University will be in attendance and deliver the principal lectures. The success of the course, apart from the character and value of the addresses, will be measured largely by the number of merchants and their clerks who attend.

To be sure of the future support of the University in offering such valuable education for retail merchants of the province, a general response is necessary. In cases where merchants are unable to be present, an effort should be made to have a clerk or clerks attend the course on behalf of the store and thus get the benefit of the information and ideas available.

Last February, five members of the Manitoba Association attended the short course provided by the Minnesota University. The subjects treated in this course were as follows: Accounting, Preparing an Annual Statement, Credits and Collections, Over-buying, Perpetual Inventory, Arrangement and Display of Stock, Window Dressing, Salesmanship, Advertising, Knowing the Markets, Keeping a Mailing List, A Store Paper, Turn-over, Community Development, Circular Letters, How to Meet Competition, Dealers Co-operating, Selling Points of Goods, Training Salespeople, etc. Upon their return to Winnipeg, the members recommended to the Manitoba Executive of the Retail Merchants' Association that every effort should be made to provide a similar course for the merchants of Manitoba, and it is gratifying to know that the officers have succeeded in getting the fullest co-operation of the Manitoba University in accomplishing the task. It is up to the merchants all over this province to make this an annual affair by proving to the University that their efforts along this line are fully appreciated. Your appreciation will best be expressed by your presence. The short course comes at a very desirable time. Most of the merchants will have completed stocktaking and business will likely be quieter than at any other period during the year.

UNLAWFUL PRACTICES ALLEGED

Colgate & Co., of Jersey City, have been indicted by the Grand Jury in the United States Court for violation of the Federal Laws by refusing to sell their products to dealers who would not agree to sell at the prices fixed by the company.

The indictment charges that Colgate & Co., manufacturers of soaps and toilet preparations, for the three years have engaged in unlawful practices in Virginia and elsewhere in the United States.

The indictment alleges that the defendants, through wholesale and retail dealers, fixed the prices at which all their products should be sold, and refused to sell to dealers who would not agree to sell at the prices fixed by the company, thus suppressing competition.

COST OF DOING BUSINESS

(Continued from page 41.)

think is just as a profit on your year's effort;

(5) Ascertain, from those two sets of figures—your total sales and your total costs of conducting your business—the percentage cost of doing business;

(6) Convert this percentage cost on sales into its equivalent cost received on the cost of goods;

(7) Mark goods accordingly;

(8) Then make sure that you are selling enough goods at the requisite advance on cost to give you every week the amount, in dollars and cents, necessary to meet your requirements.

If you do all this—and it will take some doing— you can possess a mind at ease; if you fall short, then let the deficit urge you to greater endeavors.

When you learn how hard it is to keep everything up to scratch, you will be slow to put on special cut-price sales; or to give away goods or make friendly allowances to favorite customers. You will be careful in your buying, careful to buy only what you are reasonably sure of selling at a full advance over cost and what can be quickly sold. You will discourage yourself and your staff from taking overmuch time to sell goods on which, for one reason and another, you cannot get the full advance on cost, which your expense of doing business calls for; and you and they will devote all energy to selling goods whose retail price gives you a bountiful advance over their cost.

So will you become a better merchant, a happier one, a more prosperous one. So will you remove yourself from that poor class of retailers, comprising 90% of all retailers, who get no profit on their effort; and so will you place yourself in that prosperous and rich-growing 10% class who get a profit on their effort year after year.

BRITISH MAGNETO OUTPUT

Although before the outbreak of the war the output of British magnetos was not more than 100 a week, since the war no fewer than 165,000 magnetos are said to have been produced in Great Britain.

WANTED

WANTED—Two experienced hardware travelling salesmen for established territories. State experience, salary wanted, also age. Permanent position to right men. Services required within thirty days. Whites, Limited, Collingwood.

Salesmen Convene in Brockville

Salesmen of the James Smart Plant of the Canada Foundries and Forgings, Brockville, Meet

THE travelling staff of the James Smart plant, of the Canada Foundries & Forgings, Ltd., Brockville, Ont., met together for convention on the week of December 10.

All of the members of the staff were present, territory from the Atlantic to the Pacific being represented. The members present were as follows:—F. W. Tracy, Alberta and British Columbia; A. E. Mulloy, Saskatchewan; M. G. Pettipiece, Manitoba; W. P. Millar, manager Winnipeg branch; Chas. E. McKay, Maritime Provinces; Wm. J. Irving, Montreal; A. St. Louis and V. Cadorette, province of Quebec; Geo. A. Hutcheson, A. A. Sutherland, H. M. Roblin, J. A. Turnbull, T. H. Webster, province of Ontario.

A number of the travellers arrived on Monday, the day preceding the convention, and spent the time looking about the factory getting information and in the evening were entertained by the local sales agent at the local theatre.

Tuesday found every member of the staff on hand and the day was spent in meeting one another and getting in touch with conditions throughout the factory. In the evening a supper and smoker was held, the general manager, T. J. Dillon of Welland, occupying the chair. He called upon a number of those present to address the meeting, all speaking along a very happy strain, going to show the good feeling prevailing among the staff. Many interesting and humorous features in connection with the work on the road were discussed, and a most enjoyable evening spent.

Wednesday the actual business of the convention was started, the salesmen going over the catalogue, discussing same, and making suggestions as to new and extended lines.

The travellers in closing expressed their appreciation of the general sales manager, B. J. McCormick, who handled the affairs of the convention. They looked upon the convention as a success and felt the information received would be of benefit to them throughout the coming year.

—⚙—

CAN COMPANY ENLARGES PLANT

A. R. Whittall Can Co. of Montreal Make Extensive Additions to Plant

Within the past five weeks an addition to the plant of the A. R. Whittall Can Co. of Montreal doubling its former capacity has been erected, and it is expected will be ready for operation by the first of the year.

This company engages in the manufacture of tin containers for food stuffs and is now engaged on large government orders for such containers as will be used in sending beef, beans, etc., overseas.

The addition to the plant is 125 x 125 feet, three floors being provided with 47,000 square feet of floor space. It is expected the present capacity of the plant, which is 225,000 cans per day, will be doubled and this will probably mean an output of 150,000,000 cans for 1918.

The present officers of the company are: president, A. R. Whittall; vice-president, D. S. Whittall; managing-director, Fred S. Whittall.

—⚙—

Oshawa, Ont.—A by-law will be submitted to the citizens to give the Thornton Rubber Company a fixed assessment of $5,000 per annum on the premises of the defunct Ontario Malleable Steel Range Company for a period of ten years with a cash bonus of $10,000 at the end of that time should the company carry out all its undertakings.

Association News from the President

Plans Being Completed For Convention Program, Which Will Deal With Conditions of To-day.

Editor of HARDWARE AND METAL

Regret that a letter written by me some weeks ago requesting some suggestions for our convention in February elicits no response. Never in the history of our country has the retail trade been confronted with such perplexing conditions as at the present. The successful retailer has got to be much more than a storekeeper. He must be able to gaze into the future with almost prophetic vision, so that he may be able to safely steer the commercial ship through the ever shifting danger zones that lie before it.

We will cite for instance the conditions of the tin market—we are told that in the future it will be almost impossible to get this commodity; then, too, the drastic restrictions the U.S. Government has placed on glass and many other commodities which we handle. In the past the retailer could diagnose his business ahead and make his arrangements accordingly, but cannot do so now.

Appreciating present conditions the executive have secured a number of men who have made a thorough study of to-day's problems, and the business outlook in relation to these. We feel sure that any retailer who comes to Hamilton will get a wealth of knowledge and information that will repay him for the time and money invested. Then let us see at the Hamilton convention of 1918 a big representation of the hardware trade of Ontario. We never wanted advice and counsel as much as we want it at the present time and are sparing no pains or effort to make the convention fulfil that purpose.

Yours very truly,
JAS. N. McGREGOR,
President, Ontario Retail Hardware and Stove Dealers' Association.

Members of the Sales Staff of the James Smart plant of the Canada Foundries and Forgings Co., Brockville, photographed on the occasion of their convention held recently.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

MILBRADT ROLLING LADDERS

The John Calander Mfg. Co., St. Paul, Minn., are now putting Milbradt rolling ladders on the Canadian market. It is stated these are built to order specially for hardware stores, and can be applied to all kinds of hardware shelving, bringing the highest shelves within easy

Milbradt Rolling Ladder.

reach. It is claimed by the makers that these ladders will pay for themselves in a very short time, as they enable dealers to wait on more customers, and mean a saving in wear and tear of fixtures and goods. Milbradt ladders also make a store look more up-to-date. They are handled by the J. H. Ashdown Hardware Co., Ltd., and Marshall Wells Co., Ltd., Winnipeg.

BURGESS FLASHLIGHT BATTERIES

Canada Dry Cells Limited, Winnipeg, Man., are bringing Burgess flashlight batteries on to this market. These are made in various sizes and shapes, and fit all standard flashlight cases now on the

No 422.

No. 237.

Burgess Vest Pocket. Burgess Tubular.

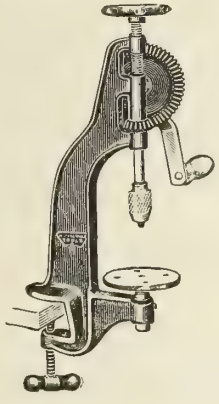
market. The makers point out that the flashlight battery is no longer a novelty or device of restricted usefulness, but is a commodity of general utility, and is fast becoming as much a household necessity as a match or a pin.

The makers suggest that the long life and great brilliancy of the Burgess battery is due in part to the fact that they are carefully tested in every process of manufacture. They are tested during assembly, and again after completion, and are held in reserved stock for a definite period, then tested again and put into a carton and shipped.

Another feature of their battery they draw attention to is the fact that their carbon has no seals on it, thus allowing the battery to be tested in the case by the customer before purchasing.

BENCH DRILL PRESS

A new bench drill for service on light work is now being marketed by the Millers Falls Company of Millers Falls, Mass. It is fed by hand with wheel located at the top of the tool and it is stated the ratio of speed is 3 to 1. It is



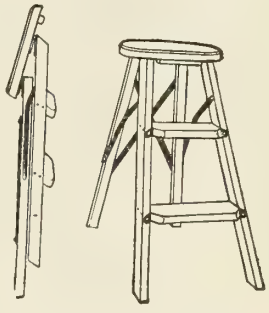
Bench Drill Press No. 207.

claimed the gears are cut, pinion being of steel. The frame is of strong, rigid construction, painted dark gray; feed wheel and large gear red, and chuck, spindle and crank are nickeled. Details as to capacity and dimensions are as follows: capacity of chuck 0 to ¼ inch round shanks; height over all 18 inches; maximum distance from chuck to table, 4½ inches; weight, 8½ pounds.

GEMCO STEP-STOOLS AND IRONING TABLES

The Geneva Mfg. Co. of Geneva, Ill., are placing on the market the Gemco Step-Stool and Gemco Ironing Table.

It is claimed the step-stool serves a double use, that of a stool seat and that of a step ladder. It weighs only six lbs. and can be easily carried. It is stated that one can swing it open with one hand, when it spreads and locks all legs and becomes a step ladder; or when in this form it folds compactly for setting

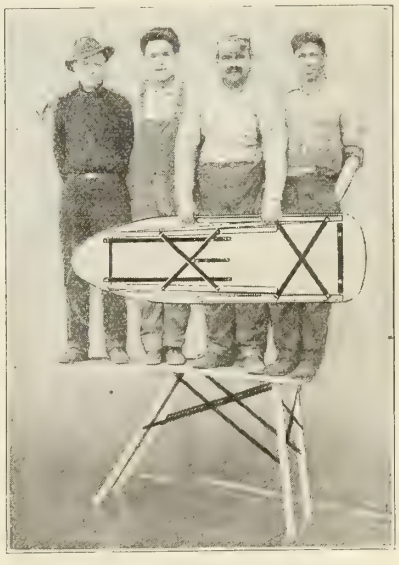


Gemco Step-Stool.

aside or with a swing from the wrist again becomes a stool seat.

The Gemco Ironing Table is built up from narrow pieces, grooved and glued together, which it is claimed is much stronger than natural lumber and will not warp and twist.

The legs are set at an angle which it is stated affords greatest rigidity and freedom from "spring" and "give" and "creep" and the ironwork is so constructed that the more weight on the top the more rigid the table stands; it will not tip from weight at small end.



Gemco Ironing Table.

It is suggested that there is ample room at the end to iron a skirt, and a clothes basket can sit under the braces.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

QUESTION of increased freight rates authorized for Canadian railways has been one of absorbing interest to the hardware trade during the week. Opinion is quite generally expressed by wholesalers that this increase in rates will mean an increase in prices of many lines to the retailer. Opinion is divided as to whether it will apply immediately to shipments from warehouse to retailer. There is unity, however, in the opinion that where new goods are brought forward and increased rates apply to both incoming and outgoing freights an increased price must obtain for the goods. There is one exception, however, in the case of scrap metals. Wholesalers of scrap metals are of the opinion the difference will cause a decline in price paid to those having these materials for sale to the extent of the increased freight rates.

Numerous changes have been recorded in bicycle accessories during the week, the majority of which have been in the upward direction. Wholesaler dealers in bicycles are looking forward to a good season so far as sales are concerned. War-time activities have resulted in a greatly increased sale of bicycles to munition workers who require them as a means of night transportation. Revision in prices for spring selling have embodied advances in vulcanizers, roller chains, handle bars, handle grips, mudguards, spokes and nipples, saddles, tool bags, separate wheels and rims, repair frames, coaster brakes, pedals, rubber tires. Changes have again been made in a number of automobile accessory lines. Certain grades of brushes have advanced approximately 10 per cent. An important change in the downward direction was that of a decline in cut nails amounting to 15c per hundred pounds. Ingot metals held in a steady market during the week. Wholesalers are engaged in stock-taking for the balance of the year. Travelers are now off the road and conditions will in all probability remain quiet until after the holiday season.

MONTREAL MARKETS

MONTREAL, Dec. 26.—The usual holiday spirit has taken hold of everyone and little interest centres around markets for the week. Some lines are due for a change, states one jobber, but no new announcements are obtainable for the week. There has been an advance in lubricating oils. Some lines of accessories have advanced in price, among these being lifting jacks, lubricating oils, emergency tire chains, Universal rims, engine-driven tire pumps, bumpers and engine heaters (electrical). Most of the travellers are in from the road for the week and it will be a quiet time for a few days in a business way. Tin has reached a new high level, being quoted at 84 cents per pound. One line of barn door tracks has been advanced about 20 per cent.

Lenses to Advance To 33 1-3 per Cent.

Montreal.

HEADLIGHT LENSES.—An item of interest to retail dealers handling auto accessories is the change of discount on lenses. This has been only 25% to the dealer and will be 33 1/3 per cent. after January 1. It applies to the standard lines.

Lifting Jacks Advance 50c on List

Montreal.

AUTO LIFTING JACKS.—Among the items recording advances this week are ball-bearing lifting jacks of "Kimball" make. The new list price is $7 showing an advance of 50c. A discount of 25% is applied to this line when bought by retail dealers.

Auto Emergency Grips Take on New List Prices

Montreal.

EMERGENCY GRIPS.—A new list price has been named on Dreadnought emergency grips in the copperized, electric-weld style. The new list on the sizes used on 3½-in. tires is $6.50 per set of six; that on the 4-in. and 4½-in. sizes is $7.50 and for the 5-in. and 5½-in. sizes $8.50. From the list prices a discount of 25% is allowed dealers.

New Weather Strip for Overlapping Wind Shields

Montreal.

WIND SHIELD WEATHER STRIP.—A new and improved line of wind shield weather strip is now being offered. This is for use with the overlapping style of wind shield and comes in lengths of 42 inches. It is made of rubber and will keep out rain and wind. The wholesale price of this line is 81 cents per strip.

Lubricating Oils Advance in Bulk and in Packages

Montreal.

AUTO LUBRICATING OILS. — A general advance will be announced at once affecting the various sizes of package Mobiloils. This will amount to about 5 cents a gallon in barrel lots, while in package goods the advance will depend upon the size of package. The increase is due, in large measure, to the increased cost of containers and also owing to the scarcity of these.

Rims Are Higher By About 15 per Cent.

Montreal.

RIMS.—Universal rims have advanced about 15 per cent. and the same applies to the various sizes for all makes of cars. The principal sellers are the 34 x 4 which were formerly listed at $39.45 and this is advanced to $46.10. Size 34 x 4½ listed formerly at $45 is advanced to $52.80 and 36 x 4½ with a list of $49.55 has now been listed at $57.80. These list prices are subject to a dealer's discount of 30 per cent.

Engine Driven Pumps Record a Big Advance

Montreal.

AUTO PUMPS.—Engine-driven automobile pumps are to be advanced on January 1, which will make a new high record for this line. Thus, the large car pumps formerly retailing at $14 will be listed after January 1 at $20. This is a steel pump and has been a ready seller. The price for the Ford car size of pump has been $10 and the new list on this is $14. From these list prices a discount of 25 per cent. is allowed on small lots or in dozens the discount is 33 1/3 per cent.

Automobile Bumpers Up About 10 per Cent.

Montreal.

AUTOMOBILE BUMPERS.—An advance approximating about ten per cent. will apply on and after January 1 on auto bumpers. Thus the spring style which has been listed at $16.80 will list at $18.50. Channel rail listed now at $9.85 will have a new list of $11.40 and Diamond Rail at present having a list of $12.95 will be advanced to $14.90. Round Rail listed at $14.50 will advance to $16.60 and Semi-Diamond will be advanced from $12.20 to $13.70. From these list prices the retail dealer is given a discount of 25% in less than half dozen lots. In half dozen lots the discount is 30% and in dozen lots a discount of 35% is allowed.

Engine Heaters Advance $1.50 on List

Montreal.

RADIATOR HEATERS.—There will be an advance of $1.50 each on electric auto heaters on January 1. The heater selling heretofore at $3.50 will be listed at $5, and from this the usual dealers' discount of 25% is allowed on quantities required. These are a popular seller and owing to their convenience there is a good sale to those storing their own cars.

Steel Barn Door Track Is Moved Up 20 per Cent.

Montreal.

BARN DOOR TRACK.—A stronger tendency in price revision of T-F barn door track is embodied in the rather large advance of 20 per cent. This is effective immediately. It applies to the various lines of track as made by this firm and comes as a result of added costs for raw material and labor shortage, as well as higher wage costs.

Lubricating Oils Advance 2c per Gallon

Montreal.

LUBRICATING OILS.—Oil refiners are about to accept bookings for lubricating oils and on these an advance is recorded averaging two cents per gallon. Costs of barrels and other materials and scarcity and increased cost of cooperage have affected the quotations in an upward direction and the increase thus effective bears out the tendencies of the market for the past few weeks.

Cut Nails Register Decline In Price

Montreal.

NAILS AND WIRE.—Quiet characterizes the market for such staple lines as nails and wire and with the exception of a somewhat large demand from Halifax there is little doing. Cut nails declined 15c per hundred pounds and are now quoted at $5.60 base. Wire nails are quoted at $5.50 base.

Iron and Steel Markets Are Firm Without Change

Montreal.

IRON AND STEEL.—Such dealers as have branches or customers at Halifax are receiving some orders from this quarter for certain classes of staple lines such as iron and steel. The local and country demand is limited and while prices hold firmly they are unchanged as follows:—

MONTREAL—	
Common bar iron, per 100 lbs.	$ 4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	11 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0.17½-0 19
Black Diamond tool steel, per lb.	0 18-0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 18-0 19

Galvanized and Black Sheets in Quiet Market

Montreal.

SHEETS AND PLATES.—The volume of business passing in sheets is naturally limited these days and sorting orders are small. There is probably a greater tendency to more uneven prices, some having quantities to dispose of on which favorable quotations may be obtained It is evident that nothing very definite as to a defined price schedule has been reached and the following quotations are prevailing:

MONTREAL—	100 lbs.
BLACK SHEETS—	
10 gauge	$12 50
12 gauge	11 60
14 gauge	11 50
16 gauge	10 75
18-20 gauge	9 25 10 25
22-24 gauge	9 40 10 40
26 gauge	9 45 10 45
28 gauge	10 55
10¾ oz. (28 English)	10 55 10 75
GALVANIZED SHEETS—	
10¾ oz.	$10 00
28 ga.	9 65
26 ga.	9 25
22 and 24 ga.	9 05-10 45
20 ga.	10 30
18 ga.	10 15
16 ga.	8 70- 8 85

Coal Oil and Gasoline Selling in Normal Volume

Montreal.

COAL OIL AND GASOLINE.—Weather conditions here have moderated of late so that the number of car owners using their autos is fairly large. As a consequence the local demand for the product is very good. The outside or country demand has correspondingly been less from week to week and from this source the dealers do not anticipate any change for some weeks. Coal oil remains without change and for this there is a fairly good request from country points. Palacine is quoted at 20c per gallon, Electroline at 20c and Royalite 17c. Gasoline is 32½c per gallon.

Rope and Cordage Firm but Unchanged

Montreal.

ROPE AND CORDAGE. — Limited movement of the cordage and rope lines is reported and dealers are finishing up stocktaking and preparing for the business of 1918. The increased shipbuilding activities have served to make a better demand from this quarter and this will probably continue to be fairly good. The market is very firm and importers and jobbers state that they are expecting advances to be made very soon. Current market quotations as found elsewhere give the prevailing prices:

Lead Products Slow; Demand is Limited

Montreal.

LEAD PRODUCTS.—There is very little demand for products of lead manufacture and the holidays have served to quiet the market, which holds unchanged. Plumbers have the usual request to make for odds and ends which are required as a result of freeze-ups, etc. Pipe and waste as well as lead sheets are quoted as follows:—

MONTREAL—	
Lead pipe, lb.	$0.14-$0.15
Lead waste pipe, lb.	0.15- 0.16
Lead traps and bends	Net list
Lead wool, lb.	0.14
Lead sheets, 3 lbs. sq. ft.	0.12½- 0.13
Lead sheets, 3½ lbs. sq. ft.	0.12- 0.12½
Lead sheets, 4 to 6 lbs. sq. ft.	0.11½- 0.12

Old Material Market Characterized by Dullness

Montreal.

OLD MATERIALS.—Until the first of the year there will probably be no change in the situation on old scrap and other old materials. Dealers are having little demand with quietness even more manifest than heretofore. Prices have not changed, but when movement begins after the first of the new year there will probably be some price revisions in such lines as are moving then. Dealers are paying the following prices:—

MONTREAL—		
Tea lead	$ 0 04	....
Heavy lead pipe	0 05	0 06¼
Yellow brass	0 13½	0 14
Red brass	0 20	0 21½
Light brass	0 08	....
Scrap zinc	0 06	....
Heavy copper	0 22	0 23
Old cast iron, per gross ton	22 00	25 00
Wrought iron, No. 1, per gr. ton	22 40	23 00
No. 1 machinery scrap	27 00	....
Heavy melting steel	18 00	20 00
Pipe scrap	15 00	17 00
Stove plate, per ton	17 00	19 00
Old rubbers, boots and shoes	0 07½	0 08
Overshoes, lumbermen's rubbers boots	0 06	....
Bicycle tires	0 03	....
Auto tires	0 04½	0 05½
No. 2 busheling	....	12 00
Country mixed scrap	14 00	15 00
Country No. 1 wrought iron	....	18 00

Tin Selling at 84 Cents With Other Ingots Held

Montreal.

INGOTS.—As far as the local situation is concerned the market has been very quiet. The only change noticeable this week is in tin, which has recorded another advance of two cents.

COPPER.—Quiet and unchanged, with little promise of improvement as to demand. Quotations are still 33 to 34c per lb.

LEAD.—In United States points there is a somewhat firmer tendency owing to scarcity of spot stocks and better prices

have been offered. Locally prices hold unchanged at 9 to 9½c lb.

TIN.—Another advance of two cents brings the local price to 84 cents per pound. In the New York market an easier tone prevails due to the difficulty of getting export space to Portugal.

SPELTER. — Firmness marks the primary markets for this ingot metal but the local situation is quiet and unchanged at 10½ to 11c lb.

ALUMINUM.—Market is steady but continues quiet and little movement is reported. Prices range from 58c to 60c pound.

ANTIMONY.—There is a limited demand and the price holds unchanged at 18c lb.

TORONTO MARKETS

TORONTO, Dec. 27.—Wholesalers are now busy with stock-taking and travelers for the most part are off the road during the present week. Some calls will be made, however, by city travelers. There have been a number of changes in automobile and bicycle accessories during the week, including vulcanizers, roller chains, handle bars, handle grips, mudguards, spokes and nipples, saddles, tool bags, bicycle rims, forks, repair frames for bicycles, axles, pedals, pedal wrenches, repair hangers, coaster brakes, sportsmen's scales, bicycle tires. Readjustments have been made in the price of certain makes of spark plugs and roller chains. Business is naturally quiet as a result of the holiday period.

Vulcanizers and Roller Chain Lists Advance

Toronto.

VULCANIZERS, CHAINS.—List prices on Adamson vulcanizers have been advanced by dealers in bicycle accessories to the extent of 50c. Model U vulcanizer was formerly sold at $3 list while the new list price is $3.50. Model T vulcanizer former list was $2 while the new list price is $2.50. In quantities of six the discount on this line is 25 per cent., in quantities of 24 the discount is 30 per cent. while in quantities of 40 the discount is 35 per cent. Roller chains is one of the bicycle accessory lines to register a higher price with the recent revision for spring, 1918, prices. The former price was $3 list while the new list price is $3.60 list. These chains are subject to a discount of 50 per cent. to the retail trade. Bean chain tool No. A33 has been advanced $1 on list price and is now quoted at $3 list. Discount on the latter line is also 50 per cent. off list price.

Handle Bars Show Considerable Advance

Toronto.

BICYCLE ACCESSORIES.—With the recent revision of prices on bicycle accessory lines handle bars were included in the articles to show an advance. Extension handle bars which formerly sold at $1.70 list per pair are now quoted at $2.10 list. Braced motor bike bars that formerly sold for $4.10 each are now quoted at $4.80 each. Above prices are subject to a discount of 50 per cent. off list prices.

Bicycle Handle Grips Show Downward Trend

Toronto.

BICYCLE ACCESSORIES.—A readjustment in the price of bicycle handle grips has been put into effect by wholesale dealers. In one instance an advance was recorded while in three other instances declines have been made effective. Leather wound handle bar grips have been advanced on list to the extent of 40c per dozen, making the new list price $3.30 per dozen. Keystone rubber grips 6-inch size remain unchanged at $7.20 per dozen pairs list. Leather covered handle grips have declined 10c per dozen pairs and are now quoted at $5.60 list. Best quality leather grips have also declined 10c on list price and are now quoted at $6.50 per dozen pairs. Boy Scout Junior grips have declined 40c on list price and are now quoted at $9.20 per dozen pairs. All of above prices on grips are subject to a discount of 50 per cent. to the retail trade.

Readjustment in Price of Mudguards

Toronto.

MUDGUARDS.—A readjustment in the price of mudguards has been recorded during the week through the change of the list prices. Mudguards without flap that formerly sold for $1.50 are now quoted at $1.30 per pair. Mudguards with flap are still quoted at the same list price of $1.90 per pair. Centre-raised mudguards with flap have been advanced 20c and are now quoted at $1.60 per pair. Bluemel's celluloid mudguard has declined 30c per pair and is now quoted at $2.50 list. Above prices are subject to a discount of 50 per cent. from list.

Bicycle Spokes and Nipples Advance in Price

Toronto.

BICYCLE ACCESSORIES.—An advance of 20c per hundred on the list price of unswedged spokes and nipples has been made effective through the recent revision of prices on bicycle accessories. For the swedged spokes and nipples the advance amounts to 30c per hundred on list price. Unswedged spokes and nipples are now quoted at $2.50 per hundred, while swedged spokes and nipples are quoted at $2.80 per hundred list. Discount to the retail trade from above prices is 50 per cent.

Bicycle Saddles Carry Higher Prices

Toronto.

BICYCLE ACCESSORIES. — Higher prices have been recorded on certain makes of bicycle saddles. Gough's girder roadster saddle which sold formerly for $3.50 list price is now quoted at $3.70 list. Zenith saddle that formerly sold for $5.80 each list is now quoted at $6.30 list. Other makes of saddles hold unchanged at the following list prices: Gentlemen's three-coil 10½ by 8½, with single wire stay, is quoted at $2.80 each; gentlemen's three-coil saddle with double wire stay is quoted at $3 list; Bon Ton saddles are quoted at $3.40 list each; Saxon saddle 12x8 in. is quoted at $4.20 list each. List prices on saddles are subject to a discount of 50 per cent.

Tool Bags and Repair Forks Higher

Toronto.

BICYCLE ACCESSORIES.—An advance of 10c each has been recorded in the price of grained leather tool bags. Seven-inch size that formerly sold for 70c list each has been advanced to 80c list, while the eight-inch size that formerly sold for 80c each is now quoted at 90c list. Front repair forks have made an advance of 80c on list prices. Nine-inch stem are now quoted at $3.60 each while the 10-inch stem size is quoted at $3.80 each. Above list prices are subject to a trade discount of 50 per cent.

Bicycle Wheels and Rims Advanced in Price

Toronto.

WHEELS, RIMS.—An advance on the list prices of built-up wheels and rims has been put into effect. Built-up front wheels with wood rims are now quoted at list price of $4.50 each, an advance of 50c. Built-up front wheels with steel lined wood rim are now quoted at list price of $5, also an advance of 50c each. Built-up rear wheel with wood rim and new departure coaster brake has been advanced to $11 list price, the former list price being $9.40. Built-up rear wheel with steel lined wood rim and new departure coaster brake has been advanced to $11.50, the former list price being $9.90 each. Front wheel wood rims have been advanced in price and 26 in. or 28 in. are now quoted at $3.20 each, an advance of 70c on list price. Front wheel wood rims steel lined 28 in. are quoted at $4.20 each, an advance of 60c on list price. Rear wheel wood rims with Lester coaster brake are now quoted at $11 list price, while same wheel with steel lined wood rim is quoted at $11.50 each. Rear wheel wood rim with Eadie coaster brake is quoted at $11 each and with steel-lined wood rim at $11.50 list price. Above prices are subject to a discount of 50 per cent.

Repair Bicycle Frames Advance $6 on List

Toronto.

BICYCLE FRAMES.—An advance of $6 on the list price of repair bicycle frames has been made effective through the recent revision of prices on bicycle accessories. Frames that were formerly sold at $25 list price have been advanced to $31 each for men's. Frames for ladies' bicycles have also been advanced $6 on list and are now quoted at $33 each. These prices are subject to a discount of 50 per cent. These frames in-

clude the complete bicycle with the exception of wheels, handle bars, saddle.

Front Axle Assembly Goes Higher in Price

Toronto.

AXLES, HANGERS.—An advance of 2c each has been made effective in front axle assembly which now makes the list price 72c. This price is subject to a discount of 50 per cent. from list price. Crank repair hangers hold at the same prices as formerly quoted, Rollfast being quoted at $6.50 each and Stevens repair hangers at $7.10 each. Prices on hangers are subject to discount of 50 per cent.

Pedals and Pedal Wrenches Advance

Toronto.

PEDALS, WRENCHES. — Considerable advances have been recorded in the price of certain kinds of pedals. Pirate rat trap pedals are now quoted at $19 per dozen pairs, which is an advance of $2.50 on list price. Combination rubber and rat trap pedals have been advanced to $2 per pair, the former list price being $1.88. Solid rubber pedals remain unchanged in price at $2.30 per pair list price. Pedal wrenches have been advanced 50c on list and are now quoted at $3 per dozen. Above prices are subject to a discount of 50 per cent.

Coaster Brakes Have Been Increased in Price

Toronto.

BRAKES.—Coaster brakes for bicycles have been increased in price in certain instances. New Departure has been advanced to $8 list price, an increase of 50c. Sturmey-Archer tri-coaster brake has been advanced to $25 each list price. This latter price is an increase of $5 on former list price. Eadie coaster brakes remain unchanged at $8 each list price. Lester coaster brakes are also unchanged at $8 each list price. Prices on coaster brakes are subject to a discount of 50 per cent.

Sportmen's Scales Advance 50c Dozen

Toronto.

SCALES.—An advance of 50c per dozen has been put into effect on the sportsmen's scales which now makes the selling price $4.50 per dozen net. These scales weigh up to 25 pounds and are used for weighing fish and similar commodities. An advance in other lines of scales was recorded some three months ago. Labor costs and raw material costs are given as the reason for the advance.

Readjustment of Prices on Spark Plugs

Toronto.

SPARK PLUGS.—A readjustment in the selling price of Splitdorf spark plugs has been put into effect and in certain cases provides for a slight increase in price. Prices to the dealer for the hexagon type in quantities of less than 100 plugs is 75c each. In quantities of 500 the price is 65c each and in quantities of 1,000 plugs the price is 60c each. Heavy type of plugs in quantities of less than 25 are priced at 90c each, in quantities of 25 to 99 the price is 85c and in quantities of 100 and over the price is 80c each.

Chains Decline in Some Numbers; Others Advance

Toronto.

CHAINS.—A decline in the list price of Whitney roller chains of the cotter pin detachable type has been made effective during the week. On type with three-quarter inch pitch, while considerable advances have been recorded on chain of 1-inch, 1¼-inch, 1½-inch, 1¾-inch and 2-inch pitch. Cotter pins for same have also recorded a readjustment in price. Following are the former list prices and the new list prices. Prices given below are subject to a discount of 25 per cent. in quantities of less than 20 feet, 30 per cent. discount in quantities of 20 feet and 35 per cent. in quantities of 100 feet of chain:

Cut Nails Decline 15c Per Hundred

Toronto.

NAILS, WIRE.—A decline of 15c per hundred pounds was made effective in the price of cut nails during the week which now makes the base price $5.65 per hundred pounds. Wholesale hardware houses in this city continue to quote standard steel wire nails on the basis of $5.45 per hundred pounds. Wire rods are reported to be a scarce article in the United States market owing to the turning of activities of the rolling mills toward steel for government use. Wire products hold in steady position, base price for smooth steel wire being quoted on the basis of $6.50 per hundred pounds.

Lubricating Oils Likely to Advance

Toronto.

GASOLINE, OILS.—As intimated last week that there was a strong probability that lubricating oils for automobiles was likely to advance, such advance has not yet been made effective in this district but is expected to become effective in the near future. Cost of tins and difficulty in scuring containers is given as the main reason for the probable advance in this line. Coal oil still holds unchanged although the market is firm and consumption is heavy. Gasoline consumption is perhaps lower than it has been for many months past. Quotations are made on the basis of 31½c per gallon for gasoline and 1c per gallon less for benzine.

Manila Rope Firm Owing to Fibre Situation

Toronto.

ROPE, TWINE.—Owing to the very light offerings in the primary market for medium and low grades of Manila hemp a firm situation exists in these commodities. There is very little business at primary points by reason of the difficulty of getting shipping space. Prices in the fibre market are merely nominal owing to the lightness of offerings. This is having an effect on the Manila cordage, and prices are firmly maintained. Manufacturers are quoting only on the basis of immediate delivery and will give no quotations on the basis of future delivery. Prices hold unchanged at those given in current quotations.

Movement of Stoves and Ranges Accelerated

Toronto.

STOVES, ENAMELWARE. — Manufacturers have been busy during the past week endeavoring to look after the needs of their customers. There is an evident desire to secure goods on the part of the retailer and this has resulted in orders to ship goods without delay. There is evidently some misgiving about delivery of goods later in the season and some merchants have taken time by the forelock and are endeavoring to see that they get their goods in time. Acceleration of business in stoves and ranges for this reason has been quite noticeable during the week. Manufacturers are also busy with stock-taking and the closing week of the year gives promise of being a busy one. Enamelware is moving seasonably well. Prices in the various lines hold unchanged.

Certain Grades of Paint Brushes Higher

Toronto.

BRUSHES. — One manufacturer of paint brushes announced an advance of approximately 10 per cent. in certain lines of gray bristle paint brushes. Owing to the shortage of okatka bristles and gray China bristles these lines have been affected in price. Certain lines of oxhair, camel hair and badger-hair brushes have also been advanced. Manufacturers have intimated for some time past that brushes would in all probability advance sharply about the first of the new year. The advance now recorded is probably preliminary to a more general advance in all lines of black bristle brushes.

Shipments from U. S. Steel Mills Light

Toronto.

IRON AND STEEL.—Shipments of iron and steel from the United States mills is becoming more difficult each day. There is a congestion of freight traffic that is greatly hampering movement of iron and steel while the shortage of coke is seriously affecting the production of the basic iron. Canadian mills continue to make fairly regular shipments and are able to supply wholesalers to the extent of their requirements in most instances. Prices held unchanged during the week.

Fairly Heavy Stocks of Sheets Due to Arrive

Toronto.

SHEETS, PLATES.—Some of the local dealers report they have fairly heavy stocks of sheets of the lighter gauges now on the way and that when these arrive there may be some readjustments in price. In some instances stocks of sheets were comparatively light on spot and there was trading between wholesalers during the week to piece out orders for immediate shipment. Prices held steady during the week, which is somewhat unusual as there has been a shifting of the prices in some sizes almost weekly for some time past. Trade is not heavy at this season of the year.

Fuel Situation May Affect Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Dealers in some instances incline to the belief that ere spring comes around there will be a much firmer situation in corrugated sheets owing to the fuel situation. Mills are not able to operate to capacity in the production of sheets due to the shortage of fuel supplies. This is having an effect toward a firmness in cost. One manufacturer of eavetrough and conductor pipe will book into the future for only three months and on corrugated sheets will book no further into the future than six months. Firm quotations are made on the basis of delivery at a certain specified time.

Boiler Tubes May Be Serious Problem

Toronto.

BOILER TUBES.—There is no change for the better in the boiler tube situation. Wholesalers assert that it is becoming more and more a serious problem for the users of steam. Since they are unable to get further supplies for domestic use it would seem to be approaching the time when they may have to close their plants or change to some other form of power. Once a boiler is out of commission there seems small chance of getting it repaired. Prices are unchanged for any available stocks still extant.

Lead and Zinc Products Hold Steady

Toronto.

LEAD AND ZINC PRODUCTS.—There was a steadiness in the market for lead and zinc products during the week. Tin is holding at high levels with little chance of easier conditions in the near future. This is having a firm effect on solder. Trade during the week has been seasonably good. Prices hold unchanged.

Snow Interfering With Old Materials

Toronto.

OLD MATERIALS.—There is a dullness in the old material market at present due to in large measure to the fact that snow has covered the scrap materials and sellers have shown no disposition to move them. There is very little buying on the part of mills as they are ready to take quantities only when the buying appears exceptionally favorable. Prices for all old materials held in a steady market.

Bicycle Tires Advance 10 To 15%

Toronto.

BICYCLE TIRES.—Manufacturers of bicycle tires have announced an advance in the price of this line of goods to the extent of 10 to 15 per cent. Prices on bicycle accessories have recently been in process of revision, and the new prices on tires will apply for goods for shipment henceforward. Following are prices on Dunlop and Dominion bicycle tires and tubes:

Ingot Metals Hold Steady During Week

Toronto.

INGOT METALS.—There was a quiet market throughout in ingot metals during the week coincident to the holiday period. Industrial concerns are now busy with stock-taking, and are not interested in taking in any additional supplies except for those that suffice for their absolute needs. After the turn of the year there will in all probability be greater activity as a result of the need to replenish stocks.

COPPER.—It is now quite generally felt that the United States Government will make no change in the price of copper after the new year. The copper situation might now be termed a comfortable one, as there is no industry suffering from the lack of copper supplies. Consumers are quite generally well covered for the first quarter of 1918. Locally the market held steady at 30c to 32c per pound for casting copper.

TIN.—Stocks of tin held in London on December 1 are reported to be 4,891 tons, or over double normal. However, three-quarters of this stock is known to have been sold previously to America and held there awaiting permits to ship. It is also believed that considerable stocks of tin have accumulated at Singapore and Penang. There is, however, very little free tin that can be sold in the primary markets as a new transaction. Should heavy stocks of tin arrive for this continent it will mean that they are being shipped against old orders, and that they will be for consumers. Locally the tin situation held firm, quotations being made on the basis of 78c to 80c per pound.

SPELTER.—The United States Navy Department and the United States Government are in the market for a combined amount of 5,000 tons of spelter. These inquiries by Government interests are encouraging to producers, and in the opinion of many of them seem to herald more extensive buying on the part of the Government. A buying movement would in all probability put a greater measure of firmness in this market. Locally prices held unchanged at 9¾c to 10½c per pound.

LEAD.—There is a firmer undertone to the lead market at primary points, due to slightly higher prices that are being obtained in the Western lead centre at St. Louis. Demand for lead is not large. In the local market prices held unchanged at 8¾c to 9c per pound

ANTIMONY.—There is a steadiness in the market for antimony, as there was little activity in primary markets. Locally prices held unchanged at 16c to 18c per pound.

ALUMINUM.—The market held steady, with demand light. Quotations were unchanged at 60c per pound.

PIG IRON.—The coke situation continues to be the factor of engrossing interest in the pig iron market. So far Canadian manufacturers have had sufficient to meet their requirements. Transportation continues to be an uncertain factor. It is hoped, however, that with the taking over of the United States railways by the Government delivery of raw materials will be greatly facilitated. Quotations held unchanged at $50 per ton for foundry iron.

LONDON MARKETS

LONDON, Dec. 27.—There have been a number of changes in hardware lines during the week. One of the important changes is a decline in the price of cut nails. Advances have been recorded in shears and scissors, chain hooks, steel wagon jacks, glass cutters. Business here during the past week has been good. Most Christmas lines have been in good sale. Collections have been good. A seasonable quietness is expected by wholesale houses for the balance of the year as a result of stock-taking operations.

Shears And Scissors Go Higher In Price

London.

SHEARS, SCISSORS.—An advance in Wiss shears and scissors has been made effective during the week to the extent of approximately 15 per cent. Increase has been provided for through the issuance of new list prices. Discount from present list price is now 33 1/3 per cent. Conditions in the steel market, together with the labor situation, have affected the prices of these commodities.

Cut Nails Decline 15c Per Hundred

London.

NAILS.—A decline of 15c per hundred pounds has been made effective in the price of cut nails, which now makes the base selling price $5.60 per keg. Quotations on wire nails are holding steady, price being on the basis of $5.45 base per keg. The decline in the price of cut nails came unheralded, and so was cause for mild surprise. Wire products are holding in steady market.

Chain Hooks And Wagon Jacks Higher

London.

CHAIN HOOKS, WAGON JACKS.—Higher prices have been made effective in chain hooks and steel wagon jacks. Grab and slide chain hooks, ¼-inch, are now quoted at 10c each, 5/16-inch at 13c each, ⅜-inch at 17c each, and 7/16-inch at 22c each. R.-W. steel wagon jacks are now quoted at the following prices: No. 528 x 1, $13.25 per dozen; No. 528 x 2, $17.50 per dozen; No. 228 x 3, $26.50 per dozen.

Glass Cutters And Mending Materials Up

London.

GLASS CUTTERS, MENDING MATERIALS.—An advance has been made effective in Coleman Eclipse glass cutters, which now makes the selling price $1.20 per dozen. Higher prices have also been put into effect on Mendits. New prices on small packages are now $1 per dozen, while the large packages have been advanced to $2.15 per dozen.

Crosscut Saws Steady

There is a steadiness in the market for

(By permission of The Passing Show.

NAGGING WIFE *(to her husband, Chairman of Local Tribunal)*: " There now, didn't I tell you it was a mistake to refuse exemption to the only plumber in town!

The above gives one some idea of the conditions in the Old Country. But who can tell how soon they may be the same in Canada and the United States. Kaiser Bill has undoubtedly something to answer for.

crosscut saws, and prices hold unchanged at $4.50 each for 5-foot, $5.30 each for 5½-foot, and $6 each for 6-foot. Prices apply to Premier, Maple Leaf Lance, Maple Leaf Pacer, Pangburn, Arrowhead, Oriole and Leader brands.

Horseshoes And Toe Calks Selling Well

London.

HORSESHOES, TOE CALKS.—Due to the recent icy conditions on streets and roads, there has been a good demand for horseshoes and toe calks in order that horses may be sharp shod. List prices on Nos. 1 and 2 horseshoes are 40c per pair; Nos. 3 and 4, 45c per pair, and No. 5, 50c per pair. These prices are subject to a discount of 10 per cent. Neverslip toe calks are quoted at a discount of 15 per cent. off list.

Good Sale Skates and Hand Sleighs

There is a continuation of good sales of skates and hand sleighs. Weather conditions have been very favorable for this trade, and the holiday season has further assisted in the movement of these goods. Starr make of skates are quoted at 20 per cent. off list, while hand sleighs are quoted at a discount of 35 per cent. off list prices.

Winter Accessories Are Moving Freely

London.

STRIPPING, SNOW SHOVELS, AND SCRAPERS.—Winter conditions still engender a good sale of such lines as weather stripping, snow shovels and sidewalk scrapers. Frost King weather stripping is unchanged in price at $4.40 per dozen packages; Swan hardwood stripping at 75c per set, and wood and felt stripping at a discount of 75 per cent. off list prices. Steel snow shovels are quoted at a discount of 12½ per cent. off list. Wooden snow shovels, No. 116, are quoted at $4.25 per dozen, and No. 118 at $4.75 per dozen. Galvanized snow shovels, No. 127 are quoted at $7.75 per dozen, and No. 128 at $8.50 per dozen. Sidewalk scrapers are quoted at $4 to $5.50 per dozen.

Glass And Putty Hold Unchanged

London.

GLASS, PUTTY.—Quotations remain unchanged for glass and putty. There is a strong situation in glass, which seems to indicate higher prices in the near future. Single and double diamond glass are quoted at 40 and 10 per cent. off list prices, while cut lights are quoted at a discount of 33 1/3 per cent. off list. Standard putty in 25-lb., 50-lb. and 100-lb. drums is quoted at $4.65 per 100 pounds, while pure putty is quoted at an advance of $1.25 per 100 pounds over standard putty.

Rope Prices Unchanged

There was a steady market for rope prices during the week, and quotations were made on the basis of 39c per pound for pure Manila, 33c per pound for British Manila and New Zealand hemp, and 27½c per pound for sisal rope.

Ash Sifters in Good Sale

There is a continued good sale of ash sifters, with prices unchanged. Banner is quoted at $2.90 each; Rocker No. 1 at $5.25 each, and common wood sides at $2.15 per dozen.

Linseed Oil Firm; Turpentine Unchanged

London.

LINSEED OIL, TURPENTINE.—Prices on linseed oil held steady, with a firm undertone. Quotations were made on the basis of $1.48 per gallon for raw and $1.51 for boiled in 1 and 2-barrel lots; 3 to 5-barrel lots, $1.47 for raw and $1.50 for boiled; 6 to 9-barrel lots, $1.45 for raw and $1.48 for boiled. Turpentine in single barrel lots is still quoted at 71c per gallon and in 2 to 4-barrel lots at 70c per gallon. In 5-gallon lots the price is 78c per gallon.

White Lead in Oil

White lead in oil holds unchanged at $16.20 per 100 pounds for pure grade in ton lots and $16.55 per 100 pounds in less than ton lots. Pure Elephant is quoted on the basis of $16.80 per 100 pounds in ton lots and $17.15 in less than ton lots.

WINNIPEG MARKETS

WINNIPEG, Dec. 27.—With the Christmas rush over business has slackened off and many of the dealers are preparing for the taking of their stocks and until this is over no rush can be expected.

Local markets showed a firmer tone during the past week than at any time during the year and no changes of any importance are reported. However, many of the manufacturers delay revising their prices until the first of the year, which no doubt accounts for the present quietness.

Linseed Oil And Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—Prices on turpentine continue steady with no advance recorded over the former prices, namely, barrels 80c gal., ½ barrels, 83c gal., 5 gal. lots, 85c gal., 1 gal lots 85c gal. plus the usual extra for containers.

No change of prices is reported on linseed oil on the local market. To-day's market prices are as follows: Raw, $1.65 gal., boiled, $1.68 gal.

Mirrors Are In Firm Position

Winnipeg.

MIRRORS.—Prices on mirrors which have remained firm for the past year will no doubt be advanced soon as the high prices ruling on all grades of glass coupled with the scarcity of this class of labor is felt by all manufacturers. To-day's prices are quoted herewith:

Earl, 6 x 9 in., $3.40 doz.; 8 x 10 in., $4.15 doz.
York, 5 x 7 in., $1.50 doz.; 6 x 9 in., $1.90 doz.; 8 x 10 in., $2.40 doz.; 9 x 12 in., $3.05 doz.
Alexandra, 9 x 12 in., $5.85 doz.; 10 x 14 in., $6.80 doz.; 12 x 18 in., $9.60 doz.; 14 x 24 in., $12.90 doz.

Weather Strip May Advance Soon

Winnipeg.

WEATHER STRIP.—Although no new prices have been announced by the manufacturers of Swan weather strip for 1918 delivery, it has been intimated that an increase will be found necessary as the felt used in its manufacture has to be imported from England and transportation difficulties coupled with higher prices are the ruling factors. Price quoted at present is 68c per set.

Lead Products May Be Readjusted

Winnipeg.

LEAD PRODUCTS. — The recent fluctuations in the lead market have already affected the prices on many of the manufactured lines into which it enters. However, up to the present few changes in babbit metals are recorded and a general revision of prices on this commodity will no doubt be necessary in the near future.

Light Weight Stove Pipe Elbows Scarce

Winnipeg.

STOVEPIPE, ELBOWS.—Owing to the scarcity of Canada plates a local shortage is reported on light weight stove pipe elbows, and in some cases only the heavy weight can be supplied and with the present embargoes and transportation difficulties no improvement is looked for. Stove pipe and heavy elbows continue in good demand with prices remaining firm as formerly quoted.

White Lead In Oil Demand Is Light

Winnipeg.

WHITE LEAD IN OIL.—The market for white lead during the past week has been very quiet, with no indication of further advances in the near future. The demand at the present time is very limited with prices remaining firm as follows: Decorators' pure, ton lots, $16 65, 100 lbs.; less than ton lots, $17 100 lbs..

Logging Chains In Good Demand

Winnipeg.

CHAIN.—Present markets continue steady on all lines of coal and log chains, with no indication of further advances in the near future, all lines continue in good demand wherever logging operations are being carried on. Present market prices are herewith quoted:

Coil Chain—3-16 in., $13.75 100 lbs.; ¼ in., $11; 5-16 in., $10.10; ⅜ in., $9.25; 7-16 in., $9; ½ in., $8.75; 9-16 in., $8.75; ⅝ in., $8.65; ¾ in., $7.25 per 100 lbs.

Logging Chain—5-16 in., $11 per 100 lbs.; ⅜ in., $10; ½ in., $9.75 per 100 lbs.

Nuts Are Holding In Steady Market

Winnipeg.

NUTS.—No further change is recorded in the markets for nuts, which continue in good demand with prices remaining unchanged and are quoted today at the following prices:

	advance on list
Square blank, small lots	4½c lb.
Square tapped, small lots	4¾c lb.
Hexagon blank, small lots	4¾c lb.
Hexagon tapped, small lots	5 c lb.

Case lots of any of the above lines $1 per 100 lbs. less than above prices.

Window Glass In Firm Market

Winnipeg.

GLASS.—Prices on window glass remain very firm and it is in the usual demand. Reports from American markets indicate that owing to shortage of labor and coke many of the factories will be unable to turn out the usual amount and others will be forced to close, and if there is no improvement in these conditions higher prices may be expected. To-day's prices are as follows:

	Single	Double
	100 Square Feet	
Up to 25 in.	$ 9 50	$13 75
26 to 40	10 50	15 75
41 to 50	13 50	17 75
51 to 60	14 00	18 50
61 to 70	15 00	20 00

Iron Pipe Holds In Steady Market

Winnipeg.

WROUGHT PIPE.—Prices on wrought iron pipe which have remained stationary for the past six months show no indication of any immediate advance and are quoted to-day as follows:

	Black	Galvanized
¼	$ 6 08	$ 8 42
⅜	6 16	8 50
½	7 83	9 63
¾	9 95	12 38
1	14 67	18 27
1¼	19 88	24 75
1½	23 76	29 57
2	32 04	39 78
2½	51 30	63 59

PITTSBURG MARKETS

PITTSBURG, Pa., Dec. 22.—It seems to be well established that no effort will be made at Washington to revise iron and steel prices at this time. If there is any revision it will probably occur after the fate of the Pomerene Iron and Steel Price Fixing Bill has been determined. This measure will probably be pushed by the Federal Trade Commission, and probably with a provision that some existing contracts can be suspended or abrogated entirely. The commission seems to be convinced that there are in existence some contracts, particularly for intermediate materials, that interfere with the system of uniform prices.

There are practically no offerings of pig iron by the merchant furnaces in the Pittsburgh and nearby districts. An occasional odd lot of prompt foundry is furnished as an accommodation, and there is some to be bought for second quarter and second half delivery. There are no offerings at all of basic or Bessemer.

Regular contract buyers of billets and sheet bars are being fairly well taken care of by their respective mills, but the consumer without a regular mill connection finds it almost impossible to buy soft steel. The offerings of shell steel discards continue to increase, but they are not well absorbed, although offered in billet form at about $2.50 less than the prices set for soft steel.

The sheet mills sold quite a tonnage of sheets in November after prices had been set, and with output restricted as it is at present they have little to offer. Sheet mills are operating at an average of only 50 to 60 per cent. of capacity.

Chain makers have promulgated a new list on chain, which ignores entirely the prices recently named by the American Iron and Steel Institute. This new list is based on 8.30c for 1-inch, ⅜-inch being 9.20c.

The whole iron and steel market has been extremely quiet, there being scarcely any commercial transactions. Government orders continue to be alloted as freely as formerly, but details are withheld. It is stated that 1,200,000 tons of shell steel has now been distributed, the whole programme involving 1.500.000 tons, all for shipment by the middle of June.

APPRAISERS BULLETIN

CURRENT VALUES FOR DUTY ON PIG IRON

The following schedule of price differentials covering all grades of Pig Iron at all producing and sales centers in the United States effective Nov. 3rd, 1917, is announced.

These differentials are to be added to or subtracted from the base of $33.00 per gross ton on No. 2 Foundry and Basic (Valley Furnaces). The grade of No. 2 Foundry Iron to be equivalent in analysis to:—

Silicon	1.75 to 2.25
Sulphur	Not over .05

No. 2 Soft Southern Iron equivalent to No. 2 Foundry of same Silicon content.

Differentials from the above price for No. 2 Foundry Iron to be made for the following changes in specifications:—

Forge or Mill Iron...$1.00 per gross ton under base Foundry Iron running

Silicon 1.00 to 1.75 0.50 per gross ton under base Foundry Iron running

Silicon 2.25 to 2.75 0.50 per gross ton over base Foundry Iron running

Silicon 2.75 to 3.25 1.50 per gross ton over base Foundry Iron in excess of 3.25 Silicon add $1.00 per gross ton for each ½% of Silicon over the price for 3.25 Silicon Iron.

Manganese, sulphur, and phosphorus variations to be adjusted as formerly customary in each district having respect to the base price.

Where iron is sold by fracture the usual grading prevailing in each district to continue.

Malleable Iron	$0.50 per gross ton above base
Bessemer Iron	10% " "
Basic Iron	Base price

CHARCOAL IRON

Southern or Warm Blast Charcoal Iron a maximum of $10.00 per gross ton above base for iron ranging .40 to .60 phosphorus, and silicon 1.00 to 2.00.

For grades running below these analyses corresponding reductions as usual to the trade to be made.

Cold Blast Charcoal Iron a maximum of $22.00 per gross ton above base with customary reductions for lower grades, as recognized by the trade.

Lake Superior Iron $2.50 per gross ton above base for iron averaging 1.25 silicon. Other grades to be adjusted as per the custom of the trade depending upon the silicon, phosphorus and manganese contents of the iron.

All of these charcoal iron differentials to be considered in connection with the base price.

HIGH SILICON OR SILVERY IRON

For iron containing:—

6% silicon	$7.00 per gross ton above base
7% "	9.00 " "
8% "	11.50 " "
9% "	14.00 " "
10% "	17.00 " "

$3.00 per gross ton advance for each 1% silicon for 11% and over.

BESSEMER FERRO SILICON

For iron containing:—

10% silicon	$22.00 per gross ton above base
11% "	25.30 " "
12% "	28.60 " "

LOW PHOSPHORUS IRON

Iron containing phosphorus and sulphur not exceeding .04 and silicon not exceeding 2%.

	Per gross ton
For copper bearing iron	$17.00 above base
For copper free iron	20.00 above base

A sliding scale of $1.50 per gross advance for each reduction in phosphorus of .005% below .04 and $1.75 per gross ton advance for each 1% of silicon in excess of 2%.

COKE (Modified Prices)

By-product	$6.00 per net ton
Selected Foundry	7.00 "
By-product over one-inch size	6.50 "

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

1469. **Bags.**—A merchant in Curacoa, Dutch West Indies, wishes to secure supplies of second-hand bags measuring, more or less, 30 or 35 by 45 inches. Samples and prices are invited.

1470. **Agency.**—A firm of Government contractors in South Africa who are also contractors for a number of large concerns throughout the country wish to arrange to act as agents for Canadian motor cars, tires and tubes and motorcycle tires. They are particularly anxious to make connections for after-the-war business.

1473. **Acetate of cobalt and manganese.**—A London company asks to be placed in touch with Canadian producers of acetate of cobalt and of manganese, who can offer supplies.

1475. **Raw potash felspar.**—A Midlands company asks to be placed in communication with Canadian producers of raw potash felspar who are favorably situated for export to the United Kingdom.

1482. **Wire for bedstead manufacture.**—A firm of Birmingham, Eng., bedstead manufacturers requires large quantities of wire of the following kinds: Coppered hook wire; bright spring wire; galvanized mat wire; tinned hood wire; 1C4 bright spring wire, quality as the japanned spring; galvanized strip. Further particulars and samples of wires may be had on application to Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

INDUSTRIAL NOTES

Montreal, Que.—Canadian Wire Specialty Co., manufacturers, has been registered.

Whitby, Ont.—The by-law granting a loan of $25,000 to the United Rubber Mfg. & Reclaiming was passed by the ratepayers by a large majority.

WEEKLY PAINT DEPARTMENT

Practical Paint Pointers

Observations and Quotations—Cultivating the Women's Trade —Paint in Small Tins May Bring Big Sales

THERE is a large hardware store in Western Canada in which paint sales are large every month in the year. More attention has been paid to the retailing of paint in the past few years, and the dividends that have accrued to this store from its paint sales have proved to their satisfaction that more than certain seasons only are paint seasons with the other periods of the year almost inactive.

It is certain that paint will not sell if the dealer puts forth no effort to stimulate its sale. It is also sure that a big surprise awaits the merchant who does a little constructive thinking along this line, and then sets to work to stimulate his paint sales in a manner such as he would adopt in the prosecution of his other departments.

Women Are Good Prospects

Many women like to do some painting around the house when convenient. As a matter of fact investigation justifies the belief that if a record were made, it would reveal the fact that more paint in popular, counter-size cans is sold to women-folk than to the men. They make the suggestions for the "touching up" around the house and it is to the women that the dealer should appeal.

Selling Enamels

In a great many homes there are bedsteads of the iron or steel variety and it is only natural that these require retouching from time to time. It would be safe to estimate that, in many centres at least, 75 to 90 per cent. of this work is carried out by the "woman of the house." Now it is necessary to take some care with business of this kind. "I would not sell a woman a can of white enamel," said an old retailer to HARDWARE AND METAL without tactfully asking her what use was to be made of it. It must be remembered that white enamel, as well as most other shades, cannot be applied direct to the surface of the article to be finished and the best results obtained. The grounding must be thought of and arranged for. Thus, if she were to ask me for white enamel for use on a bed or other iron work, I would suggest the purchase as well of a small tin of inside white paint. This I would suggest her using—first pouring off the surplus oil and adding a little turpentine which it is considered gives a better gripping surface to the enamel when it is applied after the former coat has dried. I show a real interest in such jobs, and the results obtained by the customer are not only satisfactory, but I have the satisfaction as well of knowing that customers appreciate the assistance given through my suggestion.

Limited But Constant Advertising

"In the matter of stains, I run a small advertisement in the paper at least once a week, pointing out the moderate outlay required to refinish a cupboard, a desk or other bric-a-brac around the house. I make these advertisements bristle with good talks, brief and pointed, and frequently if not always, they are accompanied by a good electro, thus serving to attract and hold attention.

"I have also a neat display of these small stains and enamels always where they can be seen, using every piece of advertising matter supplied me to the best possible advantage. A space is reserved in the window where these lines find a prominent position frequently. In the case of either window or interior display, I utilize a neat card giving some prices and other useful suggestions."

Paint in Small Tins

There is a big demand in many places for paint in the smaller packages. In the store mentioned above a great percentage of the sales is made up of the half pint, pint and quart sizes. This applies to stains, varnishes and paints, and the profits are generally large.

Should be a Bright Place

The paint department should be the brightest spot in the hardware store. It is a renovating agent and if there is one place that should suggest the advantages of paint, varnish and stains, it surely ought to be the paint department of the store selling it. Too often it is an unattractive and dismal place shoved into a dark corner where no incentive is afforded the prospective purchaser to approach it.

Therefore get busy with the brush and go after your paint corner with a will. Get the dust off the woodwork and select a good effective color. White sometimes is best but the color scheme to be adopted will have to depend upon the amount of sunlight let into the store. Careful thought to this feature will repay well the attention given this important matter.

Brushes, Stencils, etc.

There is always a demand to be satisfied for brushes. Carrying a comprehensive stock covering the painter's as well as the housewife's and artist's needs is wise. Keep a good line; display it well; carry a better rather than a cheap grade, and talk quality to your customers. Tell them how to take care of a brush and advise them to clean the brush when through and not leave it for a more convenient time.

Many women are interested in stencilling. This is a line that the average hardware store will leave in the background and never show until it is asked for. Why not stencil some samples on wall board and place them where they may be seen conveniently? Place a small card on them, neatly lettered, and lose no opportunity to interest any who may stop to look at the work. Many a prospect can be interested to the point of buying if a little real interest be taken in showing just how the materials are mixed and how applied.

Then there are the small brushes that many want for lettering or water color work. These comprise the camel hair, ox-hair, sables and so on. A good stock may be carried with a small outlay. They yield a handsome profit and will be well worth the investment required.

Is your paint stock moving? It requires only careful thought, coupled with judicious, pithy advertising and frequent display. Make this stock pay for the space it occupies twelve months in the year.

BRITISH PAINT IN SOUTH AMERICA

It recently was announced in London that under the auspices of the Board of Trade a special commissioner will shortly proceed to Argentina, Brazil, Peru, Chile and Uruguay to ascertain the nature and extent of the market for British goods, including paints and varnishes. This mission is being supported by leading British concerns, and it is stated that, though the commissioner and his staff will not accept orders themselves for goods, they will take with them a complete line of samples of the various goods, in all the various forms and sizes, also a large quantity of printed matter in the several languages and "the trade vernacular" of those languages.

Jamieson's

PURE PREPARED

Paints & Varnishes

"Sprucing Up" about the house

This is the season when the busy householder has time and inclination to do a little painting inside the house. So don't keep *Jamieson's Pure Prepared Paints* in the background just because cold weather has set in. Catch your customer's eye with a nice display of interior finishes and you'll keep paint sales moving steadily all winter.

"Jamieson's" will give your customers permanent satisfaction.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 26.—As is to be expected, there is little interest surrounding the paint markets this week. Travelers are in for the holidays and everyone is bending his thought toward the happy conditions he hopes to enjoy this week. It may be said that the same state of trade has obtained as is usual during holiday week. Linseed oil is in very strong market with prices held firmly. There is a limited amount of business passing in this and also for turpentine, the latter being unchanged. Much glass has gone forward to Halifax and this has made quite a difference in the spot stocks in dealers' hands.

Linseed Oil Very Firm Seed Situation Unchanged

Montreal.

LINSEED OIL.—A very firm market is reported for linseed oil. This is due to the short receipts of flaxseed, delivery of which is still held back. Crushers are even unable to get reply to their enquiries as to where shipments are on the road, and the congestion and shortage are accentuated over the conditions obtaining even a week ago. Some are holding oil at firmer prices although no new figures are given out. There was a decline of 7 cents per bushel on flaxseed but this has no effect on the local situation as spot stocks of seed are light.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 4 barre'ls	$1.38-$1.42	$1.40½-$1.45
5 to 9 barrels	1.35- 1.39	1.37½- 1.42
10 to 25 barrels	1.34- 1.38	1.36½- 1.41

Turpentine is Quiet; Price Holds Unchanged

Montreal.

TURPENTINE.—There is little movement of turpentine and the market is quiet and uninteresting. Prices are maintained on the basis of 70 cents per gallon for barrel lots and 69 cents per gallon on lots of six barrels or more.

Turpentine—	Per Imp. gallon
5 bbls. and over	$0.69-$0.71
1 barrel lots	0.70- 0.72
Small quantities	- 0.83

Mixed Paint Firm; Present Business Slow

Montreal.

MIXED PAINTS.—Manufacturers are always glad to record orders for future delivery. It is stated that many prefer these to orders for immediate shipment. While the demand for mixed paint is small for present delivery, many of the large makers are more than pleased with the outlook for spring and while travelers are in just now for the holidays, they have been sending forward nice orders. Prices are maintained but without change.

Putty Maintains Its Price, but Unchanged

Montreal.

PUTTY. — Little interest centres around putty, which is in very limited demand. The only business passing at the present time is that of small quantities to fill in stocks. There is some demand for the article to be shipped out with spring goods. Prices are unchanged, with $3.60 per 100 lbs. asked for bulk in casks; $4.45 per 100 lbs. in 25, 50 and 100-lb. drums and $4.70 per 100 lbs. for bladders in barrels.

Much Glass Required For City of Halifax

Montreal.

GLASS.—Glass has been in very active demand from Halifax dealers and the amount shipped out of here has had a depleting effect on the stocks held by jobbers and importers. Thousands of boxes have gone forward and the end is not yet. Prices of window glass are firmly maintained and it is not improbable that a further advance may be made ere long.

Small Movement for White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—There is no new feature reported in connection with this commodity and the situation is unchanged. Paint makers are naturally using up a good deal in the manufacture of mixed paints but present demand from dealers is reduced to a small compass. For five ton lots the price is $15.50 per 100 lbs.; for ton lots it is $16 per 100 lbs. and in smaller lots $16.35 per 100 lbs.

TORONTO

TORONTO, Dec. 27.—There was a firm situation in linseed oil during the week. Turpentine held steady in the local market but changes in the primary market showed a measure of weakness in that quarter. Glass is in a strong market and higher prices are not an improbability in the near future. Putty and white lead held unchanged. Some wholesalers are now engaged in stock-taking and until after the holiday season will be largely concerned with activities in that direction. Travelers have been off the road during the week and will not make their rounds until after the New Year. Altogether conditions are normal for this season of the year.

Linseed Oil Holds In Strong Position

Toronto.

LINSEED OIL.—There was a steadiness in the market for linseed oil so far as prices are concerned but a firm undertone was evident in view of the difficulty of getting supplies of seed from the Canadian West. Crushers' stocks of seed are getting low and there appears no prospect of getting deliveries of flaxseed for a week or ten days. This is a situation akin to that which developed last winter. While there are good supplies of seed in the Canadian West the transportation situation is keeping deliveries to Eastern consumers low. Belief is still maintained in well-informed circles that the price of linseed oil is likely to bear upward rather than downward in the months immediately ahead. While the Argentine seed will be available for shipment some time in February it is not yet apparent that it will be brought into the United States. Even should tonnage be available it would be well along toward the latter part of May before supplies would reach this continent from that source. Quotations in the local market were firmly maintained. The increase in freight rates on Canadian railways will increase the cost of seed and thus give additional firmness to the market for linseed oil.

	Raw. Imp. Gal.	Boiled. Imp. Gal.
1 to 2 bbls.	$1.38-$1.48	$1.40½-$1.51
3 to 5 bbls.	1.38- 1.47	1.40½- 1.50
6 to 9 bbls.	1.37- 1.45	1.39½- 1.48

Less than barrel lots 10c per gallon higher than single barrel price.

Plan To Show Merits Of Pure Gum Spirits

Toronto.

TURPENTINE.—There is a movement on foot in the Southern United States to place a small assessment on every barrel of turpentine produced in order to raise a fund for the purpose of placing before the consumers of paint the merits of pure gum spirits of turpentine as compared with mineral oils and gasoline substitutes. The projected plan is to advertise the salient advantages of pure gum spirits of turpentine to the consuming public. In this way it is hoped

A NEW YEAR'S RESOLUTION THAT WILL PLACE MONEY IN THE BANK FOR YOU

Resolve to make "1918" a bigger business year for your store than 1917. There is no more important aid toward the carrying out of this resolution than the B-H line of products. Brandram-Henderson Products have proven a source of satisfaction to Brandram-Henderson Dealers because they give satisfaction to every B-H user. They are guaranteed 100% Pure. B-H Dealers have found that this guarantee means not only satisfied customers but a steadily-growing patronage from people particular about paint.

Every known assistance is given to make B-H goods easy to sell. In 1918, the B-H advertising will have greater strength and greater effectiveness even than that which you have known and admired as the strongest paint publicity in Canada. The co-operation given will know no limit. This is *our* New Year's Resolution.

Make yours. Decide now that your Paint Department is to increase your bank account. We know it will if you stock the B-H Line.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

If interested, tear out this page and keep with letters to be answered.

the consumption of turpentine may be increased. Should this take place it is possible that some of the surplus turpentine held on this continent might disappear through more extended use. There was a steady situation in the local turpentine market during the week and the range of quotations was from 70c to 71½c in single barrel lots. In the primary market at Savannah there was a net decline of 1c per gallon during the week. Stocks of turpentine in the local market are light but demand is correspondingly light, which is to be expected at this season of the year.

	Imp. gal.
1 barrel	$0.70-$0.71½
2 to 4 barrels	0.69- 0.70½
5 gallon lots	0.77- 0.78½

May Reduce Number Of Colors And Certain Sizes

Toronto.

MIXED PAINTS.—With the holiday season and stock-taking the centre of interest there is naturally a seasonable quietness in paint circles during the closing days of the old year. Travelers will start on the road again shortly after the opening of the New Year and there will then be an uninterrupted period for booking spring business. Already the amount of business placed on the books by manufacturers has been very satisfactory for this time of the year.

There is a movement on foot among Canadian paint manufacturers to conserve supplies of containers by doing away with the half-gallon and half-pint size tins. It is pointed out that probably hundreds of thousands pounds of tin could be conserved through curtailment of these sizes. A movement along similar lines is under way in the United States. Intimations are made also that there may be a reduction in the number of colors manufactured. This is considered a way in which considerable capital that is tied up in stocks could be released for other purposes. Some manufacturers are already making shipments against spring orders. One manufacturer states their booking for November was 25 per cent. heavier than in November of last year and looks forward with satisfaction to the coming year. The firm in question has already booked enough orders to keep their plant running for the first three months of the coming year.

White Lead In Oil Still Marking Time

Toronto.

WHITE LEAD IN OIL.—Conditions in the white lead in oil market held unchanged during the week. There was a firmer undertone to the pig lead market at primary points but there was no material change in prices. Linseed oil held in firm position with the belief expressed in some well-informed circles that prices are likely to bear steadily toward strength. This belief is based on the probability that flaxseed from the Argentine will not reach the United States market in time to relieve the situation on this continent. With continued firmness in these two basic materials white lead in oil seems destined to maintain a firm position. Quotations were made on the basis of $16.20 per hundred pounds in ton lots and $16.55 per hundred pounds in less than ton lots.

Glass Market Still In Strong Position

Toronto.

GLASS, PUTTY.—There is a continued strong situation in the glass market and intimations were again made in some quarters that an advance was highly probable in the near future. The fuel situation in the United States has brought about a condition that has almost entirely shut off the source of supply. Furthermore, stocks of glass in the United States are reported to be very light. Canadian dealers also state their supplies are not heavy as a drain was caused through the demand due to the Halifax catastrophe. Quotations were made on the basis of 40 and 10 per cent. off list on box glass and 33 1/3 per cent. on cut lights.

Putty held unchanged on the basis of $3.80 for bulk in casks, $4.55 to $4.65 for 100-lb. drums and $4.65 for 25-lb. and 50-lb. drums. Bladder putty in barrels was quoted at $4.90 per hundred pounds. Pure putty is quoted on the basis of $1.25 per hundred pounds higher than standard putty.

TOOLS AND THE MEN

There was a flutter among dealers in small tools when it became known a few days ago that the Ministry of Munitions meant to put a stop to the scandalous speculation that has been rife for some time past, and that with this end in view new regulations are to be enforced as from November 15, restricting the importation of small tools except under a special license, the form of which has not yet been made public, says the "Ironmonger," England.

The articles to be scheduled include the following engineers' and machinists' small tools. Some of the goods specified are used by woodworking machinists:

Abrasive wheels
Adjustable clamps, iron, steel or wood
Auger bits
Bandsaws
Boring heads
Callipers
Chasers
Chucks
Circular saws for wood-cutting machines
Dia. gauges
Dies and die stocks
Die heads
Drill sleeves
Drill sockets
Emery-wheel dressers
Expanding mandrels
Expansion bits
Files
Furniture and dove-tail bits
Gauges
Hacksaw blades
Hand and breast drills
Hand grinders
Hide hammers
Lathe carriers
Lathe dogs
Lead hammers
Machine vices
Micrometers
Milling cutters
Pipe cutters
Pipe vices
Pipe wrenches
Pliers
Punches
Reamers
Swage shapers
Screwing tackle (i.e., chasers, dies and stocks)
Taps and thread milling cutters
Tapping attachments
Tool wrenches
Tool holders
Tube expanders
Verniers and rules and measuring tapes
Wood-boring bits

It is understood that the scheme in its entirety will comprise provisions for limiting the profits of the importers and dealers. It is alleged that there has been a regular speculative profiteering traffic in such tools, and in many instances the goods are said to have changed hands over and over again before reaching the user, and, as every intermediary puts on a profit, prices have risen out of all proportion to the original value of the tools.

We believe there is need for drastic intervention of some sort. It is common knowledge in the trade that there has sprung up in London, and probably in other populous centres, a new type of "carpet bagger," who, operating from a small office with a wallet distended by bank notes, waits on unwary stockholders of small tools and drives a "cash-on-the-nail" bargain. Having secured the goods, he proceeds to release them as, and when, buyers urgently in need of his stock meet his ideas of remuneration for national services thus rendered. It is stated that some of these gentry are evading military service by claiming to be "in the tool trade," and that many of them are German Jews or other undesirable aliens.

FOEMAN OR FRIEND

I read that a human skeleton, together with an iron sword and two iron spears, have been unearthed in the course of some excavations at Horncastle in Lincolnshire. The skeleton is supposed to be that of a native of the district now known as Schleswig, a so-called Anglo-Saxon, and (says the report) "it may therefore be said to relate to an early German invasion of Lincolnshire." I think that to call the interesting stranger whose rest has thus been disturbed a German is a cruel libel on what was presumably quite a respectable, if rather primitive, Englishman. He and his fellows were Angles, and although to the iron merchant that term may suggest sinister association with U-shapes, the Angles were born and bred in Schleswig, which many centuries later was torn from Denmark against the wishes of its people. The Angles had no connection whatsoever with the forebears of the modern Prussians, who were square-headed Mongols from Central Asia. It is therefore fair to the deceased gentleman to assume that if, instead of promptly digging himself in after landing here and allowing the trench to fall in upon him, he had kept awake and settled in Lincolnshire, his descendants would now be fighting in the British ranks, while, if he had remained in his native country, they would have been ardent anti-Prussians. Moreover, his armament was made up of straightforward weapons: the sword is 33 in. long, 1¾ in. wide, tapered at the top, and double-edged. The spears are socketed, and the larger one (a lozenge-shaped thing 10¾ in. long and 1¾ in. wide at its broadest part) still has the rivets that held the shaft. Nothing like the remains of a prehistoric bomb or poison-gas cylinder, or the skeleton of a slain baby, was found near. Our friend, therefore, is clearly not a Hun, and he leaves his diggings without a stain on his character.

From The *Ironmonger*, England.

Mr. Manufacturer, We Get Results in the West

This organization includes a bunch of live salesmen who are calling regularly on both the wholesale and retail trade throughout Western Canada. We are getting good business for our clients because we know our field thoroughly and cover it often. If yours is a good line we certainly can get business for you. Get in touch with us.

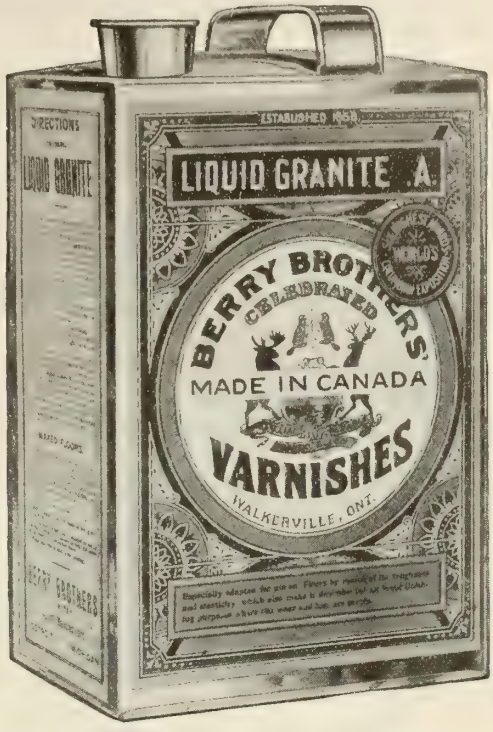
Salesmen Wanted

Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.



THE great demand for Berry Brothers' Varnishes and Enamels grows greater as consumers realize their economy. They not only produce the most beautiful interiors, but their lasting quality offsets the high cost of labor.

Most buyers realize that labor is the chief item of expense in finishing operations. Those who do not, will thank you for reminding them, as it costs no more to apply "Berry" Finishes that last for many years than the kind that wears out the first year. The difference in the price per gallon is nominal.

Liquid Granite Floor Varnish, Luxeberry Enamels (White, Ivory and three shades of Gray), Luxeberry Wood Finish and Luxeberry Wall Finishes are a few among the many "Berry" products it pays to push because they make permanent customers.

Big Market for Brushes

Will you let us say to you that there is a much larger market in every community than is generally perceived. We make a hundred or more different kinds of brushes. For example, there are **Meakins Brushes** for horse stables and carriage cleaning, for garages and automobile needs, for butchers, barmen, stove-makers; for walls, radiators, floors, bannisters, cornices; for kitchens, parlors, schools; for cream separators, gun barrels, bottles.

We do not suggest that you carry stocks or even a sample of every variety of brush, but we do suggest that you have our catalogue and familiarize yourself with our various brushes in order to be able to suggest the right brush to the right person for the right need.

Sell from our Catalogue—Just a last word: Meakins Brushes are good brushes—and our catalogue will tell you why. Our catalogue is valuable. Have you a copy?

Farmers Are Planning for a Big Crop in 1918

They must make their farm produce the maximum crop, for they are going to get high prices for everything they sell. No field can go uncropped in 1918 simply for the want of a fence. They must buy fence —the fence they should have bought two or three years ago, but which they said they would not buy at the high price. They would wait until the price dropped. But they are not going to—they have their eyes open now. No, we didn't do it. We do not pretend to possess the necessary power to open a farmer's eyes—much less his pocket-book. But the farmer has become educated to the higher prices — mostly from hearing the higher price for what he has to sell rather than the price he has to pay for what he buys. He is going after a big crop for 1918 and must have fencing. It is a necessity, not a luxury. A farm is useless without it.

Are You Prepared

to supply the farmers in your section with their fencing requirements in 1918? They look to you as their local hardware dealer to supply them with fencing. Here's your chance to strengthen your connection with the farmers—your customers. Show mail order houses in the Spring that you realize the importance of fencing to the farmer as well as they do. "Ideal" Fence will satisfy every farmer. You want satisfied customers—repeat orders—more profits. There is only one way for the farmer to buy "Ideal" Fence. That is through the dealer. Prepare now for the big fencing season in the Spring. Write us for the "Ideal" Fencing proposition.

RAMSAY'S PAINTS

There is no paint so certain to give satisfactory results to the user as Ramsay's. Likewise there is no proposition so certain to prove profitable to the dealer.

Convinced that Ramsay's Paint is the best from every standpoint, we are going to use this space each week to tell something about our line so that those who care to do so may read.

No dealer ever regretted his action in linking up with the Ramsay line.

Get Them Thinking about Spring Painting

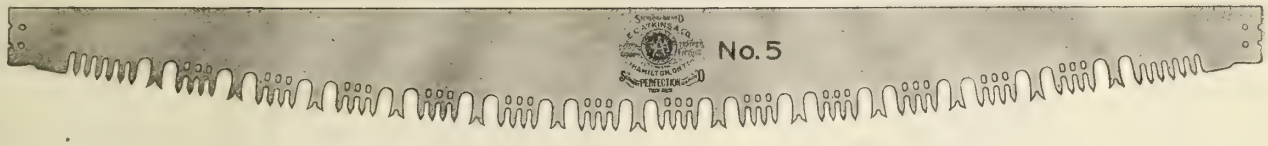
Forestall spring and your competitors. Don't wait until the snow begins to leave, but start in right now to "educate" your paint trade for spring. Keep *Moore's House Colors* well displayed where all can see. Implant the spring painting idea so firmly in the minds of your customers that when the weather does open up sales will come naturally and easily.

Start now—and keep it up. You'll be well rewarded.

Benjamin Moore & Co., Limited, West Toronto

ATKINS

Sterling Quality Cross-Cut Saws



The Saw that brings a *higher price*—a *bigger profit.* Their Service makes them worth it.

Sterling quality steel backed by sixty years' experience has produced these popular Saws. Get quotations and resale prices immediately. *Ask for catalog "H.M."*

Made in Canada.

E. C. ATKINS & CO.

MacLean's Magazine

for JANUARY

Chasing the Submarine—by a Canadian

A CANADIAN, whose name is withheld, in the Motor Boat Patrol Service in the North Sea, tells in the January MacLean's the story of the work and life and triumphs of the Service to which he is attached. It is a fine performance by MacLean's to get this story for the Canadian people. Successes of this sort have made MacLean's go far forward in public favor during past months.

If the horrid and terrible submarine warfare and the conquest of this pest of the deep interest you, learn more about submarines and their capturing in the January MACLEAN'S, and pass on to others the news of this unsigned contribution.

Ships—more ships—and yet more ships

THIS is a very strong article which Miss Agnes C. Laut contributes. As usual she is very well informed. Regarding the duration of the war she voices American opinion when she says that it is likely to be long drawn-out. The United States people are buckling down to a stern struggle. At this time we want very much to read what well-informed, virile thinkers and writers have to say about the war, since things are not any too bright in certain directions. Miss Laut has a good deal to say about the shipping programme of the United States, and certainly she gives facts and sets us thinking as few writers do.

"Jim" by Robert W. Service

A POEM by this strong poet—a poem wrought amid the smoke and hell of battle, yet fanciful and tender. One wonders how men can write fanciful verse amid surroundings that seem so adverse to thinking and writing, yet some gifted can detach themselves and let fancy play; or is it that their minds see through the real and horrible—through the immediate environment into inner things? Whatever it may be, we ought to be glad for the verse that men like Service give us, remembering how and where it is produced.

Adam and Arthur William Brown, Brothers

ADAM BROWN is a Canadian short story writer of large promise. His brother, Arthur William, is one of New York's foremost illustrators. Both brothers have joined their gifts to make Hannibal Helps a mighty good feature of the January MACLEAN'S.

A New Serial by Alan Sullivan

ALAN SULLIVAN'S recent novel, The Inner Door, is being well received. Perhaps we have no better novelist of his type in Canada to-day. He writes books that show introspection and fine analysis. This serial, The Magic Makers, adds venture and mystery to psychological study, and is a rare good thing. Arthur Heming illustrates the story, which begins in Scotland and is transferred to Canada where the stage is set.

The Regular Departments of MacLean's

REVIEW of Reviews, Women at Work, The Business Outlook—are present in goodly measure. Oppenheim's The Pawns Count, Trench Pictures, and first-class illustrations by artists of note help to make the January MACLEAN'S good value for money.

At All News Stands, 20c.

HOYT METALS

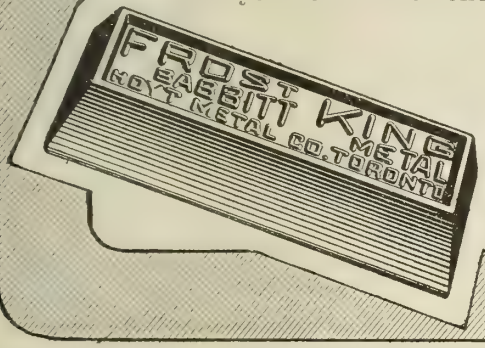
MEMO
December 29th

for your Babbitt Metal file

WHEREVER BABBITT METAL IS USED

the most satisfaction can be derived from using "Nickel Genuine," "Trojan" or "Frost King." These are the lines which have made Hoyt metals famous for durability and all-round satisfaction. For any kind of engine or machine work always recommend one of these Hoyt metals and thereby guarantee to your customers freedom from babbitt troubles.

There are other good Hoyt metals which you could profitably handle, including Bar and Wire Solder, Lead Pipe, Sheets, etc. Ask us about them.



Write for our price list.

Mr. Hardwareman

Have you ever considered the advantages of advertising your wants in HARDWARE AND METAL? One of the most important of these is the fact that there is no waste circulation. HARDWARE AND METAL goes only to the people who are directly interested in the trade. We have offices in Montreal, Toronto, and Winnipeg. If you like you can have a box number in care of either one of these offices, whichever is nearest to you. We will then notify our representative there and he will promptly forward any replies which may come in answer to your ad. Remember, Thursday noon is the latest for receiving want ads for the current issue.

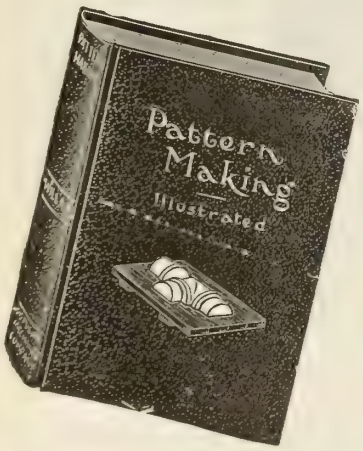
Greetings to the Hardware Trade of Canada

WE wish to thank our customers for their valued patronage during the year just passed, and to extend to them, as well as to the entire Hardware Trade of Canada, our sincere wishes for a Happy and Prosperous Nineteen-Eighteen.

Lyons & Marks, 38 Yonge St., **Toronto**



Two Significant Opinions:

"I think the book is the best I ever saw for the price." Edwin Sluyter, Construction Engineer, Burroughs Adding Machine Co., Detroit.

"I consider this is a valuable book and should be in the hands of all men engaged in this line of business." E. W. Clarke, Wilmington Malleable Iron Co., Wilmington, Delaware.

A Valuable Book on an Important Trade

PATTERN-MAKING—By G. H. Willard

A book for the man who does the work. Written by a practical patternmaker of many years' experience. Gets right down to business in the first chapter and keeps it up throughout the book. Full of kinks and actual working information. Profusely illustrated.

Written So You Can Understand It

Deals with the practical experience of foundry work; tools required; woods adapted for the work; turning and all kinds of patterns.

Contains additional chapters on core-making and molding.

A big cloth-bound book of 224 pages with 312 illustrations.

Price, postpaid, $1.00.

The MacLean Publishing Co., Limited

A Happy New Year to You

May all your dreams come true in 1918. May you have absolutely the best year in your history. May you have so much good business that you'll forget you ever had any troubles. May you make so many sales of that good

North Star Multiple Battery

that you'll have us working nights to keep you supplied.

Honestly, we feel sure that if you just give those good unit batteries prominence in your displays this year you'll be amply rewarded in sales and profits. The North Star Multiple fills a growing need for a compact, easily handled, quickly attached battery, specially adapted for lighting and ignition service. Made in several sizes to give various voltages and capacities.

Don't forget to say "North Star" to your jobber.

CANADA DRY CELLS, LIMITED, WINNIPEG, MAN.

Johns-Manville Fire Extinguisher

Every Dealer should stock this Quick-Selling Accessory

THE steady growth in sales volume proves that the market for Johns-Manville Fire Extinguishers is practically unlimited. This is an accessory you can sell, and sell fast—and the whole machinery of the Johns-Manville organization will back up your sales efforts.

Our sales policy provides you with profit protection, too. The Johns-Manville Fire Extinguisher is distributed only through jobber-dealer trade channels on a liberal basis. Remember that the Johns-Manville Fire Extinguisher is nationally advertised, and is in demand not only for automobiles, but for motor boats, factories, public buildings, and private homes. Let us send you the details of our dealer proposition—you'll want to add the Johns-Manville to your accessory stock. Ask your jobber about it.

The Johns-Manville Fire Extinguisher has been approved by the Canadian Underwriters' Association. This entitles motorists who carry the Johns-Manville to a 15% reduction from all insurance companies in the Dominion who are members of this association.

Wanted

SITUATIONS VACANT

FIRST-CLASS HARDWARE MAN—ACCOUNT our location applicant must be able to speak German. Good wages for good man. Box 507, Hardware and Metal.

WANTED—A THOROUGHLY COMPETENT pattern fitter who is accustomed to fitting stove patterns. Highest wages and permanent employment to the right man. Apply to the Enterprise Foundry Co., Sackville, N.B.

TRAVELLING SALESMAN TO CARRY FULL line of high-grade cutlery on commission basis. Must have established connection with hardware trade. Applicants will require to state experience, territory, and what other lines they carry. Apply Box 114, Montreal Star Office, Bay Street, Toronto.

SITUATIONS WANTED

HARDWARE TRAVELLER IS OPEN FOR AN engagement, having several years' experience in the line, with first-class references, or would like to take up agencies for the City of Montreal and Province of Quebec. Box 508, Hardware and Metal.

FOR SALE

FOR SALE—BUILDING AND STOCK OF THE Fraser Hardware Co., 1043 Granville Street, Vancouver, B.C.; good terms can be arranged; stock amounts to about $15,000. Fraser Hardware Co.

MISCELLANEOUS

STOVE REPAIRS FOR ACMES, CROWN Hurons, Jewels, Garlands, Pen Esther, Colonials, Peninsulars, and all kinds of stoves. Write for list and prices. Grundy Bros., Strathroy.

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Toronto.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms is to tell the manufacturers who read Hardware and Metal, all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

MISCELLANEOUS

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

FIFTY DOLLARS TIED UP IN OLD FIXtures that you are no longer using would make a lot of money for you if invested in stock and turned over three or four times a year. Get your money out, by selling the fixtures to one of Hardware and Metal's readers who may be looking for exactly what you have to offer.

SALESMEN WANTED—LIVE WIRES CALLing on hardware and automobile dealers, garages, department, drug, racket and general stores, premium and advertising novelty users, etc., to sell ten-cent necessity. Article sells at sight. Splendid side-line. Liberal commission. State experience, lines handled and territory covered. Marshalltown Tool Works, Marshalltown, Iowa.

For Quick Sales

Recently a hardware dealer in Western Canada became overstocked with shotguns. He placed a want ad. in Hardware & Metal. We learned eventually that he not only disposed of his stock, but received several orders that he could not fill. If this man had kept this stock away, it would not only have deteriorated in value, but he would have had to pay taxes, insurance, etc. on it. If you have anything on hand which you wish to dispose of quickly advertise it in our want column. The quick results will make the first cost negligible.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

DREADNOUGHT TRUSS ROD

Whiffletrees, Neckyokes, Eveners and Four Horse Hitches

They are built for the heaviest kind of work. The wood is clear, straight-grained stock of the toughest fibre. It is reinforced by our patented steel Truss Rod, which takes the overload and allows the wood to spring—no sore shoulders. Write for prices.
